In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to Section 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with Section 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the Borough Building, 20 Pennsylvania Avenue, Mill Hall, Pennsylvania.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width in feet from bank of stream to 100-yr flood boundary facing downstream	
			Left	Right
Fishing Creek	Southern Corporate Limit	596	120	(1)
	Upstream of Main St. Bridge	586	20	540
	Upstream of Church St. Bridge	584	10	930
	Upstream of abandoned Penn Central R.R. Bridge.	579	520	1,300
	Upstream of Penn Central R.R. bridge	576	1,400	(1)
	Northern corporate limit	568	280	(1)

[1] To corporate limit.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: August 10, 1976.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

[Docket No. FI-946]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the Borough of Mountainside, New Jersey

The Federal Insurance Administrator, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (P.L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (P.L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (Section 1917.10)), hereby gives notice of the final determinations of flood elevations for the Borough of Mountainside, New Jersey under Section 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the Borough must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to Section 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with Section 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at Borough Hall, Route 22, Mountainside, New Jersey 07092.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one percent chance of annual occurrence) flood elevations as set forth below:

V 41 164 AUG 23 76 UMI

Source of flooding	Location	Elevation in feet above mean sea level	Width from shoreline or bank of stream (facing down-stream) to 100-yr flood boundary (feet)	
			Right	Left
Branch 7, Nomahegan Brook.	Force Dr.	174.7	37.5	37.5
Branch 3, Nomahegan Brook.	Stoney Brook Lane	209.0	25.0	37.5
	Hickory Lane	190.0	37.5	35.0
	Indian Trail	179.5	50.0	50.0

[Docket No. FI-970]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the Borough of New Cumberland, Cumberland County, Pennsylvania

The Federal Insurance Administrator, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (P.L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (P.L. 90-448), 42 U.S.C. 4001-4128, and 24 CRF Part 1917 (Section 1917.10)), hereby gives notice of his final determinations of flood elevations for the Borough of New Cumberland, Cumberland County, Pennsylvania under Section 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the Borough must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to Section 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with Section 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the Bulletin Board, Town Hall Lobby, 7th and Reno Streets, New Cumberland, Pennsylvania.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width in feet from bank of stream to 100-yr flood boundary facing downstream	
			Left	Right
Susquehanna River	2d St. (extended)	313	(1)	1,000

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the Borough of Oceanport, New Jersey

The Federal Insurance Administrator, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (P.L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (P.L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (Section 1917.-10)), hereby gives notice of the final determinations of flood elevations for the Borough of Oceanport, New Jersey under Section 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the Borough must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to Section 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with Section 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at Borough Hall, Oceanport, New Jersey 07757.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width from shoreline or bank of stream (facing downstream) to 100-yr flood boundary (feet)	
			Right	Left
Turtle Mill Brook	Myrtle Ave. extended	9	(1)	670
	Oceanport Ave	10	(1)	210
	Eatontown Blvd	11	(1)	700

elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to Section 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with Section 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the Bulletin Board in the Meeting Room of the Town Hall, 41 Cherry Street, West Fairview, Pennsylvania.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width in feet from bank of stream to 100-yr flood boundary facing downstream	
			Left	Right
Susquehanna River	North corporate limits	322		90
	South St. extended	321		400
Conodoguinet Creek	West corporate limits	321	180	
	Penn Central RR	321	480	

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: August 10, 1976.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

[Docket No. FI-1032]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the City of Delaware City, Delaware

The Federal Insurance Administrator, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (P.L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (P.L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (Section 1917.10)), hereby gives notice of the final determinations of flood elevations for City of Delaware City, Delaware under Section 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the City must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to Section 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with Section 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at Town Hall, 407 Clinton Street, Delaware City, Delaware 19706.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width—distance in feet NE. from 2d St.
Delaware River	Jefferson St	9.0	650
	Washington St	9.0	575
			Distance in feet NE. from 4th St.
Delaware River	Hamilton St	9.0	950
	5th St	9.0	(1)

[1] Approximate distance in feet from bank of Delaware City Branch Channel to boundary of 100-yr flood.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the City of Paterson, New Jersey

The Federal Insurance Administrator, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (P.L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (P.L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (Section 1917.10)), hereby gives notice of the final determinations of flood elevations for the City of Paterson, New Jersey under Section 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the City must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to Section 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with Section 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at City Hall, 155 Market Street, Paterson, New Jersey 07505.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width from shoreline or bank of stream (facing downstream) to 100-yr flood boundary (feet)	
			Right	Left
Passaic River	West Broadway St	49	95	40
	6th Ave	45	225	(1)
	Broadway St	37	150	(1)
	Bergen Passaic Expressway	34	140	(1)
Molly Ams Brook	Redwood Ave	135	25	50
	Preakness Ave	127	520	20
	Union Ave	125	35	20
Slippery Rock Brook	Danforth Ave	155	25	100
	Murray Ave	129	25	35

[1] To corporate limits.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the Village of Sea Ranch Lakes, Florida

The Federal Insurance Administrator, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (P.L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (P.L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (Section 1917.10)), hereby gives notice of the final determinations of flood elevations for the Village of Sea Ranch Lakes, Florida under Section 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the Village must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to Section 1917.8, no appeals were received from the Community or from individuals within the community. Therefore, publication of this notice is in compliance with Section 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at Village Hall, 1 Gatehouse Road, Sea Ranch Lakes, Florida 33308.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width from shoreline or bank of stream (facing downstream) to 100-yr flood boundary (feet)	
			Right	Left
Intercoastal Waterway	Seneca Rd	6	Entire road around lake except the stretch extending 400 ft north of eastern intersection with Gate House Rd.	
	Saranac Rd	6	Section extending 250 ft north of intersection with Minnetonka Rd.	
	Winona Lane	6	Section extending 130 ft from intersection with Cayuga Rd.	
Intercoastal Waterway	Minnetonka Rd	6	Section extending 140 ft south from eastern intersection with Cayuga Rd.	
	Chippewa Lane	6	Section extending 50 ft east from intersection with Cayuga Rd.	

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: August 10, 1976.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the Township of Neptune, New Jersey

The Federal Insurance Administrator, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (P.L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (P.L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (Section 1917.10)), hereby gives notice of the final determinations of flood elevations for the Township of Neptune, New Jersey under Section 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the Township must adopt flood plain man-

agement measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to Section 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with Section 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at Town Hall, 25 Neptune Boulevard, Neptune, New Jersey 07753.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width from shoreline or bank of stream (facing downstream) to 100-yr flood boundary (feet)	
			Right	Left
Jumping Brook	State Highway 66	72	100	100

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the Township of Wall, New Jersey

The Federal Insurance Administrator, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (P.L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (P.L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (Section 1917.10)), hereby gives notice of the final determinations of flood elevations for the Township of Wall, New Jersey under Section 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the Township must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to Section 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with Section 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at 2500 Municipal Court, Wall, New Jersey 07719.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width from shoreline or bank of stream (facing downstream) to 100-yr flood boundary (feet)	
			Right	Left
Shark River	Route 33	57	40	(1)

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the Town of Yaupon Beach, North Carolina

The Federal Insurance Administrator, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (P.L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (P.L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (Section 1917.10)), hereby gives notice of the final determinations of flood elevations for the Town of Yaupon Beach, North Carolina under Section 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the Town must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to Section 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with Section 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at Town Hall, 518 Yaupon Drive, Yaupon Beach, North Carolina 28461.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width from shoreline or bank of stream (facing downstream) to 100-yr flood boundary (feet)	
			Right	Left
Atlantic Ocean	Corwell St	14.0	500	(1)
	Barbee Blvd	14.0	360	(1)
	Keziah St	14.0	410	(1)
	Norton St	14.0	155	(1)
	Sellers St	14.0	65	(2)
	McGlamery St	14.0	320	(1)
Elizabeth River Estuary	N.C. 133	13.0	140	
	McGlamery St	13.0	230	
	Keziah St	13.0	260	(3)

[1] Distance from intersection of Ocean Dr. to northern boundary of 100-yr flood.
[2] Distance from intersection of Ocean Dr. south, to boundary of 100-yr flood boundary.
[3] Distance from intersection with Elizabeth Dr. to boundary of 100-yr flood.

Title 26—Internal Revenue

CHAPTER I—INTERNAL REVENUE SERVICE, DEPARTMENT OF THE TREASURY

[T.D. 7429]

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

PART 20—ESTATE TAX; ESTATES OF DECEDENTS DYING AFTER AUGUST 16, 1954

PART 25—GIFT TAX; GIFTS MADE AFTER DECEMBER 31, 1954

PART 301—PROCEDURE AND ADMINISTRATION

Priority of Lien; Release of Lien or Discharge of Property

PREAMBLE

On January 4, 1973, a notice of proposed rulemaking to conform the Income Tax Regulations (26 CFR Part 1), the Estate Tax Regulations (26 CFR Part 20), the Gift Tax Regulations (26 CFR Part 25), and the Regulations on Procedure and Administration (26 CFR Part 301) under sections 545, 6323, and 6325 of the Internal Revenue Code of 1954 (relating to priority of lien and release of lien or discharge of property) to changes made by section 236 of the Revenue Act of 1964 (78 Stat. 127), section 17(a) of Public Law 89–493 (80 Stat. 263), and sections 101 and 103 of the Federal Tax Lien Act of 1966 (80 Stat. 1125 and 1133) was published in the FEDERAL REGISTER (38 FR 776).

Section 6323 generally relates to the validity and priority of a Federal tax lien against certain persons. Section 301.6323 (b)–1 (d) of the proposed regulations provided that a previously filed notice of tax lien is not valid against a purchaser who buys (for less than $250 and not for resale) household goods, personal effects or certain other tangible personal property in a casual sale, provided the purchaser does not have actual notice or knowledge of (A) the existence of a tax lien, or (B) that the sale is one of a series of sales.

No definitive rule was developed in the proposed regulations to determine, under all circumstances, when a purchaser would be considered to have notice or knowledge that the sale was one of a series of sales. However, example (3) of proposed § 301.6323 (b)–1 (d) illustrated a situation where a purchaser would be considered to have such notice. In this example the seller advertised the sale of substantially all his household property. In response to the advertisement the buyer purchased the seller's dining room furniture for $200. The purchase occurred after a notice of tax lien was filed. The example concluded that because such an advertisement contemplated a series of sales to dispose of substantially all the seller's household articles, the purchaser had notice that the sale was one of a series of sales and, consequently, purchased the dining room furniture subject to the tax lien.

After reconsideration, it was concluded that whether a particular purchaser would be considered to have such actual notice or knowledge would depend upon that purchaser's background and experience. Consequently, example (3) of proposed § 301.6323 (b)–1 (d) is not contained in the final regulations.

Section 301.6323(c)–1 (b) and (d) of the proposed regulations have been revised. Section 301.6323(c)–1(b) contained a definition of the term "commercial transactions financing agreement" for purposes of the priority rules of section 6323(c). In addition to other requirements relating to such agreements, protection of a security interest in "qualified property" against a tax lien is provided only with respect to advances made under such an agreement before the 46th day after the date of tax lien filing or, if earlier, the time when the lender or purchaser has actual notice or knowledge of tax lien filing. Section 6323(c)(2)(B) provides that "qualified property" under a commercial transactions financing agreement includes only property acquired by the debtor-taxpayer before the 46th day after the date of tax lien filing. Thus, there are two 45-day rules relating to commercial transactions financing agreements, i.e., one relating to the period during which advances must be made by the creditor or purchaser and another relating to the period during which the property or collateral must be acquired by the debtor-taxpayer. The acquisition of notice or knowledge of the tax lien by the creditor shortens one of the periods (the one relating to advances) but not the other (the one relating to the acquisition of the collateral). Proposed § 301.6323(c)–1(b) had contained both the 45-day rules. In the interest of clarification, § 301.6323(c)–(1) (b) and (d) have been revised so that the 45-day rule relating to advances appears in § 301.6323(c)–1 (b) of the final regulations (relating to commercial transactions financing agreement) and the 45-day rule relating to the acquisition of the collateral appears in § 301.6323(c)–1(d) of the final regulations (relating to qualified property).

Sections 301.6323(c)–1(d) and 301.6323 (d)–1(a) of the proposed regulations have been revised to reflect a change of position with respect to the acquisition of contract rights.

The proposed regulations provided that contract rights are considered to be "acquired" when, and to the extent that, a right to payment is earned by performance. This position was taken in proposed § 301.6323(c)–1(d), relating to the specific protection provided a security interest in qualified property under a commerical transactions financing agreement, and § 301.6323(d)–1(a), relating to the general protection provided with respect to advances made after tax lien filing under an agreement entered into before such filing. However, after considering comments received from the public, the final regulations have been revised to provide that: for purposes of § 301.6323(c)–1(b), a contract right is acquired by the taxpayer when the contract is made; for purposes of § 301.6323(d)–1(a), a contract right is subject to the lien imposed by section 6321 if the contract has been made by the time of tax lien filing; and that, for purposes of § 301.6323(h)–1(a) (relating to the definition of a security interest) a contract right is in existence when the contract is made.

Section 301.6323 (c)–1 (d) of the proposed regulations has also been revised to reflect changes in local law. In the proposed regulations, § 301.6323 (c)–1 (d) provided that an account receivable is acquired by a taxpayer at the time, and to the extent, a right to payment is earned by performance. Because some jurisdictions have adopted a revised definition of an "account", the regulations have been revised to emphasize that the priority of a security interest over a Federal tax lien does not depehd upon local law definitions of the various types of property interests comprising commercial financing security.

Section 301.6323 (g)–1 (b) (2) (ii) of the proposed regulations have been revised to extend a transitional date for sending change of address notices to the Internal Revenue Service. Under the proposed regulations, a change of address notice sent to any office of the Service would be effective, provided such notice was received prior to July 1, 1973. Section 301.6323 (g)–1 (b) (2) (ii) of the final regulations provides that such a notice sent to any office of the Service will be effective, provided that it is received prior to the date this Treasury decision is published in the FEDERAL REGISTER.

ADOPTION OF AMENDMENTS TO THE REGULATIONS

On January 4, 1973, a notice of proposed rule making was published in the FEDERAL REGISTER (38 FR 776) in order to conform the Income Tax Regulations, the Estate Tax Regulations, the Gift Tax Regulations and the Regulations on Procedure and Administration (26 CFR Parts 1, 20, 25, and 301) under sections 545, 6323, and 6325 of the Internal Revenue Code of 1954 to section 236 of the Revenue Act of 1964 (78 Stat. 127), section 17(a) of Public Law 89–493 (80 Stat. 263), and sections 101 and 103 of the Federal Tax Lien Act of 1966 (80 Stat. 1125 and 1133). Section 301.6323 (g)–1 of the regulations hereby adopted supersedes §§ 400.1 and 400.1–1 of this chapter, relating to section 101(a) of the Federal Tax Lien Act of 1966, which were

prescribed by T. D. 6932, approved October 13, 1967 (32 FR 14385). Section 301.6325–1 of the regulations hereby adopted supersedes §§ 400.2 and 400.2–1 of this chapter, relating to section 103 (a) of such Act, which were prescribed by T. D. 6944, approved January 17, 1968 (33 FR 732). After taking into consideration all such relevant matter as was presented by interested persons regarding the rules proposed, the amendment of the regulations as proposed is hereby adopted, subject to the changes set forth below:

Paragraph 1. Paragraph (b) of § 301.6323(a)–1, as set forth in paragraph 7 of the appendix to the notice of proposed rule making, is revised by deleting the word "security" from the last sentence thereof.

Par. 2. Example (3) of § 301.6323(b)–1 (d) (3), as set forth in paragraph 7 of the appendix to the notice of proposed rule making, is deleted and example (4) of such section is renumbered as example (3).

Par. 3. Paragraph (j) (1) of § 301.6323 (b)–1, as set forth in paragraph 7 of the appendix to the notice of proposed rule making, is revised by deleting the reference to paragraph (i) (2) in the first sentence and by inserting a reference to subparagraph (2) in lieu thereof. The third sentence of such paragraph is revised by striking out the phrase "If a passbook loan is made" and inserting in lieu thereof "Even though an original passbook loan is made". As revised, § 301.6323(b)–1(j)(1) reads as follows:

§ 301.6323(b)–1 Protection for certain interests even though notice filed.

* * * * *

(j) *Passbook loans*—(1) *In general.* Even though a notice of a lien imposed by section 6321 is filed in accordance with § 301.6323 (f)–1, the lien is not valid against an institution described in section 581 or 591 to the extent of any loan made by the institution which is secured by a savings deposit, share, or other account evidenced by a passbook (as defined in subparagraph 2 of this paragraph) if the institution has been continuously in possession of the passbook from the time the loan is made. This paragraph applies only to a loan made without actual notice or knowledge (as defined in paragraph (a) of § 301.6323 (i)–1) of the existence of the lien. Even though an original passbook loan is made without actual notice or knowledge of the existence of the lien, this paragraph does not apply to any additional loan made after knowledge of the lien is acquired by the institution even if it continues to retain the passbook from the time the original passbook loan is made.

* * * * *

Par. 4. Section 301.6323 (c)–1, as set forth in paragraph 7 of the appendix to the notice of proposed rule making, is amended by revising paragraphs (b), (c) and (d) of such section. As revised, paragraphs (b), (c) and (d) of § 301.6323 (c)–1 read as follows:

§ 301.6323(c)–1 Protection for commercial transactions financing agreements.

* * * * *

(b) *Commercial transactions financing agreement.* For purposes of this section, the term "commercial transactions financing agreement" means a written agreement entered into by a person in the course of his trade or business—

(1) To make loans to the taxpayer (whether or not at the option of the person agreeing to make such loans) to be secured by commercial financing security acquired by the taxpayer in the ordinary course of his trade or business, or

(2) To purchase commercial financing security, other than inventory, acquired by the taxpayer in the ordinary course of his trade or business.

Such an agreement qualifies as a commercial transactions financing agreement only with respect to loans or purchases made under the agreement before (i) the 46th day after the date of tax lien filing or, (ii) the time when the lender or purchaser has actual notice or knowledge (as defined in paragraph (a) of § 301.6323(i)–1) of the tax lien filing, if earlier. For purposes of this paragraph, a loan or purchase is considered to have been made in the course of the lender's or purchaser's trade or business if such person is in the business of financing commercial transactions (such as a bank or commercial factor) or if the agreement is incidental to the conduct of such person's trade or business. For example, if a manufacturer finances the accounts receivable of one of his customers, he is considered to engage in such financing in the course of his trade or business. The extent of the priority of the lender or purchaser over the tax lien is the amount of his disbursements made before the 46th day after the date the notice of tax lien is filed, or made before the date (before such 46th day) on which the lender or purchaser has actual notice or knowledge of the filing of the notice of the tax lien.

(c) *Commercial financing security*—(1) *In general.* The term "commercial financing security" means—

(i) Paper of a kind ordinarily arising in commercial transactions,

(ii) Accounts receivable (as defined in subparagraph (2) of this paragraph),

(iii) Mortgages on real property, and

(iv) Inventory.

For purposes of this subparagraph, the term "paper of a kind ordinarily arising in commercial transactions" in general includes any written document customarily used in commercial transactions. For example, such written documents include paper giving contract rights (as defined in subparagraph (2) of this paragraph), chattel paper, documents of title to personal property, and negotiable instruments or securities. The term "commercial financing security" does not include general intangibles such as patents or copyrights. A mortgage on real estate (including a deed of trust, contract for sale, and similar instrument) may be commercial financing security if the taxpayer has an interest in the mortgage as a mortgagee or assignee. The term "commercial financing security" does not include a mortgage where the taxpayer is the mortgagor of realty owned by him. For purposes of this subparagraph, the term "inventory" includes raw materials and goods in process as well as property held by the taxpayer primarily for sale to customers in the ordinary course of his trade or business.

(2) *Definitions.* For purposes of §§ 301.6323 (d)–1, 301.6323(h)–1 and this section—

(i) A contract right is any right to payment under a contract not yet earned by performance and not evidenced by an instrument or chattel paper, and

(ii) An account receivable is any right to payment for goods sold or leased or for services rendered which is not evidenced by an instrument or chattel paper.

(d) *Qualified property.* For purposes of paragraph (a) of this section, qualified property consists solely of commercial financing security acquired by the taxpayer-debtor before the 46th day after the date of tax lien filing. Commercial financing security acquired before such day may be qualified property even though it is acquired by the taxpayer after the lender received actual notice or knowledge of the filing of the notice of the tax lien. For example, although the receipt of actual notice or knowledge of the filing of the notice of the tax lien has the effect of ending the period within which protected disbursements may be made to the taxpayer, property which is acquired by the taxpayer after the lender receives actual notice or knowledge of such filing and before such 46th day, which otherwise qualifies as commercial financing security, becomes commercial financing security to which the priority of the lender extends for loans made before he received the actual notice or knowledge. An account receivable (as defined in paragraph (c)(2)(ii) of this section) is acquired by a taxpayer at the time, and to the extent, a right to payment is earned by performance. Chattel paper, documents of title, negotiable instruments, securities, and mortgages on real estate are acquired by a taxpayer when he obtains rights in the paper or mortgage. Inventory is acquired by the taxpayer when title passes to him. A contract right (as defined in paragraph (c)(2)(i) of this section) is acquired by a taxpayer when the contract is made. Identifiable proceeds, which arise from the collection or disposition of qualified property by the taxpayer, are considered to be acquired at the time such qualified property is acquired if the secured party has a continuously perfected security interest in the proceeds under local law. The term "proceeds" includes whatever is received when collateral is sold, exchanged, or collected. For purposes of this paragraph, the term "identifiable proceeds" does not include money, checks and the like which have been commingled with other cash proceeds. Property acquired by the taxpayer after the 45th day following tax lien filing, by the expenditure of proceeds, is not qualified property.

* * * * *

Par. 5. Examples (2) and (3) of § 301.6323 (c)–2 (d), as set forth in paragraph 7 of the appendix to the notice of proposed rule making, are revised to provide appropriate cross references to other provisions of section 6323 and the regulations thereunder. As revised, examples (2) and (3) of § 301.6323 (c)–2 (d) read as follows:

§ 301.6323(c)–2 Protection for real property construction or improvement financing agreements.

* * * * *

(d) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

* * * * *

Example (2). (i) C is awarded a contract for the demolition of several buildings. On March 3, 1969, C enters into a written agreement with D which provides that D will make cash disbursements to finance the demolition and also provides that repayment of the disbursements is secured by any sums due C under the contract. On April 1, 1969, in accordance with § 301.6323 (f)–1, a notice of lien is filed with respect to C's delinquent tax liability. With actual notice of the tax lien, D makes cash disbursements to C on August 1, September 1, and October 1, 1969. Under local law D's security interest in the proceeds of the contract with respect to the disbursements is entitled to priority over a judgment lien arising on April 1, 1969 (the date of tax lien filing) out of an unsecured obligation.

V41I164 AUG 23 76 UMI

(ii) Because D's security interest arose by reason of disbursements made pursuant to a writen agreement, entered into before tax lien filing, to make cash disbursements to finance a contract to demolish real property, and because D's security interest is valid under local law against a judgment lien arising as of the time of tax lien filing out of an unsecured obligation, the tax lien is not valid with respect to D's security interest in the proceeds of the demolition contract.

Example (3). Asume the same facts as in example (2) and, in addition, assume that, as further security for the cash disbursements, the March 3, 1969 agreement also provides for a security interest in all of C's demolition equipment. Because the protection of the security interest arising from the disbursements made after tax lien filing under the agreement is limited under section 6323 (c) (3) to the proceeds of the demolition contract and because, under the circumstances, the security interest in the equipment is not otherwise protected under section 6323, the tax lien will have priority over D's security interest in the equipment.

• • • • •

Par. 6. Paragraph (a) of § 301.6323 (d)–1, as set forth in paragraph 7 of the appendix to the notice of proposed rule making, is revised to read as follows:

§ 301.6323(d)–1 45-day period for making disbursements.

(a) *In general.* Even though a notice of a lien imposed by section 6321 is filed in accordance with § 301.6323(f)–1, the lien is not valid with respect to a security interest which comes into existence, after tax lien filing, by reason of disbursements made before the 46th day after the date of tax lien filing, or if earlier, before the person making the disbursements has actual notice or knowledge of the tax lien filing, but only if the security interest is—

(1) In property which is subject, at the time of tax lien filing, to the lien imposed by section 6321 and which is covered by the terms of a written agreement entered into before tax lien filing, and

(2) Protected under local law against a judgment lien arising, as of the time of tax lien filing, out of an unsecured obligation.

For purposes of subparagraph (1) of this paragraph, a contract right (as defined in paragraph (c)(2)(i) of § 301.6323 (c)–1) is subject, at the time of tax lien filing, to the lien imposed by section 6321 if the contract has been made by such time. An account receivable (as defined in paragraph (c)(2)(ii) of § 301.6323 (c)–1) is subject, at the time of tax lien filing, to the lien imposed by section 6321 if, and to the extent, a right to payment has been earned by performance at such time. For purposes of subparagraph (2) of this paragraph, a judgment lien is a lien held by a judgment lien creditor as defined in paragraph (g) of § 301.6323 (h)–1. For purposes of this section, it is immaterial that the written agreement provides that the disbursements are to be made at the option of the person making the disbursements. See paragraphs (a) and (e) of § 301.6323 (h)–1 for definitions of the terms "security interest" and "tax lien filing", respectively. See paragraph (a) of § 301.6323 (i)–1 for certain circumstances under which a person is deemed to have actual notice or knowledge of a fact.

• • • • •

Par. 7. Section 301.6323 (f)–1, as set forth in paragraph 7 of the appendix to the notice of proposed rule making, is changed by revising so much of paragraph (a) as precedes subparagraph (1) to read as follows:

§ 301.6323(f)–1 Place for filing notice; form.

(a) *Place for filing.* The notice of lien referred to in § 301.6323 (a)–1 shall be filed as follows:

• • • • •

Par. 8. Subdivisions (i) and (ii) of § 301.6323 (g)–1 (b) (2), as set forth in paragraph 7 of the appendix to the notice of proposed rule making, are revised to read as follows:

§ 301.6323(g)–1 Refiling of notice of tax lien.

• • • • •

(b) *Place for refiling notice of lien* • • •

(2) *Notice of change of taxpayer's residence*—(i) *In general.* Except as provided in subdivision (ii) or (iii) of this subparagraph, for purposes of this section, a notice of change of a taxpayer's residence will be effective only if it (A) is received, in writing, from the taxpayer or his representative by the district director or the service center director having jurisdiction where the original notice of lien was filed, (B) relates to an unpaid tax liability of the taxpayer, and (C) states the taxpayer's name and the address of his new residence. Although it is not necessary that a written notice contain the taxpayer's identifying number authorized by section 6109, it is preferable that it include such number. For purposes of this subdivision, a notice of change of a taxpayer's residence shown on a return or an amended return (including a return of the same tax) will not be effective to notify the Internal Revenue Service.

(ii) *Notice received before August 23, 1976.* For purposes of this section, a notice of a change of a taxpayer's residence will also be effective if it (A) is received, in writing, by any office of the Internal Revenue Service before August 23, 1976, from the taxpayer or his representative, (B) relates to an unpaid tax liability of the taxpayer, and (C) states the taxpayer's name and the address of his new residence.

• • • • •

Par. 9. Paragraph (a)(1) of § 301.6323 (h)–1, as set forth in paragraph 7 of the appendix to the notice of proposed rule making, is revised to read as follows:

§ 301.6323(h)–1 Definitions.

(a) *Security interests*—(1) *In general.* The term "security interest" means any interest in property acquired by contract for the purpose of securing payment or performance of an obligation or indemnifying against loss or liability. A security interest exists at any time—

(i) If, at such time, the property is in existence and the interest has become protected under local law against a subsequent judgment lien (as provided in subparagraph (2) of this paragraph) arising out of an unsecured obligation; and

(ii) To the extent that, at such time, the holder has parted with money or money's worth (as defined in subparagraph (3) of this paragraph).

For purposes of this subparagraph, a contract right (as defined in paragraph (c)(2)(i) of § 301.6323(c)–1) is in existence when the contract is made. An account receivable (as defined in paragraph (c)(2)(ii) of § 301.6323(c)–1) is in existence when, and to the extent, a right to payment is earned by performance. A security interest must be in existence, within the meaning of this paragraph, at the time as of which its priority against a tax lien is determined. For example, to be afforded priority under the provisions of paragraph (a) of § 301.6323 (a)–1 a security interest must be in existence within the meaning of this paragraph before a notice of lien is filed.

• • • • •

Par. 10. Paragraph (e) of § 301.6323 (h)–1, as set forth in paragraph 7 of the appendix to the notice of proposed rule making, is revised to provide a cross reference. As revised, § 301.6323(h)–1 (e) reads as follows:

§ 301.6323(h)–1 Definitions.

• • • • •

(e) *Tax lien filing.* The term "tax lien filing" means the filing of notice of the lien imposed by section 6321 in accordance with § 301.6323(f)–1.

• • • • •

(This Treasury decision is issued under the authority contained in section 7805 of the Internal Revenue Code of 1954. (68A Stat. 917; 26 U.S.C. 7805).)

DONALD C. ALEXANDER,
Commissioner of Internal Revenue.

Approved: August 16, 1976.

CHARLES M. WALKER,
Assistant Secretary of the Treasury.

In order to conform the Income Tax Regulations, the Estate Tax Regulations, the Gift Tax Regulations and the Regulations on Procedure and Administration (26 CFR Parts 1, 20, 25, and 301) under sections 545, 6323, and 6325 of the Internal Revenue Code of 1954 to section 236 of the Revenue Act of 1964 (78 Stat. 127), section 17(a) of Public Law 89–493 (80 Stat. 263), and sections 101 and 103 of the Federal Tax Lien Act of 1966 (80 Stat. 1125 and 1133), such regulations are amended as set forth hereinafter. Section 301.6323(g)–1 of the regulations hereby adopted supersedes those provisions of §§ 400.1 and 400.1–1 of this chapter relating to section 101(a) of the Federal Tax Lien Act of 1966 which were prescribed by T.D. 6932, approved October 13, 1967 (32 F.R. 14385). Section 301.6325–1 hereby adopted supersedes those provisions of §§ 400.2 and 400.2–1 of this chapter relating to section 103(a) of such Act which were prescribed by T.D. 6944, approved January 17, 1968 (33 F.R. 732).

A. Part 1, Income Tax Regulations, of 26 CFR Chapter I, is amended as follows:

PARAGRAPH 1. Paragraph (l)(1) of § 1.545–2 is amended to read as follows:

§ 1.545–2 Adjustments to taxable income.

• • • • •

(l) *Amount of a lien in favor of the United States.* (1) If notices of lien are filed in the manner provided in section 6323(f), the amount of the liability to the United States outstanding at the close of the taxable year, and secured by such liens which are in effect at that time, shall be allowed as a deduction in computing undistributed personal holding company income. However, the amount of such deduction which may be allowed for any taxable year shall not exceed the taxable income (as adjusted for purposes of determining the undistributed personal holding company income, but without regard to the deduction under section 545(b)(9)) for such year. The fact that the amount of, or any part of, the outstanding obligation to the United States was deducted for one taxable year does not prevent its deduction for a subsequent taxable year to the extent the obligation is still outstanding at the close of the subsequent taxable year and is secured by a lien, notice of which has been filed.

• • • • •

B. Part 20, Estate Tax Regulations, of 26 CFR Chapter I, is amended as follows:

PAR. 2. Section 20.6323 is amended by revising sections (a) through (e), by adding subsections (f) through (i), and by revising the historical note. These revised and added provisions read as follows:

§ 20.6323 Statutory provisions; validity and priority against certain persons.

SEC. 6323. *Validity and priority against certain persons*—(a) *Purchases, holders of security interests, mechanics's lienors, and judgment lien creditors.* The lien imposed by section 6321 shall not be valid as against any purchaser, holder of a security interest, mechanic's lienor, or judgment lien creditor until notice thereof which meets the requirements of subsection (f) has been filed by the Secretary or his delegate.

(b) *Protection for certain interests even though notice filed.* Even though notice of a lien imposed by section 6321 has been filed, such lien shall not be valid—

(1) *Securities.* With respect to a security (as defined in subsection (h)(4))—

(A) As against a purchaser of such security who at the time of purchase did not have actual notice or knowledge of the existence of such lien; and

(B) As against a holder of a security interest in such security who, at the time such interest came into existence, did not have actual notice or knowledge of the existence of such lien.

(2) *Motor vehicles.* With respect to a motor vehicle (as defined in subsection (h)(3)), as against a purchaser of such motor vehicle, if—

(A) At the time of the purchase such purchaser did not have actual notice or knowledge of the existence of such lien, and

(B) Before the purchaser obtains such notice or knowledge, he has acquired possession of such motor vehicle and has not thereafter relinquished possession of such motor vehicle to the seller or his agent.

(3) *Personal property purchased at retail.* With respect to tangible personal property purchased at retail, as against a purchaser in the ordinary course of the seller's trade or business, unless at the time of such purchase such purchaser intends such purchase to (or knows such purchase will) hinder, evade, or defeat the collection of any tax under this title.

(4) *Personal property purchased in casual sale.* With respect to household goods, personal effects, or other tangible personal property described in section 6334(a) purchased (not for resale) in a casual sale for less than $250, as against the purchaser, but only if such purchaser does not have actual notice or knowledge (A) of the existence of such lien, or (B) that this sale is one of a series of sales.

(5) *Personal property subject to possessory lien.* With respect to tangible personal property subject to a lien under local law securing the reasonable price of the repair or improvement of such property, as against a holder of such a lien, if such holder is, and has been, continuously in possession of such property from the time such lien arose.

(6) *Real property tax and special assessment liens.* With respect to real property, as against a holder of a lien upon such property, if such lien is entitled under local law to priority over security interests in such property which are prior in time, and such lien secures payment of—

(A) A tax of general application levied by any taxing authority based upon the value of such property;

(B) A special assessment imposed directly upon such property by any taxing authority, if such assessment is imposed for the purpose of defraying the cost of any public improvement; or

(C) Charges for utilities or public services furnished to such property by the United States, a State or political subdivision thereof, or an instrumentality of any one or more of the foregoing.

(7) *Residential property subject to a mechanic's lien for certain repairs and improvements.* With respect to real property subject to a lien for repair or improvement of a personal residence (containing not more than four dwelling units) occupied by the owner of such residence, as against a mechanic's lienor, but only if the contract price on the contract with the owner is not more than $1,000.

(8) *Attorneys' liens.* With respect to a judgment or other amount in settlement of a claim or of a cause of action, as against an attorney who, under local law, holds a lien upon or contract enforcible against such judgment or amount, to the extent of his reasonable compensation for obtaining such judgment or procuring such settlement, except that this paragraph shall not apply to any judgment or amount in settlement of a claim or of a cause of action against the United States to the extent that the United States offsets such judgment or amount against any liability of the taxpayer to the United States.

(9) *Certain insurance contracts.* With respect to a life insurance, endowment, or annuity contract, as against the organization which is the insurer under such contract, at any time—

(A) Before such organization had actual notice or knowledge of the existence of such lien;

(B) After such organization had such notice or knowledge, with respect to advances required to be made automatically to maintain such contract in force under an agreement entered into before such organization had such notice or knowledge; or

(C) After satisfaction of a levy pursuant to section 6332(b), unless and until the Secretary or his delegate delivers to such organization a notice, executed after the date of such satisfaction, of the existence of such lien.

(10) *Passbook loans.* With respect to a savings deposit, share, or other account, evidenced by a passbook, with an institution described in section 581 or 591, to the extent of any loan made by such institution without actual notice or knowledge of the existence of such lien, as against such institution, if such loan is secured by such account and if such institution has been continuously in possession of such passbook from the time the loan is made.

(c) *Protection for certain commercial transactions financing agreements, etc.*—(1) *In general.* To the extent provided in this subsection, even though notice of a lien imposed by section 6321 has been filed, such lien shall not be valid with respect to a security interest which came into existence after tax lien filing but which—

(A) Is in qualified property covered by the terms of a written agreement entered into before tax lien filing and constituting—

(i) A commercial transactions financing agreement,

(ii) A real property construction or improvement financing agreement, or

(iii) An obligatory disbursement agreement, and

(B) Is protected under local law against a judgment lien arising, as of the time of tax lien filing, out of an unsecured obligation.

(2) *Commercial transactions financing agreement.* For purposes of this subsection—

(A) *Definition.* The term "commercial transactions financing agreement" means an agreement (entered into by a person in the course of his trade or business)—

(i) To make loans to the taxpayer to be secured by commercial financing security acquired by the taxpayer in the ordinary course of his trade or business, or

(ii) To purchase commercial financing security (other than inventory) acquired by the taxpayer in the ordinary course of his trade or business;

but such an agreement shall be treated as coming within the term only to the extent that such loan or purchase is made before the 46th day after the date of tax lien filing or (if earlier) before the lender or purchaser had actual notice or knowledge of such tax lien filing.

(B) *Limitation on qualified property.* The term "qualified property", when used with respect to a commercial transactions financing agreement, includes only commercial financing security acquired by the taxpayer before the 46th day after the date of tax lien filing.

(C) *Commercial financing security defined.* The term "commercial financing security" means (i) paper of a kind ordinarily arising in commercial transactions, (ii) accounts receivable, (iii) mortgages on real property, and (iv) inventory.

(D) *Purchaser treated as acquiring security interest.* A person who satisfies subparagraph (A) by reason of clause (ii) thereof shall be treated as having acquired a security interest in commercial financing security.

(3) *Real property construction or improvement financing agreement.* For purposes of this subsection—

(A) *Definition.* The term "real property construction or improvement financing agreement" means an agreement to make cash disbursements to finance—

(i) The construction or improvement of real property,

(ii) A contract to construct or improve real property, or

(iii) The raising or harvesting of a farm crop or the raising of livestock or other animals.

For purposes of clause (iii), the furnishing of goods and services shall be treated as the disbursement of cash.

(B) *Limitation on qualified property.* The term "qualified property", when used with respect to a real property construction or improvement financing agreement, includes only—

(i) In the case of subparagraph (A)(i), the real property with respect to which the construction or improvement has been or is to be made,

(ii) In the case of subparagraph (A)(ii), the proceeds of the contract described therein, and

(iii) In the case of subparagraph (A)(iii), property subject to the lien imposed by section 6321 at the time of tax lien filing and

V 41 164 AUG 23 76 UMI

the crop or the livestock or other animals referred to in subparagraph (A)(iii).

(4) *Obligatory disbursement agreement.* For purposes of this subsection—

(A) *Definition.* The term "obligatory disbursement agreement" means an agreement (entered into by a person in the course of his trade or business) to make disbursements, but such an agreement shall be treated as coming within the term only to the extent of disbursements which are required to be made by reason of the intervention of the rights of a person other than the taxpayer.

(B) *Limitation on qualified property.* The term "qualified property", when used with respect to an obligatory disbursement agreement, means property subject to the lien imposed by section 6321 at the time of tax lien filing and (to the extent that the acquisition is directly traceable to the disbursements referred to in subparagraph (A)) property acquired by the taxpayer after tax lien filing.

(C) *Special rules for surety agreements.* Where the obligatory disbursement agreement is an agreement insuring the performance of a contract between the taxpayer and another person—

(i) The term "qualified property" shall be treated as also including the proceeds of the contract the performance of which was insured, and

(ii) If the contract the performance of which was insured was a contract to construct or improve real property, to produce goods, or to furnish services, the term "qualified property" shall be treated as also including any tangible personal property used by the taxpayer in the performance of such insured contract.

(d) *45-day period for making disbursements.* Even though notice of a lien imposed by section 6321 has been filed, such lien shall not be valid with respect to a security interest which came into existence after tax lien filing by reason of disbursements made before the 46th day after the date of tax lien filing, or (if earlier) before the person making such disbursements had actual notice or knowledge of tax lien filing, but only if such security interest—

(1) Is in property (A) subject, at the time of tax lien filing, to the lien imposed by section 6321, and (B) covered by the terms of a written agreement entered into before tax lien filing, and

(2) Is protected under local law against a judgment lien arising, as of the time of tax lien filing, out of an unsecured obligation.

(e) *Priority of interest and expenses.* If the lien imposed by section 6321 is not valid as against a lien or security interest, the priority of such lien or security interest shall extend to—

(1) Any interest or carrying charges upon the obligation secured,

(2) The reasonable charges and expenses of an indenture trustee or agent holding the security interest for the benefit of the holder of the security interest,

(3) The reasonable expenses, including reasonable compensation for attorneys, actually incurred in collecting or enforcing the obligation secured,

(4) The reasonable costs of insuring, preserving, or repairing the property to which the lien or security interest relates,

(5) The reasonable costs of insuring payment of the obligation secured, and

(6) Amounts paid to satisfy any lien on the property to which the lien or security interest relates, but only if the lien so satisfied is entitled to priority over the lien imposed by section 6321,

to the extent that, under local law, any such item has the same priority as the lien or security interest to which it relates.

(f) *Place for filing notice; form*—(1) *Place for filing.* The notice referred to in subsection (a) shall be filed—

(A) *Under State laws*—(i) *Real property.* In the case of real property, in one office within the State (or the county, or other governmental subdivision), as designated by the laws of such State, in which the property subject to the lien is situated; and

(ii) *Personal property.* In the case of personal property, whether tangible or intangible, in one office within the State (or the county, or other governmental subdivision), as designated by the laws of such State, in which the property subject to the lien is situated; or

(B) *With clerk of district court.* In the office of the clerk of the U.S. district court for the judicial district in which the property subject to the lien is situated, whenever the State has not by law designated one office which meets the requirements of subparagraph (A); or

(C) *With recorder of deeds of the District of Columbia.* In the office of the Recorder of Deeds of the District of Columbia, if the property subject to the lien is situated in the District of Columbia.

(2) *Situs of property subject to lien.* For purposes of paragraph (1), property shall be deemed to be situated—

(A) *Real property.* In the case of real property, at its physical location; or

(B) *Personal property.* In the case of personal property, whether tangible or intangible, at the residence of the taxpayer at the time the notice of lien is filed.

For purposes of paragraph (2)(B), the residence of a corporation or partnership shall be deemed to be the place at which the principal executive office of the business is located, and the residence of a taxpayer whose residence is without the United States shall be deemed to be in the District of Columbia.

(3) *Form.* The form and content of the notice referred to in subsection (a) shall be prescribed by the Secretary or his delegate. Such notice shall be valid notwithstanding any other provision of law regarding the form or content of a notice of lien.

(g) *Refiling of notice.* For purposes of this section—

(1) *General rule.* Unless notice of lien is refiled in the manner prescribed in paragraph (2) during the required refiling period, such notice of lien shall be treated as filed on the date on which it is filed (in accordance with subsection (f)) after the expiration of such refiling period.

(2) *Place for filing.* A notice of lien refiled during the required refiling period shall be effective only—

(A) If such notice of lien is refiled in the office in which the prior notice of lien was filed; and

(B) In any case in which, 90 days or more prior to the date of a refiling of notice of lien under subparagraph (A), the Secretary or his delegate received written information (in the manner prescribed in regulations issued by the Secretary or his delegate) concerning a change in the taxpayer's residence, if a notice of such lien is also filed in accordance with subsection (f) in the State in which such residence is located.

(3) *Required refiling period.* In the case of any notice of lien, the term "required refiling period" means—

(A) The 1-year period ending 30 days after the expiration of 6 years after the date of the assessment of the tax, and

(B) The 1-year period ending with the expiration of 6 years after the close of the preceding required refiling period for such notice of lien.

(4) *Transitional rule.* Notwithstanding paragraph (3), if the assessment of the tax was made before January 1, 1962, the first required refiling period shall be the calendar year 1967.

(h) *Definitions.* For purposes of this section and section 6324—

(1) *Security interest.* The term "security interest" means any interest in property acquired by contract for the purpose of securing payment or performance of an obligation or indemnifying against loss or liability. A security interest exists at any time (A) if, at such time, the property is in existence and the interest has become protected under local law against a subsequent judgment lien arising out of an unsecured obligation, and (B) to the extent that, at such time, the holder has parted with money or money's worth.

(2) *Mechanic's lienor.* The term "mechanic's lienor" means any person who under local law has a lien on real property (or on the proceeds of a contract relating to real property) for services, labor, or materials furnished in connection with the construction or improvement of such property. For purposes of the preceding sentence, a person has a lien on the earliest date such lien becomes valid under local law against subsequent purchasers without actual notice, but not before he begins to furnish the services, labor, or materials.

(3) *Motor vehicle.* The term "motor vehicle" means a self-propelled vehicle which is registered for highway use under the laws of any State or foreign country.

(4) *Security.* The term "security" means any bond, debenture, note, or certificate, or other evidence of indebtedness, issued by a corporation or a government or political subdivision thereof, with interest coupons or in registered form, share of stock, voting trust certificate, or any certificate of interest or participation in, certificate of deposit or receipt for, temporary or interim certificate for, or warrant or right to subscribe to or purchase, any of the foregoing; negotiable instrument; or money.

(5) *Tax lien filing.* The term "tax lien filing" means the filing of notice (referred to in subsection (a)) of the lien imposed by section 6321.

(6) *Purchaser.* The term "purchaser" means a person who, for adequate and full consideration in money or money's worth, acquires an interest (other than a lien or security interest) in property which is valid under local law against subsequent purchasers without actual notice. In applying the preceding sentence for purposes of subsection (a) of this section, and for purposes of section 6324—

(A) A lease of property,

(B) A written executory contract to purchase or lease property,

(C) An option to purchase or lease property or any interest therein, or

(D) An option to renew or extend a lease of property,

which is not a lien or security interest shall be treated as an interest in property.

(i) *Special rules*—(1) *Actual notice or knowledge.* For purposes of this subchapter, an organization shall be deemed for purposes of a particular transaction to have actual notice or knowledge of any fact from the time such fact is brought to the attention of the individual conducting such transaction, and in any event from the time such fact would have been brought to such individual's attention if the organization had exercised due diligence. An organization exercises due diligence if it maintains reasonable routines for communicating significant information to the person conducting the transaction and there is reasonable compliance with the routine. Due diligence does not require an individual acting for the organization to communicate information unless such communication is part of his regular duties or unless he has reason to know of the transaction and that the transaction would be materially affected by the information.

(2) *Subrogation.* Where, under local law, one person is subrogated to the rights of another with respect to a lien or interest, such person shall be subrogated to such rights for purposes of any lien imposed by section 6321 or 6324.

(3) *Disclosure of amount of outstanding lien.* If a notice of lien has been filed pursuant to subsection (f), the Secretary or his delegate is authorized to provide by regulations the extent to which, and the conditions under which, information as to the amount of the outstanding obligation secured by the lien may be disclosed.

[Sec. 6323 as amended by sec. 236 (a) and (c)(1), Rev. Act 1964 (78 Stat. 127); sec. 17(a), Act of July 5, 1966 (Public Law 89-493, 80 Stat. 263); sec. 101(a), Federal Tax Lien Act 1966 (80 Stat. 1125)]

PAR. 3. Section 20.6323-1 is amended to read as follows:

§ 20.6323-1 Validity and priority against certain persons.

For regulations concerning the validity of the lien imposed by section 6321 against certain persons, see §§ 301.6323(a)-1 through 301.6323(i)-1 of this chapter (Regulations on Procedure and Administration).

PAR. 4. Section 20.6325 is amended by revising subsections (a) through (e), by adding subsections (f) through (h), and by revising the historical note. These revised and added provisions read as follows:

§ 20.6325 Statutory provisions; release of lien or discharge of property.

Sec. 6325. *Release of lien or discharge of property*—(a) *Release of lien.* Subject to such regulations as the Secretary or his delegate may prescribe, the Secretary or his delegate may issue a certificate of release of any lien imposed with respect to any internal revenue tax if—

(1) *Liability satisfied or unenforceable.* The Secretary or his delegate finds that the liability for the amount assessed, together with all interest in respect thereof, has been fully satisfied or has become legally unenforceable; or

(2) *Bond accepted.* There is furnished to the Secretary or his delegate and accepted by him a bond that is conditioned upon the payment of the amount assessed, together with all interest in respect thereof, within the time prescribed by law (including any extension of such time), and that is in accordance with such requirements relating to terms, conditions, and form of the bond and sureties thereon, as may be specified by such regulations.

(b) *Discharge of property*—(1) *Property double the amount of the liability.* Subject to such regulations as the Secretary or his delegate may prescribe, the Secretary or his delegate may issue a certificate of discharge of any part of the property subject to any lien imposed under this chapter if the Secretary or his delegate finds that the fair market value of that part of such property remaining subject to the lien is at least double the amount of the unsatisfied liability secured by such lien and the amount of all other liens upon such property which have priority over such lien.

(2) *Part payment; interest of United States valueless.* Subject to such regulations as the Secretary or his delegate may prescribe, the Secretary or his delegate may issue a certificate of discharge of any part of the property subject to the lien if—

(A) There is paid over to the Secretary or his delegate in partial satisfaction of the liability secured by the lien an amount determined by the Secretary or his delegate, which shall not be less than the value, as determined by the Secretary or his delegate, of the interest of the United States in the part to be so discharged, or

(B) The Secretary or his delegate determines at any time that the interest of the United States in the part to be so discharged has no value.

In determining the value of the interest of the United States in the part to be so discharged, the Secretary or his delegate shall give consideration to the value of such part and to such liens thereon as have priority over the lien of the United States.

(3) *Substitution of proceeds of sale.* Subject to such regulations as the Secretary or his delegate may prescribe, the Secretary or his delegate may issue a certificate of discharge of any part of the property subject to the lien if such part of the property is sold and, pursuant to an agreement with the Secretary or his delegate, the proceeds of such sale are to be held, as a fund subject to the liens and claims of the United States, in the same manner and with the same priority as such liens and claims had with respect to the discharged property.

(c) *Estate or gift tax.* Subject to such regulations as the Secretary or his delegate may prescribe, the Secretary or his delegate may issue a certificate of discharge of any or all of the property subject to any lien imposed by section 6324 if the Secretary or his delegate finds that the liability secured by such lien has been fully satisfied or provided for.

(d) *Subordination of lien.* Subject to such regulations as the Secretary or his delegate may prescribe, the Secretary or his delegate may issue a certificate of subordination of any lien imposed by this chapter upon any part of the property subject to such lien if—

(1) There is paid over to the Secretary or his delegate an amount equal to the amount of the lien or interest to which the certificate subordinates the lien of the United States, or

(2) The Secretary or his delegate believes that the amount realizable by the United States from the property to which the certificate relates, or from any other property subject to the lien, will ultimately be increased by reason of the issuance of such certificate and that the ultimate collection of the tax liability will be facilitated by such subordination.

(e) *Nonattachment of lien.* If the Secretary or his delegate determines that, because of confusion of names or otherwise, any person (other than the person against whom the tax was assessed) is or may be injured by the appearance that a notice of lien filed under section 6323 refers to such person, the Secretary or his delegate may issue a certificate that the lien does not attach to the property of such person.

(f) *Effect of certificate*—(1) *Conclusiveness.* Except as provided in paragraphs (2) and (3), if a certificate is issued pursuant to this section by the Secretary or his delegate and is filed in the same office as the notice of lien to which it relates (if such notice of lien has been filed) such certificate shall have the following effect:

(A) In the case of a certificate of release, such certificate shall be conclusive that the lien referred to in such certificate is extinguished;

(B) In the case of a certificate of discharge, such certificate shall be conclusive that the property covered by such certificate is discharged from the lien;

(C) In the case of a certificate of subordination, such certificate shall be conclusive that the lien or interest to which the lien of the United States is subordinated is superior to the lien of the United States; and

(D) In the case of a certificate of nonattachment, such certificate shall be conclusive that the lien of the United States does not attach to the property of the person referred to in such certificate.

(2) *Revocation of certificate of release or nonattachment.* If the Secretary or his delegate determines that a certificate of release or nonattachment of a lien imposed by section 6321 was issued erroneously or improvidently, or if a certificate of release of such lien was issued pursuant to a collateral agreement entered into in connection with a compromise under section 7122 which has been breached, and if the period of limitation on collection after assessment has not expired, the Secretary or his delegate may revoke such certificate and reinstate the lien—

(A) By mailing notice of such revocation to the person against whom the tax was assessed at his last known address, and

(B) By filing notice of such revocation in the same office in which the notice of lien to which it relates was filed (if such notice of lien had been filed).

Such reinstated lien (i) shall be effective on the date notice of revocation is mailed to the taxpayer in accordance with the provisions of subparagraph (A), but not earlier than the date on which any required filing of notice of revocation is filed in accordance with the provisions of subparagraph (B), and (ii) shall have the same force and effect (as of such date), until the expiration of the period of limitation on collection after assessment, as a lien imposed by section 6321 (relating to lien for taxes).

(3) *Certificates void under certain conditions.* Notwithstanding any other provision of this subtitle, any lien imposed by this chapter shall attach to any property with respect to which a certificate of discharge has been issued if the person liable for the tax reacquires such property after such certificate has been issued.

(g) *Filing of certificates and notices.* If a certificate or notice issued pursuant to this section may not be filed in the office designated by State law in which the notice of lien imposed by section 6321 is filed, such certificate or notice shall be effective if filed in the office of the clerk of the United States district court for the judicial district in which such office is situated.

(h) *Cross reference.* For provisions relating to bonds, see chapter 73 (sec. 7101 and following).

[Sec. 6325 as amended by sec. 77, Technical Amendments Act 1958 (72 Stat. 1662); sec. 103, Federal Tax Lien Act 1966 (80 Stat. 1133)]

C. Part 25, Gift Tax Regulations, of 26 CFR Chapter I is amended as follows:

PAR. 5. Section 25.6323 is amended by revising subsections (a) through (e), by adding subsections (f) through (i), and by revising the historical note. These re-

V 41 164
AUG 23 76
UMI

vised and amended provisions read as follows:

§ 25.6323 Statutory provisions; validity and priority against certain persons.

SEC. 6323. *Validity and priority against certain persons*—(a) *Purchases, holders of security interests, mechanic's lienors, and judgment lien creditors.* The lien imposed by section 6321 shall not be valid as against any purchaser, holder of a security interest, mechanic's lienor, or judgment lien creditor until notice thereof which meets the requirements of subsection (f) has been filed by the Secretary or his delegate.

(b) *Protection for certain interests even though notice filed.* Even though notice of a lien imposed by section 6321 has been filed, such lien shall not be valid—

(1) *Securities.* With respect to a security (as defined in subsection (b)(4))—

(A) As against a purchaser of such security who at the time of purchase did not have actual notice or knowledge of the existence of such lien; and

(B) As against a holder of a security interest in such security who, at the time such interest came into existence, did not have actual notice or knowledge of the existence of such lien.

(2) *Motor vehicles.* With respect to a motor vehicle (as defined in subsection (h)(3)), as against a purchaser of such motor vehicle, if—

(A) At the time of the purchase such purchaser did not have actual notice or knowledge of the existence of such lien, and

(B) Before the purchaser obtains such notice or knowledge, he has acquired possession of such motor vehicle and has not thereafter relinquished possession of such motor vehicle to the seller or his agent.

(3) *Personal property purchased at retail.* With respect to tangible personal property purchased at retail, as against a purchaser in the ordinary course of the seller's trade or business, unless at the time of such purchase such purchaser intends such purchase to (or knows such purchase will) hinder, evade, or defeat the collection of any tax under this title.

(4) *Personal property purchased in casual sale.* With respect to household goods, personal effects, or other tangible personal property described in section 6334(a) purchased (not for resale) in a casual sale for less than $250, as against the purchaser, but only if such purchaser does not have actual notice or knowledge (A) of the existence of such lien, or (B) that this sale is one of a series of sales.

(5) *Personal property subject to possessory lien.* With respect to tangible personal property subject to a lien under local law securing the reasonable price of the repair or improvement of such property, as against a holder of such a lien, if such holder is, and has been, continuously in possession of such property from the time such lien arose.

(6) *Real property tax and special assessment liens.* With respect to real property, as against a holder of a lien upon such property, if such lien is entitled under local law to priority over security interests in such property which are prior in time, and such lien secures payment of—

(A) A tax of general application levied by any taxing authority based upon the value of such property;

(B) A special assessment imposed directly upon such property by any taxing authority, if such assessment is imposed for the purpose of defraying the cost of any public improvement; or

(C) Charges for utilities or public services furnished to such property by the United States, a State or political subdivision thereof, or an instrumentality of any one or more of the foregoing.

(7) *Residential property subject to a mechanic's lien for certain repairs and improvements.* With respect to real property subject to a lien for repair or improvement of a personal residence (containing not more than four dwelling units) occupied by the owner of such residence, as against a mechanic's lienor, but only if the contract price on the contract with the owner is not more than $1,000.

(8) *Attorneys' liens.* With respect to a judgment or other amount in settlement of a claim or of a cause of action, as against an attorney who, under local law, holds a lien upon or a contract enforcible against such judgment or amount, to the extent of his reasonable compensation for obtaining such judgment or procuring such settlement, except that this paragraph shall not apply to any judgment or amount in settlement of a claim or of a cause of action against the United States to the extent that the United States offsets such judgment or amount against any liability of the taxpayer to the United States.

(9) *Certain insurance contracts.* With respect to a life insurance, endowment, or annuity contract, as against the organization which is the insurer under such contract, at any time—

(A) Before such organization had actual notice or knowledge of the existence of such lien;

(B) After such organization had such notice or knowledge, with respect to advances required to be made automatically to maintain such contract in force under an agreement entered into before such organization had such notice or knowledge; or

(C) After satisfaction of a levy pursuant to section 6332(b), unless and until the Secretary or his delegate delivers to such organization a notice, executed after the date of such satisfaction, of the existence of such lien.

(10) *Passbook loans.* With respect to a savings deposit, share, or other account, evidenced by a passbook, with an institution described in section 581 or 591, to the extent of any loan made by such institution without actual notice or knowledge of the existence of such lien, as against such institution, if such loan is secured by such account and if such institution has been continuously in possession of such passbook from the time the loan is made.

(c) *Protection for certain commercial transactions financing agreements, etc.*—(1) *In general.* To the extent provided in this subsection, even though notice of a lien imposed by section 6321 has been filed, such lien shall not be valid with respect to a security interest which came into existence after tax lien filing but which—

(A) Is in qualified property covered by the terms of a written agreement entered into before tax lien filing and constituting—

(i) A commercial transactions financing agreement,

(ii) A real property construction or improvement financing agreement, or

(iii) An obligatory disbursement agreement, and

(B) Is protected under local law against a judgment lien arising, as of the time of tax lien filing, out of an unsecured obligation.

(2) *Commercial transactions financing agreement.* For purposes of this subsection—

(A) *Definition.* The term "commercial transactions financing agreement" means an agreement (entered into by a person in the course of his trade or business)—

(i) To make loans to the taxpayer to be secured by commercial financing security acquired by the taxpayer in the ordinary course of his trade or business, or

(ii) To purchase commercial financing security (other than inventory) acquired by the taxpayer in the ordinary course of his trade or business;

but such an agreement shall be treated as coming within the term only to the extent that such loan or purchase is made before the 46th day after the date of tax lien filing or (if earlier) before the lender or purchaser had actual notice or knowledge of such tax lien filing.

(B) *Limitation on qualified property.* The term "qualified property," when used with respect to a commercial transactions financing agreement, includes only commercial financing security acquired by the taxpayer before the 46th day after the date of tax lien filing.

(C) *Commercial financing security defined.* The term "commercial financing security" means (i) paper of a kind ordinarily arising in commercial transactions, (ii) accounts receivable, (iii) mortgages on real property, and (iv) inventory.

(D) *Purchaser treated as acquiring security interest.* A person who satisfies subparagraph (A) by reason of clause (ii) thereof shall be treated as having acquired a security interest in commercial financing security.

(3) *Real property construction or improvement financing agreement.* For purposes of this subsection—

(A) *Definition.* The term "real property construction or improvement financing agreement" means an agreement to make cash disbursements to finance—

(i) The construction or improvement of real property,

(ii) A contract to construct or improve real property, or

(iii) The raising or harvesting of a farm crop or the raising of livestock or other animals.

For purposes of clause (iii), the furnishing of goods and services shall be treated as the disbursement of cash.

(B) *Limitation on qualified property.* The term "qualified property," when used with respect to a real property construction or improvement financing agreement, includes only—

(i) In the case of subparagraph (A)(i), the real property with respect to which the construction or improvement has been or is to be made,

(ii) In the case of subparagraph (A)(ii), the proceeds of the contract described therein, and

(iii) In the case of subparagraph (A)(iii), property subject to the lien imposed by section 6321 at the time of tax lien filing and the crop or the livestock or other animals referred to in subparagraph (A)(iii).

(4) *Obligatory disbursement agreement.* For purposes of this subsection—

(A) *Definition.* The term "obligatory disbursement agreement" means an agreement (entered into by a person in the course of his trade or business) to make disbursements, but such an agreement shall be treated as coming within the term only to the extent of disbursements which are required to be made by reason of the intervention of the rights of a person other than the taxpayer.

(B) *Limitation on qualified property.* The term "qualified property," when used with respect to an obligatory disbursement agreement, means property subject to the lien imposed by section 6321 at the time of tax lien filing and (to the extent that the acquisition

is directly traceable to the disbursements referred to in subparagraph (A)) property acquired by the taxpayer after tax lien filing.

(C) *Special rules for surety agreements.* Where the obligatory disbursement agreement is an agreement insuring the performance of a contract between the taxpayer and another person—

(i) The term "qualified property" shall be treated as also including the proceeds of the contract the performance of which was insured, and

(ii) If the contract the performance of which was insured was a contract to construct or improve real property, to produce goods, or to furnish services, the term "qualified property" shall be treated as also including any tangible personal property used by the taxpayer in the performance of such insured contract.

(d) *Forty-five-day period for making disbursements.* Even though notice of a lien imposed by section 6321 has been filed, such lien shall not be valid with respect to a security interest which came into existence after tax lien filing by reason of disbursements made before the 46th day after the date of tax lien filing, or (if earlier) before the person making such disbursements had actual notice or knowledge of tax lien filing, but only if such security interest—

(1) Is in property (A) subject, at the time of tax lien filing, to the lien imposed by section 6321, and (B) covered by the terms of a written agreement entered into before tax lien filing, and

(2) Is protected under local law against a judgment lien arising, as of the time of tax lien filing, out of an unsecured obligation.

(e) *Priority of interest and expenses.* If the lien imposed by section 6321 is not valid as against a lien or security interest, the priority of such lien or security interest shall extend to—

(1) Any interest or carrying charges upon the obligation secured,

(2) The reasonable charges and expenses of an indenture trustee or agent holding the security interest for the benefit of the holder of the security interest,

(3) The reasonable expenses, including reasonable compensation for attorneys, actually incurred in collecting or enforcing the obligation secured,

(4) The reasonable costs of insuring, preserving, or repairing the property to which the lien or security interest relates,

(5) The reasonable costs of insuring payment of the obligations secured, and

(6) Amounts paid to satisfy any lien on the property to which the lien or security interest relates, but only if the lien so satisfied is entitled to priority over the lien imposed by section 6321,

to the extent that, under local law, any such item has the same priority as the lien or security interest to which it relates.

(f) *Place for filing notice; form*—(1) *Place for filing.* The notice referred to in subsection (a) shall be filed—

(A) *Under State laws*—(i) *Real property.* In the case of real property, in one office within the State (or the county, or other governmental subdivision), as designated by the laws of such State, in which the property subject to the lien is situated; and

(ii) *Personal property.* In the case of personal property, whether tangible or intangible, in one office within the State (or the county, or other governmental subdivision), as designated by the laws of such State, in which the property subject to the lien is situated; or

(B) *With clerk of district court.* In the office of the clerk of the U.S. district court for the judicial district in which the property subject to the lien is situated, whenever the State has not by law designated one office which meets the requirements of subparagraph (A); or

(C) *With recorder of deeds of the District of Columbia.* In the office of the Recorder of Deeds of the District of Columbia, if the property subject to the lien is situated in the District of Columbia.

(2) *Situs of property subject to lien.* For purposes of paragraph (1), property shall be deemed to be situated—

(A) *Real property.* In the case of real property, at its physical location; or

(B) *Personal property.* In the case of personal property, whether tangible or intangible, at the residence of the taxpayer at the time the notice of lien is filed.

For purposes of paragraph (2)(B), the residence of a corporation or partnership shall be deemed to be the place at which the principal executive office of the business is located, and the residence of a taxpayer whose residence is without the United States shall be deemed to be in the District of Columbia.

(3) *Form.* The form and content of the notice referred to in subsection (a) shall be prescribed by the Secretary or his delegate. Such notice shall be valid notwithstanding any other provision of law regarding the form or content of a notice of lien.

(g) *Refiling of notice.* For purposes of this section—

(1) *General rule.* Unless notice of lien is refiled in the manner prescribed in paragraph (2) during the required refiling period, such notice of lien shall be treated as filed on the date on which it is filed (in accordance with subsection (f)) after the expiration of such refiling period.

(2) *Place for filing.* A notice of lien refiled during the required refiling period shall be effective only—

(A) If such notice of lien is refiled in the office in which the prior notice of lien was filed; and

(B) In any case in which, 90 days or more prior to the date of a refiling of notice of lien under subparagraph (A), the Secretary or his delegate received written information (in the manner prescribed in regulations issued by the Secretary or his delegate) concerning a change in the taxpayer's residence, if a notice of such lien is also filed in accordance with subsection (f) in the State in which such residence is located.

(3) *Required refiling period.* In the case of any notice of lien, the term "required refiling period" means—

(A) The 1-year period ending 30 days after the expiration of 6 years after the date of the assessment of the tax, and

(B) The 1-year period ending with the expiration of 6 years after the close of the preceding required refiling period for such notice of lien.

(4) *Transitional rule.* Notwithstanding paragraph (3), if the assessment of the tax was made before January 1, 1962, the first required refiling period shall be the calendar year 1967.

(h) *Definitions.* For purposes of this section and section 6324—

(1) *Security interest.* The term "security interest" means any interest in property acquired by contract for the purpose of securing payment or performance of an obligation or indemnifying against loss or liability. A security interest exists at any time (A) if, at such time, the property is in existence and the interest has become protected under local law against a subsequent judgment lien arising out of an unsecured obligation, and (B) to the extent that, at such time, the holder has parted with money or money's worth.

(2) *Mechanic's lienor.* The term "mechanic's lienor" means any person who under local law has a lien on real property (or on the proceeds of a contract relating to real property) for services, labor, or materials furnished in connection with the construction or improvement of such property. For purposes of the preceding sentence, a person has a lien on the earliest date such lien becomes valid under local law against subsequent purchasers without actual notice, but not before he begins to furnish the services, labor, or materials.

(3) *Motor vehicle.* The term "motor vehicle" means a self-propelled vehicle which is registered for highway use under the laws of any State or foreign country.

(4) *Security.* The term "security" means any bond, debenture, note, or certificate or other evidence of indebtedness, issued by a corporation or a government or political subdivision thereof, with interest coupons or in registered form, share of stock, voting trust certificate, or any certificate of interest or participation in, certificate of deposit or receipt for, temporary or interim certificate for, or warrant or right to subscribe to or purchase, any of the foregoing; negotiable instrument; or money.

(5) *Tax lien filing.* The term "tax lien filing" means the filing of notice (referred to in subsection (a)) of the lien imposed by section 6321.

(6) *Purchaser.* The term "purchaser" means a person who, for adequate and full consideration in money or money's worth, acquires an interest (other than a lien or security interest) in property which is valid under local law against subsequent purchasers without actual notice. In applying the preceding sentence for purposes of subsection (a) of this section, and for purposes of section 6324—

(A) A lease of property,

(B) A written executory contract to purchase or lease property,

(C) An option to purchase or lease property or any interest therein, or

(D) An option to renew or extend a lease of property,

which is not a lien or security interest shall be treated as an interest in property.

(i) *Special rules*—(1) *Actual notice or knowledge.* For purposes of this subchapter, an organization shall be deemed for purposes of a particular transaction to have actual notice or knowledge of any fact from the time such fact is brought to the attention of the individual conducting such transaction, and in any event from the time such fact would have been brought to such individual's attention if the organization had exercised due diligence. An organization exercises due diligence if it maintains reasonable routines for communicating significant information to the person conducting the transaction and there is reasonable compliance with the routine. Due diligence does not require an individual acting for the organization to communicate information unless such communication is part of his regular duties or unless he has reason to know of the transaction and that the transaction would be materially affected by the information.

(2) *Subrogation.* Where, under local law, one person is subrogated to the rights of another with respect to a lien or interest, such person shall be subrogated to such rights for purposes of any lien imposed by section 6321 or 6324.

(3) *Disclosure of amount of outstanding lien.* If a notice of lien has been filed pursuant to subsection (f), the Secretary or his delegate is authorized to provide by regulations the extent to which, and the conditions under which, information as to the amount of the outstanding obligation secured by the lien may be disclosed.

V 41 164 AUG 23 76 UMI

[Sec. 6323 as amended by sec. 236 (a) and (c)(1), Rev. Act 1964 (78 Stat. 127); sec. 17(a), Act of July 5, 1966 (Public Law 89-493, 80 Stat. 263); sec. 101(a), Federal Tax Lien Act 1966 (80 Stat. 1125)]

PAR. 6. Section 25.6323-1 is amended to read as follows:

§ 25.6323-1 Validity and priority against certain persons.

For regulations concerning the validity of the lien imposed by section 6321 against certain persons, see §§ 301.6323(a)-1 through 301.6323(i)-1 of this chapter (Regulations on Procedure and Administration).

D. Part 301, Regulations on Procedure and Administration, of 26 CFR Chapter I is amended as follows:

PAR 7. Sections 301.6323 and 301.6323-1 are deleted, and immediately following § 301.6322, there are added the following new sections:

§ 301.6323(a) Statutory provisions; validity and priority against certain persons; purchasers, holders of security interests, mechanic's lienors, judgment lien creditors.

SEC. 6323. *Validity and priority against certain persons*—(a) *Purchasers, holders of security interests, mechanic's lienors, and judgment lien creditors.* The lien imposed by section 6321 shall not be valid as against any purchaser, holder of a security interest, mechanic's lienor, or judgment lien creditor until notice thereof which meets the requirements of subsection (f) has been filed by the Secretary or his delegate.

[Sec. 6323(a) as amended by sec. 236(c)(1), Rev. Act 1964 (78 Stat. 127); sec. 17(a), Act of July 5, 1966 (Public Law 89-493, 80 Stat. 263); sec. 101(a), Federal Tax Lien Act 1966 (80 Stat. 1125)]

§ 301.6323(a)-1 Purchasers, holders of security interests, mechanic's lienors, and judgment lien creditors.

(a) *Invalidity of lien without notice.* The lien imposed by section 6321 is not valid against any purchaser (as defined in paragraph (f) of § 301.6323(h)-1), holder of a security interest (as defined in paragraph (a) of § 301.6323(h)-1), mechanic's lienor (as defined in paragraph (b) of § 301.6323(h)-1), or judgment lien creditor (as defined in paragraph (g) of § 301.6323(h)-1) until a notice of lien is filed in accordance with § 301.6323(f)-1. Except as provided by section 6323, if a person becomes a purchaser, holder of a security interest, mechanic's lienor, or judgment lien creditor after a notice of lien is filed in accordance with § 301.6323(f)-1, the interest acquired by such person is subject to the lien imposed by section 6321.

(b) *Cross references.* For provisions relating to the protection afforded a security interest arising after tax lien filing, which interest is covered by a commercial transactions financing agreement, real property construction or improvement financing agreement, or an obligatory disbursement agreement, see §§ 301.6323(c)-1, 301.6323(c)-2, and 301.6323(c)-3, respectively. For provisions relating to the protection afforded to a security interest coming into existence by virtue of disbursements made before the 46th day after the date of tax lien filing, see § 301.6323(d)-1. For provisions relating to priority afforded to interest and certain other expenses with respect to a lien or security interest having priority over the lien imposed by section 6321, see § 301.6323(e)-1. For provisions relating to certain other interests arising after tax lien filing, see § 301.6323(b)-1.

§ 301.6323(b) Statutory provisions; validity and priority against certain persons; protection for certain interests even though notice filed.

SEC. 6323. *Validity and priority against certain persons.* • • •

(b) *Protection for certain interests even though notice filed.* Even though notice of a lien imposed by section 6321 has been filed, such lien shall not be valid—

(1) *Securities.* With respect to a security (as defined in subsection (h)(4))—

(A) As against a purchaser of such security who at the time of purchase did not have actual notice or knowledge of the existence of such lien; and

(B) As against a holder of a security interest in such security who, at the time such interest came into existence, did not have actual notice or knowledge of the existence of such lien.

(2) *Motor vehicles.* With respect to a motor vehicle (as defined in subsection (h)(3)), as against a purchaser of such motor vehicle, if—

(A) At the time of the purchase such purchaser did not have actual notice or knowledge of the existence of such lien, and

(B) Before the purchaser obtains such notice or knowledge, he has acquired possession of such motor vehicle and has not thereafter relinquished possession of such motor vehicle to the seller or his agent.

(3) *Personal property purchased at retail.* With respect to tangible personal property purchased at retail, as against a purchaser in the ordinary course of the seller's trade or business, unless at the time of such purchase such purchaser intends such purchase to (or knows such purchase will) hinder, evade, or defeat the collection of any tax under this title.

(4) *Personal property purchased in casual sale.* With respect to household goods, personal effects, or other tangible personal property described in section 6384(a) purchased (not for resale) in a casual sale for less than $250, as against the purchaser, but only if such purchaser does not have actual notice or knowledge (A) of the existence of such lien, or (B) that this sale is one of a series of sales.

(5) *Personal property subject to possessory lien.* With respect to tangible personal property subject to a lien under local law securing the reasonable price of the repair or improvement of such property, as against a holder of such a lien, if such holder is, and has been, continuously in possession of such property from the time such lien arose.

(6) *Real property tax and special assessment liens.* With respect to real property, as against a holder of a lien upon such property, if such lien is entitled under local law to priority over security interests in such property which are prior in time, and such lien secures payment of—

(A) A tax of general application levied by any taxing authority based upon the value of such property;

(B) A special assessment imposed directly upon such property by any taxing authority, if such assessment is imposed for the purpose of defraying the cost of any public improvement; or

(C) Charges for utilities or public services furnished to such property by the United States, a State or political subdivision thereof, or an instrumentality of any one or more of the foregoing.

(7) *Residential property subject to a mechanic's lien for certain repairs and improvements.* With respect to real property subject to a lien for repair or improvement of a personal residence (containing not more than four dwelling units) occupied by the owner of such residence, as against a mechanic's lienor, but only if the contract price on the contract with the owner is not more than $1,000.

(8) *Attorneys' liens.* With respect to a judgment or other amount in settlement of a claim or of a cause of action, as against an attorney who, under local law, holds a lien upon or a contract enforcible against such judgment or amount, to the extent of his reasonable compensation for obtaining such judgment or procuring such settlement, except that this paragraph shall not apply to any judgment or amount in settlement of a claim or of a cause of action against the United States to the extent that the United States offsets such judgment or amount against any liability of the taxpayer to the United States.

(9) *Certain insurance contracts.* With respect to a life insurance, endowment, or annuity contract, as against the organization which is the insurer under such contract, at any time—

(A) Before such organization had actual notice or knowledge of the existence of such lien;

(B) After such organization had such notice or knowledge, with respect to advances required to be made automatically to maintain such contract in force under an agreement entered into before such organization had such notice or knowledge; or

(C) After satisfaction of a levy pursuant to section 6332(b), unless and until the Secretary or his delegate delivers to such organization a notice, executed after the date of such satisfaction, of the existence of such lien.

(10) *Passbook loans.* With respect to a savings deposit, share, or other account, evidenced by a passbook, with an institution described in section 581 or 591, to the extent of any loan made by such institution without actual notice or knowledge of the existence of such lien, as against such institution, if such loan is secured by such account and if such institution has been continuously in possession of such passbook from the time the loan is made.

[Sec. 6323(b) as amended by sec. 101(a), Federal Tax Lien Act 1966 (80 Stat. 1125)]

§ 301.6323(b)-1 Protection for certain interests even though notice filed.

(a) *Securities*—(1) *In general.* Even though a notice of a lien imposed by section 6321 is filed in accordance with § 301.6323(f)-1, the lien is not valid with respect to a security (as defined in paragraph (d) of § 301.6323(h)-1) against—

(i) A purchaser (as defined in paragraph (f) of § 301.6323(h)-1) of the security who at the time of purchase did not have actual notice or knowledge (as defined in paragraph (a) of § 301.6323(i)-1) of the existence of the lien;

(ii) A holder of a security interest (as defined in paragraph (a) of § 301.6323(h)-1) in the security who did not have actual notice or knowledge (as defined in paragraph (a) of § 301.6323(i)-1) of the existence of the lien at the time the security interest came into existence or at the time such security interest was acquired from a previous holder for a consideration in money or money's worth; or

(iii) A transferee of an interest protected under subdivision (i) or (ii) of this subparagraph to the same extent the lien is invalid against his transferor.

For purposes of subdivision (iii) of this subparagraph, no person can improve his position with respect to the lien by reacquiring the interest from an intervening purchaser or holder of a security interest against whom the lien is invalid.

(2) *Examples.* The application of this paragraph may be illustrated by the following examples:

Example (1). On May 1, 1969, in accordance with § 301.6323(f)-1, a notice of lien is filed with respect to A's delinquent tax liability. On May 20, 1969, A sells 100 shares of common stock in X corporation to B, who, on the date of the sale, does not have actual notice or knowledge of the existence of the lien. Because B purchased the stock without actual notice or knowledge of the lien, under subdivision (i) of subparagraph (1) of this paragraph, the stock purchased by B is not subject to the lien.

Example (2). Assume the same facts as in example (1) except that on May 30, 1969, B sells the 100 shares of common stock in X corporation to C who on May 5, 1969, had actual notice of the existence of the tax lien against A. Because the X stock when purchased by B was not subject to the lien, under subdivision (iii) of subparagraph (1) of this paragraph, the stock purchased by C is not subject to the lien. C succeeds to B's rights, even though C had actual notice of the lien before B's purchase.

Example (3). On June 1, 1970, in accordance with § 301.6323(f)-1, a notice of lien is filed with respect to D's delinquent tax liability. D owns 20 $1,000 bonds issued by the Y company. On June 10, 1970, D obtains a loan from M bank for $5,000 using the Y company bonds as collateral. At the time the loan is made M bank does not have actual notice or knowledge of the existence of the tax lien. Because M bank did not have actual notice or knowledge of the lien when the security interest came into existence, under subdivision (ii) of subparagraph (1) of this paragraph, the tax lien is not valid against M bank to the extent of its security interest.

Example (4). Assume the same facts as in example (3) except that on June 19, 1970, M bank assigns the chose in action and its security interest to N, who had actual notice or knowledge of the existence of the lien on June 1, 1970. Because the security interest was not subject to the lien to the extent of M bank's security interest, the security interest held by N is to the same extent entitled to priority over the tax lien because N succeeds to M bank's rights. See subdivision (iii) of subparagraph (1) of this paragraph.

Example (5). On July 1, 1970, in accordance with § 301.6323(f)-1, a notice of lien is filed with respect to E's delinquent tax liability. E owns ten $1,000 bonds issued by the Y company. On July 5, 1970, E borrows $4,000 from F and delivers the bonds to F as collateral for the loan. At the time the loan is made, F has actual knowledge of the existence of the tax lien and, therefore, holds the security interest subject to the lien on the bonds. On July 10, 1970, F sells the security interest to G for $4,000 and delivers the Y company bonds pledged as collateral. G does not have actual notice or knowledge of the existence of the lien on July 10, 1970. Because G did not have actual notice or knowledge of the lien at the time he purchased the security interest, under subdivision (ii) of subparagraph (1) of this paragraph, the tax lien is not valid against G to the extent of his security interest.

Example (6). Assume the same facts as in example (5) except that, instead of purchasing the security interest from F on July 10, 1970, G lends $4,000 to F and takes a security interest in F's security interest in the bonds on that date. Because G became the holder of a security interest in a security interest after notice of lien was filed and does not directly have a security interest in a security, the security interest held by G is not entitled to a priority over the tax lien under the provisions of subparagraph (1) of this paragraph.

(b) *Motor vehicles*—(1) *In general.* Even though a notice of a lien imposed by section 6321 is filed in accordance with § 301.6323(f)-1, the lien is not valid against a purchaser (as defined in paragraph (f) of § 301.6323(h)-1) of a motor vehicle (as defined in paragraph (c) of § 301.6323(h)-1) if—

(i) At the time of the purchase, the purchaser did not have actual notice or knowledge (as defined in paragraph (a) of § 301.6323(i)-1) of the existence of the lien, and

(ii) Before the purchaser obtains such notice or knowledge, he has acquired actual possession of the motor vehicle and has not thereafter relinquished actual possession to the seller or his agent.

(2) *Examples.* The application of this paragraph may be illustrated by the following examples:

Example (1). A, a delinquent taxpayer against whom a notice of tax lien has been filed in accordance with § 301.6323(f)-1, sells his automobile (which qualifies as a motor vehicle under paragraph (c) of § 301.6323(h)-1) to B, an automobile dealer. B takes actual possession of the automobile and does not thereafter relinquish actual possession to the seller or his agent. Subsequent to his purchase, B learns of the existence of the tax lien against A. Even though notice of lien was filed before the purchase, the lien is not valid against B, because B did not know of the existence of the lien before the purchase and before acquiring actual possession of the vehicle.

Example (2). C is a wholesaler of used automobiles. A notice of lien has been filed with respect to C's delinquent tax liability in accordance with § 301.6323(f)-1. Subsequent to such filing, D, a used automobile dealer, purchases and takes actual possession of 20 automobiles (which qualify as motor vehicles under the provisions of paragraph (c) of § 301.6323(h)-1) from C at an auction and places them on his lot for sale. C does not reacquire possession of any of the automobiles. At the time of his purchase, D does not have actual notice or knowledge of the existence of the lien against C. Even though notice of lien was filed before D's purchase, the lien was not valid against D because D did not know of the existence of the lien before the purchase and before acquiring actual possession of the vehicles.

(3) *Cross reference.* For provisions relating to additional circumstances in which the lien imposed by section 6321 may not be valid against the purchaser of tangible personal property (including a motor vehicle) purchased at retail, see paragraph (c) of this section.

(c) *Personal property purchased at retail*—(1) *In general.* Even though a notice of a lien imposed by section 6321 is filed in accordance with § 301.6323(f)-1, the lien is not valid against a purchaser (as defined in paragraph (f) of § 301.6323(h)-1) of tangible personal property purchased at a retail sale (as defined in subparagraph (2) of this paragraph) unless at the time of purchase the purchaser intends the purchase to (or knows that the purchase will) hinder, evade, or defeat the collection of any tax imposed by the Internal Revenue Code of 1954.

(2) *Definition of retail sale.* For purposes of this paragraph, the term "retail sale" means a sale, made in the ordinary course of the seller's trade or business, of tangible personal property of which the seller is the owner. Such term includes a sale in customary retail quantities by a seller who is going out of business, but does not include a bulk sale or an auction sale in which goods are offered in quantities substantially greater than are customary in the ordinary course of the seller's trade or business or an auction sale of goods the owner of which is not in the business of selling such goods.

(3) *Example.* The application of this paragraph may be illustrated by the following example:

Example. A purchases a refrigerator from the M company, a retail appliance dealer. Prior to such purchase, a notice of lien was filed with respect to M's delinquent tax liability in accordance with § 301.6323(f)-1. At the time of the purchase A knows of the existence of the lien. However, A does not intend the purchase to hinder, evade, or defeat the collection of any internal revenue tax, and A does not have any reason to believe that the purchase will affect the collection of any internal revenue tax. Even though notice of lien was filed before the purchase, the lien is not valid against A because A in good faith purchased the refrigerator at retail in the ordinary course of the M company's business.

(d) *Personal property purchased in casual sale*—(1) *In general.* Even though a notice of a lien imposed by section 6321 is filed in accordance with § 301.6323(f)-1, the lien is not valid against a purchaser (as defined in § 301.6323(h)-1(f)) of household goods, personal effects, or other tangible personal property of a type described in § 301.6334-1 (which includes wearing apparel; school books; fuel, provisions, furniture, arms for personal use, livestock, and poultry (whether or not the seller is the head of a family); and books and tools of a trade, business, or profession (whether or not the trade, business, or profession of the seller)), purchased, other than for resale, in a casual sale for less than $250 (excluding interest and expenses described in § 301.6323(e)-1). For purposes of this paragraph, a casual sale is a sale not made in the ordinary course of the seller's trade or business.

(2) *Limitation.* This paragraph applies only if the purchaser does not have actual notice or knowledge (as defined in paragraph (a) of § 301.6323(i)-1)—

V 41 164
AUG 23 76
UMI

(i) Of the existence of the tax lien, or
(ii) That the sale is one of a series of sales.

For purposes of subdivision (ii) of this subparagraph, a sale is one of a series of sales if the seller plans to dispose of, in separate transactions, substantially all of his household goods, personal effects, and other tangible personal property described in § 301.6334–1.

(3) *Examples.* The application of this paragraph may be illustrated by the following examples:

Example (1). A, an attorney's widow, sells a set of law books for $200 to B, for B's own use. Prior to the sale a notice of lien was filed with respect to A's delinquent tax liability in accordance with § 301.6323(f)–1. B has no actual notice or knowledge of the tax lien. In addition, B does not know that the sale is one of a series of sales. Because the sale is a casual sale for less than $250 and involves books of a profession (tangible personal property of a type described in § 301.6334–1, irrespective of the fact that A has never engaged in the legal profession), the tax lien is not valid against B even though a notice of lien was filed prior to the time of B's purchase.

Example (2). Assume the same facts as in example (1) except that B purchases the books for resale in his second-hand bookstore. Because B purchased the books for resale, he purchased the books subject to the lien.

Example (3). In an advertisement appearing in a local newspaper, G indicates that he is offering for sale a lawn mower, a used television set, a desk, a refrigerator, and certain used dining room furniture. In response to the advertisement, H purchases the dining room furniture for $200. H does not receive any information which would impart notice of a lien, or that the sale is one of a series of sales, beyond the information contained in the advertisement. Prior to the sale a notice of lien was filed with respect to G's delinquent tax liability in accordance with § 301.6323(f)–1. Because H had no actual notice or knowledge that substantially all of G's household goods were being sold, or that the sale is one of a series of sales and because the sale is a casual sale for less than $250, H does not purchase the dining room furniture subject to the lien. The household goods are of a type described in § 301.6334–1(a)(2) irrespective of whether G is the head of a family or whether all such household goods offered for sale exceed $500 in value.

(e) *Personal property subject to possessory liens.* Even though a notice of a lien imposed by section 6321 is filed in accordance with § 301.6323(f)–1, the lien is not valid against a holder of a lien on tangible personal property which under local law secures the reasonable price of the repair or improvement of the property if the property is, and has been, continuously in the possession of the holder of the lien from the time the possessory lien arose. For example, if local law gives an automobile repairman the right to retain possession of an automobile he has repaired as security for payment of the repair bill and the repairman retains continuous possession of the automobile until his lien is satisfied, a tax lien filed in accordance with § 301.6323(f)(1) which has attached to the automobile will not be valid to the extent of the reasonable price of the repairs. It is immaterial that the notice of tax lien was filed before the repairman undertook his work or that he knew of the lien before undertaking the work.

(f) *Real property tax and special assessment liens*—(1) *In general.* Even though a notice of a lien imposed by section 6321 is filed in accordance with § 301.6323(f)–1, the lien is not valid against the holder of another lien upon the real property (regardless of when such other lien arises), if such other lien is entitled under local law to priority over security interests in real property which are prior in time and if such other lien on real property secures payment of—

(i) A tax of general application levied by any taxing authority based upon the value of the property;

(ii) A special assessment imposed directly upon the property by any taxing authority, if the assessment is imposed for the purpose of defraying the cost of any public improvement; or

(iii) Charges for utilities or public services furnished to the property by the United States, a State or political subdivision thereof, or an instrumentality of any one or more of the foregoing.

(2) *Examples.* The application of this paragraph may be illustrated by the following examples:

Example (1). A owns Blackacre in the city of M. A notice of lien affecting Blackacre is filed in accordance with § 301.6323(f)–1. Subsequent to the filing of the notice of lien, the city of M acquires a lien against Blackacre to secure payment of real estate taxes. Such taxes are levied against all property in the city in proportion to the value of the property. Under local law, the holder of a lien for real property taxes is entitled to priority over a security interest in real property even though the security interest is prior in time. Because the real property tax lien held by the city of M secures payment of a tax of general application and is entitled to priority over security interests which are prior in time, the lien held by the city of M is entitled to priority over the Federal tax lien with respect to Blackacre.

Example (2). B owns Whiteacre in N county. A notice of lien affecting Whiteacre is filed in accordance with § 301.6323(f)–1. Subsequent to the filing of the notice of lien, N county constructs a sidewalk, paves the street, and installs water and sewer lines adjacent to Whiteacre. In order to defray the cost of these improvements, N county imposes upon Whiteacre a special assessment which under local law results in a lien upon Whiteacre that is entitled to priority over security interests that are prior in time. Because the special assessment lien is (i) entitled under local law to priority over security interests which are prior in time, and (ii) imposed directly upon real property to defray the cost of a public improvement, the special assessment lien has priority over the Federal tax lien with respect to Whiteacre.

Example (3). C owns Greenacre in town O. A notice of lien affecting Greenacre is filed in accordance with § 301.6323(f)–1. Town O furnishes water and electricity to Greenacre and periodically collects a fee for these services. Subsequent to the filing of the notice of lien, town O supplies water and electricity to Greenacre, and C fails to pay the charges for these services. Under local law, town O acquires a lien to secure charges for the services, and this lien has priority over security interests which are prior in time. Because the lien of town O (1) is for services furnished to the real property and (ii) has priority over earlier security interests, town O's lien has priority over the Federal tax lien with respect to Greenacre.

(g) *Residential property subject to a mechanic's lien for certain repairs and improvements*—(1) *In general.* Even though a notice of a lien imposed by section 6321 is filed in accordance with § 301.6323(f)–1, the lien is not valid against a mechanic's lienor (as defined in § 301.6323(h)–1(b)) who holds a lien for the repair or improvement of a personal residence if—

(i) The residence is occupied by the owner and contains no more than four dwelling units, and

(ii) The contract price on the prime contract with the owner for the repair or improvement (excluding interest and expenses described in § 301.6323(e)–1) is not more than $1,000.

For purposes of subdivision (ii) of this subparagraph, the amounts of subcontracts under the prime contract with the owner are not to be taken into consideration for purposes of computing the $1,000 prime contract price. It is immaterial that the notice of tax lien was filed before the contractor undertakes his work or that he knew of the lien before undertaking the work.

(2) *Examples.* The application of this paragraph may be illustrated by the following examples:

Example (1). A owns a building containing four apartments, one of which he occupies as his personal residence. A notice of lien which affects the building is filed in accordance with § 301.6323(f)–1. Thereafter, A enters into a contract with B in the amount of $800, which includes labor and materials, to repair the roof of the building. B purchases roofing shingles from C for $300. B completes the work and A fails to pay B the agreed amount. In turn, B fails to pay C for the shingles. Under local law, B and C acquire mechanic's liens on A's building. Because the contract price on the prime contract with A is not more than $1,000 and under local law B and C acquire mechanic's liens on A's building, the liens of B and C have priority over the Federal tax lien.

Example (2). Assume the same facts as in example (1), except that the amount of the prime contract between A and B is $1,100. Because the amount of the prime contract with the owner, A, is in excess of $1,000, the tax lien has priority over the entire amount of each of the mechanic's liens of B and C, even though the amount of the contract between B and C is $300.

Example (3). Assume the same facts as in example (1), except that A and B do not agree in advance upon the amount due under the prime contract but agree that B will perform the work for the cost of materials and labor plus 10 percent of such cost. When the work is completed, it is determined that the total amount due is $850. Because the prime contract price is not more than $1,000 and under local law B and C acquire mechanic's liens on A's residence, the liens of B and C have priority over the Federal tax lien.

(h) *Attorneys' liens*—(1) *In general.* Even though notice of a lien imposed by section 6321 is filed in accordance with § 301.6323(f)–1, the lien is not valid against an attorney who, under local law, holds a lien upon, or a contract enforceable against, a judgment or other amount

in settlement of a claim or of a cause of action. The priority afforded an attorney's lien under this paragraph shall not exceed the amount of the attorney's reasonable compensation for obtaining the judgment or procuring the settlement. For purposes of this paragraph, reasonable compensation means the amount customarily allowed under local law for an attorney's services for litigating or settling a similar case or administrative claim. However, reasonable compensation shall be determined on the basis of the facts and circumstances of each individual case. It is immaterial that the notice of tax lien is filed before the attorney undertakes his work or that the attorney knows of the tax lien before undertaking his work. This paragraph does not apply to an attorney's lien which may arise from the defense of a claim or cause of action against a taxpayer except to the extent such lien is held upon a judgment or other amount arising from the adjudication or settlement of a counterclaim in favor of the taxpayer. In the case of suits against the taxpayer, see § 301.6325–1(d)(2) for rules relating to the subordination of the tax lien to facilitate tax collection.

(2) *Claim or cause of action against the United States.* Paragraph (h)(1) of this section does not apply to an attorney's lien with respect to—

(i) Any judgment or other fund resulting from the successful litigation or settlement of an administrative claim or cause of action against the United States to the extent that the United States, under any legal or equitable right, offsets its liability under the judgment or settlement against any liability of the taxpayer to the United States, or

(ii) Any amount credited against any liability of the taxpayer in accordance with section 6402.

(3) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example (1). A notice of lien is filed against A in accordance with § 301.6323(f)–1. Subsequently, A is struck by an automobile and retains B, an attorney to institute suit on A's behalf against the operator of the automobile. B knows of the tax lien before he begins his work. Under local law, B is entitled to a lien upon any recovery in order to secure payment of his fee. A is awarded damages of $10,000. B charges a fee of $3,000 which is the fee customarily allowed under local law in similar cases and which is found to be reasonable under the circumstances of this particular case. Because, under local law, B holds a lien for the amount of his reasonable compensation for obtaining the judgment, B's lien has priority over the Federal tax lien.

Example (2). Assume the same facts as in example (1), except that before suit is instituted A and the owner of the automobile settle out of court for $7,500. B charges a reasonable and customary fee of $1,800 for procuring the settlement and under local law holds a lien upon the settlement in order to secure payment of the fee. Because, under local law, B holds a lien for the amount of his reasonable compensation for obtaining the settlement, B has priority over the Federal tax lien.

Example (3). In accordance with § 301.6323(f)–1, a notice of lien in the amount of $8,000 is filed against C, a contractor. Subsequently C retains D, an attorney, to initiate legal proceedings to recover the amount allegedly due him for construction work he has performed for the United States. C and D enter into an agreement which provides that D will receive a reasonable and customary fee of $2,500 as compensation for his services. Under local law, the agreement will give rise to a lien which is enforceable by D against any amount recovered in the suit. C is successful in the suit and is awarded $10,000. D claims $2,500 of the proceeds as his fee. The United States, however, exercises its right of set-off and applies $8,000 of the $10,000 award to satisfy C's tax liability. Because the $10,000 award resulted from the successful litigation of a cause of action against the United States, B's contract for attorney's fees is not enforceable against the amount recovered to the extent the United States offsets its liability under the judgment against C's tax liability. It is immaterial that D had no notice or knowledge of the tax lien at the time he began work on the case.

(i) *Certain insurance contracts*—(1) *In general.* Even though a notice of a lien imposed by section 6321 is filed in accordance with § 301.6323(f)–1, the lien is not valid with respect to a life insurance, endowment, or annuity contract, against an organization which is the insurer under the contract, at any time—

(i) Before the insuring organization has actual notice or knowledge (as defined in paragraph (a) of § 301.6323(1)–1) of the existence of the tax lien,

(ii) After the insuring organization has actual notice or knowledge of the lien (as defined in paragraph (a) of § 301.6323(1)–1), with respect to advances (including contractual interest thereon as provided in paragraph (a) of § 301.6323(e)–1) required to be made automatically to maintain the contract in force under an agreement entered into before the insuring organization had such actual notice or knowledge, or

(iii) After the satisfaction of a levy pursuant to section 6332(b), unless and until the district director delivers to the insuring organization a notice (for example, another notice of levy, a letter, etc.), executed after the date of such satisfaction, that the lien exists.

Delivery of the notice described in subdivision (iii) of this subparagraph may be made by any means, including regular mail, and delivery of the notice shall be effective only from the time of actual receipt of the notification by the insuring organization. The provisions of this paragraph are applicable to matured as well as unmatured insurance contracts.

(2) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example (1). On May 1, 1964, the X insurance company issues a life insurance policy to A. On June 1, 1970, a tax assessment is made against A, and on June 2, 1970, a notice of lien with respect to the assessment is filed in accordance with § 301.6323(f)–1. On July 1, 1970, without actual notice or knowledge of the tax lien, the X company makes a "policy loan" to A. Under subparagraph (1)(i) of this paragraph, the loan, including interest (in accordance with the provisions of paragraph (a) of § 301.6323(e)–1), will have priority over the tax lien because X company did not have actual notice or knowledge of the tax lien at the time the policy loan was made.

Example (2). On May 1, 1964, B enters into a life insurance contract with the Y insurance company. Under one of the provisions of the contract, in the event a premium is not paid, Y is to advance out of the cash loan value of the policy the amount of an unpaid premium in order to maintain the contract in force. The contract also provides for interest on any advances so made. On June 1, 1971, a tax assessment is made against B, and on June 2, 1971, in accordance with section 6323(f)–1, a notice of lien is filed. On July 1, 1971, B fails to pay the premium due on that date, and Y makes an automatic premium loan to keep the policy in force. At the time the automatic premium loan is made, Y had actual knowledge of the tax lien. Under subparagraph (1)(ii) of this paragraph, the lien is not valid against Y with respect to the advance (and the contractual interest thereon), because the advance was required to be made automatically under an agreement entered into before Y had actual notice or knowledge of the tax lien.

Example (3). On May 1, 1964, C enters into a life insurance contract with the Z insurance company. On January 4, 1971, an assessment is made against C for $5,000 unpaid income taxes, and on January 11, 1971, in accordance with § 301.6323(f)–1, a notice of lien is filed. On January 29, 1971, a notice of levy with respect to C's delinquent tax is served on Z company. The amount which C could have had advanced to him from Z company under the contract on the 90th day after service of the notice of levy on Z company is $2,000. The Z company pays $2,000 pursuant to the notice of levy, thereby satisfying the levy upon the contract in accordance with section 6332(b). On February 1, 1973, Z company advances $500 to C, which is the increment in policy loan value since satisfaction of the levy of January 29, 1971. On February 5, 1973, a new notice of levy for the unpaid balance of the delinquent taxes, executed after the first levy was satisfied, is served upon Z company. Because the new notification was not received by Z company until after the policy loan was made, under paragraph (1)(iii) of this paragraph, the tax lien is not valid against Z company with respect to the policy loan (including interest thereon in accordance with paragraph (a) of § 301.6323(e)–1).

Example (4). On June 1, 1973, a tax assessment is made against D and on June 2, 1973, in accordance with § 301.6323(f)–1, a notice of lien with respect to the assessment is filed. On July 2, 1973, D executes an assignment of his rights, as the insured, under an insurance contract to M bank as security for a loan. M bank holds its security interest subject to the lien because it is not an insurer entitled to protection under section 6323(b)(9) and did not become a holder of the security interest prior to the filing of the notice of lien for purposes of section 6323(a). It is immaterial that a notice of levy had not been served upon the insurer before the assignment to M bank was made.

(j) *Passbook loans*—(1) *In general.* Even though a notice of a lien imposed by section 6321 is filed in accordance with § 301.6323(f)–1, the lien is not valid against an institution described in section 581 or 591 to the extent of any loan made by the institution which is secured by a savings deposit, share, or other account evidenced by a passbook (as defined in subparagraph (2) of this para-

V 41 1164
AUG 23 76
UMI

graph) if the institution has been continuously in possession of the passbook from the time the loan is made. This paragraph applies only to a loan made without actual notice or knowledge (as defined in paragraph (a) of § 301.6323 (i)–1) of the existence of the lien. Even though an original passbook loan is made without actual notice or knowledge of the existence of the lien, this paragraph does not apply to any additional loan made after knowledge of the lien is acquired by the institution even if it continues to retain the passbook from the time the original passbook loan is made.

(2) *Definition of passbook.* For purposes of this paragraph, the term "passbook" includes—

(i) Any tangible evidence of a savings deposit, share, or other account which, when in the possession of the bank or other savings institution, will prevent a withdrawal from the account to the extent of the loan balance, and

(ii) Any procedure or system, such as an automatic data processing system, the use of which by the bank or other savings institution will prevent a withdrawal from the account to the extent of the loan balance.

(3) *Example.* On June 1, 1970, a tax assessment is made against A and on June 2, 1970, a notice of lien with respect to the assessment is filed in accordance with § 301.6323(f)–1. A owns a savings account at the M bank with a balance of $1,000. On June 10, 1970, A borrows $300 from the M bank using the savings account as security therefor. The M bank is continuously in possession of the passbook from the time the loan is made and does not have actual notice or knowledge of the lien at the time of the loan. The tax lien is not valid against M bank with respect to the passbook loan of $300 and accrued interest and expenses entitled to priority under § 301.6323(e)–1. Upon service of a notice of levy, the M bank must pay over the savings account balance in excess of the amount of its protected interest in the account as determined on the date of levy.

§ 301.6323(c) Statutory provisions; validity and priority against certain persons; protection for certain commercial transactions financing agreements, etc.

SEC. 6323. *Validity and priority against certain persons.* • • •

(c) *Protection for certain commercial transactions financing agreements, etc.*—(1) *In general.* To the extent provided in this subsection, even though notice of a lien imposed by section 6321 has been filed, such lien shall not be valid with respect to a security interest which came into existence after tax lien filing but which—

(A) Is in qualified property covered by the terms of a written agreement entered into before tax lien filing and constituting—

(i) A commercial transactions financing agreement,

(ii) A real property construction or improvement financing agreement, or

(iii) An obligatory disbursement agreement, and

(B) Is protected under local law against a judgment lien arising, as of the time of tax lien filing, out of an unsecured obligation.

(2) *Commercial transactions financing agreement.* For purposes of this subsection—

(A) *Definition.* The term "commercial transactions financing agreement" means an agreement (entered into by a person in the course of his trade or business)—

(i) To make loans to the taxpayer to be secured by commercial financing security acquired by the taxpayer in the ordinary course of his trade or business, or

(ii) To purchase commercial financing security (other than inventory) acquired by the taxpayer in the ordinary course of his trade or business;

but such an agreement shall be treated as coming within the term only to the extent that such loan or purchase is made before the 46th day after the date of tax lien filing or (if earlier) before the lender or purchaser had actual notice or knowledge of such tax lien filing.

(B) *Limitation on qualified property.* The term "qualified property", when used with respect to a commercial transactions financing agreement, includes only commercial financing security acquired by the taxpayer before the 46th day after the date of tax lien filing.

(C) *Commercial financing security defined.* The term "commercial financing security" means (i) paper of a kind ordinarily arising in commercial transactions, (ii) accounts receivable, (iii) mortgages on real property, and (iv) inventory.

(D) *Purchaser treated as acquiring security interest.* A person who satisfies subparagraph (A) by reason of clause (ii) thereof shall be treated as having acquired a security interest in commercial financing security.

(3) *Real property construction or improvement financing agreement.* For purposes of this subsection—

(A) *Definition.* The term "real property construction or improvement financing agreement" means an agreement to make cash disbursements to finance—

(i) The construction or improvement of real property,

(ii) A contract to construct or improve real property, or

(iii) The raising or harvesting of a farm crop or the raising of livestock or other animals.

For purposes of clause (iii), the furnishing of goods and services shall be treated as the disbursement of cash.

(B) *Limitation on qualified property.* The term "qualified property", when used with respect to a real property construction or improvement financing agreement, includes only—

(i) In the case of subparagraph (A)(i), the real property with respect to which the construction or improvement has been or is to be made,

(ii) In the case of subparagraph (A)(ii), the proceeds of the contract described therein, and

(iii) In the case of subparagraph (A)(iii), property subject to the lien imposed by section 6321 at the time of tax lien filing and the crop or the livestock or other animals referred to in subparagraph (A)(iii).

(4) *Obligatory disbursement agreement.* For purposes of this subsection—

(A) *Definition.* The term "obligatory disbursement agreement" means an agreement (entered into by a person in the course of his trade or business) to make disbursements, but such an agreement shall be treated as coming within the term only to the extent of disbursements which are required to be made by reason of the intervention of the rights of a person other than the taxpayer.

(B) *Limitation on qualified property.* The term "qualified property", when used with respect to an obligatory disbursement agreement, means property subject to the lien imposed by section 6321 at the time of tax lien filing and (to the extent that the acquisition is directly traceable to the disbursements referred to in subparagraph (A)) property acquired by the taxpayer after tax lien filing.

(C) *Special rules for surety agreements.* Where the obligatory disbursement agreement is an agreement insuring the performance of a contract between the taxpayer and another person—

(i) The term "qualified property" shall be treated as also including the proceeds of the contract the performance of which was insured, and

(ii) If the contract the performance of which was insured was a contract to construct or improve real property, to produce goods, or to furnish services, the term "qualified property" shall be treated as also including any tangible personal property used by the taxpayer in the performance of such insured contract.

[Sec. 6323(c) as amended by sec. 101(a), Federal Tax Lien Act 1966 (80 Stat. 1125)]

§ 301.6323(c)–1 Protection for commercial transactions financing agreements.

(a) *In general.* Even though a notice of a lien imposed by section 6321 is filed in accordance with § 301.6323(f)–1, the lien is not valid with respect to a security interest which:

(1) Comes into existence after the tax lien filing,

(2) Is in qualified property covered by the terms of a commercial transactions financing agreement entered into before the tax lien filing, and

(3) Is protected under local law against a judgment lien arising, as of the time of the tax lien filing, out of an unsecured obligation.

See paragraphs (a) and (e) of § 301.6323 (h)–1 for definitions of the terms "security interest" and "tax lien filing," respectively. For purposes of this section, a judgment lien is a lien held by a judgment lien creditor as defined in paragraph (g) of § 301.6323(h)–1.

(b) *Commercial transactions financing agreement.* For purposes of this section, the term "commercial transactions financing agreement" means a written agreement entered into by a person in the course of his trade or business—

(1) To make loans to the taxpayer (whether or not at the option of the person agreeing to make such loans) to be secured by commercial financing security acquired by the taxpayer in the ordinary course of his trade or business, or

(2) To purchase commercial financing security, other than inventory, acquired by the taxpayer in the ordinary course of his trade or business.

Such an agreement qualifies as a commercial transactions financing agreement only with respect to loans or purchases made under the agreement before (i) the 46th day after the date of tax lien filing or, (ii) the time when the lender or purchaser has actual notice or knowledge (as defined in paragraph (a) of § 301.6323(i)–1) of the tax lien filing, if earlier. For purposes of this paragraph, a loan or purchase is considered to have been made in the course of the lender's or purchaser's trade or business if such person is in the business of financing commercial transactions (such as a bank or commercial factor) or if the agreement is incidental to the conduct of such person's trade or business. For example, if a manufacturer finances the accounts receivable of one of his customers, he is considered to engage in such financing in the course of his trade or business. The extent of the priority of the lender or purchaser over the tax lien is the amount of his disbursements made before the 46th day after the date the notice of tax lien is filed, or made before the day (before such 46th day) on which the lender or purchaser has actual notice or knowledge of the filing of the notice of the tax lien.

(c) *Commercial financing security.* (1) *In general.* The term "commercial financing security" means—

(i) Paper of a kind ordinarily arising in commercial transactions,

(ii) Accounts receivable (as defined in subparagraph (2) of this paragraph),

(iii) Mortgages on real property, and

(iv) Inventory.

For purposes of this subparagraph, the term "paper of a kind ordinarily arising in commercial transactions" in general includes any written document customarily used in commercial transactions. For example, such written documents include paper giving contract rights (as defined in subparagraph (2) of this paragraph), chattel paper, documents of title to personal property, and negotiable instruments or securities. The term "commercial financing security" does not include general intangibles such as patents or copyrights. A mortgage on real estate (including a deed of trust, contract for sale, and similar instrument) may be commercial financing security if the taxpayer has an interest in the mortgage as a mortgagee or assignee. The term "commercial financing security" does not include a mortgage where the taxpayer is the mortgagor of realty owned by him. For purposes of this subparagraph, the term "inventory" includes raw materials and goods in process as well as property held by the taxpayer primarily for sale to customers in the ordinary course of his trade or business.

(2) *Definitions.* For purposes of §§ 301.6323(d)–1, 301.6323(h)–1 and this section—

(i) A contract right is any right to payment under a contract not yet earned by performance and not evidenced by an instrument or chattel paper, and

(ii) An account receivable is any right to payment for goods sold or leased or for services rendered which is not evidenced by an instrument or chattel paper.

(d) *Qualified property.* For purposes of paragraph (a) of this section, qualified property consists solely of commercial financing security acquired by the taxpayer-debtor before the 46th day after the date of tax lien filing: Commercial financing security acquired before such day may be qualified property even though it is acquired by the taxpayer after the lender received actual notice or knowledge of the filing of the tax lien. For example, although the receipt of actual notice or knowledge of the filing of the notice of the tax lien has the effect of ending the period within which protected disbursements may be made to the taxpayer, property which is acquired by the taxpayer after the lender receives actual notice or knowledge of such filing and before such 46th day, which otherwise qualifies as commercial financing security, becomes commercial financing security to which the priority of the lender extends for loans made before he received the actual notice or knowledge. An account receivable (as defined in paragraph (c)(2)(ii) of this section) is acquired by a taxpayer at the time, and to the extent, a right to payment is earned by performance. Chattel paper, documents of title, negotiable instruments, securities, and mortgages on real estate are acquired by a taxpayer when he obtains rights in the paper or mortgage. Inventory is acquired by the taxpayer when title passes to him. A contract right (as defined in paragraph (c)(2)(i) of this section) is acquired by a taxpayer when the contract is made. Identifiable proceeds, which arise from the collection or disposition of qualified property by the taxpayer, are considered to be acquired at the time such qualified property is acquired if the secured party has a continuously perfected security interest in the proceeds under local law. The term "proceeds" includes whatever is received when collateral is sold, exchanged, or collected. For purposes of this paragraph, the term "identifiable proceeds" does not include money, checks and the like which have been commingled with other cash proceeds. Property acquired by the taxpayer after the 45th day following tax lien filing, by the expenditure of proceeds, is not qualified property.

(e) *Purchaser treated as acquiring security interest.* A person who purchases commercial financing security, other than inventory, pursuant to a commercial transactions financing agreement is treated, for purposes of this section, as having acquired a security interest in the commercial financing security. In the case of a bona fide purchase at a discount, a purchaser of commercial financing security who satisfies the requirements of this section has priority over the tax lien to the full extent of the security.

(f) *Examples.* The provisions of this section may be illustrated by the following examples:

Example (1). (i) On June 1, 1970, a tax is assessed against M, a tool manufacturer, with respect to his delinquent tax liability. On June 15, 1970, M enters into a written financing agreement with X, a bank. The agreement provides that, in consideration of such sums as X may advance to M, X is to have a security interest in all of M's presently owned and subsequently acquired commercial paper, accounts receivable, and inventory (including inventory in the manufacturing stages and raw materials). On July 6, 1970, notice of the tax lien is filed in accordance with § 301.6323(f)–1. On August 3, 1970, without actual notice or knowledge of the tax lien filing, X advances $10,000 to M. On August 5, 1970, M acquires additional inventory through the purchase of raw materials. On August 20, 1970, M has accounts receivable, arising from the sale of tools, amounting to $5,000. Under local law, X's security interest arising by reason of the $10,000 advance on August 3, 1970, has priority, with respect to the raw materials and accounts receivable, over a judgment lien against M arising July 6, 1970 (the date of tax lien filing) out of an unsecured obligation.

(ii) Because the $10,000 advance was made before the 46th day after the tax lien filing, and the accounts receivable in the amount of $5,000 and the raw materials were acquired by M before such 46th day, X's $10,000 security interest in the accounts receivable and the inventory has priority over the tax lien. The priority of X's security interest also extends to the proceeds, received on or after the 46th day after the tax lien filing, from the liquidation of the accounts receivable and inventory held by M on August 20, 1970, if X has a continuously perfected security interest in identifiable proceeds under local law. However, the priority of X's security interest will not extend to other property acquired with such proceeds.

Example (2). Assume the same facts as in example (1) except that on July 15, 1970, X has actual knowledge of the tax lien filing. Because an agreement does not qualify as a commercial transactions financing agreement when a disbursement is made after tax lien filing with actual knowledge of the filing, X's security interest will not have priority over the tax lien with respect to the $10,000 advance made on August 3, 1970.

Example (3). Assume the same facts as in example (1) except that, instead of additional inventory, on August 5, 1970, M acquires an account receivable as the result of the sale of machinery which M no longer needs in his business. Even though the account receivable was acquired by taxpayer M before the 46th day after tax lien filing, the tax lien will have priority over X's security interest arising in the account receivable pursuant to the earlier written agreement because the account receivable was not acquired by the taxpayer in the ordinary course of his trade or business.

Example (4). Pursuant to a written agreement with the N Manufacturing Company entered into on January 4, 1971, Y, a commercial factor, purchases the accounts receivable arising out of N's regular sales to its customers. On November 1, 1971, in accordance with § 301.6323(f)–1, a notice of lien is filed with respect to N's delinquent tax liability. On December 6, 1971, Y, without actual notice or knowledge of the tax lien filing, purchases all of the accounts receivable resulting from N's November 1971 sales. Y has taken appropriate steps under local law so that the December 6, 1971, purchase is protected against a judgment lien arising November 1, 1971 (the date of tax lien filing) out of an unsecured obligation. Because the purchaser of commercial financing security, other than inventory, is treated as having acquired a security interest in commercial financing security, and because Y otherwise meets the requirements of this section, the tax lien is not valid with respect to Y's December 6, 1971, purchase of N's accounts receivable.

§ 301.6323(c)–2 Protection for real property construction or improvement financing agreements.

(a) *In general.* Even though a notice of a lien imposed by section 6321 is filed in accordance with § 301.6323(f)–1, the lien is not valid with respect to a security interest which:

V41164 AUG 23 76 UMI

(1) Comes into existence after the tax lien filing,

(2) Is in qualified property covered by the terms of a real property construction or improvement financing agreement entered into before the tax lien filing, and

(3) Is protected under local law against a judgment lien arising, as of the time of tax lien filing, out of an unsecured obligation.

For purposes of this section, it is immaterial that the holder of the security interest had actual notice or knowledge of the lien at the time disbursements are made pursuant to such an agreement. See paragraphs (a) and (e) of § 301.6323(h)–1 for general definitions of the terms "security interest" and "tax lien filing." For purposes of this section, a judgment lien is a lien held by a judgment lien creditor as defined in paragraph (g) of § 301.6323(h)–1.

(b) *Real property construction or improvement financing agreement.* For purposes of this section, the term "real property construction or improvement financing agreement" means any written agreement to make cash disbursements (whether or not at the option of the party agreeing to make such disbursements):

(1) To finance the construction, improvement, or demolition of real property if the agreement provides for a security interest in the real property with respect to which the construction, improvement, or demolition has been or is to be made;

(2) To finance a contract to construct or improve, or demolish real property if the agreement provides for a security interest in the proceeds of the contract; or

(3) To finance the raising or harvesting of a farm crop or the raising of livestock or other animals if the agreement provides for a security interest in any property subject to the lien imposed by section 6321 at the time of tax lien filing, in the crop raised or harvested, or in the livestock or other animals raised.

For purposes of subparagraphs (1) and (2) of this paragraph, construction or improvement may include demolition. For purposes of any agreement described in subparagraph (3) of this paragraph, the furnishing of goods and services is treated as the disbursement of cash.

(c) *Qualified property.* For purposes of this section, the term "qualified property" includes only—

(1) In the case of an agreement described in paragraph (b)(1) of this section, the real property with respect to which the construction or improvement has been or is to be made;

(2) In the case of an agreement described in paragraph (b)(2) of this section, the proceeds of the contract to construct or improve real property; or

(3) In the case of an agreement described in paragraph (b)(3) of this section, property subject to the lien imposed by section 6321 at the time of tax lien filing, the farm crop raised or harvested, or the livestock or other animals raised.

(d) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example (1). A, in order to finance the construction of a dwelling on a lot owned by him, mortgages the property to B. The mortgage, executed January 4, 1971, includes an agreement that B will make cash disbursements to A as the construction progresses. On February 1, 1971, in accordance with § 301.6323(f)–1, a notice of lien is filed with respect to A's delinquent tax liability. A continues the construction, and B makes cash disbursements on June 10, 1971, and December 10, 1971. Under local law B's security interest arising by virtue of the disbursements is protected against a judgment lien arising February 1, 1971 (the date of tax lien filing) out of an unsecured obligation. Because B is the holder of a security interest coming into existence by reason of cash disbursements made pursuant to a written agreement, entered into before tax lien filing, to make cash disbursements to finance the construction of real property, and because B's security interest is protected, under local law, against a judgment lien arising as of the time of tax lien filing out of an unsecured obligation, B's security interest has priority over the tax lien.

Example (2). (i) C is awarded a contract for the demolition of several buildings. On March 3, 1969, C enters into a written agreement with D which provides that D will make cash disbursements to finance the demolition and also provides that repayment of the disbursements is secured by any sums due C under the contract. On April 1, 1969, in accordance with § 301.6323(f)–1, a notice of lien is filed with respect to C's delinquent tax liability. With actual notice of the tax lien, D makes cash disbursements to C on August 1, September 1, and October 1, 1969. Under local law D's security interest in the proceeds of the contract with respect to the disbursements is entitled to priority over a judgment lien arising on April 1, 1969 (the date of tax lien filing) out of an unsecured obligation.

(ii) Because D's security interest arose by reason of disbursements made pursuant to a written agreement, entered into before tax lien filing, to make cash disbursements to finance a contract to demolish real property, and because D's security interest is valid under local law against a judgment lien arising as of the time of tax lien filing out of an unsecured obligation, the tax lien is not valid with respect to D's security interest in the proceeds of the demolition contract.

Example (3). Assume the same facts as in example (2) and, in addition, assume that, as further security for the cash disbursements, the March 3, 1969 agreement also provides for a security interest in all of C's demolition equipment. Because the protection of the security interest arising from the disbursements made after tax lien filing under the agreement is limited under section 6323(c)(3) to the proceeds of the demolition contract and because, under the circumstances, the security interest in the equipment is not otherwise protected under section 6323, the tax lien will have priority over D's security interest in the equipment.

Example (4). (i) On January 2, 1969, F and G enter into a written agreement, whereby F agrees to provide G with cash disbursements, seed, fertilizer, and insecticides as needed by G, in order to finance the raising and harvesting of a crop on a farm owned by G. Under the terms of the agreement F is to have a security interest in the crop, the farm, and all other property then owned or thereafer acquired by G. In accordance with § 301.6323(f)–1, on January 10, 1969, a notice of lien is filed with respect to G's delinquent tax liability. On March 3, 1969, with actual notice of the tax lien, F makes a cash disbursement of $5,000 to G and furnishes him seed, fertilizer, and insecticides having a value of $10,000. Under local law F's security interest, coming into existence by reason of the cash disbursement and the furnishing of goods, has priority over a judgment lien arising January 10, 1969 (the date of tax lien filing) out of an unsecured obligation.

(ii) Because F's security interest arose by reason of a disbursement (including the furnishing of goods) made under a written agreement which was entered into before tax lien filing and which constitutes an agreement to finance the raising or harvesting of a farm crop, and because F's security interest is valid under local law against a judgment lien arising as of the time of tax lien filing out of an unsecured obligation, the tax lien is not valid with respect to F's security interest in the crop even though a notice of lien was filed before the security interest arose. Furthermore, because the farm is property subject to the tax lien at the time of tax lien filing, F's security interest with respect to the farm also has priority over the tax lien.

Example (5). Assume the same facts as in example (4) and in addition that on October 1, 1969, G acquires several tractors to which F's security interest attaches under the terms of the agreement. Because the tractors are not property subject to the tax lien at the time of tax lien filing, the tax lien has priority over F's security interest in the tractors.

§ 301.6323(c)–3 Protection for obligatory disbursement agreements.

(a) *In general.* Even though a notice of a lien imposed by section 6321 is filed in accordance with § 301.6323(f)–1, the lien is not valid with respect to a security interest which:

(1) Comes into existence after the tax lien filing,

(2) Is in qualified property covered by the terms of an obligatory disbursement agreement entered into before the tax lien filing, and

(3) Is protected under local law against a judgment lien arising, as of the time of tax lien filing, out of an unsecured obligation.

See paragraphs (a) and (e) of § 301.6323(h)–1 for definitions of the terms "security interest" and "tax lien filing." For purposes of this section, a judgment lien is a lien held by a judgment lien creditor as defined in paragraph (g) of § 301.6323(h)–1.

(b) *Obligatory disbursement agreement.* For purposes of this section the term "obligatory disbursement agreement" means a written agreement, entered into by a person in the course of his trade or business, to make disbursements. An agreement is treated as an obligatory disbursement agreement only with respect to disbursements which are required to be made by reason of the intervention of the rights of a person other than the taxpayer. The obligation to pay must be conditioned upon an event beyond the control of the obligor. For example, the provisions of this section are applicable where an issuing bank obligates itself to honor drafts or other demands for payment on a letter of credit and a bank, in good faith, relies upon that letter of credit in making advances. The provisions of this section are also applicable, for example, where a bonding company obligates itself to make payments to indemnify against loss or liability and, under the terms of the bond, makes a payment with respect to a loss. The priority described in this section is not applicable, for example, in the case of an accommodation endorsement by an endorser who assumes his obligation other than in the course of his trade or business.

(c) *Qualified property.* Except as provided under paragraph (d) of this section, the term "qualified property," for purposes of this section, means property subject to the lien imposed by section 6321 at the time of tax lien filing and, to the extent that the acquisition is directly traceable to the obligatory disbursement, property acquired by the taxpayer after tax lien filing.

(d) *Special rule for surety agreements.* Where the obligatory disbursement agreement is an agreement insuring the performance of a contract of the taxpayer and another person, the term "qualified property" shall be treated as also including—

(1) The proceeds of the contract the performance of which was insured, and

(2) If the contract the performance of which was insured is a contract to construct or improve real property, to produce goods, or to furnish services, any tangible personal property used by the taxpayer in the performance of the insured contract.

For example, a surety company which holds a security interest, arising from cash disbursements made after tax lien filing under a payment or performance bond on a real estate construction project, has priority over the tax lien with respect to the proceeds of the construction contract and, in addition, with respect to any tangible personal property used by the taxpayer in the construction project if its security interest in the tangible personal property is protected under local law against a judgment lien arising, as of the time the tax lien was filed, out of an unsecured obligation.

(e) *Examples.* This section may be illustrated by the following examples:

Example (1). (i) On January 2, 1969, H, an appliance dealer, in order to finance the acquisition from O of a large inventory of appliances, enters into a written agreement with Z, a bank. Under the terms of the agreement, in return for a security interest in all of H's inventory, presently owned and subsequently acquired, Z issues an irrevocable letter of credit to allow H to make the purchase. On December 31, 1968 and January 10, 1969, in accordance with § 301.6323(f)–1, separate notices of lien are filed with respect to H's delinquent tax liabilities. On March 31, 1969, Z honors the letter of credit. Under local law, Z's security interest in both existing and after-acquired inventory is protected against a judgment lien arising on or after January 10, 1969, out of an unsecured obligation. Under local law, Z's security interest in the inventory purchased under the letter of credit qualifies as a purchase money security interest and is valid against persons acquiring security interests in or liens upon such inventory at any time.

(ii) Because Z's security interest in H's inventory did not arise under a written agreement entered into before the filing of notice of the first tax lien on December 31, 1968, that lien is superior to Z's security interest except to the extent of Z's purchase money security interest. Because Z's interest qualifies as a purchase money security interest with respect to the inventory purchased under the letter of credit, the tax liens attach under section 6321 only to the equity acquired by H, and the rights of Z in the inventory so purchased are superior even to the lien filed on December 31, 1968, without regard to this section.

(iii) Because Z's security interest arose by reason of disbursements made under a written agreement which was entered into before the filing of notice of the second tax lien on January 10, 1969, and which constitutes an agreement to make disbursements required to be made by reason of the intervention of the rights of O, a person other than the taxpayer, and because Z's security interest is valid under local law against a judgment lien arising as of the time of such tax lien filing on January 10, 1969, out of an unsecured obligation, the second tax lien is, under this section, not valid with respect to Z's security interest in inventory owned by H on January 10, 1969, as well as any after-acquired inventory directly traceable to Z's disbursements (apart from such greater protection as Z enjoys, with respect to the latter, under its purchase money security interest). No protection against the second tax lien is provided under this section with respect to a security interest in any other inventory acquired by H after January 10, 1969, because such other inventory is neither subject to the tax lien at the time of tax lien filing nor directly traceable to Z's disbursements.

Example (2). On June 1, 1971, K is awarded a contract to construct an office building. At the same time, S, a surety company, agrees in writing to insure the performance of the contract. The agreement provides that in the event S must complete the job as the result of a default by K, S will be entitled to the proceeds of the contract. In addition, the agreement provides that S is to have a security interest in all property belonging to K. On December 1, 1971, prior to the completion of the building, K defaults. On the same date, under § 301.6323(f)–1, a notice of lien is filed with respect to K's delinquent tax liability. S completes the building on June 1, 1972. Under local law S's security interest in the proceeds of the contract and S's security interest in the property of K are entitled to priority over a judgment lien arising December 1, 1971 (the date of tax lien filing) out of an unsecured obligation. Because, for purposes of an obligatory disbursement agreement which is a surety agreement, the security interest may be in the proceeds of the insured contract, S's security interest in the proceeds of the contract has priority over the tax lien even though a notice of lien was filed before S's security interest arose. Furthermore, because the insured contract was a contract to construct real property, S's security interest in any of K's tangible personal property used in the performance of the contract also has priority over the tax lien.

Example (3). (i) On February 2, 1970, L enters into an agreement with M, a contractor, to construct an apartment building on land owned by L. Under a separate agreement, N bank agrees to furnish funds on a short-term basis to L for the payment of amounts due to M during the course of construction. Simultaneously, X, a financial institution, makes a binding commitment to N bank and L to provide long-term financing for the project after its completion. Under its commitment, X is obligated to pay off the balance of the construction loan held by N bank upon the execution by L of a new promissory note secured by a mortgage deed of trust upon the improved property. On September 4, 1970, in accordance with § 301.6323(f)–1, notice of lien is properly filed with respect to L's delinquent tax liability. On September 8, 1970, X obtains actual notice of the tax lien filing. On September 14, 1970, the documents creating X's security interest are executed and recorded, N bank's lien for its construction loan is released, and X makes the required disbursements to N bank. Under local law, X's security interest is protected against a judgment lien arising on September 4, 1970 (the time of tax lien filing) out of an unsecured obligation.

(ii) Because X's security interest arose by reason of a disbursement made under a written agreement entered into before tax lien filing, which constitutes an agreement to make disbursements required to be made by reason of the intervention of the rights of N bank, a person other than the taxpayer, and because X's security interest is valid under local law against a judgment lien arising as of the time of the tax lien filing out of an unsecured obligation, the tax lien is not valid with respect to X's security interest to the extent of the disbursement to N bank. The obligatory disbursement is protected under section 6323(c)(4) even if X is not subrogated to N bank's rights or X's agreement is not itself a real property construction financing agreement.

§ 301.6323(d) Statutory provisions; validity and priority against certain persons; 45-day period for making disbursements.

SEC. 6323. *Validity and priority against certain persons.*

* * * * *

(d) *45-day period for making disbursements.* Even though notice of a lien imposed by section 6321 has been filed, such lien shall not be valid with respect to a security interest which came into existence after tax lien filing by reason of disbursements made before the 46th day after the date of tax lien filing, or (if earlier) before the person making such disbursements had actual notice or knowledge of tax lien filing, but only if such security interest—

(1) Is in property (A) subject, at the time of tax lien filing, to the lien imposed by section 6321, and (B) covered by the terms of a written agreement entered into before tax lien filing, and

(2) Is protected under local law against a judgment lien arising, as of the time of tax lien filing, out of an unsecured obligation.

[Sec. 6323(d) as amended by sec. 236(a) Rev. Act 1964 (78 Stat. 127); sec. 101(a) Federal Tax Lien Act 1966 (80 Stat. 1125)]

§ 301.6323(d)–1 45-day period for making disbursements.

(a) *In general.* Even though a notice of a lien imposed by section 6321 is filed in accordance with § 301.6323(f)–1, the lien is not valid with respect to a security interest which comes into existence, after tax lien filing, by reason of disbursements made before the 46th day after the date of tax lien filing, or if earlier, before the person making the disbursements has actual notice or knowledge of the tax lien filing, but only if the security interest is—

V 41 164 AUG 23 76 UMI

(1) In property which is subject, at the time of tax lien filing, to the lien imposed by section 6321 and which is covered by the terms of a written agreement entered into before tax lien filing, and

(2) Protected under local law against a judgment lien arising, as of the time of tax lien filing, out of an unsecured obligation.

For purposes of subparagraph (1) of this paragraph, a contract right (as defined in paragraph (c)(2)(i) of § 301.6323(c)–1) is subject, at the time of tax lien filing, to the lien imposed by section 6321 if the contract has been made by such time. An account receivable (as defined in paragraph (c)(2)(ii) of § 301.6323(c)–1) is subject, at the time of tax lien filing, to the lien imposed by section 6321, if, and to the extent, a right to payment has been earned by performance at such time. For purposes of subparagraph (2) of this paragraph, a judgment lien is a lien held by a judgment lien creditor as defined in paragraph (g) of § 301.6323(h)–1. For purposes of this section, it is immaterial that the written agreement provides that the disbursements are to be made at the option of the person making the disbursements. See paragraphs (a) and (e) of § 301.6323(h)–1 for definitions of the terms "security interest" and "tax lien filing," respectively. See paragraph (a) of § 301.6323(1)–1 for certain circumstances under which a person is deemed to have actual notice of knowledge of a fact.

(b) *Examples.* The application of this section may be illustrated by the following examples:

Example (1). On December 1, 1967, an assessment is made against A with respect to his delinquent tax liability. On January 2, 1968, A enters into a written agreement with B whereby B agrees to lend A $10,000 in return for a security interest in certain property owned by A. On January 10, 1968, in accordance with § 301.6323(f)–1 notice of the tax lien affecting the property is filed. On February 1, 1968, B, without actual notice or knowledge of the tax lien filing, disburses the loan to A. Under local law, the security interest arising by reason of the disbursement is entitled to priority over a judgment lien arising January 10, 1968 (the date of tax lien filing) out of an unsecured obligation. Because the disbursement was made before the 46th day after tax lien filing, because the disbursement was made pursuant to a written agreement entered into before tax lien filing, and because the resulting security interest is protected under local law against a judgment lien arising as of the date of tax lien filing out of an unsecured obligation, B's $10,000 security interest has priority over the tax lien.

Example (2). Assume the same facts as in example (1) except that when B disburses the $10,000 to A on February 10, 1968, B has actual knowledge of the tax lien filing. Because the disbursement was made with actual knowledge of tax lien filing, B's security interest does not have priority over the tax lien even though the disbursement was made before the 46th day after the tax lien filing. Furthermore, B is not protected under § 301.6323(a)–1(a) as a holder of a security interest because he had not parted with money or money's worth prior to the time the notice of tax lien was filed (Jan. 10, 1968) even though he had made a firm commitment to A before that time.

§ 301.6323(c) Statutory provisions; validity and priority against certain persons; priority of interest and expenses.

SEC. 6323. *Validity and priority against certain persons.* • • •

(c) *Priority of interest and expenses.* If the lien imposed by section 6321 is not valid as against a lien or security interest, the priority of such lien or security interest shall extend to—

(1) Any interest or carrying charges upon the obligation secured,

(2) The reasonable charges and expenses of an indenture trustee or agent holding the security interest for the benefit of the holder of the security interest,

(3) The reasonable expenses, including reasonable compensation for attorneys, actually incurred in collecting or enforcing the obligation secured,

(4) The reasonable costs of insuring, preserving, or repairing the property to which the lien or security interest relates,

(5) The reasonable costs of insuring payment of the obligation secured, and

(6) Amounts paid to satisfy any lien on the property to which the lien or security interest relates, but only if the lien so satisfied is entitled to priority over the lien imposed by section 6321,

to the extent that, under local law, any such item has the same priority as the lien or security interest to which it relates.

[Sec. 6323(c) as amended by sec. 236(a) Rev. Act 1964 (78 Stat. 127); sec. 101(a), Federal Tax Lien Act 1966 (80 Stat. 1125)]

§ 301.6323(c)–1 Priority of interest and expenses.

(a) *In general.* If the lien imposed by section 6321 is not valid as against another lien or security interest, the priority of the other lien or security interest also extends to each of the following items to the extent that under local law the item has the same priority as the lien or security interest to which it relates:

(1) Any interest or carrying charges (including finance, service, and similar charges) upon the obligation secured,

(2) The reasonable charges and expenses of an indenture trustee (including, for example, the trustee under a deed of trust) or agent holding the security interest for the benefit of the holder of the security interest,

(3) The reasonable expenses, including reasonable compensation for attorneys, actually incurred in collecting or enforcing the obligation secured,

(4) The reasonable costs of insuring, preserving, or repairing the property to which the lien or security interest relates,

(5) The reasonable costs of insuring payment of the obligation secured (including amounts paid by the holder of the security interest for mortgage insurance, such as that issued by the Federal Housing Administration), and

(6) Amounts paid to satisfy any lien on the property to which the lien or security interest relates, but only if the lien so satisfied is entitled to priority over the lien imposed by section 6321.

(b) *Collection expenses.* The reasonable expenses described in paragraph (a)(3) of this section include expenditures incurred by the protected holder of the lien or security interest to establish the priority of his interest or to collect, by foreclosure or otherwise, the amount due him from the property subject to his lien. Accordingly, the amount of the encumbrance which is protected is increased by the amounts so expended by the holder of the security interest.

(c) *Costs of insuring, preserving, etc.* The reasonable costs of insuring, preserving, or repairing described in paragraph (a)(4) of this section include expenditures by the holder of a security interest for fire and casualty insurance on the property subject to the security interest and amounts paid by the holder of the lien or security interest to repair the property. Such reasonable costs also include the amounts paid by the holder of the lien or security interest in a leasehold to the lessor of the leasehold to preserve the leasehold subject to the lien or security interest. Accordingly, the amount of the lien or security interest which is protected is increased by the amounts so expended by the holder of the lien or security interest.

(d) *Satisfaction of liens.* The amounts described in paragraph (a)(6) of this section include expenditures incurred by the protected holder of a lien or security interest to discharge a statutory lien for State sales taxes on the property subject to his lien or security interest if both his lien or security interest and the sales tax lien have priority over a Federal tax lien. Accordingly, the amount of the lien or security interest is increased by the amounts so expended by the holder of the lien or security interest even though under local law the holder of the lien or security interest is not subrogated to the rights of the holder of the State sales tax lien. However, if the holder of the lien or security interest is subrogated, within the meaning of paragraph (b) of § 301.6323(1)–1, to the rights of the holder of the sales tax lien, he will also be entitled to any additional protection afforded by section 6323(1)(2).

§ 301.6323(f) Statutory provisions; validity and priority against certain persons; place for filing notice; form.

SEC. 6323. *Validity and priority against certain persons.* • • •

(f) *Place for filing notice; form*—(1) *Place for filing.* The notice referred to in subsection (a) shall be filed—

(A) *Under State laws*—(i) *Real property.* In the case of real property, in one office within the State (or the county, or other governmental subdivision) as designated by the laws of such State, in which the property subject to the lien is situated; and

(ii) *Personal property.* In the case of personal property, whether tangible or intangible, in one office within the State (or the county, or other governmental subdivision), as designated by the laws of such State, in which the property subject to the lien is situated; or

(B) *With clerk of district court.* In the office of the clerk of the United States district court for the judicial district in which the property subject to the lien is situated, whenever the State has not by law designated one office which meets the requirements of subparagraph (A); or

(C) *With recorder of deeds of the District of Columbia.* In the office of the Recorder of Deeds of the District of Columbia, if the property subject to the lien is situated in the District of Columbia.

(2) *Situs of property subject to lien.* For purposes of paragraph (1), property shall be deemed to be situated—

(A) *Real property.* In the case of real property, at its physical location; or

(B) *Personal property.* In the case of personal property, whether tangible or intangible, at the residence of the taxpayer at the time the notice of lien is filed.

For purposes of paragraph (2)(B), the residence of a corporation or partnership shall be deemed to be the place at which the principal executive office of the business is located, and the residence of a taxpayer whose residence is without the United States shall be deemed to be in the District of Columbia.

(3) *Form.* The form and content of the notice referred to in subsection (a) shall be prescribed by the Secretary or his delegate. Such notice shall be valid notwithstanding any other provision of law regarding the form or content of a notice of lien.

[Sec. 6323(f) as added by sec. 101(a) Federal Tax Lien Act of 1966 (80 Stat. 1125)]

§ 301.6323(f)–1 Place for filing notice; form.

(a) *Place for filing.* The notice of lien referred to in § 301.6323(a)–1 shall be filed as follows:

(1) *Under State laws*—(i) *Real property.* In the case of real property, notice shall be filed in one office within the State (or the county or other governmental subdivision), as designated by the laws of the State, in which the property subject to the lien is deemed situated under the provisions of paragraph (b)(1) of this section.

(ii) *Personal property.* In the case of personal property, whether tangible or intangible, the notice shall be filed in one office within the State (or the county or other governmental subdivision), as designated by the laws of the State, in which the property subject to the lien is deemed situated under the provisions of paragraph (b)(2) of this section.

(2) *With the clerk of the U.S. district court.* Whenever a State has not by law designated one office which meets the requirements of subparagraph (1)(i) or (1)(ii) of this paragraph, the notice shall be filed in the office of the clerk of the U.S. district court for the judicial district in which the property subject to the lien is deemed situated under the provisions of paragraph (b) of this section. For example, a State has not by law designated one office meeting the requirements of subparagraph (1)(i) of this paragraph if more than one office is designated within the State, county, or other governmental subdivision for filing notices with respect to all real property located in such State, county, or other governmental subdivision. A State has not by law designated one office meeting the requirements of subparagraph (1)(ii) of this paragraph if more than one office is designated in the State, county, or other governmental subdivision for filing notices with respect to all of the personal property of a particular taxpayer.

(3) *With the Recorder of Deeds of the District of Columbia.* If the property subject to the lien imposed by section 6321 is deemed situated, under the provisions of paragraph (b) of this section, in the District of Columbia, the notice shall be filed in the office of the Recorder of Deeds of the District of Columbia.

(b) *Situs of property subject to lien.* For purposes of paragraph (a) of this section, property is deemed situated as follows:

(1) *Real property.* Real property is deemed situated at its physical location.

(2) *Personal property.* Personal property, whether tangible or intangible, is deemed situated at the residence of the taxpayer at the time the notice of lien is filed.

For purposes of subparagraph (2) of this paragraph the residence of a corporation or partnership is deemed to be the place at which the principal executive office of the business is located, and the residence of a taxpayer whose residence is not within the United States is deemed to be in the District of Columbia.

(c) *Form.* The notice referred to in § 301.6323(a)–1 shall be filed on Form 668, "Notice of Federal Tax Lien under Internal Revenue Laws". Such notice is valid notwithstanding any other provision of law regarding the form or content of a notice of lien. For example, omission from the notice of lien of a description of the property subject to the lien does not affect the validity thereof even though state law may require that the notice contain a description of the property subject to the lien.

(d) *Examples.* The provisions of this section may be illustrated by the following examples:

Example (1). The law of State X provides that notices of Federal tax lien affecting personal property are to be filed in the Office of the Recorder of Deeds of the county where the taxpayer resides. The laws of State X also provide that notices of lien affecting real property are to be filed with the recorder of deeds of the county where the real property is located. On June 1, 1970, in accordance with § 301.6323(f)–1, a notice of lien is filed in county M with respect to the delinquent tax liability of A. At the time the notice is filed, A is a resident of county M and owns real property in that county. One year later A moves to county N and one year after that A moves to county O. Because the situs of personal property is deemed to be at the residence of the taxpayer at the time the notice of lien is filed, the notice continues to be effectively filed with respect to A's personal property even though A no longer resides in county M. Furthermore, because the situs of real property is deemed to be at its physical location, the notice of lien also continues to be effectively filed with respect to A's real property.

Example (2). B is a resident of Canada but owns personal property in the United States. On January 4, 1971, in accordance with § 301.6323(f)–1, a notice of lien is filed with the Office of the Recorder of Deeds of 1973, B changes his residence to State Y in the United States. Because the residence of the United States. Because the residence of a taxpayer who is not a resident of the United States is deemed to be in the District of Columbia and the situs of personal property is deemed to be at the residence of the taxpayer at the time of filing, the lien continues to be effectively filed with respect to the personal property of B located in the United States even though B has returned to the United States and taken up residence in State Y and even though B has at no time been in the District of Columbia.

Example (3). The law of State Z in effect before July 1, 1967, provides that notices of lien affecting real property are to be filed in the office of the recorder of deeds of the county in which the real property is located, but that if the real property is registered under the Torrens system of title registration the notice is to be filed with the registrar of titles rather than the recorder of deeds. The law of State Z in effect after June 30, 1967, provides that all notices of lien affecting real property are to be filed with the recorder of deeds of the county in which the real property is located. Accordingly, where the Torrens system is adopted by a county in State Z, there were before July 1, 1967, two offices designated for filing notices of Federal tax lien affecting real property in the county because one office was designated for Torrens real property and another office was designated for non-Torrens real property. Because State Z had not designated one office within the State, county, or other governmental subdivision for filing notices before July 1, 1967, with respect to all real property located in the State, county, or governmental subdivision, before July 1, 1967, the place for filing notices of lien under this section, affecting property located in counties adopting the Torrens system, was with the clerk of the U.S. district court for the judicial district in which the real property is located. However, after June 30, 1967, the place for filing notices of lien under this section, affecting both Torrens and non-Torrens real property in counties adopting the Torrens system is with the recorder of deeds for each such county. Notices of lien filed under this section with the clerk of the U.S. district court before July 1, 1967, remain validly filed whether or not refiled with the recorder of deeds after the change in State law or upon refiling during the required refiling period.

Example (4). The law of State W provides that notices of lien affecting personal property of corporations and partnerships are to be filed in the office of the Secretary of State. Notices of lien affecting personal property of any other person are to be filed in the office of the clerk of court for the county where the person resides. Because the State law designates only one filing office within State W with respect to personal property of any particular taxpayer, notices of lien filed under this section, affecting personal property, shall be filed in the office designated under State law.

§ 301.6323(g) Statutory provisions; validity and priority against certain persons; refiling of notice of tax lien.

SEC. 6323. *Validity and priority against certain persons.* • • •

(g) *Refiling of notice.*—For purposes of this section—

(1) *General rule.*—Unless notice of lien is refiled in the manner prescribed in paragraph (2) during the required refiling period, such notice of lien shall be treated as filed on the date on which it is filed (in accordance with subsection (f)) after the expiration of such refiling period.

(2) *Place for filing.*—A notice of lien refiled during the required refiling period shall be effective only—

(A) If such notice of lien is refiled in the office in which the prior notice of lien was filed; and

(B) In any case in which, 90 days or more prior to the date of a refiling of notice of lien under subparagraph (A), the Secretary or his delegate received written information (in

V 41 1164
AUG 23 76
UMI

the manner prescribed in regulations issued by the Secretary or his delegate) concerning a change in the taxpayer's residence, if a notice of such lien is also filed in accordance with subsection (f) in the State in which such residence is located.

(3) *Required refiling period.*—In the case of any notice of lien, the term "required refiling period" means—

(A) The 1-year period ending 30 days after the expiration of 6 years after the date of the assessment of the tax, and

(B) The 1-year period ending with the expiration of 6 years after the close of the preceding required refiling period for such notice of lien.

(4) *Transitional rule.*—Notwithstanding paragraph (3), if the assessment of the tax was made before January 1, 1962, the first required refiling period shall be the calendar year 1967.

[Sec. 6323(g) as added by sec. 101(a), Federal Tax Lien Act 1966 (80 Stat. 1125)]

§ 301.6323(g)-1 Refiling of notice of tax lien.

(a) *In general*—(1) *Requirement to refile.* In order to continue the effect of a notice of lien, the notice must be refiled in the place described in paragraph (b) of this section during the required refiling period (described in paragraph (c) of this section). In the event that two or more notices of lien are filed with respect to a particular tax assessment, the failure to comply with the provisions of paragraphs (b)(1)(i) and (c) of this section in respect of one of the notices of lien does not affect the effectiveness of the refiling of any other notice of lien. Except for the filing of a notice of lien required by paragraph (b)(1)(ii) of this section (relating to a change of residence) the validity of any refiling of a notice of lien is not affected by the refiling or nonrefiling of any other notice of lien.

(2) *Effect of refiling.* A timely refiled notice of lien is effective as of the date on which the notice of lien to which it relates was effective.

(3) *Effect of failure to refile.* If the district director fails to refile a notice of lien in the manner described in paragraphs (b) and (c) of this section, the notice of lien is not effective, after the expiration of the required refiling period, as against any person without regard to when the interest of the person in the property subject to the lien was acquired. However, the failure of the district director to refile a notice of lien during the required refiling period will not, following the expiration of the refiling period, affect the effectiveness of the notice with respect to:

(i) Property which is the subject matter of a suit, to which the United States is a party, commenced prior to the expiration of the required refiling period, or

(ii) Property which has been levied upon by the United States prior to the expiration of the refiling period.

However, if a suit or levy referred to in the preceding sentence is dismissed or released and the property is subject to the lien at such time, a notice of lien with respect to the property is not effective after the suit or levy is dismissed or released unless refiled during the required refiling period. Failure to refile a notice of lien does not affect the existence of the lien.

(4) *Filing of new notice.* If a notice of lien is not refiled, and if the lien remains in existence, the Internal Revenue Service may nevertheless file a new notice of lien either on the form prescribed for the filing of a notice of lien or on the form prescribed for refiling a notice of lien. This new filing must meet the requirements of section 6323(f) and § 301.6323(f)-1 and is effective from the date on which such filing is made.

(b) *Place for refiling notice of lien*—(1) *In general.* A notice of lien refiled during the required refiling period (described in paragraph (c) of this section) shall be effective only—

(i) If the notice of lien is refiled in the office in which the prior notice of lien (including a refiled notice) was filed under the provisions of section 6323; and

(ii) In any case in which 90 days or more prior to the date the refiling of the notice of lien under subdivision (i) is completed, the Internal Revenue Service receives written information (in the manner described in subparagraph (2) of this paragraph) concerning a change in the taxpayer's residence, if a notice of such lien is also filed in accordance with section 6323(f)(1)(A)(ii) in the State in which such new residence is located (or, if such new residence is located without the United States, in the District of Columbia).

A notice of lien is considered as refiled in the office in which the prior notice or refiled notice was filed under the provisions of section 6323 if it is refiled in the office which, pursuant to a change in the applicable local law, assumed the functions of the office in which the prior notice or refiled notice was filed. If on or before the 90th day referred to in subdivision (ii) more than one written notice is received concerning a change in the taxpayer's residence, a notice of lien is required by this subdivision to be filed only with respect to the residence shown on the written notice received on the most recent date. Subdivision (ii) is applicable regardless of whether the taxpayer resides at the new residence on the date the refiling of notice of lien under subdivision (i) of this subparagraph is completed.

(2) *Notice of change of taxpayer's residence*—(i) *In general.* Except as provided in subdivision (ii) or (iii) of this subparagraph, for purposes of this section, a notice of change of a taxpayer's residence will be effective only if it (A) is received, in writing, from the taxpayer or his representative by the district director or the service center director having jurisdiction where the original notice of lien was filed, (B) relates to an unpaid tax liability of the taxpayer, and (C) states the taxpayer's name and the address of his new residence. Although it is not necessary that a written notice contain the taxpayer's identifying number authorized by section 6109, it is preferable that it include such number. For purposes of this subdivision, a notice of change of a taxpayer's residence shown on a return or an amended return (including a return of the same tax) will not be effective to notify the Internal Revenue Service.

(ii) *Notice received before August 23, 1976.* For purposes of this section, a notice of a change of a taxpayer's residence will also be effective if it (A) is received, in writing, by any office of the Internal Revenue Service before August 23, 1976, from the taxpayer or his representative, (B) relates to an unpaid tax liability of the taxpayer, and (C) states the taxpayer's name and the address of his new residence.

(iii) *By return or amended return.* For purposes of this section, in the case of a notice of lien which relates to an assessment of tax made after December 31, 1966, a notice of change of a taxpayer's residence will also be effective if it is contained in a return or amended return of the same type of tax filed with the Internal Revenue Service by the taxpayer or his representative which on its face indicates that there is a change in the taxpayer's address and correctly states the taxpayer's name, the address of his new residence, and his identifying number required by section 6109.

(iv) *Other rules applicable.* Except as provided in subdivisions (i), (ii), and (iii) of this subparagraph, no communication (either written or oral) to the Internal Revenue Service will be considered effective as notice of a change of a taxpayer's residence under this section, whether or not he Service has actual notice or knowledge of the taxpayer's new residence. For the purpose of determining the date on which a notice of change of a taxpayer's residence is received under this section, the notice shall be treated as received on the date it is actually received by the Internal Revenue Service without reference to the provisions of section 7502.

(3) *Examples.* The provisions of this section may be illustrated by the following examples:

Example (1). A, a delinquent taxpayer, is a resident of State M and owns real property in State N. In accordance with § 301.6323(f)-1, notices of lien are filed in States M and N. In order to continue the effect of the notice of lien filed in M, the Internal Revenue Service must refile, during the required refiling period, the notice of lien with the appropriate office in M but is not required to refile the notice of lien with the appropriate office in N. Similarly, in order to continue the effect of the notice of lien filed in State N, the Internal Revenue Service must refile, during the required refiling period, the notice of lien with the appropriate office in N but is not required to refile the notice of lien with the appropriate office in M.

Example (2). B, a delinquent taxpayer, is a resident of State M. In accordance with § 301.6323(f)-1, notice of lien is properly filed in that State. One year before the beginning of the required refiling period, B establishes his residence in State N, and B immediately notifies the Internal Revenue Service of his change in residence in accordance with the provisions of paragraph (b)(2) of this section. In order to continue the effect of the notice of lien filed in M, the Internal Revenue Service must refile, during the required refiling period, notices of lien with (i) the appropriate office in M, and (ii) the appropriate office in N, because B properly notified the Internal Revenue Service of his change in residence to N more than 89 days prior to the date refiling of the notice of lien in M is completed. Even if the Internal Revenue Service had acquired actual notice or knowledge of B's change in residence by other means, if B had not properly notified the Internal Revenue Service of his change in residence, the effect of the notice of lien in State M could have been continued without any refiling in State N.

Example (3). C, a delinquent taxpayer, is a resident of State O. In accordance with § 301.6323(f)-1, notice of lien is properly filed in that State. Four years before the required refiling period, C establishes his residence in State P, and C immediately notifies the Internal Revenue Service of his change in residence in accordance with the provisions of paragraph (b)(2) of this section. Three years before the required refiling period, C establishes his residence in State R, and again C immediately notifies the Internal Revenue Service of his change in residence in accordance with the provisions of paragraph (2) of this section. In order to continue the effect of the notice of lien filed in O, the Internal Revenue Service must refile, during the required refiling period, notices of lien with (i) the appropriate office in O, and (ii) the appropriate office in R. Refiling in R is required because the notice received by the Service of C's change in residence to R was the most recent notice received more than 89 days prior to the date refiling in O is completed. The notice of lien is not required to be filed in P, even though C properly notified the Internal Revenue Service of his change in residence to P, because such notice is not the most recent one received.

Example (4). Assume the same facts as in example (3), except that C does not notify the Internal Revenue Service of his change in residence to R in accordance with the provisions of paragraph (b)(2) of this section. In order to continue the effect of the notice of lien filed in O, the Internal Revenue Service must refile, during the required refiling period, the notice of lien with (i) the appropriate office in O, and (ii) the appropriate office in P. Refiling in P is required because C properly notified the Internal Revenue Service of his change in residence to P, even though C is not a resident of P on the date refiling of the notice of lien in O is completed. The Internal Revenue Service is not required to file a notice of lien in R because C did not properly notify the Service of his change in residence to R.

Example (5). D, a delinquent taxpayer, is a resident of State M and owns real property in States N and O. In accordance with § 301.6323(f)-1, the Internal Revenue Service files notices of lien in M, N, and O States. Five years and 6 months after the date of the assessment shown on the notice of lien, D establishes his residence in P, and at that time the Internal Revenue Service received from D a notification of his change in residence in accordance with the provisions of paragraph (b)(2) of this section. On a date which is 5 years and 7 months after the date of the assessment shown on the notice of lien, the Internal Revenue Service properly refiles notices of lien in M, N, and O which refilings are sufficient to continue the effect of each of the notice of lien. The Internal Revenue Service is not required to file a notice of lien in P because D did not notify the Internal Revenue Service of his change of residence to P more than 89 days prior to the date each of the refilings in M, N, and O was completed.

Example (6). Assume the same facts as in example (5) except that the refiling of the notice of lien in O occurs 100 days after D notifies the Internal Revenue Service of his change in residence to P in accordance with the provisions of paragraph (b)(2) of this section. In order to continue the effect of the notice of lien filed in O, in addition to refiling the notice of lien in O, the Internal Revenue Service must also refile, during the required refiling period, a notice of lien in P because D properly notified the Internal Revenue Service of his change of residence to P more than 89 days prior to the date the refiling in O was completed. However, the Internal Revenue Service is not required to refile the notice of lien in P to maintain the effect of the notices of lien in M and N because D did not notify the Internal Revenue Service of his change in residence to P more than 89 days prior to the date the refilings in M and N were completed.

Example (7). E, a delinquent taxpayer, is a resident of State T. Because T has not designated one office in the case of personal property for filing notices of lien in accordance with the provisions of section 6323(f)(1)(A)(ii), the Internal Revenue Service properly files a notice of lien with the clerk of the appropriate United States district court. However, solely as a matter of convenience for those who may have occasion to search for notices of lien, and not as a matter of legal effectiveness, the Internal Revenue Service also files notice of lien with the recorder of deeds of the county in T where E resides. In addition, the Internal Revenue Service sends a copy of the notice of lien to the X life insurance company to give the company actual notice of the notice of lien. In order to continue the effect of the notice of lien, the Internal Revenue Service must refile the notice of lien with the clerk of the appropriate United States district court during the required refiling period. In order to continue the effect of the notice of the lien, it is not necessary to refile the notice of lien with the Recorder of Deeds of the county where E resides, because the refiling of the notice of lien with the recorder of deeds does not constitute a proper filing for the purposes of section 6323(f). In addition, to continue the effect of the notice of lien under this section it is not necessary to send a copy of the notice of lien to the X life insurance company, because the sending of a notice of lien to an insurance company does not constitute a proper filing for the purposes of section 6323(f).

(c) *Required refiling period*—(1) *In general.* For the purpose of this section, except as provided in subparagraph (2) of this paragraph, the term "required refiling period" means—

(i) The 1-year period ending 30 days after the expiration of 6 years after the date of the assessment of the tax, and

(ii) The 1-year period ending with the expiration of 6 years after the close of the preceding required refiling period for such notice of lien.

(2) *Tax assessments made before January 1, 1962.* If the assessment of the tax is made before January 1, 1962, the first required refiling period shall be the calendar year 1967. Thus, to maintain the effectiveness of any notice of lien on file which relates to a lien which arose before January 1, 1962, the Internal Revenue Service will refile the notice of lien during the calendar year 1967.

(3) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example (1). On March 1, 1963, an assessment of tax is made against B, a delinquent taxpayer, and a lien for the amount of the assessment arises on that date. On July 1, 1963, in accordance with § 301.6323(f)-1, a notice of lien is filed. The notice of lien filed on July 1, 1963, is effective through March 31, 1969. The first required refiling period for the notice of lien begins on April 1, 1968, and ends on March 31, 1969. A refiling of the notice of lien during that period will extend the effectiveness of the notice of lien filed on July 1, 1963, through March 31, 1975. The second required refiling period for the notice of lien begins on April 1, 1974, and ends on March 31, 1975.

Example (2). Assume the same facts as in example (1), except that although the Internal Revenue Service fails to refile a notice of lien during the first required refiling period (April 1, 1968, through March 31, 1969), a notice of lien is filed on June 2, 1971, in accordance with § 301.6323(f)-1. Because of this filing, the notice of lien filed on June 2, 1971, is effective as of June 2, 1971. That notice must be refiled during the 1-year period ending on March 31, 1975, if it is to continue in effect after March 31, 1975.

Example (3). On April 1, 1960, an assessment of tax is made against B, a delinquent taxpayer, and a tax lien for the amount of the assessment arises on that date. On June 1, 1962, in accordance with § 301.6323(f)-1, a notice of lien is filed. Because the assessment of tax was made before January 1, 1962, the notice of lien filed on June 1, 1962, is effective through December 31, 1967. The first required refiling period for the notice of lien is the calendar year 1967. A refiling of the notice of lien during 1967 will extend the effectiveness of the notice of lien filed on June 1, 1962, through December 31, 1973.

§ 301.6323(h) Statutory provisions; validity and priority against certain persons; definitions.

SEC. 6323. *Validity and priority against certain persons.* • • •

(h) *Definitions.* For purposes of this section and section 6324—

(1) *Security interest.* The term "security interest" means any interest in property acquired by contract for the purpose of securing payment or performance of an obligation or indemnifying against loss or liability. A security interest exists at any time (A) if, at such time, the property is in existence and the interest has become protected under local law against a subsequent judgment lien arising out of an unsecured obligation, and (B) to the extent that, at such time, the holder has parted with money or money's worth.

(2) *Mechanic's lienor.* The term "mechanic's lienor" means any person who under local law has a lien on real property (or on the proceeds of a contract relating to real property) for services, labor, or materials furnished in connection with the construction or improvement of such property. For purposes of the preceding sentence, a person has a lien on the earliest date such lien becomes valid under local law against subsequent purchasers without actual notice, but not before he begins to furnish the services, labor, or materials.

(3) *Motor vehicle.* The term "motor vehicle" means a self-propelled vehicle which is registered for highway use under the laws of any State or foreign country.

(4) *Security.* The term "security" means any bond, debenture, note, or certificate or other evidence of indebtedness, issued by a corporation or a government or political subdivision thereof, with interest coupons or in

V41164 AUG 23 76 UMI

registered form, share of stock, voting trust certificate, or any certificate of interest or participation in, certificate of deposit or receipt for, temporary or interim certificate for, or warrant or right to subscribe to or purchase, any of the foregoing; negotiable instrument or money.

(5) *Tax lien filing.* The term "tax lien filing" means the filing of notice (referred to in subsection (a)) of the lien imposed by section 6321.

(6) *Purchaser.* The term "purchaser" means a person who, for adequate and full consideration in money or money's worth, acquires an interest (other than a lien or security interest) in property which is valid under local law against subsequent purchasers without actual notice. In applying the preceding sentence for purposes of subsection (a) of this section, and for purposes of section 6324—

(A) A lease of property,

(B) A written executory contract to purchase or lease property,

(C) An option to purchase or lease property or any interest therein, or

(D) An option to renew or extend a lease of property,

which is not a lien or security interest shall be treated as an interest in property.

[Sec. 6323(h) as added by sec. 101(a), Federal Tax Lien Act 1966 (80 Stat. 1125)]

§ 301.6323(h)–0 Scope of definitions.

Except as otherwise provided by § 301.6323(h)–1, the definitions provided by § 301.6323(h)–1 apply for purposes of §§ 301.6323(a)–1 through 301.6324–1.

§ 301.6323(h)–1 Definitions.

(a) *Security interest*—(1) *In general.* The term "security interest" means any interest in property acquired by contract for the purpose of securing payment or performance of an obligation or indemnifying against loss or liability. A security interest exists at any time—

(i) If, at such time, the property is in existence and the interest has become protected under local law against a subsequent judgment lien (as provided in subparagraph (2) of this paragraph) arising out of an unsecured obligation; and

(ii) To the extent that, at such time, the holder has parted with money or money's worth (as defined in subparagraph (3) of this paragraph).

For purposes of this subparagraph, a contract right (as defined in paragraph (c)(2)(i) of § 301.6323(c)–1) is an existence when the contract is made. An account receivable (as defined in paragraph (c)(2)(ii) of § 301.6323(c)–1) is in existence when, and to the extent, a right to payment is earned by performance.

A security interest must be in existence, within the meaning of this paragraph, at the time as of which its priority against a tax lien is determined. For example, to be afforded priority under the provisions of paragraph (a) of § 301.6323(a)–1 a security interest must be in existence within the meaning of this paragraph before a notice of lien is filed.

(2) *Protection against a subsequent judgment lien.* (i) For purposes of this paragraph, a security interest is deemed to be protected against a subsequent judgment lien on—

(A) The date on which all actions required under local law to establish the priority of a security interest against a judgment lien have been taken, or

(B) If later, the date on which all required actions are deemed effective, under local law, to establish the priority of the security interest against a judgment lien.

For purposes of this subdivision, the dates described in (A) and (B) of this subdivision (i) shall be determined without regard to any rule or principle of local law which permits the relation back of any requisite action to a date earlier than the date on which the action is actually performed. For purposes of this paragraph, a judgment lien is a lien held by a judgment lien creditor as defined in paragraph (g) of this section.

(ii) The application of this subparagraph may be illustrated by the following example:

Example. (1) Under the law of State X, a security interest in negotiable instruments, stocks, bonds, or other securities may be perfected, and hence protected against a judgment lien, only by the secured party taking possession of the instruments or securities. However, a security interest in such intangible personal property is considered to be temporarily perfected for a period of 21 days from the time the security interest attaches, to the extent consideration other than past consideration is given under a written security agreement. Under the law of X, a security interest attaches to such collateral when there is an agreement between the creditor and debtor that the interest attaches, the debtor has rights in the property, and consideration is given by the creditor. Under the law of X, in the case of temporary perfection, the security interest in such property is protected during the 21-day period against a judgment lien arising, after the security interest attaches, out of an unsecured obligation. Upon expiration of the 21-day period, the holder of the security interest must take possession of the collateral to continue perfection.

(ii) Because the security interest is protected during the 21-day period against a subsequent judgment lien arising out of an unsecured obligation, and because the taking of possession before the conclusion of the period of temporary perfection is not considered, for purposes of subdivision (i) of this subparagraph, to be a requisite action which relates back to the beginning of such period, the requirements of this paragraph are satisfied. However, because taking possession is a condition precedent to continued perfection, possession of the collateral is a requisite action to establish such priority after expiration of the period of temporary perfection. If there is a lapse of perfection for failure to take possession, the determination of when the security interest exists (for purposes of protection against the tax lien) is made without regard to the period of temporary perfection.

(3) *Money or money's worth.* For purposes of this paragraph, the term "money or money's worth" includes money, a security (as defined in paragraph (d) of this section), tangible or intangible property, services, and other consideration reducible to a money value. Money or money's worth also includes any consideration which otherwise would constitute money or money's worth under the preceding sentence which was parted with before the security interest would otherwise exist if, under local law, past consideration is sufficient to support an agreement giving rise to a security interest. A relinquishing or promised relinquishment of dower, curtesy, or of a statutory estate created in lieu of dower or curtesy, or of other marital rights is not a consideration in money or money's worth. Nor is love and affection, promise of marriage, or any other consideration not reducible to a money value a consideration in money or money's worth.

(4) *Holder of a security interest.* For purposes of this paragraph, the holder of a security interest is the person in whose favor there is a security interest. For provisions relating to the treatment of a purchaser of commercial financing security as a holder of a security interest, see § 301.6323(c)–1(e).

(b) *Mechanic's lienor*—(1) *In general.* The term "mechanic's lienor" means any person who under local law has a lien on real property (or on the proceeds of a contract relating to real property) for services, labor, or materials furnished in connection with the construction or improvement (including demolition) of the property. A mechanic's lienor is treated as having a lien on the later of—

(i) The date on which the mechanic's lien first becomes valid under local law against subsequent purchasers of the real property without actual notice, or

(ii) The date on which the mechanic's lienor begins to furnish the services, labor, or materials.

(2) *Examples.* The provisions of this paragraph may be illustrated by the following example:

Example (1). On February 1, 1968, A lets a contract for the construction of an office building on property owned by him. On March 1, 1968, in accordance with § 301.6323(f)–1, a notice of lien for delinquent Federal taxes owed by A is filed. On April 1, 1968, B, a lumber dealer, delivers lumber to A's property. On May 1, 1968, B records a mechanic's lien against the property to secure payment of the price of the lumber. Under local law, B's mechanic's lien is valid against subsequent purchasers of real property without notice from February 1, 1968, which is the date the construction contract was entered into. Because the date on which B's mechanic's lien is valid under local law against subsequent purchasers is February 1, and the date on which B begins to furnish the materials is April 1, the date on which B becomes a mechanic's lienor within the meaning of this paragraph is April 1, the later of these two dates. Under paragraph (a) of § 301.6323(a)–1, B's mechanic's lien will not have priority over the Federal tax lien, even though under local law the mechanic's lien relates back to the date of the contract.

(c) *Motor vehicle.* (1) The term "motor vehicle" means a self-propelled vehicle which is registered for highway use under the laws of any State, the District of Columbia, or a foreign country.

(2) A motor vehicle is "registered for highway use" at the time of a sale if immediately prior to the sale it is so registered under the laws of any State, the District of Columbia, or a foreign country. Where immediately prior to the sale of a motor vehicle by a dealer, the dealer is permitted under local law to operate it under a dealer's tag, license, or permit issued to him, the motor vehicle is considered to be registered for highway use in the name of the dealer at the time of the sale.

(d) *Security.* The term "security" means any bond, debenture, note, or certificate or other evidence of indebtedness, issued by a corporation or a government or political subdivision thereof, with interest coupons or in registered form, share of stock, voting trust certificate, or any certificate of interest or participation in, certificate of deposit or receipt for, temporary or interim certificate for, or warrant or right to subscribe to or purchase, any of the foregoing; negotiable instrument; or money.

(e) *Tax lien filing.* The term "tax lien filing" means the filing of notice of the lien imposed by section 6321 in accordance with § 301.6323(f)–1.

(f) *Purchaser*—(1) *In general.* The term "purchaser" means a person who, for adequate and full consideration in money or money's worth (as defined in subparagraph (3) of this paragraph), acquires an interest (other than a lien or security interest) in property which is valid under local law against subsequent purchasers without actual notice.

(2) *Interest in property.* For purposes of this paragraph, each of the following interests is treated as an interest in property, if it is not a lien or security interest:

(i) A lease of property,

(ii) A written executory contract to purchase or lease property,

(iii) An option to purchase or lease property and any interest therein, or

(iv) An option to renew or extend a lease of property.

(3) *Adequate and full consideration in money or money's worth.* For purposes of this paragraph, the term "adequate and full consideration in money or money's worth" means a consideration in money or money's worth having a reasonable relationship to the true value of the interest in property acquired. See paragraph (a)(3) of this section for definition of the term "money or money's worth." Adequate and full consideration in money or money's worth may include the consideration in a bona fide bargain purchase. The term also includes the consideration in a transaction in which the purchaser has not completed performance of his obligation, such as the consideration in an installment purchase contract, even though the purchaser has not completed the installment payments.

(4) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example (1). A enters into a contract for the purchase of a house and lot from B. Under the terms of the contract A makes a down payment and is to pay the balance of the purchase price in 120 monthly installments. After payment of the last installment, A is to receive a deed to the property. A enters into possession, which under local law protects his interest in the property against subsequent purchasers without actual notice. After A has paid five monthly installments, a notice of lien for Federal taxes is filed against B in accordance with § 301.6323(f)–1. Because the contract is an executory contract to purchase property and is valid under local law against subsequent purchasers without actual notice, A qualifies as a purchaser under this paragraph.

Example (2). C owns a residence which he leases to his son-in-law, D, for a period of 5 years commencing January 1, 1968. The lease provides for payment of $100 a year, although the fair rental value of the residence is $2,500 a year. The lease is recorded on December 31, 1967. On March 1, 1968, a notice of tax lien for unpaid Federal taxes of C is filed in accordance with § 301.6323(f)–1. Under local law, D's interest is protected against subsequent purchasers without actual notice. However, because the rental paid by D has no reasonable relationship to the value of the interest in property acquired, D does not qualify as a purchaser under this paragraph.

(g) *Judgment lien creditor.* The term "judgment lien creditor" means a person who has obtained a valid judgment, in a court of record and of competent jurisdiction, for the recovery of specifically designated property or for a certain sum of money. In the case of a judgment for the recovery of a certain sum of money, a judgment lien creditor is a person who has perfected a lien under the judgment on the property involved. A judgment lien is not perfected until the identity of the lienor, the property subject to the lien, and the amount of the lien are established. Accordingly, a judgment lien does not include an attachment or garnishment lien until the lien has ripened into judgment, even though under local law the lien of the judgment relates back to an earlier date. If recording or docketing is necessary under local law before a judgment becomes effective against third parties acquiring liens on real property, a judgment lien under such local law is not perfected with respect to real property until the time of such recordation or docketing. If under local law levy or seizure is necessary before a judgment lien becomes effective against third parties acquiring liens on personal property, then a judgment lien under such local law is not perfected until levy or seizure of the personal property involved. The term "judgment" does not include the determination of a quasi-judicial body or of an individual acting in a quasi-judicial capacity such as the action of State taxing authorities.

§ 301.6323(i) Statutory provisions; validity and priority against certain persons; special rules.

SEC. 6323. *Validity and priority against certain persons.* • • •

(i) *Special rules*—(1) *Actual notice or knowledge.* For purposes of this subchapter, an organization shall be deemed for purposes of a particular transaction to have actual notice or knowledge of any fact from the time such fact is brought to the attention of the individual conducting such transaction, and in any event from the time such fact would have been brought to such individual's attention if the organization had exercised due diligence. An organization exercises due diligence if it maintains reasonable routines for communicating significant information to the person conducting the transaction and there is reasonable compliance with the routines. Due diligence does not require an individual acting for the organization to communicate information unless such communication is part of his regular duties or unless he has reason to know of the transaction and that the transaction would be materially affected by the information.

(2) *Subrogation.* Where, under local law, one person is subrogated to the rights of another with respect to a lien or interest, such person shall be subrogated to such rights for purposes of any lien imposed by section 6321 or 6324.

(3) *Disclosure of amount of outstanding lien.* If a notice of lien has been filed pursuant to subsection (f), the Secretary or his delegate is authorized to provide by regulations the extent to which, and the conditions under which, information as to the amount of the outstanding obligation secured by the lien may be disclosed.

[Sec. 6323(i) as added by sec. 101(a), Federal Tax Lien Act 1966 (80 Stat. 1125)]

§ 301.6323(i)–1 Special rules.

(a) *Actual notice or knowledge.* For purposes of subchapter C (section 6321 and following), chapter 64 of the Code, an organization is deemed, in any transaction, to have actual notice or knowledge of any fact from the time the fact is brought to the attention of the individual conducting the transaction, and in any event from the time the fact would have been brought to the individual's attention if the organization had exercised due diligence. An organization exercises due diligence if it maintains reasonable routines for communicating significant information to the person conducting the transaction and there is reasonable compliance with the routines. Due diligence does not require an individual acting for the organization to communicate information unless such communication is part of his regular duties or unless he has reason to know of the transaction and that the transaction would be materially affected by the information.

(b) *Subrogation*—(1) *In general.* Where, under local law, one person is subrogated to the rights of another with respect to a lien or interest, such person shall be subrogated to such rights for purposes of any lien imposed by section 6321 or 6324. Thus, if a tax lien imposed by section 6321 or 6324 is not valid with respect to a particular interest as against the holder of that interest, then the tax lien also is not valid with respect to that interest as against any person who, under local law, is a successor in interest to the holder of that interest.

(2) *Example.* The application of this paragraph may be illustrated by the following example:

Example. On February 1, 1968, an assessment is made and a tax lien arises with respect to A's delinquent tax liability. On February 25, 1968, in accordance with § 301.6323(f)–1, a notice of lien is properly filed. On March 1, 1968, A negotiates a loan from B, the security for which is a second mortgage on property owned by A. The first mortgage on the property is held by C and has priority

V 41 164
AUG 23 76
UMI

over the tax lien. Upon default by A, C begins proceedings to foreclose upon the first mortgage. On September 1, 1968, B pays the amount of principal and interest in default to C in order to protect the second mortgage against the pending foreclosure of C's senior mortgage. Under local law, B is subrogated to C's rights to the extent of the payment to C. Therefore, the tax lien is invalid against B to the extent he became subrogated to C's rights even though the tax lien is valid against B's second mortgage on the property.

(c) *Disclosure of amount of outstanding lien.* If a notice of lien has been filed (see § 301.6323(f)–1), the amount of the outstanding obligation secured by the lien is authorized to be disclosed as a matter of public record on Form 668 "Notice of Federal Tax Lien Under Internal Revenue Laws." The amount of the outstanding obligation secured by the lien remaining unpaid at the time of an inquiry is authorized to be disclosed to any person who has a proper interest in determining this amount. Any person who has a right in the property or intends to obtain a right in the property by purchase or otherwise will, upon presentation by him of satisfactory evidence, be considered to have a proper interest. Any person desiring this information may make his request to the office of the Internal Revenue Service named on the notice of lien with respect to which the request is made. The request should clearly describe the property subject to the lien, identify the applicable lien, and give the reasons for requesting the information.

PAR. 8. Section 301.6325 is amended to read as follows:

§ 301.6325 Statutory provisions; release of lien or discharge of property.

SEC. 6325. *Release of lien or discharge of property*—(a) *Release of lien.* Subject to such regulations as the Secretary or his delegate may prescribe, the Secretary or his delegate may issue a certificate of release of any lien imposed with respect to any internal revenue tax if—

(1) *Liability satisfied or unenforceable.* The Secretary or his delegate finds that the liability for the amount assessed, together with all interest in respect thereof, has been fully satisfied or has become legally unenforceable; or

(2) *Bond accepted.* There is furnished to the Secretary or his delegate and accepted by him a bond that is conditioned upon the payment of the amount assessed, together with all interest in respect thereof, within the time prescribed by law (including any extension of such time), and that is in accordance with such requirements relating to terms, conditions, and form of the bond and sureties thereon, as may be specified by such regulations.

(b) *Discharge of property*—(1) *Property double the amount of the liability.* Subject to such regulations as the Secretary or his delegate may prescribe, the Secretary or his delegate may issue a certificate of discharge of any part of the property subject to any lien imposed under this chapter if the Secretary or his delegate finds that the fair market value of that part of such property remaining subject to the lien is at least double the amount of the unsatisfied liability secured by such lien and the amount of all other liens upon such property which have priority over such lien.

(2) *Part payment; interest of United States valueless.* Subject to such regulations as the Secretary or his delegate may prescribe, the Secretary or his delegate may issue a certificate of discharge of any part of the property subject to any lien imposed by section 6324 if the Secretary or his delegate finds that the liability secured by such lien has been fully satisfied or provided for.

(d) *Subordination of lien.* Subject to such regulations as the Secretary or his delegate may prescribe, the Secretary or his delegate may issue a certificate of subordination of any lien imposed by this chapter upon any part of the property subject to such lien if—

(1) There is paid over to the Secretary or his delegate an amount equal to the amount of the lien or interest to which the certificate subordinates the lien of the United States, or

(2) The Secretary or his delegate believes that the amount realizable by the United States from the property to which the certificate relates, or from any other property subject to the lien, will ultimately be increased by reason of the issuance of such certificate and that the ultimate collection of the tax liability will be facilitated by such subordination.

(e) *Nonattachment of lien.* If the Secretary or his delegate determines that, because of confusion of names or otherwise, any person (other than the person against whom the tax was assessed) is or may be injured by the appearance that a notice of lien filed under section 6323 refers to such person, the Secretary or his delegate may issue a certificate that the lien does not attach to the property of such person.

(f) *Effect of certificate*—(1) *Conclusiveness.* Except as provided in paragraphs (2) and (3), if a certificate is issued pursuant to this section by the Secretary or his delegate and is filed in the same office as the notice of lien to which it relates (if such notice of lien has been filed) such certificate shall have the following effect:

(A) In the case of a certificate of release, such certificate shall be conclusive that the lien referred to in such certificate is extinguished;

(B) In the case of a certificate of discharge, such certificate shall be conclusive that the property covered by such certificate is discharged from the lien;

(C) In the case of a certificate of subordination, such certificate shall be conclusive that the lien or interest to which the lien of the United States is subordinated is superior to the lien of the United States; and

(D) In the case of a certificate of nonattachment, such certificate shall be conclusive that the lien of the United States does not attach to the property of the person referred to in such certificate.

(2) *Revocation of certificate of release or nonattachment.* If the Secretary or his delegate determines that a certificate of release or nonattachment of a lien imposed by section 6321 was issued erroneously or improvidently, or if a certificate of release of such lien was issued pursuant to a collateral agreement entered into in connection with a compromise under section 7122 which has been breached, and if the period of limitation on collection after assessment has not expired, the Secretary or his delegate may revoke such certificate and reinstate the lien—

(A) By mailing notice of such revocation to the person against whom the tax was assessed at his last known address, and

(B) By filing notice of such revocation in the same office in which the notice of lien to which it relates was filed (if such notice of lien had been filed).

Such reinstated lien (i) shall be effective on the date notice of revocation is mailed to the taxpayer in accordance with the provisions of subparagraph (A), but not earlier than the date on which any required filing of notice of revocation is filed in accordance with the provisions of subparagraph (B), and (ii) shall have the same force and effect (as of such date), until the expiration of the period of limitation on collection after assessment, as a lien imposed by section 6321 (relating to lien for taxes).

(3) *Certificates void under certain conditions.* Notwithstanding any other provision of this subtitle, any lien imposed by this chapter shall attach to any property with respect to which a certificate of discharge has been issued if the person liable for the tax reacquires such property after such certificate has been issued.

(g) *Filing of certificates and notices.* If a certificate or notice issued pursuant to this section may not be filed in the office designated by State law in which the notice of lien imposed by section 6321 is filed, such certificate or notice shall be effective if filed in the office of the clerk of the United States district court for the judicial district in which such office is situated.

(h) *Cross reference.* For provisions relating to bonds, see chapter 73 (sec. 7101 and following).

[Sec. 6325 as amended by sec. 77, Technical Amendments Act 1958 (72 Stat. 1662); sec. 103(a), Federal Tax Lien Act 1966 (80 Stat. 1133)]

PAR. 9. Section 301.6325–1 is amended by revising the heading, by revising subparagraphs (1)(i), (2), (3), and (4) of paragraph (b), by revising paragraph (d), and by adding new paragraphs (e), (f), and (g). These revised and added provisions read as follows:

§ 301.6325–1 Release of lien or discharge of property.

* * * * *

(b) *Discharge of specific property from the lien*—(1) *Property double the amount of the liability.* (i) The district director may, in his discretion, issue a certificate of discharge of any part of the property subject to a lien imposed under chapter 64 of the Code if he determines that the fair market value of that part of the property remaining subject to the lien is at least double the sum of the amount of the unsatisfied liability secured by the lien and of the amount of all other liens upon the property which have priority over the lien. In general, fair market value is that amount which one ready and willing but not compelled to buy would pay to another ready and willing but not compelled to sell the property.

* * * * *

(2) *Part payment; interest of United States valueless*—(i) *Part payment.* The district director may, in his discretion, issue a certificate of discharge of any part of the property subject to a lien imposed under chapter 64 of the Code if there is paid over to him in partial satisfaction of the liability secured by the lien an amount determined by him to be not less than the value of the interest of the United States in the property to be so discharged. In determining the amount to be paid, the district director will take into consideration all the facts and circumstances of the case, including the expenses to which the Government has been put in the matter. In no case shall the amount to be paid be less than the value of the interest of the United States in the property with respect to which the certificate of discharge is to be issued.

(ii) *Interest of the United States valueless.* The district director may, in his discretion, issue a certificate of discharge of any part of the property subject to the lien if he determines that the interest of the United States in the property to be so discharged has no value.

(iii) *Valuation of interest of United States.* For purposes of this subparagraph, in determining the value of the interest of the United States in the property, or any part thereof, with respect to which the certificate of discharge is to be issued, the district director shall give consideration to the value of the property and the amount of all liens and encumbrances thereon having priority over the Federal tax lien. In determining the value of the property, the district director may, in his discretion, give consideration to the forced sale value of the property in appropriate cases.

(3) *Discharge of property by substitution of proceeds of sale.* A district director may, in his discretion, issue a certificate of discharge of any part of the property subject to a lien imposed under chapter 64 of the Code if such part of the property is sold and, pursuant to a written agreement with the district director, the proceeds of the sale are held, as a fund subject to the liens and claims of the United States, in the same manner and with the same priority as the lien or claim had with respect to the discharged property. This subparagraph does not apply unless the sale divests the taxpayer of all right, title, and interest in the property sought to be discharged. Any reasonable and necessary expenses incurred in connection with the sale of the property and the administration of the sale proceeds shall be paid by the applicant or from the proceeds of the sale before satisfaction of any lien or claim of the United States.

(4) *Application for certificate of discharge.* Any person desiring a certificate of discharge under this paragraph shall submit an application in writing to the district director responsible for collection of the tax. The application shall contain such information as the district director may require.

* * * * *

(d) *Subordination of lien*—(1) *By payment of the amount subordinated.* A district director may, in his discretion, issue a certificate of subordination of a lien imposed under chapter 64 of the Code upon any part of the property subject to the lien if there is paid over to the district director an amount equal to the amount of the lien or interest to which the certificate subordinates the lien of the United States. For this purpose, the tax lien may be subordinated to another lien or interest on a dollar-for-dollar basis. For example, if a notice of a Federal tax lien is filed and a delinquent taxpayer secures a mortgage loan on a part of the property subject to the tax lien and pays over the proceeds of the loan to a district director after an application for a certificate of subordination is approved, the district director will issue a certificate of subordination. This certificate will have the effect of subordinating the tax lien to the mortgage.

(2) *To facilitate tax collection*—(i) *In general.* A district director may, in his discretion, issue a certificate of subordination of a lien imposed under chapter 64 of the Code upon any part of the property subject to the lien if the district director believes that the subordination of the lien will ultimately result in an increase in the amount realized by the United States from the property subject to the lien and will facilitate the ultimate collection of the tax liability.

(ii) *Examples.* The provisions of this subparagraph may be illustrated by the following examples:

Example (1). A, a farmer, needs money in order to harvest his crop. A Federal tax lien, notice of which has been filed, is outstanding with respect to A's property. B, a lending institution is willing to make the necessary loan if the loan is secured by a first mortgage on the farm which is prior to the Federal tax lien. Upon examination, the district director believes that ultimately the amount realizable from A's property will be increased and the collection of the tax liability will be facilitated by the availability of cash when the crop is harvested and sold. In this case, the district director may, in his discretion, subordinate the tax lien on the farm to the mortgage securing the crop harvesting loan.

Example (2). C owns a commercial building which is deteriorating and in unsalable condition. Because of outstanding Federal tax liens, notices of which have been filed, C is unable to finance the repair and rehabilitation of the building. D, a contractor, is willing to do the work if his mechanic's lien on the property is superior to the Federal tax liens. Upon examination, the district director believes that ultimately the amount realizable from C's property will be increased and the collection of the tax liability will be facilitated by arresting deterioration of the property and restoring it to salable condition. In this case, the district director may, in his discretion, subordinate the tax lien on the building to the mechanic's lien.

Example (3). E, a manufacturer of electronic equipment, obtains financing from F, a lending institution, pursuant to a security agreement, with respect to which a financing statement was duly filed under the Uniform Commercial Code on June 1, 1970. On April 15, 1971, F gains actual notice or knowledge that notice of a Federal tax lien had been filed against E on March 31, 1971, and F refuses to make further advances unless its security interest is assured of priority over the Federal tax lien. Upon examination, the district director believes that ultimately the amount realizable from E's property will be increased and the collection of the tax liability will be facilitated if the work in process can be completed and the equipment sold. In this case, the district director may, in his discretion, subordinate the tax lien to F's security interest for the further advances required to complete the work.

Example (4). Suit is brought against G by H, who claims ownership of property the legal title to which is held by G. A Federal tax lien against G, notice of which has previously been filed, will be enforceable against the property if G's title is confirmed. Because section 6323(b)(8) is inapplicable, J, an attorney, is unwilling to defend the case for G unless he is granted a contractual lien on the property, superior to the Federal tax lien. Upon examination, the district director believes that the successful defense of the case by G will increase the amount ultimately realizable from G's property and will facilitate collection of the tax liability. In this case, the district director may, in his discretion, subordinate the tax lien to J's contractual lien on the disputed property to secure J's reasonable fees and expenses.

(3) *Application for certificate of subordination.* Any person desiring a certificate of subordination under this paragraph shall submit an application therefor in writing to the district director responsible for the collection of the tax. The application shall contain such information as the district director may require.

(e) *Nonattachment of lien.* If a district director determines that, because of confusion of names or otherwise, any person (other than the person against whom the tax was assessed) is or may be injured by the appearance that a notice of lien filed in accordance with § 301.6323(f)–1 refers to such person, the district director may issue a certificate of nonattachment. Such certificate shall state that the lien, notice of which has been filed, does not attach to the property of such person. Any person desiring a certificate of nonattachment under this paragraph shall submit an application

V 41 164
AUG 23 76
UMI

therefor in writing to the district director responsible for the collection of the tax. The application shall contain such information as the district director may require.

(f) *Effect of certificate*—(1) *Conclusiveness.* Except as provided in subparagraphs (2) and (3) of this paragraph, if a certificate is issued under section 6325 by a district director and the certificate is filed in the same office as the notice of lien to which it relates (if the notice of lien has been filed), the certificate shall have the following effect—

(i) In the case of a certificate of release issued under paragraph (a) of this section, the certificate shall be conclusive that the tax lien referred to in the certificate is extinguished;

(ii) In the case of a certificate of discharge issued under paragraph (b) or (c) of this section, the certificate shall be conclusive that the property covered by the certificate is discharged from the tax lien;

(iii) In the case of a certificate of subordination issued under paragraph (d) of this section, the certificate shall be conclusive that the lien or interest to which the Federal tax lien is subordinated is superior to the tax lien; and

(iv) In the case of a certificate of nonattachment issued under paragraph (e), the certificate shall be conclusive that the lien of the United States does not attach to the property of the person referred to in the certificate.

(2) *Revocation of certificate of release or nonattachment*—(i) *In general.* If a district director determines that either—

(*a*) A certificate of release or a certificate of nonattachment of the general tax lien imposed by section 6321 was issued erroneously or improvidently, or

(*b*) A certificate of release of such lien was issued in connection with a compromise agreement under section 7122 which has been breached,

and if the period of limitation on collection after assessment of the tax liability has not expired, the district director may revoke the certificate and reinstate the tax lien. The provisions of this subparagraph do not apply in the case of the lien imposed by section 6324 relating to estate and gift taxes.

(ii) *Method of revocation and reinstatement.* The revocation and reinstatement described in subdivision (i) of this subparagraph is accomplished by—

(*a*) Mailing notice of the revocation to the taxpayer at his last known address, and

(*b*) Filing notice of the revocation of the certificate in the same office in which the notice of lien to which it relates was filed (if the notice of lien has been filed).

(iii) *Effect of reinstatement*—(*a*) *Effective date.* A tax lien reinstated in accordance with the provisions of this subparagraph is effective on and after the date the notice of revocation is mailed to the taxpayer in accordance with the provisions of subdivision (ii) (*a*) of this subparagraph, but the reinstated lien is not effective before the filing of notice of revocation, in accordance with the provisions of subdivision (ii) (*b*) of this subparagraph, if the filing is required by reason of the fact that a notice of the lien had been filed.

(*b*) *Treatment of reinstated lien.* As of the effective date of reinstatement, a reinstated lien has the same force and effect as a general tax lien imposed by section 6321 which arises upon assessment of a tax liability. The reinstated lien continues in existence until the expiration of the period of limitation on collection after assessment of the tax liability to which it relates. The reinstatement of the lien does not retroactively reinstate a previously filed notice of lien. The reinstated lien is not valid against any holder of a lien or interest described in § 301.6323(a)–1 until notice of the reinstated lien has been filed in accordance with the provisions of § 301.6323(f)–1 subsequent to or concurrent with the time the reinstated lien became effective.

(iv) *Example.* The provisions of this subparagraph may be illustrated by the following example:

Example. On March 1, 1967, an assessment of an unpaid Federal tax liability is made against A. On March 1, 1968, notice of the Federal tax lien, which arose at the time of assessment, is filed. On April 1, 1968, A executes a bona fide mortgage on property belonging to him to B. On May 1, 1968, a certificate of release of the tax lien is erroneously issued and is filed by A in the same office in which the notice of lien was filed. On June 3, 1968, the lien is reinstated in accordance with the provisions of this subparagraph. On July 1, 1968, A executes a bona fide mortgage on property belonging to him to C. On August 1, 1968, a notice of the lien which was reinstated is properly filed in accordance with the provisions of § 301.6323(f)–1. The mortgages of both B and C will have priority over the rights of the United States with respect to the tax liability in question. Because a reinstated lien continues in existence only until the expiration of the period of limitation on collection after assessment of the tax liability to which the lien relates, in the absence of any extension or suspension of the period of limitation on collection after assessment, the reinstated lien will become unenforceable by reason of lapse of time after February 28, 1973.

(3) *Certificates void under certain conditions.* Notwithstanding any other provisions of subtitle F of the Code, any lien for Federal taxes attaches to any property with respect to which a certificate of discharge has been issued if the person liable for the tax reacquires the property after the certificate has been issued. Thus, if property subject to a Federal tax lien is discharged therefrom and is later reacquired by the delinquent taxpayer at a time when the lien is still in existence, the tax lien attaches to the reacquired property and is enforceable against it as in the case of after-acquired property generally.

(g) *Filing of certificates and notices.* If a certificate or notice described in this section may not be filed in the office designated by State law in which the notice of lien imposed by section 6321 (to which the certificate or notice relates) is filed, the certificate or notice is effective if filed in the office of the clerk of the United States district court for the judicial district in which the State office where the notice of lien is filed is situated.

SUBCHAPTER D—MISCELLANEOUS EXCISE TAXES

[T.D. 7431]

PART 53—FOUNDATION EXCISE TAXES

Application of Taxes to Certain Nonexempt Trusts

By a notice of proposed rule making appearing in the FEDERAL REGISTER for Thursday, March 18, 1971 (36 FR 25015), amendments to the Foundation Excise Tax Regulations (26 CFR Part 53) were proposed in order to provide rules for the application of such taxes to certain nonexempt trusts under section 4947 of the Internal Revenue Code of 1954. After consideration of all such relevant matter as was presented by interested persons regarding the rules proposed, certain changes were made, and the proposed amendments of the regulations, subject to the changes, are adopted by this document.

Section 4947 generally subjects nonexempt charitable trusts to many of the requirements and restrictions imposed on private foundations in order to prevent taxpayers from avoiding these restrictions by the use of nonexempt trusts instead of private foundations. Thus, many nonexempt charitable trusts are subject to those provisions relating to self-dealing, retention of excess business holdings, and the making of speculative investments or taxable expenditures, but not the current income payout requirement if the trust is a split-interest trust (one in which not all the interests are charitable). However, the stock ownership and speculative investment requirements do not apply to split-interest trusts (a) in cases where charity is the only income beneficiary (and has no remainder interest) and the beneficial interest of charity in the trust is not more than 60 percent of the value of the trust property and also (b) in cases where the only interest of charity in the trust is as a remainderman (and there are no noncharitable remainder interests). In the latter case, the stock ownership and speculative investment requirements become applicable at the time the charitable remainder interest comes into possession.

The final regulations expand upon the proposed regulations by providing additional rules for determining the kinds of trusts that are subject to section 4947, when its provisions become applicable to trusts and the extent to which its provisions make other provisions of the Internal Revenue Code Applicable to trusts.

Adoption of amendments to the regulations. In consideration of the foregoing, the Foundation Excise Tax Regulations (26 CFR Part 53) are amended as follows:

Subpart H is added to 26 CFR Part 53 as follows:

Subpart H—Application to Certain Nonexempt Trusts

Sec.
53.4947 Statutory provisions; application of taxes to certain nonexempt trusts.
53.4947–1 Application of tax.
53.4947–2 Special rules.

SUBPART H—APPLICATION TO CERTAIN NONEXEMPT TRUSTS

§ 53.4947 Statutory provisions; application of taxes to certain nonexempt trusts.

SEC. 4947. *Application of taxes to certain nonexempt trusts*—(a) *Application of tax*—(1) *Charitable trusts.* For purposes of part II of subchapter F of chapter 1 (other than section 508 (a), (b), and (c)) and for purposes of this chapter, a trust which is not exempt from taxation under section 501(a), all of the unexpired interests in which are devoted to one or more of the purposes described in section 170(c)(2)(B), and for which a deduction was allowed under section 170, 545(b)(2), 556(b)(2), 642(c), 2055, 2106(a)(2), or 2522 (or the corresponding provisions of prior law), shall be treated as an organization described in section 501(c)(3). For purposes of section 509(a)(3)(A), such a trust shall be treated as if organized on the day on which it first becomes subject to this paragraph.

(2) *Split-interest trusts.* In the case of a trust which is not exempt from tax under section 501(a), not all of the unexpired interests in which are devoted to one or more of the purposes described in section 170(c)(2)(B), and which has amounts in trust for which a deduction was allowed under section 170, 545(b)(2), 556(b)(2), 642(c), 2055, 2106(a)(2), or 2522, section 507 (relating to termination of private foundation status), section 508(e) (relating to governing instruments) to the extent applicable to a trust described in this paragraph, section 4941 (relating to taxes on self-dealing), section 4943 (relating to taxes on excess business holdings) except as provided in subsection (b)(3), section 4944 (relating to investments which jeopardize charitable purpose) except as provided in subsection (b)(3), and section 4945 (relating to taxes on taxable expenditures) shall apply as if such trust were a private foundation. This paragraph shall not apply with respect to—

(A) Any amounts payable under the terms of such trust to income beneficiaries, unless a deduction was allowed under section 170(f)(2)(B), 2055(e)(2)(B), or 2522(c)(2)(B),

(B) Any amounts in trust other than amounts for which a deduction was allowed under section 170, 545(b)(2), 556(b)(2), 642(c), 2055, 2106(a)(2), or 2522, if such other amounts are segregated from amounts for which no deduction was allowable, or

(C) Any amounts transferred in trust before May 27, 1969.

(3) *Segregated amounts.* For purposes of paragraph (2)(B), a trust with respect to which amounts are segregated shall separately account for the various income, deduction, and other items properly attributable to each of such segregated amounts.

(b) *Special rules*—(1) *Regulations.* The Secretary or his delegate shall prescribe such regulations as may be necessary to carry out the purposes of this section.

(2) *Limit to segregated amounts.* If any amounts in the trust are segregated within the meaning of subsection (a)(2)(B) of this section, the value of the net assets for purposes of subsections (c)(2) and (g) of section 507 shall be limited to such segregated amounts.

(3) *Sections 4943 and 4944.* Sections 4943 and 4944 shall not apply to a trust which is described in subsection (a)(2) if—

(A) All the income interest (and none of the remainder interest) of such trust is devoted solely to one or more of the purposes described in section 170(c)(2)(B), and all amounts in such trust for which a deduction was allowed under section 170, 545(b)(2), 556(b)(2), 642(c), 2055, 2106(a)(2), or 2522 have an aggregate value not more than 60 percent of the aggregate fair market value of all amounts in such trust[s], or

(B) A deduction was allowed under section 170, 545(b)(2), 556(b)(2), 642(c), 2055, 2106(a)(2), or 2522 for amounts payable under the terms of such trust to every remainder beneficiary but not to any income beneficiary.

(Sec. 4947, as added by sec. 101(b) Tax Reform Act 1969 (83 Stat. 517).)

§ 53.4947–1 Application of tax.

(a) *In general.* Section 4947 subjects trusts which are not exempt from taxation under section 501(a), all or part of the unexpired interests in which are devoted to one or more of the purposes described in section 170(c)(2)(B), and which have amounts in trust for which a deduction was allowed under section 170, 545(b)(2), 556(b)(2), 642(c), 2055, 2106(a)(2), or 2522 to the same requirements and restrictions as are imposed on private foundations. The basic purpose of section 4947 is to prevent these trusts from being used to avoid the requirements and restrictions applicable to private foundations. For purposes of this section, a trust shall be presumed (in the absence of proof to the contrary) to have amounts in trust for which a deduction was allowed under section 170, 545(b)(2), 556(b)(2), 642(c), 2055, 2106(a)(2), or 2522 if a deduction would have been allowable under one of these sections. Also for purposes of this section and § 53.4947–2, the term "purposes described in section 170(c)(2)(B)" shall be treated as including purposes described in section 170(c)(1).

(b) *Charitable trusts*—(1) *General rule.* (i) For purposes of this section and § 53.4947–2, a "charitable trust", within the meaning of section 4947(a)(1), is a trust which is not exempt from taxation under section 501(a), all of the unexpired interests in which are devoted to one or more of the purposes described in section 170(c)(2)(B), and for which a deduction was allowed under section 170, 545(b)(2), 556(b)(2), 642(c), 2055, 2106(a)(2), or 2522 (or the corresponding provisions of prior law). A trust is one for which a deduction was allowed under section 642(c), within the meaning of section 4947(a)(1), once a deduction is allowed under section 642(c) to the trust for any amount paid or permanently set aside. (See sections 642(c) and § 1.642–4 for the limitation on such deduction in certain cases.) A charitable trust (as defined in this paragraph) shall be treated as an organization described in section 501(c)(3) and, if it is determined under section 509 that the trust is a private foundation, then Part II of subchapter F of chapter 1 of the Code (other than section 508 (a), (b) and (c)) and chapter 42 shall apply to the trust. However, the charitable trust is not treated as an organization described in section 501(c)(3) for purposes of exemption from taxation under section 501(a). Thus, the trust is subject to the excise tax on its investment income under section 4940(b) rather than the tax imposed by section 4940(a). For purposes of satisfying the organizational test described in § 1.501(c)(3)–1(b) when a charitable trust seeks an exemption from taxation under section 501(a), a charitable trust (as defined in this paragraph) shall be considered organized on the day it first becomes subject to section 4947(a)(1). However, for purposes of the special and transitional rules in section 4940(c)(4)(B), 4942(f)(4), 4943(c)(4)(A)(i) and (B) and section 101(l)(2)(A), (B), (C), and (D), and (l)(3) of the Tax Reform Act of 1969, a charitable trust (as defined in this paragraph) shall be considered organized on the first day it has amounts in trust for which a deduction was allowed (within the meaning of paragraph (a) of this section) under section 170, 545(b)(2), 556(b)(2), 642(c), 2055, 2106(a)(2), or 2522. Thus, under this rule, a trust may be treated as a private foundation in existence on a date governing one of the applicable special and transitional rules even though the trust did not otherwise become subject to the provisions of chapter 42 until a later date.

(ii) The provisions of paragraph (b)(1) of this section may be illustrated by the following examples:

Example (1). On January 30, 1970, X creates an inter vivos trust under which M receives 50 percent and N receives 50 percent of the trust's income for 10 years, and upon the termination of which, at the end of the 10-year period, the corpus is to be distributed to O. M, N and O are all organizations described in section 501(c)(3) and X is allowed a deduction under section 170 for the value of all interests placed in trust. The trustees of the trust do not give notice to the Internal Revenue Service under the provisions of section 508(a), and the trust will therefore not be exempt from taxation under section 501(a). The trust is a charitable trust within the meaning of section 4947(a)(1) from the date of its creation.

Example 2. On March 1, 1971, Y creates a charitable remainder annuity trust described in section 664(d)(1) under which Z, Y's son, receives $10,000 per year for life, remainder to be held in trust for P, an organization described in section 501(c)(3). Y is allowed a deduction under section 170 for the present value of the remainder interest to P. During Z's lifetime, the trust is a split-interest trust described in section 4947(a)(2) and paragraph (c) of this section. Upon the death of Z, all unexpired interests (consisting of P's remainder interest) will be devoted to section 170(c)(2)(B) purposes. Except as provided in § 53.4947–1(b)(2)(iv) (relating to a reasonable period of settlement) the trust will be treated as a charitable trust within the meaning of section 4947(a)(1) from the date of the death of Z unless the trustees of the trust apply for recognition of

V 41 164
AUG 23 76
UMI

section 501(c)(3) status under the provisions of section 508(a).

(2) *Scope of application of section 4947(a)(1).*—(i) *In general.* Subject to paragraph (b)(2)(ii) through (vii) of this section, section 4947(a)(1) applies to nonexempt trusts in which all unexpired interests are charitable. For purposes of this section, the term "charitable" when used to describe an interest or beneficiary refers to the purposes described in section 170(c)(2)(B). An estate from which the executor or administrator is required to distribute all of the net assets in trust to such beneficiaries will not be considered a charitable trust under section 4947(a)(1) during the period of estate administration or settlement, except as provided in paragraph (b)(2)(ii) of this section. A charitable trust created by will shall be considered a charitable trust under section 4947(a)(1) as of the date of death of the decedent-grantor, except as provided in paragraph (b)(2)(v) of this section (relating to trusts which wind up). For the circumstances under which segregated amounts are treated as charitable trusts, see § 53.4947–1(c)(3)(iii).

(ii) *Estates.* (A) When an estate from which the executor or administrator is required to distribute all of the net assets in trust for charitable beneficiaries, or free of trust to such beneficiaries, is considered terminated for Federal income tax purposes under § 1.641(b)–3(a), then the estate will be treated as a charitable trust under section 4947(a)(1) between the date on which the estate is considered terminated under § 1.641(b)–3(a) and the date final distribution of all of the net assets is made to or for the benefit of the charitable beneficiaries. This (ii) does not affect the determination of the tax liability under subtitle A of the beneficiaries of the estates.

(B) The provisions of this (ii) may be illustrated by the following example:

Example. X bequeaths his entire estate, including 100 percent of the stock of a wholly-owned corporation, to M, an organization described in section 501(c)(3), under a will which gives his executor authority to hold the stock and manage the corporation for a period of up to 10 years for the benefit of M prior to its ultimate disposition. A deduction for the charitable bequest was allowed to X's estate under section 2055. The executor is vested with a full range of powers, including the power of sale. Upon the death of X, his executor distributes X's assets to M except for the stock of the corporation, which he holds for 5 years prior to its disposition. The continued holding of the stock of the corporation by the executor after the expiration of a reasonable time for performance of all the ordinary duties of administration causes the estate to be considered terminated for Federal income tax purposes pursuant to § 1.641(b)–3(a) and thereby subjects it to the provisions of section 4947(a)(1) from the date of such termination to the date of final disposition of the stock of the corporation.

(iii) *Certain split-interest trusts which wind up.* A split-interest trust (as defined in paragraph (c) of this section) in which all of the unexpired interests are charitable remainder interests and in which the charitable beneficiaries have become entitled to distributions of corpus in trust or free of trust shall continue to be treated as a split-interest trust under section 4947(a)(2) until the date on which final distribution of all the net assets is made. However, if after the expiration of any intervening interests the trust is considered terminated for Federal income tax purposes under § 1.641(b)–3(b), then the trust will be treated as a charitable trust under section 4947(a)(1), rather than a split interest trust under section 4947(a)(2), between the date on which the trust is considered terminated under § 1.641(b)–3(b) and the date on which such final distribution of all of the net assets is made to or for the benefit of the charitable remainder beneficiaries. This (iii) does not affect the determination of the tax liability under subtitle A of the beneficiaries of the trusts.

(iv) *Split-interest trusts which become charitable trusts.* (A) A split-interest trust (as defined in paragraph (c) of this section) in which all of the unexpired interests are charitable remainder interests and in which some or all of the charitable beneficiaries are not entitled to distributions of corpus within the meaning of paragraph (b)(2)(iii) of this section shall continue to be treated as a split-interest trust under section 4947(a)(2) rather than a charitable trust under section 4947(a)(1) for a reasonable period of settlement after the expiration of the noncharitable interest. Thus, a split-interest trust which under its terms is to continue to hold assets for charitable beneficiaries after the expiration of the noncharitable interest rather than distributing them as in paragraph (b)(2)(iii) of this section is given a reasonable period of settlement before being treated as a charitable trust. For purposes of this paragraph, the term "reasonable period of settlement" means that period reasonably required (or if shorter, actually required) by the trustee to perform the ordinary duties of administration necessary for the settlement of the trust. These duties include, for example, the collection of assets, the payment of debts, taxes, and distributions, and the determination of the rights of the subsequent beneficiaries.

(B) This (iv) may be illustrated by the following example:

Example. On January 15, 1971, A creates a charitable remainder annuity trust described in section 664(d)(1) under which the trustees are required to distribute $10,000 a year to B, A's wife, for life, remainder to be held in trust for the use of M, an organization described in section 501(c)(3). A is allowed a deduction under section 170 for the amount of the charitable interest, and the trust is, therefore, treated as a split-interest trust under section 4947(a)(2) from the date of its creation. B dies on February 10, 1975. On April 15, 1975, the trustees complete performance of the ordinary duties of administration necessary for the settlement of the trust brought about by the death of B. These duties include, for example, an accounting for and payment to the estate of B of amounts accrued by B while alive during 1975. However, the trustees do not distribute the corpus to M by April 15, 1975. The trust shall continue to be treated as a split-interest trust under section 4947(a)(2) until April 15, 1975. After April 15, 1975, the trust shall be treated as a charitable trust under section 4947(a)(1).

(v) *Certain revocable and testamentary trusts which wind up.* A revocable trust that becomes irrevocable upon the death of the decedent-grantor, or a trust created by will, from which the trustee is required to distribute all of the net assets in trust for or free of trust to charitable beneficiaries is not considered a charitable trust under section 4947(a)(1) for a reasonable period of settlement (within the meaning of paragraph (b)(2)(iv) of this section) after becoming irrevocable. After that period the trust is considered a charitable trust under section 4947(a)(1).

(vi) *Revocable trusts which become charitable trusts.* A revocable trust that becomes irrevocable upon the death of the decedent-grantor in which all of the unexpired interests are charitable and under the terms of the governing instrument of which the trustee is required to hold some or all of the net assets in trust after becoming irrevocable solely for charitable beneficiaries is not considered a trust under section 4947(a)(1) for a reasonable period of settlement (within the meaning of paragraph (b)(2)(iv) of this section) after becoming irrevocable except that section 4941 may apply if the requirements of § 53.4941(d)–1(b)(3) are not met. After that period, the trust is considered a charitable trust under section 4947(a)(1).

(vii) *Trust devoted to 170(c) purposes.* (A) A trust all of the unexpired interests in which are devoted to section 170(c)(3) or (5) purposes together with section 170(c)(2)(B) purposes shall be considered a charitable trust except that payments under the terms of the governing instrument to an organization described in section 170(c)(3) or (5) shall not be considered a violation of section 4945(d)(5) or any other provisions of chapter 42 and shall be considered qualifying distributions under section 4942.

(B) *Example.* The application of paragraph (b)(2)(vii) of this section may be illustrated by the following example:

Example. On January 30, 1970, H creates an inter vivos trust under the terms of the governing instrument of which M, an organization described in section 170(c)(3), and N, an organization described in section 501(c)(3), are each to receive 50 percent of the income for a period of 10 years. At the end of the 10 year period, the corpus is to be distributed to O, an organization also described in section 501(c)(3). H is allowed a deduction under section 170 for the value of all interests placed in trust. The payments to M do not constitute a violation of section 4945(d)(5) or any other provision of chapter 42 and constitute qualifying distributions under section 4942. However, except as provided in the previous sentence, the trust shall be considered a charitable trust.

(3) *Charitable trusts described in section 509(a)(3).* For purposes of section 509(a)(3)(A), a charitable trust shall be treated as if organized on the day on which it first becomes subject to section 4947(a)(1). However, for purposes of applying §§ 1.509(a)–4(d)(2)(iv)(a), and 1.509(a)–4(i)(1)(ii) and (iii)(c) the previous relationship between the charitable trust and the section 509(a)(1) or (2) organizations it benefits or supports may be considered. If the charitable trust otherwise meets the requirements of section 509(a)(3), it may obtain recognition of its status as a section 509(a)(3) organization by requesting a ruling from the Internal Revenue Service. For the special rules pertaining to the application of the organizational test to organizations terminating their private foundation status under the 12-month or 60-month termination period provided under section 507(b)(1)(B) by becoming "public" under section 509(a)(3), see the regulations under section 507(b)(1).

(c) *Split-interest trusts.*—(1) *General rule.*—(i) *Definition.* For purposes of this section and § 53.4947–2, a "split-interest trust", within the meaning of section 4947(a)(2), is a trust which is not exempt from taxation under section 501(a), not all of the unexpired interests in which are devoted to one or more of the purposes described in section 170(c)(2)(B), and which has amounts in trust for which a deduction was allowed (within the meaning of paragraph (a) of this section) under section 170, 545(b)(2), 556(b)(2), 642(c), 2055, 2106(a)(2), or 2522. A trust is one which has amounts in trust for which a deduction was allowed under section 642(c) within the meaning of section 4947(a)(2) once a deduction is allowed under section 642(c) to the trust for any amount permanently set aside. This (i) also includes any trust which is not treated as a charitable trust by operation of paragraph (b)(2)(iii) or (iv) of this section (relating to split-interest trusts in the process of winding up or during a reasonable period of settlement). Section 4947(a)(1) shall apply to a trust described in this (i) (without regard to section 4947(a)(2)(A), (B), or (C)) from the first date upon which the provisions of paragraph (b)(2)(iii) or (iv) of this section are satisfied. For the circumstances under which a trust all of the unexpired interests in which are devoted to section 170(c)(3) or (5) purposes together with section 170(c)(2)(B) purposes is considered a charitable trust, see § 53.4947–1(b)(2)(vii).

(ii) *Applicability of statutory rules.* A split-interest trust is subject to the provisions of section 507 (except as provided in paragraph (e) of this section), 508(e) (to the extent applicable to a split-interest trust), 4941, 4943 (except as provided in section 4947(b)(3)), 4944 (except as provided in section 4947(b)(3)), and 4945 in the same manner as if such trust were a private foundation.

(iii) *Special rules.* A newly created trust shall, for purposes of section 4947(a)(2), be treated as having amounts in trust for which a deduction was allowed under section 170, 545(b)(2), 556(b)(2), 642(c), 2055, 2106(a)(2), or 2522 from the date of its creation, even if a deduction was allowed for such amounts only at a later date. For purposes of this (iii), the date of creation of a charitable remainder trust shall be determined by applying the rules in § 1.664–1(a)(4).

(2) *Exception for amounts payable to income beneficiaries.*—(i) Under section 4947(a)(2)(A), paragraph (c)(1)(ii) of this section does not apply to any amounts payable under the terms of a split-interest trust to income beneficiaries unless a deduction was allowed under section 170(f)(2)(B), 2055(e)(2)(B), or 2522(c)(2)(B) with respect to the income interest of any such beneficiary. See § 1.170A–6(c), § 20.2055–2(e)(2), and § 25.2522(c)–3(c)(2) for rules regarding the allowance of these deductions. However, section 4947(a)(2)(A) does not apply when the value of all interests in property transferred in trust are deductible under section 170, 545(b)(2), 556(b)(2), 642(c), 2055, 2106(a)(2), or 2522.

(ii) The application of this subparagraph may be illustrated by the following examples:

Example (1). H creates a charitable remainder unitrust (described in section 664(d)(2)) which is required annually to pay W, H's wife, 5 percent of the net fair market value of the trust assets, valued annually, for her life; and to pay the remainder to Y, a section 501(c)(3) organization. A deduction under section 170(f)(2)(A) was allowed with respect to the remainder interest of Y. Under section 4947(a)(2)(A), each annual amount which becomes payable to W during her life is not subject to paragraph (c)(1)(ii) of this section on or after the date upon which it becomes so payable and the payment of each amount to W is not an act of self-dealing under section 4941(d)(1) and does not violate any other provision of chapter 42. However, except as provided in the preceding sentence, the trust is subject to paragraph (c)(1)(ii) of this section in the same manner as any other split-interest trust.

Example (2). H bequeaths the residue of his estate in trust for the benefit of S, his son, and Y, an organization described in section 501(c)(3). A guaranteed annuity interest of $10,000 is to be paid to S for 20 years. A guaranteed annuity interest of $5,000 which meets the requirements contained in § 20.2055–2(e)(2)(v)(a) is also to be paid to Y for 20 years. Upon termination of the 20-year term, the corpus is to be distributed to Z, another organization described in section 501(c)(3). The trust is a charitable remainder annuity trust as described in section 664(d)(1) and the regulations thereunder, and a deduction under section 2055(e)(2)(A) was allowed with respect to the remainder interest of Z. A deduction was also allowed under section 2055(e)(2)(B) with respect to the guaranteed annuity interest of Y. The assets in the trust are not segregated under section 4947(a)(2)(B) and paragraph (c)(3) of this section. Under section 4947(a)(2)(A), each payment of $10,000 to S is not subject to section 4947(a)(2) and paragraph (c)(1)(ii) of this section. The payment of each amount to S is not an act of self-dealing under section 4941(d)(1) and does not violate any other provision of chapter 42. However, except as provided in the preceding sentence, the trust is subject to section 4947(a)(2) and paragraph (c)(1)(ii) of this section in the same manner as any other split-interest trust.

Example (3). H creates a trust under which the trustees are required to pay over an annuity interest of $20,000 to W, H's wife, for her life. A guaranteed annuity interest of $10,000 which meets the requirements contained in § 25.2522(c)–3(c)(2)(v) is also to be paid to X, an organization described in section 501(c)(3), for the life of W. Upon the death of W, the corpus of the trust, which consists of office buildings M and N, is to be distributed to S, H's son. H received a deduction under section 2522(c)(2)(B) for the value of X's income interest in the trust. The assets in the trust are not segregated under section 4947(a)(2)(B) and paragraph (c)(3) of this section. Under section 4947(a)(2)(A), each payment of $20,000 to W is not subject to section 4947(a)(2) and paragraph (c)(1)(ii) of this section. The payment of each amount to W is not an act of self-dealing under section 4941(d)(1) and does not violate any other provision of chapter 42. However, except as provided in the preceding sentence, the trust is subject to paragraph (c)(1)(ii) of this section in the same manner as any other split-interest trust. See example (1) of paragraph (c)(3)(v) of this section for the application of section 4947(a)(2)(B) to a similar trust where the trustees segregate the assets of the trust.

(3) *Exception for certain segregated amounts.*—(i) *In general.* Under section 4947(a)(2)(B) paragraph (c)(1)(ii) of this section does not apply to assets held in trust (together with the income and capital gains derived from the assets), which are segregated from other assets held in trust for which a deduction was allowed for an income or remainder interest under section 170, 545(b)(2), 556(b)(2), 642(c), 2055, 2106(a)(2), or 2522.

(ii) *Segregation of amounts.* Amounts will generally be considered segregated (within the meaning of section 4947(a)(2)(B)) if:

(A) assets with respect to which no deduction was allowed (for an income or remainder interest) under section 170, 545(b)(2), 556(b)(2), 642(c), 2055, 2106(a)(2), or 2522, are separately accounted for under section 4947(a)(3) and paragraph (c)(4) of this section from assets for which such a deduction was allowed for any income or remainder interest and,

(B) by reason of the separate accounting the trust can be treated as two separate trusts, one of which is devoted exclusively to noncharitable income and remainder interests and the other of which is a charitable trust described in section 4947(a)(1) or a split-interest trust described in section 4947(a)(2).

Under these circumstances, only the "trust" which is devoted exclusively to noncharitable income and remainder interests will be considered a segregated amount which, under section 4947(a)(2)(B), is not subject to section 4947(a)(2) and paragraph (c)(1)(ii) of this section.

(iii) *Exclusively charitable amounts.* If, under section 4947(a)(2)(B),

(A) an amount held in trust which is devoted exclusively to noncharitable income and remainder interests is segregated from

(B) an amount held in trust which is devoted exclusively to charitable income and remainder interests,

then for purposes of this section the amount described in paragraph (c)(3)(iii)(B) of this section will be treated as a charitable trust which is subject to the provisions of section 4947(a)(1).

V41H64 AUG 23 76 UMI

(iv) *Charitable and noncharitable amounts.* If, under section 4947(a)(2)(B),

(A) an amount held in trust which is devoted exclusively to noncharitable income and remainder interests is segregated from

(B) an amount held in trust which is devoted to both charitable income or remainder interests and noncharitable income or remainder interests,

then for purposes of this section the amount described in paragraph (c)(3)(iv)(B) of this section will be treated as a split-interest trust which is subject to the provisions of section 4947(a)(2).

(v) *Examples.* The application of paragraph (c)(3) of this section may be illustrated by the following examples:

Example (1). H creates a trust under which the trustees are required to pay over annually 5 percent of the net fair market value of M building, valued annually, to W, H's wife, for life, remainder to S, H's son. The other asset in the trust is N building, with respect to which the trustees are required to pay over annually 5 percent of the net fair market value of the building, valued annually, to X, a section 501(c)(3) organization, for a period of 15 years, remainder to S. Each asset is separately accounted for under section 4947(a)(3) and paragraph (c)(4) of this section. He received a deduction under section 2522 for the value of X's income interest in N building. Under these circumstances, M building is considered segregated (within the meaning of section 4947(a)(2)(B)) from N building and is not subject to section 4947 (a)(2). The remainder interest of S in N building is not considered segregated from the income interest of X in N building, since both are interests in the same asset. N building is considered held in a split-interest trust which is subject to section 4947 (a)(2) and paragraph (c)(1)(ii) of this section.

Example (2). H transfers $50,000 in trust to pay $2,500 per year to Z, a section 501(c)(3) organization, for a term of 20 years, remainder to S, H's son. H is allowed a deduction under section 2522 for the present value of Z's income interest. The income interest of Z in the trust asset cannot be segregated (within the meaning of section 4947(a)(2)(B)) from the remainder interest of S since both are interests in the same asset. Therefore, the entire trust is subject to section 4947(a)(2) and paragraph (c)(1)(ii) of this section.

(4) *Accounting for segregated amounts*—(i) *General rule.* Under section 4947(a)(2)(B), a trust with respect to which amounts are segregated within the meaning of paragraph (c)(3) of this section must separately account for the various income, deduction, and other items properly attributable to each segregated amount in the books of account and separately account to each of the beneficiaries of the trust.

(ii) *Method.* Separate accounting shall be made—

(A) According to the method regularly employed by the trust, if the method is reasonable, and

(B) In all other cases in a manner which, in the opinion of the Commissioner, is reasonable.

A method of separate accounting will be considered "regularly employed" by a trust when the method has been consistently followed in prior taxable years or when a trust which has never before maintained segregated amounts initiates a reasonable method of separate accounting for its segregated amounts and consistently follows such method thereafter. The trust shall keep permanent records and other data relating to the segregated amounts as are necessary to enable the district director to determine the correctness of the application of the rules prescribed in paragraph (c)(3) and (4) of this section.

(5) *Amounts transferred in trust before May 27, 1969*—(i) *General rule.* Under section 4947(a)(2)(C), paragraph (c)(1)(ii) of this section does not apply to any amounts transferred in trust before May 27, 1969. For purposes of this (5), an amount shall be considered to be transferred in trust only when the transfer is one which meets the requirements for the allowance of a deduction under section 170, 545(b)(2), 556(b)(2), 642(c), 2055, 2106(a)(2), or 2522 (or the corresponding provisions of prior law). Income and capital gains which are derived at any time from amounts transferred in trust before May 27, 1969, shall also be excluded from the application of paragraph (c)(1)(ii) of this section. If an asset which was transferred in trust before May 27, 1969, is sold or exchanged after May 26, 1969, any asset received by the trust upon the sale or exchange shall be treated as an asset which was transferred in trust before May 27, 1969.

(ii) *Requirement for separate accounting for amounts transferred in trust before May 27, 1969.* If:

(A) Amounts are transferred in trust after May 26, 1969, and the trust to which the amounts are transferred also contains

(B) Amounts transferred in trust before May 27, 1969,

the general rule of paragraph (c)(5)(i) of this section applicable to the amounts described in paragraph (c)(5)(ii)(B) of this section will apply only if the amounts described in paragraph (c)(5)(ii)(A) of this section (together with all income and capital gains derived therefrom) are separately accounted for (within the meaning of paragraph (c)(4) of this section) from the amounts described in paragraph (c)(5)(ii)(B) of this section, together with all income and capital gains derived therefrom. For the application of section 508(e) to a trust with respect to which amounts were transferred both before and after May 27, 1969, see section 508(e) and the regulations thereunder.

(iii) *Exception for certain testamentary trusts.* (A) Amounts transferred in trust before May 27, 1969 include amounts transferred in trust after May 26, 1969 when the transfer is made under the terms of a testamentary trust created by the will of a decedent who died before May 27, 1969, (regardless of whether the executors or the testamentary trustees are required to execute testamentary trusts by court order under applicable local law). Amounts transferred in trust before May 27, 1969, also include amounts transferred to a testamentary trust created by the will of a decedent who died after May 26, 1969 if the will was executed before May 27, 1969 and no dispositive provision of the will was amended (within the meaning of § 20.2055-2(e)(4) and (5)) by the decedent by codicil or otherwise, after May 26, 1969, and the decedent was on May 27, 1969, and at all times thereafter under a mental disability (as defined in § 1.642(c)-2(b)(3)(ii)) to amend the will by codicil or otherwise.

(B) The provisions of this (iii) may be illustrated by the following example:

Example. X executed a will in 1960 which provided for the creation of a testamentary trust which meets the description of a split-interest trust under section 4947(a)(2). X died on April 15, 1969. Under the provisions of his will, the probate court permitted certain property in X's estate to be transferred to the testamentary trust at fixed intervals over a period of two years during the administration of the estate. Section 4947(a)(2) does not apply to any amount described in this example, including the amounts transferred after May 26, 1969, because, for purposes of section 4947(a)(2)(C), each such transfer will be treated as an amount transferred in trust before May 27, 1969, within the meaning of section 4947(a)(2)(C).

(6) *Scope of application of section 4947(a)(2)*—(i) *In general.* Subject to paragraph (c)(6)(ii), (iii), and (iv) of this section, section 4947(a)(2) applies to trusts in which some but not all unexpired interests are charitable. An estate from which the executor or administrator is required to distribute all of the net assets in trust or free of trust to both charitable and noncharitable beneficiaries will not be considered to be a split-interest trust under section 4947(a)(2) during the period of estate administration or settlement, except as provided in paragraph (c)(6)(ii) of this section. A split-interest trust created by will shall be considered a split-interest trust under section 4947(a)(2) as of the date of death of the decedent-grantor, except as provided in paragraph (c)(6)(iv) of this section.

(ii) *Estates.* (A) When an estate from which the executor or administrator is required to distribute all of the net assets in trust or free of trust to both charitable and noncharitable beneficiaries is considered terminated for Federal income tax purposes under § 1.641(b)-3(a), then the estate will be treated as a split-interest trust under section 4957(a)(2) (or a charitable trust under section 4957(a)(1), if applicable) between the date on which the estate is considered terminated under § 1.641(b)-3(a) and the date on which final distribution of the net assets to the last remaining charitable beneficiary is made. This (ii) does not affect the determination of the tax liability under subtitle A of either charitable or noncharitable beneficiaries of the estates.

(B) The provisions of this (ii) may be illustrated by the following example:

Example. X dies on January 15, 1973 and bequeaths $10,000 to M, an organization described in section 501(c)(3), and the residue of his estate to W, his wife. A deduction for the charitable bequest was allowed to X's estate under section 2055. Substantially all of X's estate consists of 100 percent of the stock of a wholly owned corporation, certain liquid assets such as marketable stocks and securities and bank accounts, and X's home, automobile, and other personal property. X's will gives his executor a full range of powers, including the power to sell the stock of the wholly owned corporation. After the death of X, his executor continues to manage the wholly owned corporation while attempting to sell the stock of the corporation. During this period, the executor makes no distributions to M. On May 24, 1978, the Internal Revenue Service determines under § 1.641(b)-3(a) that the administration of the estate has been unduly prolonged and the estate is considered terminated as of that date for Federal income tax purposes. X's estate will be treated as a split-interest trust described in section 4947(a)(2) between May 24, 1978 and the date on which the $10,000 bequest to M is satisfied. X's estate will therefore be subject to the applicable private foundation provisions during that period and, for example, a sale of the house by the estate to any disqualified person (as defined in section 4946) will be an act of self-dealing under section 4941.

(iii) *Revocable trusts which become split-interest trusts.* A revocable trust that becomes irrevocable upon the death of the decedent-grantor under the terms of the governing instrument of which the trustee is required to hold some or all of its net assets in trust after becoming irrevocable for both charitable and noncharitable beneficiaries is not considered a split-interest trust under section 4947(a)(2) for a reasonable period of settlement after becoming irrevocable except that section 4941 may apply if the requirements of § 53.4941(d)-1(b)(3) are not met.

After that period, the trust is considered a split-interest trust under section 4947(a)(2). For purposes of this (iii), the term "reasonable period of settlement" means that period reasonably required (or if shorter, actually required) by the trustee to perform the ordinary duties of administration necessary for the settlement of the trust. These duties include, for example, the collection of assets, the payment of debts, taxes, and distributions, and the determination of rights of the subsequent beneficiaries.

(iv) *Certain revocable and testamentary trusts which wind up.* A revocable trust that becomes irrevocable upon the death of the decedent-grantor, or a trust created by will, from which the trustee is required to distribute all of the net assets in trust or free of trust to both charitable and noncharitable beneficiaries is not considered a split-interest trust under section 4947(a)(2) for a reasonable period of settlement (within the meaning of paragraph (c)(6)(iii) of this section) after becoming irrevocable. After that period, the trust is considered a split-interest trust under section 4947(a)(2) (or a charitable trust under section 4947(a)(1), if applicable).

(d) *Cross references; Governing instrument requirements and charitable deduction limitations.* For the application of section 642(c)(6) (relating to section 170 limitations on charitable deductions of non-exempt private foundation trusts) to a trust described in section 4947(a)(1), see § 1.642(c)-4. For the denial of a deduction under section 170, 545(b)(2), 556(b)(2), 642(c), 2055, 2106(a)(2), or 2522 for a gift, a bequest, or an amount paid to (and the denial of a deduction under section 642(c) for an amount set aside in) a trust described in section 4947(a)(1) or (2) that fails to meet the applicable governing instrument requirements of section 508(e) by the end of the taxable year of the trust, see section 508(d)(2) and § 1.508-2(b). Since a charitable remainder trust (as defined in section 664) is not exempt under section 501(a), it is subject to section 4947(a)(2), and thus to the governing instrument requirements of section 508(e) to the extent they are applicable.

(e) *Application of section 507(a).*—(1) *General rule.* The provisions of section 507(a) shall not apply to a trust described in section 4947(a)(1) or (2) by reason of any payment to a beneficiary that is directed by the terms of the governing instrument of the trust and is not discretionary with the trustee or, in the case of a discretionary payment, by reason of, or following, the expiration of the last remaining charitable interest in the trust.

(2) *Examples.* The provisions of this (e) may be illustrated by the following examples:

Example (1). H creates a section 4947(a)(1) trust under which the income is to be paid for 15 years to R, a section 501(c)(3) organization. Upon the expiration of 15 years, the trust is to terminate and distribute all of its assets to S, another section 501(c)(3) organization. Distribution of the corpus of the trust to S will not be considered a termination of the trust's private foundation status within the meaning of section 507(a).

Example (2). H creates a trust under which X, a section 501(c)(3) organization, receives $20,000 per year for a period of 20 years, remainder to S, H's son. H is allowed a deduction under section 2522 for the present value of X's interest.

When the final payment to X has been made at the end of the 20-year period in accordance with the terms of the trust, the provisions of section 4947(a)(2) will cease to apply to the trust because the trust no longer retains any amounts for which the deduction under section 2522 was allowed. However, the final payment to X will not be considered a termination of the trust's private foundation status within the meaning of section 507(a).

Example (3). J creates a charitable remainder annuity trust described in section 664(d)(1) under which S, J's son, receives $10,000 per year for life, remainder to be distributed outright to P, an organization described in section 501(c)(3). J is allowed a deduction under section 170 for the value of the remainder interest placed in trust for the benefit of P, and the provisions of section 4947(a)(2) apply to the trust. At the death of S, the trust will terminate and all assets will be distributed to P. However, such final distribution to P will not be considered a termination of the trust's private foundation status within the meaning of section 507(a).

§ 53.4947-2 Special rules.

(a) *Limit to segregated amounts.* If any amounts held in trust are segregated within the meaning of § 53.4947-1(c)(3), the value of the net assets for purposes of section 507(c)(2) and (g) shall be limited to the segregated amounts with respect to which a deduction under section 170, 545(b)(2), 556(b)(2), 642(c), 2055, 2106(a)(2), or 2522 was allowed. See the regulations under section 507(c)(2) and (g).

(b) *Applicability of sections 4943 and 4944 to split-interest trusts*—(1) *General rule.* Under section 4947(b)(3), sections 4943 and 4944 do not apply to a split-interest trust described in section 4947(a)(2) if:

(i) all the income interest (and none of the remainder interest) of the trust is devoted solely to one or more of the purposes described in section 170(c)(2)(B) and all amounts in the trust for which a deduction was allowed under section 170, 545(b)(2), 556(b)(2), 642(c), 2055, 2106(a)(2), or 2522 have an aggregate value (at the time for which the deduction was allowed) of not more than 60 percent of the aggregate fair market value of all amounts in the trust (after the payment of estate taxes and all other liabilities), or

(ii) a deduction was allowed under section 170, 545(b)(2), 556(b)(2), 642(c), 2055, 2106(a)(2) or 2522 for amounts payable under the terms of the trust to every remainder beneficiary, but not to any income beneficiary.

This (1) shall apply to a trust described in paragraph (b)(1)(ii) of this section only if all amounts payable under the terms of the trust to every remainder beneficiary are to be devoted solely to one or more of the purposes described in section 170(c)(2)(B). After the expiration of all income interests in a trust described in paragraph (b)(1)(ii) of this section, the trust shall become subject to section 4947(a)(1) under § 53.4947-1(b)(2), and section 4947(b)(3) shall no longer apply to the trust. A pooled income fund described in section 642(c)(5) will generally meet the requirements of paragraph (b)(1)(ii) of this section, as will a charitable remainder trust described in section 664(d)(1), if in either case it does not make payments to any income beneficiary described in section 170(c).

(2) *Definitions.* (i) For purposes of section 4947(b)(3)(A), the term "income interest" shall include an interest in property transferred in trust which is in the form of a guaranteed annuity interest or unitrust interest as described in § 1.170A-6(c), § 20.2055-2(e)(2) or § 25.2522(c)-3(c)(2) and the term "remainder interest" shall include an interest which succeeds an "income interest" within the meaning of this (i).

(ii) For purposes of section 4947(b)(3)(B), the term "income beneficiary" shall include a recipient of payments described in section 642(c)(5)(F) from a pooled income fund, payments described in section 664(d)(1)(A) from a charitable remainder annuity trust, or payments described in section 664(d)(2)(A) or (3) from a charitable remainder unitrust. The term "remainder beneficiary" shall include a beneficiary

V 41 164
AUG 23 76
UMI

of a remainder interest described in section 642(c)(5) or 664(d)(1)(C) or (2)(C).

(c) *Effective date.* Except as otherwise provided in §§ 53.4947–1 and 53.4947–2 and the regulations under sections 508 (d) and (e), §§ 53.4947–1 and 53.4947–2 shall take effect on January 1, 1970.

(Secs. 4947 and 7805, Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).)

DONALD C. ALEXANDER,
Commissioner of Internal Revenue.

Approved: August 16, 1976.

CHARLES M. WALKER,
Assistant Secretary of the Treasury.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Valencia Orange Regulation 540, Amdt. 1]

PART 908—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

PREAMBLE

This regulation increases the quantity of California-Arizona Valencia oranges that may be shipped to fresh market during the weekly regulation period August 13–19, 1976. The quantity that may be shipped is increased due to improved market conditions for California-Arizona Valencia oranges. The regulation and this amendment are issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 908.

§ 908.840 Valencia Orange Regulation 540.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674) and upon the basis of the recommendation and information submitted by the Valencia Orange Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such Valencia oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for an increase in the quantity of oranges available for handling during the current week results from changes that have taken place in the marketing situation since the issuance of Valencia Orange Regulation 540 (41 FR 34006). The marketing picture now indicates that there is a greater demand for Valencia oranges than existed when the regulation was made effective. Therefore, in order to provide an opportunity for handlers to handle a sufficient volume of Valencia oranges to fill the current demand thereby making a greater quantity of Valencia oranges available to meet such increased demand, the regulation should be amended, as hereinafter set forth.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, and this amendment relieves restriction on the handling of Valencia oranges grown in Arizona and designated part of California.

(b) *Order, as amended.* The provisions in paragraph (b)(1)(iii) of § 908.840 (Valencia Orange Regulation 540 (41 FR 34006)) are hereby amended to read as follows:

"(i) District 1: 292,000 cartons;
"(ii) District 2: 358,000 cartons."

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.)

Dated: August 18, 1976.

FLOYD F. HEDLUND,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.76–24600 Filed 8–20–76;8:45 am]

PART 967—CELERY GROWN IN FLORIDA

Handling Regulation

This handling regulation establishes the quantity of Florida celery to be marketed fresh during the 1976–77 season, with the objective of assuring adequate supplies and orderly marketing.

Notice of rule making was published in the FEDERAL REGISTER July 29, 1976 (41 FR 31558) that the Secretary of Agriculture was considering the issuance of a handling regulation designed to promote orderly marketing of celery grown in Florida. The proposal was discussed at a public meeting June 9, 1976, in Orlando, and was unanimously recommended by the Florida Celery Committee. This committee was established under Marketing Agreement No. 149 and Order No. 967, both as amended (7 CFR Part 967). This program regulates the handling of celery grown in Florida and is issued under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.). The notice afforded interested persons an opportunity to file written data, views or arguments regarding the proposal with the Hearing Clerk not later than August 12, 1976. None was filed.

The committee recommended a Marketing Quantity of 9,223,520 crates of fresh celery for the 1976–77 season. This recommendation is based on the appraisal of expected supply and prospective market demand for the 1976–77 season.

During the past decade, planted acreage generally has ranged between 10,300 and 12,800 acres each year. Yield has been variable, mainly in response to weather, although unfavorable market conditions may sometimes reduce average output per acre. The 3.9 million hundredweight produced in 1975–76 was 6 percent below the previous season and 2 percent below the 1968–69—72–73 average. The relatively small crop reflected heavy insect-caused losses during the fall, and a moderate decline in total acreage following two years of low prices.

The Marketable Quantity recommended for 1976–77 of 9,223,520 crates is 11 percent more than the 8,326,671 crates in 1975–76. Each producer will have an allotment equal to 100 percent of his historical marketings compared with 90 percent in 1975–76. The recommended large supply will afford the Florida celery industry an opportunity to evaluate market response in a situation when maximum supplies are made available to markets that generally exhibit an inelastic demand. Actual acreage of celery to be planted in Florida and elsewhere for harvest during the 1976–77 season has not been officially estimated. However, the committee projects that 11,000 acres may be planted compared with 10,359 last season and 11,424 in 1974–75. Production may amount to 4.55 million hundredweight for fresh marketing as well as for processing purposes.

With no applicants for new or increased Base Quantities, no reserve was recommended for additional Base Quantities under § 967.37(d)(1).

On the basis of all considerations it is believed that this regulation will tend to effectuate the declared policy of the act.

It is hereby found that good cause exists for not postponing the effective date of this section until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that (1) notice was given of the handling regulation set forth in this section through publicity in the production area and by publication of the proposal in the July 29, 1976, FEDERAL REGISTER, (2) as provided in the marketing agreement and order, this regulation applies to celery marketed during the 1976–77 season, (3) compliance with this section will not require any special preparation by handlers which cannot be completed prior to the time actual handling of harvested celery begins, approximately the latter part of October, (4) prompt issuance of this regulation will be beneficial to all interested persons because it should afford producers and handlers maximum time to plan their operations accordingly, and (5) no useful purpose will be served by postponing such issuance.

The regulation is as follows:

§ 967.312 Handling regulation; marketable quantity; and uniform percentage for the 1976–77 season ending July 31, 1977.

(a) The Marketable Quantity is established under § 967.36(a) as 9,223,520 crates of celery.

(b) As provided in § 967.38(a), the Uniform Percentage shall be 100 percent.

(c) Pursuant to § 967.36(b), no handler shall handle any harvested celery unless it is within the Marketable Allotment of a producer who has a Base Quantity and such producer authorizes the first handler thereof to handle it.

(d) No reserve for Base Quantities is established for the 1976–77 season.

(e) Terms used herein shall have the same meaning as when used in the said marketing agreement and order.

It is hereby certified that the economic and inflationary impacts of this regulation have been carefully evaluated in accordance with OMB Circular A–107.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.)

Dated: August 18, 1976.

FLOYD F. HEDLUND,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Lemon Reg. 53]

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Limitation of Handling

This regulation fixes the quantity of California-Arizona lemons that may be shipped to fresh market during the weekly regulation period August 22–28, 1976. It is issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 910. The quantity of lemons so fixed was arrived at after consideration of the total available supply of lemons, the quantity of lemons currently available for market, the fresh market demand for lemons, lemon prices, and the relationship of season average returns to the parity price for lemons.

§ 910.353 Lemon Regulation 53.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such lemons, as hereinafter provided, will tend to effectute the declared policy of the act.

(2) The need for this regulation to limit the quantity of lemons that may be marketed during the ensuing week stems from the production and marketing situation confronting the lemon industry.

(i) The committee has submitted its recommendation with respect to the quantity of lemons it deems advisable to be handled during the ensuing week. Such recommendation resulted from consideration of the factors enumerated in the order. The committee further reports the demand for lemons is good for first grade fruit but continues to ease for the lower grade lemons. Average f.o.b. price was $6.51 per carton the week ended August 14, 1976 compared to $6.40 per carton the previous week. Track and rolling supplies at 145 cars were down 5 cars from last week.

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the quantity of lemons which may be handled should be fixed as hereinafter set forth.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this regulation until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this regulation is based became available and the time when this regulation must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for lemons and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; the provisions of this regulation, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this regulation effective during the period herein specified; and compliance with this regulation will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on August 17, 1976.

(b) *Order.* (1) The quantity of lemons grown in California and Arizona which may be handled during the period August 22, 1976, through August 28, 1976, is hereby fixed at 250,000 cartons.

(2) As used in this section, "handled", and "carton(s)" have the same meaning as when used in the said amended marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.)

Dated: August 18, 1976.

FLOYD F. HEDLUND,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

CHAPTER XIV—COMMODITY CREDIT CORPORATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—LOANS, PURCHASES, AND OTHER OPERATIONS

PART 1427—COTTON

Subpart 1976—Crop Supplement to Cotton Loan Program Regulations

Correction

In FR Doc. 76–21670 appearing on page 31545 in the issue for Thursday, July 29, 1976, make the following changes: in § 147.101:

1. On page 31545, column 3, under Alabama, the 3rd entry should read:

Tuscombia	Colbert	39.40

2. On page 31546, column 1, under Georgia, the 33rd entry should read:

Haralson	Coweta	39.95

3. Also on page 31546, column 2, under Georgia, the 5th entry should read:

Waynesboro	Burke	39.95

4. In column 3 on page 31546, under Tennessee, the 1st entry should read:

Brownsville	Haywood	39.30

5. On page 31547, column 1, the 34th and 52nd entries should read respectively:

Littlefield	Lamb	38.85
•	•	•
Quitoque	Briscoe	38.85

6. On page 31547, in § 1427.102, in the column for "1⅛" the entry for "Light gray: SM and better", the number now reading "—155" should have read "—165".

Title 33—Navigation and Navigable Waters

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

[CGD 76–165]

PART 117—DRAWBRIDGE OPERATION REGULATIONS

Back Bay of Biloxi, Mississippi

This amendment revokes the regulations for the drawbridge across the Back

V41-164 AUG 23 76 UMI

Bay of Biloxi, Mississippi, mile 2.8, because this bridge has been replaced by a fixed bridge.

§ 117.245 [Amended]

Accordingly, Part 117 of Title 33 of the Code of Federal Regulations is amended by revoking subparagraph (20–a) of paragraph (i) of § 117.245.

(Sec. 5, 28 Stat. 362, as amended, sec. 6(g)(2), 80 Stat. 937 (33 U.S.C. 499, 49 U.S.C. 1655(g)(2)); 49 CFR 1.46(c)(5), 33 CFR 1.05–1(c)(4).)

Effective date: This revision shall become effective September 27, 1976.

Dated: August 17, 1976.

A. F. FUGARD,
Rear Admiral, U.S. Coast Guard, Chief, Office of Marine Environment and Systems.

[FR Doc.76-24636 Filed 8-20-76;8:45 am]

[CGD 76-068]

PART 117—DRAWBRIDGE OPERATION REGULATIONS

Bayou Boeuf, La.

This amendment changes the regulations for the pontoon bridge on State Route 307 across Bayou Boeuf, mile 1.3, at Kraemer, Louisiana, to require at least 12 hours notice from 9 p.m. to 5 a.m. daily. The draw shall open on signal from 5 a.m. to 9 p.m. This amendment was circulated as a public notice dated June 21, 1976, by the Commander, Eighth Coast Guard District, and was published in the FEDERAL REGISTER as a notice of proposed rule making (CGD 76-068) on June 14, 1976, (41 FR 23977). The one response received had no objection to the proposal.

Accordingly, Part 117 of Title 33 of the Code of Federal Regulations is amended as follows:

§ 117.540 [Amended]

In § 117.540(b), by adding the words "Bayou Boeuf, mile 1.3, S–307 highway drawbridge at Kraemer" immediately after the words "Bayou DuLarge, mile 23.2, S–315 highway drawbridge, near Theriot," in the listing.

(Sec. 5, 28 Stat. 362, as amended, sec. 6(g)(2), 80 Stat. 937; 33 U.S.C. 499, 49 U.S.C. 1655(g)(2); 49 CFR 1.46(c)(5), 33 CFR 1.05–1(c)(4).)

Effective date: This revision shall become effective on September 27, 1976.

Dated: August 17, 1976.

A. F. FUGARD,
Rear Admiral, U.S. Coast Guard, Chief, Office of Marine Environment and Systems.

[FR Doc.76-24637 Filed 8-20-76;8:45 am]

[CGD 76-077]

PART 117—DRAWBRIDGE OPERATION REGULATIONS

Bayou Lafourche, Louisiana

This amendment changes the regulations for the three drawbridges across Bayou Lafourche at mile 58.2, mile 58.7, and mile 66.1, to require at least 6 hours notice at all times. This amendment was circulated as a public notice dated June 21, 1976, by the Commander, Eighth Coast Guard District, and was published in the FEDERAL REGISTER as a notice of proposed rule making (CGD 76–077) on June 14, 1976, (41 FR 23977). No comments were received.

Accordingly, Part 117 of Title 33 of the Code of Federal Regulations is amended by:

1. Adding a new § 117.245(j)(4–a) to read as follows:

§ 117.245 **Navigable waters discharging into the Atlantic Ocean south of and including Chesapeake Bay and into the Gulf of Mexico, except the Mississippi River and its tributaries and outlets; bridges where constant attendance of draw tenders is not required.**

* * * * * * *

(j) * * *

(4–a) Bayou Lafourche, La.; U.S. 90 drawbridge, mile 58.2, Raceland; U.S. 90 drawbridge, S. 307, Raceland, mile 58.7; and S. 18 drawbridge, Lafourche, mile 66.1. The draws shall open on signal if at least 6 hours notice is given.

* * * * * * *

§ 117.540 [Amended]

2. In § 117.540(b), by deleting the Words "Bayou Lafourche, mile 58.2, U.S. 90 highway drawbridge at Raceland" and the words "Bayou Lafourche, mile 66.1, S–18 highway drawbridge at St. Charles" from the listing.

(Sec. 5, 28 Stat. 362, as amended, sec. 6(g)(2), 80 Stat. 937; 33 U.S.C. 499, 49 U.S.C. 1655(g)(2); 49 CFR 1.46(c)(5), 33 CFR 1.05–1(c)(4).)

Effective date: This revision shall become effective on September 27, 1976.

Dated: August 17, 1976.

A. F. FUGARO,
Rear Admiral, U.S. Coast Guard Chief, Office of Marine Environment and Systems.

CHAPTER V—NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 69–19; Notice 15]

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

Republication of Lighting Standard

This notice republishes in its entirety 49 CFR 571.108, Motor Vehicle Safety Standard No. 108, Lamps, Reflective Devices, and Associated Equipment.

Since Standard No. 108 was last reissued (36 FR 22902, December 2, 1971), it has been amended approximately 29 times. The republication will insure that the public is afforded a current and convenient copy of a complex motor vehicle safety standard. Amendments to this standard published in the FEDERAL REGISTER are therefore reflected in the reissuance, and have been incorporated through August 1, 1976.

In consideration of the foregoing, 49 CFR 571.108, Motor Vehicle Safety Standard No. 108 is republished to read as set forth below.

(Sec. 103, 119, Pub. L. 89–563, 80 Stat. 718; 15 U.S.C. 1392, 1407); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8.)

Issued on August 16, 1976.

ROBERT L. CARTER,
Associate Administrator, Motor Vehicle Programs.

§ 571.108 **Standard No. 108; Lamps, reflective devices, and associated equipment.**

S1. *Purpose and scope.* This standard specifies requirements for original and replacement lamps, reflective devices, and associated equipment necessary for signaling and for the safe operation of motor vehicles during darkness and other conditions of reduced visibility.

S2. *Application.* This standard applies to passenger cars, multipurpose passenger vehicles, trucks, buses, trailers (except pole trailers and trailer converter dollies), and motorcycles, and to lamps, reflective devices, and associated equipment for replacement of like equipment on vehicles to which this standard applies.

S3. *Definitions.* "Flash" means a cycle of activation and deactivation of a lamp by automatic means continuing until stopped either automatically or manually.

"Speed attainable in 1 mile" means the speed attainable by accelerating at maximum rate from a standing start for 1 mile on a level surface.

S4. *Requirements.*

S4.1 *Required motor vehicle lighting equipment.*

S4.1.1 Except as provided in succeeding paragraphs of S4.1.1, each vehicle shall be equipped with at least the number of lamps, reflective devices, and associated equipment specified in Tables I and III, as applicable. Required equipment shall be designed to conform to the SAE Standards or Recommended Practices referenced in those tables. Table I applies to multipurpose passenger vehicles, trucks, trailers, and buses, 80 or more inches in overall width. Table III applies to passenger cars and motorcycles and to multipurpose passenger vehicles, trucks, trailers, and buses, less than 80 inches in overall width.

S4.1.1.1 A truck tractor need not be equipped with turn signal lamps mounted on the rear if the turn signal lamps at or near the front are so constructed (double-faced) and so located that they meet the requirements for double-faced turn signals specified in SAE Standard J588e, "Turn Signal Lamps," September 1970.

S4.1.1.2 A truck tractor need not be equipped with any rear side marker devices, rear clearance lamps, and rear identification lamps.

S4.1.1.3 Intermediate side marker devices are not required on vehicles less than 30 feet in overall length.

S4.1.1.4 Reflective material conforming to Federal Specification L–S–300, "Sheeting and Tape, Reflective; Nonexposed Lens, Adhesive Backing," September 7, 1965, may be used for side reflex reflectors if this material, as used on the vehicle, meets the performance standards in Table I of SAE Standard J594d, "Reflex Reflectors," March 1967.

S4.1.1.5 The turn signal operating unit on each passenger car, and multipurpose passenger vehicle, truck, and bus less than 80 inches in overall width manufactured on or after January 1, 1973, shall be self-canceling by steering wheel rotation and capable of cancellation by a manually operated control.

S4.1.1.6 Each stop lamp on any motor vehicle manufactured between January 1, 1973, and September 1, 1978, may be designed to conform to SAE Standard J586b, *Stop Lamps*, June 1966. It shall meet the photometric minimum candlepower requirements for class A red turn signal lamps specified in SAE Standard J575d, *Test for Motor Vehicle Lighting Devices and Components*, August 1967. Each such lamp on a passenger car and on a multipurpose passenger vehicle, truck, trailer or bus less than 80 inches in overall width shall have an effective projected luminous area not less than 3½ square inches; however, the photometric requirements may be met by a combination of compartments or lamps.

S4.1.1.7 Each turn signal lamp on any motor vehicle, except motorcycles, manufactured between January 1, 1972, and September 1, 1978, may be designed to conform to SAE Standard J588d, *Turn Signal Lamps*, June 1966, and shall meet the photometric minimum candlepower requirements for Class A turn signal lamps specified in SAE Standard J575d, *Tests, for Motor Vehicle Lighting Devices and Components*, August 1967. Each such lamp on a passenger car and on a multipurpose passenger vehicle, truck, trailer or bus less than 80 inches in overall width shall have an effective projected luminous area not less than 3½ square inches. If multiple compartment lamps or multiple lamps are used, the effective projected luminous area of each compartment or lamp shall be not less than 3½ square inches; however, the photometric requirements may be met by a combination of compartments or lamps. Each such lamp on a multipurpose passenger vehicle, truck, trailer or bus 80 inches or more in overall width shall have an effective projected luminous area not less than 12 square inches.

S4.1.1.8 For each passenger car, and each multipurpose passenger vehicle, truck, trailer, and bus of less than 80 inches in overall width the photometric minimum candlepower requirements for side marker lamps specified in SAE Standard J592e "Clearance, Side Marker, and Identification Lamps," July 1972, may be met for all inboard test points at a distance of 15 feet from the vehicle and on a vertical plane that is perpendicular to the longitudinal axis of the vehicle and located midway between the front and rear side marker lamps.

S4.1.1.9 Boat trailers need not be equipped with both front and rear clearance lamps provided an amber (to front) and red (to rear) clearance lamp is located at or near the midpoint on each side of the trailer so as to indicate its extreme width.

S4.1.1.10 Multiple license plate lamps and backup lamps may be used to fulfill the requirements of the SAE Standards applicable to such lamps referenced in Tables I and III.

S4.1.1.11 A parking lamp is not required to meet the minimum photometric values at each test point specified in Table I of SAE Standard J222, "Parking Lamps (Position Lamps)," if the sum of the candlepower measured at the test points within the groups listed in Figure 1 is not less than the sum of the candlepower values for such test points specified in J222.

S4.1.1.12 A taillamp, stop lamp, or turn signal lamp is not required to meet the minimum photometric values at each test point specified in the referenced SAE Standards, if the sum of the candlepower measured at the test points is not less than that specified for each group listed in Figure 1, or for motorcycle turn signal lamps, not less than one-half of such sum.

S4.1.1.13 [Reserved]

S4.1.1.14 [Reserved]

S4.1.1.15 [Reserved]

S4.1.1.16 All passengers cars and multipurpose passenger vehicles, trucks, and buses of less than 80 inches overall width shall be equipped with turn signal operating units designed to complete a durability test of 100,000 cycles.

S4.1.1.17 A trailer that is less than 30 inches in overall width may be equipped with only one of each of the following lamps and reflective devices, located at or near its vertical centerline: Tail lamp, stop lamp, and near reflex reflector.

S4.1.1.18 A trailer that is less than 6 feet in overall length, including the trailer tongue, need not be equipped with front side marker lamps and front side reflex reflectors.

S4.1.1.19 A lamp manufactured on or after January 1, 1974, and designed to use a type of bulb that has not been assigned a mean spherical candlepower rating by its manufacturer and is not listed in SAE Standard J573d. "Lamp Bulbs and Sealed Units," December 1968, shall meet the applicable requirements of this standard when used with any bulb of the type specified by the lamp manufacturer, operated at the bulb's design voltage. A lamp that contains a sealed-in bulb shall meet these requirements with the bulb operated at the bulb's design voltage.

S4.1.1.20 Except for a lamp having a sealed-in bulb, a lamp manufactured on or after January 1, 1974 shall meet the applicable requirements of this standard when tested with a bulb whose filament is positioned within ±.010 inch of the nominal design position specified in SAE Standard J573d, "Lamp Bulbs and Sealed Units," December 1968, or specified by the bulb manufacturer.

S4.1.1.21 Instead of a headlighting system of two Type 1 headlamps and two Type 2, 5¾-inch headlamps, a vehicle manufactured on or after January 1, 1974 may be equipped with a headlighting system of two Type 1A headlamps and two Type 2A headlamps, that meet the following requirements.

(a) Each Type 1A headlamp and Type 2A headlamp shall be designed to conform to the requirements for a Type 1 headlamp and Type 2, 5¾-inch headlamp respectively, as specified in any SAE Standard or Recommended Practice, referenced or subreferenced by Tables I and III, except as provided below.

(b) Each Type 1A and Type 2A headlamp shall be designed to conform to the applicable dimensional requirements and specifications of Figure 2. At a voltage of 12.8 volts, the maximum design wattage with an allowable tolerance of plus 7.5 percent shall be 50 watts for a Type 1A headlamp and 60 watts for each filament of a Type 2A headlamp.

(c) The following SAE Standards and Recommended Practices or portions thereof, do not apply:

(i) SAE Standard J571b, "Dimensional Specifications for Sealed Beam Headlamp Units," April 1965.

(ii) SAE Standard J573d, "Lamp Bulbs and Sealed Units," December 1968.

(iii) Figure 1, SAE Recommended Practice J602, "Headlamp Aiming Device for Mechanically Aimable Sealed Beam Headlamp Units," August 1963.

(iv) Paragraph 2 of "Retaining Ring Requirements," and the paragraph "Proper Seating of Sealed Beam Unit," SAE Standard J580a. "Sealed Beam Headlamp," June 1966.

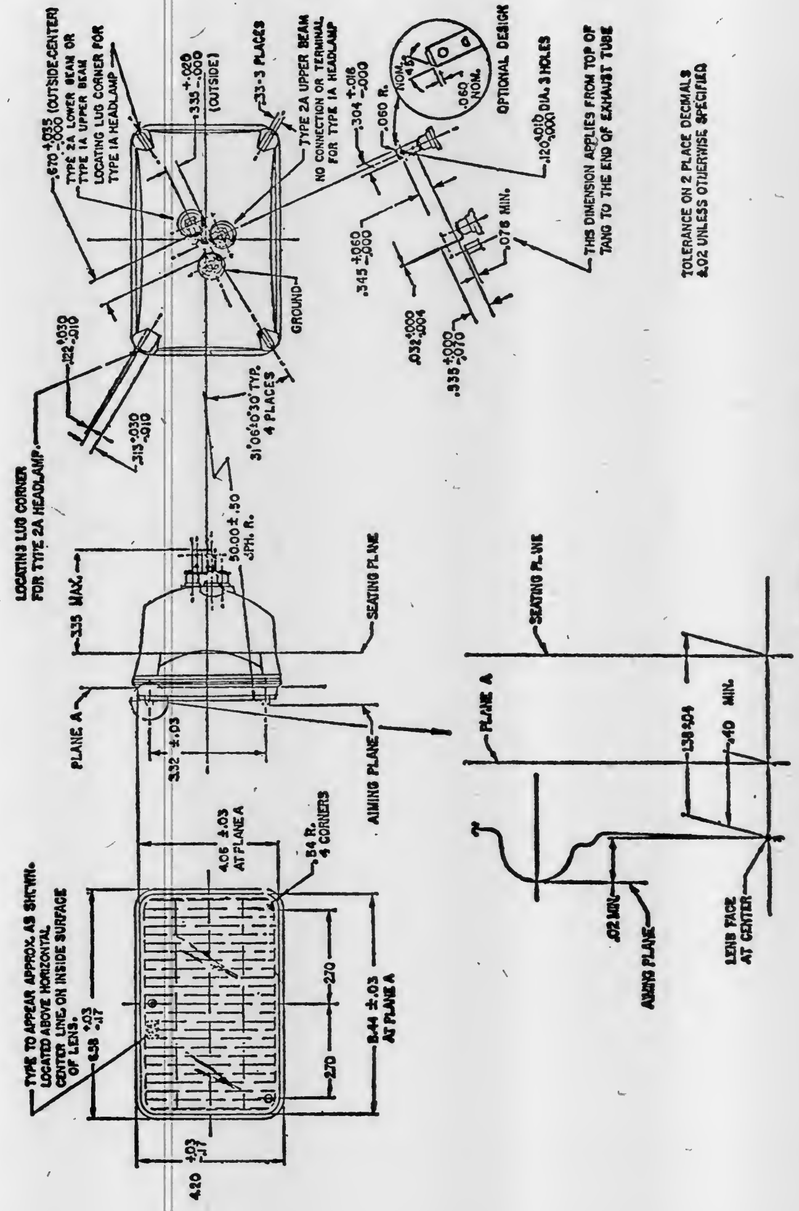

FIGURE 2
RECTANGULAR HEADLAMP SPECIFICATIONS

V 41 164 AUG 23 76 UMI

S4.1.1.22 A backup lamp is not required to meet the minimum photometric values at each test point specified in Table I of SAE Standard J593c "Backup Lamps" if the sum of the candlepower measured at the test points within each group listed in Figure 3 is not less than the group totals specified in that figure.

FIGURE 3.—*Minimum luminous intensity requirements for backup lamps*

Group	Test point, degrees	Total for group, candela (see note 1)
1[1]	45L–5U 45L–H 45L–5D	45
2[1]	30L–H 30L–5D 10L–10U 10L–5U V–10U	50
3	V–5U 10R–10U 10R–5U 10L–H 10L–5D V–H	100
4	V–5D 10R–H 10R–5D	360
5[1]	30R–H 30R–5D 45R–5U	50
6[1]	45R–H 45R–5D	45

[1] When 2 lamps of the same or symmetrically opposite design are used, the reading along the vertical axis and the averages of the readings for the same angles left and right of vertical for 1 lamp shall be used to determine compliance with the requirements. If 2 lamps of differing designs are used, they shall be tested individually and the values added to determine that the combined units meet twice the candela requirements.

When only 1 backup lamp is used on the vehicle, it shall be tested to twice the candela requirements.

S4.1.1.23 Variable load turn signal flashers shall comply with voltage drop and durability requirements with the maximum design load connected and shall comply with starting time, flash rate, and percent current "on" time requirements both with the minimum and with the maximum design load connected.

S4.1.1.24 The lowest voltage drop for turn signal flashers and hazard warning signal flashers measured between the input and load terminals shall not exceed 0.8 volt.

S4.1.1.25 The only required equipment for mobile structure trailers is stoplamps, taillamps, rear reflex reflectors, and turn signal lamps.

S4.1.1.26 A motor-driven cycle whose speed attainable in 1 mile is 30 mph or less need not be equipped with turn signal lamps.

S4.1.1.27 A motor-driven cycle whose speed attainable in 1 mile is 30 mph or less may be equipped with a stop lamp whose photometric output for the groups of test points specified in Figure 1 is at least one-half of the minimum values set forth in that figure.

S4.1.1.28 Each taillamp on any motor vehicle manufactured before September 1, 1978, may be designed to conform to SAE Standard J585c, *Tail Lamps*, June 1966.

S4.1.1.29 Each turn signal lamp on a motorcycle manufactured between January 1, 1973, and September 1, 1978, may be designed to conform to SAE Standard J588d, *Turn Signal Lamps*, June 1966.

S.4.1.1.30 Except as provided in paragraph S4.1.1.12 of this standard, each turn signal lamp on a motorcycle shall meet one-half of the minimum photometric values at each test point specified for Class A turn signal lamps in SAE Standard J575d, *Tests for Motor Vehicle Lighting Devices and Components*, August 1967, or in SAE Standard J588e, *Turn Signal Lamps*, September 1970, as applicable.

S4.1.1.31 Each turn signal lamp on a motorcycle manufactured on and after January 1, 1973, shall have an effective projected luminous area not less than 3½ square inches.

S4.1.1.32 Note 6 of Table 1 in SAE Standard J588e, *Turn Signal Lamps*, September 1970, does not apply. A stop lamp that is not optically combined with a turn signal lamp shall remain activated when the turn signal is flashing.

S4.1.1.33 Headlamps may conform to SAE Standard J579c, *Sealed Beam Headlamp Units for Motor Vehicles*, December 1974, except that:

(a) In Table I of SAE Standard J579c, the maximum candela at any test point shall not exceed 37,500;

(b) In Table II of SAE Standard J579c, the combined maximum candela at any test point shall not exceed 37,500; and

(c) At a voltage of 12.8 volts, the maximum design wattage, with an allowable tolerance of plus 7.5 percent, shall be as follows: 50 watts for Type 1 (5¾-inch); 37.5 watts for Type 2 (5¾-inch) high beam; and 60 watts for Type 2 (5¾-inch) low beam, Type 2 (7-inch) low beam, and Type 2 (7-inch) high beam.

S4.1.2 Plastic materials used for optical parts such as lenses and reflectors shall conform to SAE Recommended Practice J576c, May 1970, except that:

(a) Plastic materials manufactured before January 1, 1976, may conform to SAE J576b, August 1966;

(b) Plastic lenses used for inner lenses or those covered by another material and not exposed directly to sunlight shall meet the requirements of paragraphs 3.4 and 4.2 of SAE J576b, or J576c, as applicable, when covered by the outer lens or other material;

(c) After the outdoor exposure test, the haze and loss of surface luster of plastic materials used for lamp lenses shall not be greater than 30 percent haze as measured by ASTM–1003–61, "Haze and Luminous Transmittance of Transparent Plastic;" and

(d) After the outdoor exposure test, plastic materials used for reflex reflectors shall meet the appearance requirements of paragraph 4.2.2 of SAE J576b or J576c as applicable.

S4.1.3 No additional lamp, reflective device, or other motor vehicle equipment shall be installed that impairs the effectiveness of lighting equipment required by this standard.

S4.1.4 Each school bus shall be equipped with a system of either:

(a) Four red signal lamps designed to conform to SAE Standard J887, "School Bus Red Signal Lamps," July 1964, and installed in accordance with that standard; or

(b) Four red signal lamps designed to conform to SAE Standard J887, "School Bus Red Signal Lamps," July 1964, and four amber signal lamps designed to conform to that standard, except for their color, and except that their candlepower shall be at least 2½ times that specified for red signal lamps. Both red and amber lamps shall be installed in accordance with SAE Standard J887, except that:

(i) Each amber signal lamp shall be located near each red signal lamp, at the same level, but closer to the vertical centerline of the bus; and

(ii) The system shall be wired so that the amber signal lamps are activated only by manual or foot operation, and if activated, are automatically deactivated and the red signal lamps automatically activated when the bus entrance door is opened.

S4.1.5 The color in all lighting equipment covered by this standard shall be in accordance with SAE Standard J578a, April 1965, "Color Specification for Electric Signal Lighting Devices".

S4.2 *Other requirements.*

S4.2.1 The words "it is recommended that," "recommendations," or "should be" appearing in any SAE Standard or Recommended Practice referenced or subreferenced in this standard shall be read as setting forth mandatory requirements, except that the aiming pads on the lens face and the black area surrounding the signal lamp, recommended in SAE Standard J887, "School Bus Red Signal Lamps," July 1964, are not required.

S4.3 *Location of required equipment.*

S4.3.1 Except as provided in S4.3.1.1 through S4.3.1.8, each lamp, reflective device, and item of associated equipment shall be securely mounted on a rigid part of the vehicle other than glazing that is not designed to be removed except for repair, in accordance with the requirements of Table I or III and in locations specified in Table II (multipurpose passenger vehicles, trucks, trailers, and buses 80 or more inches in overall width) or Table IV (all passenger cars, and motorcycles, and multipurpose passenger vehicles, trucks, trailers, and buses less than 80 inches in overall width), as applicable.

S4.3.1.1 Except as provided in S4.3.1.1.1, each lamp and reflective device shall be located so that it meets the visibility requirements specified in any applicable SAE Standard or Recommended Practice. In addition, no part of the vehicle shall prevent a parking lamp, taillamp, stop lamp, turn signal lamp, or backup lamp from meeting its photometric output at any applicable group of test points specified in Figures 1 and 3, or prevent any other lamp from meeting the photometric output at any test point specified in any applicable SAE Standard or Recommended Practice. However, if motor vehicle equipment (e.g., mirrors, snow plows, wrecker booms, backhoes, and winches) prevents compliance with this paragraph by any required lamp or reflective device, an auxiliary lamp or device meeting the requirements of this paragraph shall be provided.

S4.3.1.1.1 Clearance lamps may be mounted at a location other than on the front and read if necessary to indicate the overall width of a vehicle, or for protection from damage during normal operation of the vehicle, and at such a location they need not be visible at 45 degrees inboard.

S4.3.1.2 On a truck tractor, the red rear reflex reflectors may be mounted on the back of the cab, at a minimum height not less than 4 inches above the height of the rear tires.

S4.3.1.3 On a trailer, the amber front side reflex reflectors and amber front side marker lamps may be located as far forward as practicable exclusive of the trailer tongue.

S4.3.1.4 When the rear identification lamps are mounted at the extreme height of a vehicle, rear clearance lamps need not meet the requirement of Table II that they be located as close as practicable to the top of the vehicle.

S4.3.1.5 The center of the lens referred to in SAE Standard J593c, "Backup Lamps," February 1968, is the optical center.

S4.3.1.6 On a truck tractor, clearance lamps mounted on the cab may be located to indicate the width of the cab, rather than the overall width of the vehicle.

S4.3.1.7 The requirement that there be not less than 4 inches between a front turn signal lamp and a low beam headlamp, specified in SAE Standard J588e, "Turn Signal Lamps," September 1970, shall not apply if the sum of the candlepower values of the turn signal lamp measured at the test points within each group listed in Figure 1 is not less than two and one-half times the sum specified for each group for yellow turn signal lamps.

S4.4 *Equipment combinations.*

S4.4.1 Two or more lamps, reflective devices, or items of associated equipment may be combined if the requirements for each lamp, reflective device, and item of associated equipment are met, except that no clearance lamp may be combined optically with any taillamp or identification lamp.

S4.5 *Special wiring requirements.*

S4.5.1 Each vehicle shall have a means of switching between lower and upper headlamp beams that conforms to SAE Recommended Practice J564a "Headlamp Beam Switching," April 1964 or to SAE Recommended Practice J565b, "Semi-Automatic Headlamp Beam Switching Devices," February 1969.

S4.5.2 Each vehicle shall have a means for indicating to the driver when the upper beams of the headlamps are on that conforms to SAE Recommended Practice J564a, April 1964, except that the signal color need not be red.

S4.5.3 The taillamps on each vehicle shall be activated when the headlamps are activated in a steady-burning state.

S4.5.4 The stoplamps on each vehicle shall be activated upon application of the service brakes.

S4.5.5 The vehicular hazard warning signal operating unit on each vehicle shall operate independently of the ignition or equivalent switch, and when activated, shall cause to flash simultaneously sufficient turn signal lamps to meet, as a minimum, the turn signal lamp photometric requirements of this standard.

S4.5.6 Each vehicle equipped with a turn signal operating unit shall also have an illuminated pilot indicator. Failure of one or more turn signal lamps to operate shall be indicated in accordance with SAE Standard J588e, "Turn Signal Lamps," September 1970, except where a variable-load turn signal flasher is used on a truck, bus, or multipurpose passenger vehicle 80 or more inches in overall width, on a truck that is capable of accommodating a slide-in camper, or on any vehicle equipped to tow trailers.

S4.5.7 On all passenger cars, and motorcycles, and multipurpose passenger vehicles, trucks, and buses of less than 80 inches overall width:

(a) When the parking lamps are activated, the taillamps, license plate lamps, and side marker lamps shall also be activated; and

TABLE I.—REQUIRED MOTOR VEHICLE LIGHTING EQUIPMENT

MULTIPURPOSE PASSENGER VEHICLES, TRUCKS, TRAILERS, AND BUSES, OF 80 OR MORE INCHES OVERALL WIDTH

Item	Multipurpose passenger vehicles, trucks, and buses	Trailers	Applicable SAE standard or recommended practice
Headlamps	2 white, 7-inch, Type 2 headlamp units; or 2 white, 5¾-inch, Type 1 headlamp units and 2 white 5¾-inch, Type 2 headlamp units.	None	J580a, June 1966; J579a, August 1965; and J566, January 1960.

Intermediate reflex reflectors.	2 amber [4]	2 amber [4]	J594e, March 1970.

[1] See S4.1.1.6. [2] See S4.1.1.10. [3] See S4.5.6. [4] See S4.1.1.3. [5] See S4.4.2. [6] See S4.1.1.2.

(b) When the headlamps are activated in a steady-burning state, the taillamps, parking lamps, license plate lamps and side marker lamps shall also be activated.

S4.6 When activated:

(a) Turn signal lamps, hazard warning signal lamps, and school bus warning lamps shall flash; and

(b) All other lamps shall be steady-burning, except that means may be provided to flash headlamps and side marker lamps for signaling purposes.

S4.7 *Replacement Equipment.*

S4.7.1 Each lamp, reflective device, or item of associated equipment manufactured to replace any lamp, reflective device, or item of associated equipment on any vehicle to which this standard applies, shall be designed to conform with this standard.

S4.7.2 Each lamp, reflective device, or item of associated equipment to which section S4.7.1 applies may be labeled with the symbol DOT, which shall constitute a certification that it conforms to applicable Federal motor vehicle safety standards.

S5. *Subreferenced SAE Standards and Recommended Practices.*

S5.1 SAE Standards and Recommended Practices subreferenced by the SAE Standards and Recommended Practices included in Tables I and III and paragraphs S4.1.4 and S4.5.1 are those published in the 1970 edition of the SAE Handbook, except that the SAE Standard referred to as "J599" is J599c, *Lighting Inspection Code*, March 1973, and the subreferenced SAE Standard referred to as "J575" is J575e, *Tests for Motor Vehicle Lighting Devices and Components*, August 1970, for tail lamps, stop lamps, and turn signal lamps designed to conform to SAE Standard J585d, J586c, and J588e respectively.

S5.2 Requirements of SAE Standards incorporated by reference in this standard, other than J576b and J576c, do not include tests for warpage of devices with plastic lenses.

V 41 164 AUG 23 76 UMI

TABLE II.—LOCATION OF REQUIRED EQUIPMENT

MULTIPURPOSE PASSENGER VEHICLES, TRUCKS, TRAILERS, AND BUSES, OF 80 OR MORE INCHES OVERALL WIDTH

Item	Location on—		Height above road surface measured from center of item on vehicle at curb weight
	Multipurpose passenger vehicles, trucks, and buses	Trailers	
Headlamps	Type 1 headlamps at the same height, 1 on each side of the vertical centerline; Type 2 headlamps at the same height, 1 on each side of the vertical centerline; as far apart as practicable.	Not required	Not less than 24 inches, nor more than 54 inches.
Taillamps	On the rear, 1 on each side of the vertical centerline, at the same height, and as far apart as practicable.	On the rear, 1 on each side of the vertical centerline, at the same height, and as far apart as practicable.	Not less than 15 inches, nor more than 72 inches.
Stoplamps	On the rear, 1 on each side of the vertical centerline, at the same height, and as far apart as practicable.	On the rear, 1 on each side of the vertical centerline, at the same height, and as far apart as practicable.	Not less than 15 inches, nor more than 72 inches.
License plate lamp.	At rear license plate, to illuminate the plate from the top or sides.	At rear license plate, to illuminate the plate from the top or sides.	No requirement.
Backup lamp	On the rear	Not required	No requirement.
Turn signal lamps.	At or near the front—1 amber on each side of the vertical centerline, at the same height, and as far apart as practicable. On the rear—1 red or amber on each side of the vertical centerline, at the same height, and as far apart as practicable.	On the rear—1 red or amber on each side of the vertical centerline, at the same height, and as far apart as practicable.	Not less than 15 inches, nor more than 83 inches.
Identification lamps.	On the front and rear—3 lamps, amber in front, red in rear, as close as practicable to the top of the vehicle, at the same height, as close as practicable to the vertical centerline, with lamp centers spaced not less than 6 inches or more than 12 inches apart.	On the rear—3 lamps as close as practicable to the top of the vehicle at the same height, as close as practicable to the vertical centerline, with lamp centers spaced not less than 6 inches or more than 12 inches apart.	No requirement.
Clearance lamps.	On the front and rear—2 amber lamps on front, 2 red lamps on rear, to indicate the overall width of the vehicle, one on each side of the vertical centerline, at the same height, and as near the top as practicable.[1]	On the front and rear—2 amber lamps on front, 2 red lamps on rear, to indicate the overall width of the vehicle, one on each side of the vertical centerline, at the same height, and as near the top thereof as practicable.[3 4]	No requirement.
Intermediate side marker lamps.	On each side—1 amber lamp located at or near the midpoint between the front and rear side marker lamps.	On each side—1 amber lamp located at or near the midpoint between the front and rear side marker lamps.	Not less than 15 inches.
Intermediate side reflex reflectors.	On each side—1 amber located at or near the midpoint between the front and rear side reflex reflectors.	On each side—1 amber located at or near the midpoint between the front and rear side reflex reflectors.	Not less than 15 inches nor more than 60 inches.
Reflex reflectors.	On the rear—1 red on each side of the vertical centerline, as far apart as practicable, and at the same height.[2] On each side—1 red as far to the rear as practicable, and 1 amber as far to the front as practicable.	On the rear—1 red on each side of the vertical centerline, as far apart as practicable, and at the same height. On each side—1 red as far to the rear as practicable, and 1 amber as far to the front as practicable.	Not less than 15 inches nor more than 60 inches.
Side marker lamps.	On each side—1 red as far as far to the rear as practicable, and 1 amber as far to the front as practicable.	On each side—1 red as far as far to the rear as practicable, and 1 amber as far to the front as practicable.	Not less than 15 inches.

TABLE IV.—LOCATION OF REQUIRED EQUIPMENT

ALL PASSENGER CARS AND MOTORCYCLES, AND MULTIPURPOSE PASSENGER VEHICLES, TRUCKS, TRAILERS, AND BUSES OF LESS THAN 80 INCHES OVERALL WIDTH

Item	Location on		Height above road surface measured from center of item on vehicle at curb weight
	Passenger cars, multipurpose passenger vehicles, trucks, trailers, and buses	Motorcycles	
	Column 1	Column 2	Column 3	Column 4
Headlamps	Type 1 headlamps at the same height, 1 on each side of the vertical centerline; Type 2 headlamps at the same height 1 on each side of the vertical centerline; as far apart as practicable.	On the vertical centerline, except that if two are used, they shall be symmetrically disposed about the vertical centerline.	Not less than 24 inches, nor more than 54 inches.
Taillamps	On the rear—1 on each side of the vertical centerline, at the same height, and as far apart as practicable.[2]	On the rear—on the vertical centerline except that if two are used, they shall be symmetrically disposed about the vertical centerline.	Not less than 15 inches, nor more than 72 inches.
Stoplamps	On the rear—1 on each side of the vertical centerline, at the same height, and as far apart as practicable.[2]	On the rear—on the vertical centerline except that if two are used, they shall be symmetrically disposed about the vertical centerline.	Not less than 13 inches, nor more than 72 inches.
License plate lamp	At rear license plate, to illuminate the plate from the top or sides.	At rear license plate	No requirement.
Parking lamps	On the front—1 on each side of the vertical centerline, at the same height, and as far apart as practicable.	Not required	Not less than 15 inches, nor more than 72 inches.
Reflex reflectors.	On the rear—1 red on each side of the vertical centerline, at the same height, and as far apart as practicable.[2] On each side—1 red as far to the rear as practicable, and 1 amber as far to the front as practicable.[3]	On the rear—1 red on the vertical centerline except, that, if two are used on the rear, they shall be symmetrically disposed about the vertical centerline. On each side—1 red as far to the rear as practicable, and 1 amber as far to the front as practicable.	Not less than 15 inches, nor more than 60 inches.
Backup lamp	On the rear	Not required	No requirement;
Turn signal lamps.[1]	At or near the front—1 amber on each side of the vertical centerline, at the same height, and as far apart as practicable. On the rear—1 red or amber on each side of the vertical centerline, at the same height, and as far apart as practicable.	At or near the front—1 amber on each side of the vertical centerline at the same height, and having a minimum horizontal separation distance (centerline of lamps) of 4 inches, with a maximum distance between lamp centers of 24 inches. At or near the rear—1 red or amber on each side of the vertical centerline at the same height, with a minimum horizontal separation distance (centerline to centerline of lamps) of 9 inches. Minimum edge to edge separation distance between lamp and tail lamp is 4 inches.	Not less than 15 inches; not more than 83 inches.
Side marker lamps.	On each side—1 red as far to the rear as practicable, and 1 amber as far to the front as practicable.	Not required	Not less than 15 inches;
Intermediate side marker lamps.	On each side—1 amber located at or near the midpoint between the front and rear side marker lamps.	Not required	Not less than 15 inches;
Intermediate side reflectors.	On each side—1 amber located at or near the midpoint between the front and rear side reflex reflectors.	Not required	Not less than 15 inches; nor more than 60 inches.

[1] Front turn signal lamps not required for trailers. [2] See 84.4.1.18.

TABLE III—REQUIRED MOTOR VEHICLE LIGHTING EQUIPMENT

ALL PASSENGER CARS AND MOTORCYCLES, AND MULTIPURPOSE PASSENGER VEHICLES, TRUCKS, TRAILERS, AND BUSES OF LESS THAN 80 INCHES OVERALL WIDTH

Item	Passenger cars, multipurpose passenger vehicles, trucks, and buses	Trailers	Motorcycles	Applicable SAE standard or recommended practice
Headlamps	2 white, 7-inch, Type 2 headlamp units, or 2 white, 5¾-inch, Type 1 headlamp units and 2 white, 5¾-inch, Type 2 headlamp units.	2 red [14]	1 red	J580a, June 1966, J579e, August 1965, and J566, January 1960.
	2 red [14]	2 red [14]	1 white	J584, April 1964 and J566, January 1960.
Taillamps	2 red [14]	2 red [14]	1 white [5]	J585a, August 1970.
Stoplamps	2 red [14]	2 red [14]	1 white [5]	J587d, March 1969.
License plate lamp	1 white or white [4]	1 white or white [4]	None	J222, December 1970.
Parking lamps	4 red; 2 amber [4]	4 red; 2 amber	3 red; 2 amber	J594e, March 1970.
Reflex reflectors	2 red [14]	2 amber [4]	None	J594e, March 1970.
Intermediate side reflex reflectors.	2 amber [4]	2 amber [4]	None	J592e, July 1972.
Intermediate side marker lamps	2 amber [4]	2 amber [4]	None	J592e, July 1972.
Side marker lamps	2 red; 2 amber [4]	2 red; 2 amber [11]	None	J592e, July 1972.
Backup lamp	1 white [4 11]	None	1 white	J593e, July 1972.
Turn signal lamps	2 red or amber; 2 amber [4 11]	2 red or amber	2 amber; 2 red or amber [7 13]	J588e, September 1970.
Turn signal operating unit.	1 [7 13]	None	1 [13]	J589, April 1964.
Turn signal flasher	1 [8]	None	1 [13]	J590b, October 1965.
Vehicular hazard warning signal operating unit.	1	None	None	J910, January 1966.
Vehicular hazard warning signal flasher.	1 [8]	None	None	J945, February 1966.

V 41 164 AUG 23 76 UMI

NOTE: (1) The term "overall width" refers to the nominal design dimension of the widest part of the vehicle, exclusive of signal lamps, marker lamps, outside rearview mirrors, flexible fender extensions, and mud flaps, determine with doors and windows closed, and the wheels in the straight-ahead position.

This supersedes the interpretation of the term "overall width" appearing in the FEDERAL REGISTER of March 1, 1967 (32 F.R. 3390).

(2) Paragraph S3.1 and Tables I and III of § 571.108 as amended (32 F.R. 18033, Dec. 16, 1967), specify that certain lamp assemblies shall conform to applicable SAE Standards. Each of these basically referenced standards subreferences both SAE Standard J575 (tests for motor vehicle lighting devices and components) which in turn references SAE Standard J573 on bulbs, and SAE Standard J567 on bulb sockets.

(3) Paragraph C of SAE Standard J575 states in part: "Where special bulbs are specified, they should be submitted with the devices and the same or similar bulbs used in the tests and operated at their rated mean spherical candlepower." The Administrator has determined that this provision of SAE Standard J575 permits the use of special bulbs, including tubular-type bulbs, which do not conform to the detailed requirements of Table I of SAE Standard J573. It follows that the sockets for special bulbs need not conform to the detailed requirements of SAE Standard J567. These provisions for special bulbs in no way except the lamp assemblies from meeting all performance requirements specified in Federal Standard No. 108, including those specified in the basically referenced SAE Standards, and in the subreferenced SAE Standard J575.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

[27 CFR Part 5]

[Notice No. 299]

METRIC SIZES FOR DISTILLED SPIRITS

Completeness of Conversion

The Director, Bureau of Alcohol, Tobacco and Firearms (ATF), with the approval of the Secretary of the Treasury or his delegate, is considering an amendment to the labeling and advertising regulations for distilled spirits. ATF proposes to modify the "completeness of conversion" provision relating to metric sizes for distilled spirits by adding a State-by-State provision.

BACKGROUND

ATF published T.D. ATF-25 in the FEDERAL REGISTER on March 10, 1976, which established metric standards of fill for distilled spirits. Under the provisions of that Treasury decision, a bottler may optionally use metric standards of fill between October 1, 1976, and December 31, 1979. After December 31, 1979, the metric standards of fill become mandatory, and bottlers will no longer be permitted to use current standards of fill stated in U.S. measurements.

T.D. ATF-25 also contained a "completeness of conversion" provision which regulates the change to metric sizes during the transition period of October 1, 1976, through December 31, 1979. The "completeness of conversion" regulation requires that the optional conversion to metric sizes during the transition period will be on a permit, brand and size basis. Thus, a bottler, who begins bottling XYZ gin in liter liquor bottles may no longer bottle XYZ gin in quart bottles. The bottler could continue to bottle XYZ gin in fifth-size bottles and ABC gin (a different brand) in quart bottles.

As ATF stated in the notice proposing the metric standards of fill for distilled spirits (40 FR 29866), the "completeness of conversion" requirement was intended to "* * * reduce the period of overlap of new metric and U.S. sizes, while at the same time would allow bottlers a considerable degree of flexibility in terms of using up existing bottle stocks, etc." ATF feels that the reduction in the period of overlap of metric and U.S. sizes is an important consideration. Industry members will benefit because they they will have fewer packages to store, handle and account for. Equally important, consumers will be confronted less frequently with metric sizes appearing side-by-side with U.S. sizes of the same brand on retailers' shelves.

REASONS FOR CHANGE

State laws and regulations. Industry members not only have to comply with ATF laws and regulations, they must also comply with the requirements of State agencies. Several States have laws and/or regulations which, if not changed, would prevent the sale of liquor in some metric size bottles in those States. The following are a few examples which illustrate the problems industry members may face:

1. *Minimum size.* Kansas State law prevents liquor from being sold in containers of less than one-half pint in size. The new 200 ml size, contains slightly less than 8 ounces and, thus, under Kansas law, the 200 ml size cannot be sold or offered for sale in that State.

2. *Maximum size.* Wisconsin State law prevents liquor from being sold in containers greater than 32 ounces in capacity. The liter, which contains 33.8 ounces could not be sold in Wisconsin under its current State laws.

3. *Delayed effective dates.* The State of Michigan will allow metric size liquor bottles to be sold in that State. However, Michigan has set January 23, 1977, as the earliest date for the introduction of metric sizes.

Although many States have or are planning to revise their laws and regulations, it will be some time after October 1, 1976, when distilled spirits in metric sizes will be allowed to be sold in all States. Industry members are faced with a potential dilemma because the current "completeness of conversion" provisions does not allow for a State-by-State conversion process. Thus, a permittee, who wishes to commence bottling XYZ gin,in liters on October 1, 1976, may have to postpone that conversion because one or several States have laws which prohibit the introduction of liquor in bottles containing more than 32 ounces. On the other hand, if the same bottler converted to bottling liters of XYZ gin on October 1, 1976, that bottler would be unable to supply XYZ gin in quart bottles to those States which prohibit bottle sizes in excess of 32 ounces.

Single-plant proprietors. Under the current "completeness of conversion" provision, a company with one bottling plant (one permit) is at a disadvantage in comparison to a company with two or more bottling plants (two or more permits). Since the conversion process is on a permit-by-permit basis, a single-plant proprietor (one permit) cannot, after October 1, 1976, bottle the same brand in corresponding metric and U.S. sizes (e.g., the liter and the quart). Thus, the single-plant proprietor could not bottle liters of XYZ gin for one marketing area (or State) and quarts of XYZ gin for another marketing area (or State). A multiplant company (two or more permits), on the other hand, could have one of its plants bottle in liters and another of its plants bottle in quarts of the same brand and, therefore, it could supply two different marketing areas.

The permit-by-permit basis for the conversion process was adopted because conditions affecting the time of conversion to new metric bottles can vary considerably from one bottling plant to another, even though they are of the same ownership. For example, bottling and packing machinery can be significantiy different, resulting in varying lead times as far as making the equipment changes necessary for metrication. Similarly, supplies of bottles and labels can vary considerably from one plant to another. Without the permit-by-permit conversion provisions, it would be impossible in many situations to make the conversion simultaneously at two or more plants without wasting considerable stocks of unused bottles or labels or a costly redistribution of such materials. At the same time, since for competitive reasons different plants bottling the same brand almost invariably distribute to different market areas, the permit-by-permit conversion provision did not seem to threaten our consumer protection objective of keeping to a minimum the period during which a retailer might have both the old U.S. size and the replacement metric size of a given brand on his shelves at the same time.

PROPOSAL

ATF proposes to modify the "completeness of conversion" regulation by adding a *State-by-State* provision. In effect, instead of requiring that conversion to metrication be complete on a nationwide basis, the regulation would require that such conversion be complete for any given State. Once a permittee had converted a given size and brand to a corresponding metric size for distribution to a particular State, he could not continue, or revert back to, bottling that product in the U.S. size for distribution to that State. He could, however, continue to bottle the U.S. size of that product for distribution to other States.

ATF believes that this new provision would retain the consumer protection advantage of our current "completeness of conversion" requirement, while at the same time resolving the difficulties bottlers are encountering with State laws and regulations which now prevent the sale of distilled spirits in some metric bottles. It would also eliminate the bulk

V 41 1 64 AUG 23 76 UMI

of the competitive disadvantages accruing to the single-plant proprietor from the current "completeness of conversion" provision.

SUBMISSION OF WRITTEN COMMENTS

Persons who wish to participate in the rulemaking process are invited to submit written comments or suggestion on the proposed regulatory change. The written material should be submitted, in duplicate, to the Director, Bureau of Alcohol, Tobacco and Firearms, Washington, DC 20226 (Attn: Chief, Regulations and Procedures Division) by [thirty days after publication in the Federal Register]. The provisions of 27 CFR 71.31(b) shall apply with respect to the designation of portions of comments as exempt from disclosure. Written comments, which are not exempt from disclosure, may be inspected by any person upon compliance with 27 CFR 71.22. Any interested person submitting comments or suggestions who desires an opportunity to comment orally at a public hearing on these proposed regulations should submit his/her request, in writing, to the Director by [thirty days after publication in the Federal Register].

The proposed regulation is issued under the authority contained in section 27 U.S.C. 205 (49 Stat. 981, as amended).

PROPOSED REGULATION

In consideration of the foregoing, ATF proposes to amend the regulation relating to "completeness of conversion" (27 CFR Part 5), as follows:

Paragraph (d) of § 5.47a is proposed to be amended, as follows:

§ 5.47a Metric standards of fill.

(d) *Completness of conversion.* (1) Whenever a permittee or foreign bottler commences bottling a given product in a standard liquor bottle corresponding to a metric standard of fill prescribed by paragraph (a) of this section for distribution to a particular State, he may not thereafter bottle that product in any standard liquor bottle corresponding to a standard of fill prescribed by § 5.47 for distribution to that State. He may, however, continue to use a corresponding standard of fill prescribed by § 5.47 for that product in a bottle of unusual design which has been approved under the provisions of § 5.48. For the purposes of this paragraph, (i) product shall mean a given class and type of distilled spirits bearing a given brand name (e.g., ABC bourbon, ABC gin, XYZ bourbon, and XYZ gin would be four distinct products), and (ii) the standards of fill in U.S. measure which correspond to the metric standards are:

Metric standard (prescribed by sec. 5.47a(a)):	Corresponding standard (prescribed by sec. 5.47(a))	
1.75 liters	gallon	½
1.00 liter	quart	1
750 milliliters	do	⅘
500 milliliters	pint	1
200 milliliters	do	½
50 milliliters	do	⅛
		⅛, 1/10, 1/16.

* * * * *

Dated: August 12, 1976.

REX D. DAVIS,
Director.

Signed: August 17, 1976.

JAMES J. FEATHERSTONE,
Acting Assistant Secretary of the Treasury.

[FR Doc.76-24611 Filed 8-20-76;8:45 am]

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

[7 CFR Part 1867]

[FmHA Instruction 452.1]

REAMORTIZING AND RENEWING OPERATING LOANS

Account Servicing

Notice is hereby given that the Farmers Home Administration has under consideration the proposed amendment of §§ 1867.3 and 1867.9 of Part 1867 of Title 7, Code of Federal Regulations (40 FR 13203). Paragraph (b) of § 1867.3 by revising the eligibility requirements for reamortizing and renewing Operating loans; § 1867.9 by deleting the requirement that the combined Operating loan and Emergency loan principal balances not exceed the loan approval official's approval authority.

Interested persons are invited to submit written comments, suggestions, data or arguments regarding the proposed amendments to the Office of the Chief, Directive's Management Branch, Farmers Home Administration, U.S. Department of Agriculture, Room 6316, South Building, Washington, D.C. 20250. All materials received on or before September 22, 1976 will be considered. All written submissions made pursuant to this notice will be made available for public inspection at the Office of the Chief, Directive's Management Branch, during regular business hours. (8:15 a.m.-4:45 p.m.)

As proposed, § 1867.3(b) (1), (2), (3), and (4) and § 1867.9 read as follows:

§ 1867.3 Eligibility requirements.

* * * * *

(b) *Other operating loans.* * * *

(1) The borrower has made an extra payment from sale of basic security or refund which will result in a significantly reduced income for the remaining period of the loan; and

(2) The approving official determines that the borrower cannot reasonably be expected to meet the repayment schedule in the original note(s); and

(3) The borrower's plan for the next operating year (or typical year if the next year will not be typical) shows that he can realistically meet the terms of the proposed payment schedule on the reamortized or renewed note under the conditions which will likely prevail; and

(4) The justification for the reamortization or renewal is fully documented in the running case record.

* * * * *

§ 1867.9 Approval authority.

Loan approval officials are hereby authorized to approve the reamortization or renewal of Operating loans subject to the policies within this regulation, and provided the principal amount owed on the Operating loan note being reamortized or renewed plus the outstanding total principal balance owed by the borrower on the Operating loans does not exceed the loan approval official's authority shown in Subpart B of Part 1810 of this Chapter.

(7 U.S.C. 1989; delegation of authority by the Sec. of Agri., 7 CFR 2.23; delegation of authority by the Asst. Sec. for Rural Development, 7 CFR 2.70)

Dated: August 16, 1976.

FRANK W. NAYLOR, JR.,
Acting Administrator, Farmers Home Administration.

[FR Doc.76-24602 Filed 8-20-76;8:45 am]

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 128f]

[Docket No. 76N-0037]

TREE NUTS AND PEANUTS

Good Manufacturing Practice Regulation; Extension of Comment Period

The Food and Drug Administration is extending the period for comments on the proposed good manufacturing practice regulation for tree nuts and peanuts to September 30, 1976.

In the FEDERAL REGISTER of June 30, 1976 (41 FR 2700) the Commissioner of Food and Drugs issued a proposal to establish a good manufacturing practice regulation for nuts (almonds, Brazil nuts, cashew nuts, filberts, macadamia nuts, peanuts, pecans, pine nuts, pistachio nuts, and walnuts). Comments were to be filed on or before August 30, 1976.

The Commissioner has received a request for an extension of the comment period from the Dried Fruit Association of California, an association of dried fruit and tree nuts processors, in order to permit the association an opportunity to meet with all its commodity groups regarding the issues raised by the proposal. This opportunity will allow for the submission of more meaningful comments.

The Commissioner hereby extends the period for filing comments on the subject proposal to close of business September 30, 1976.

Interested persons may submit to the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852, written comments (preferably in quintuplicate and identified with the Hearing Clerk docket number found in brackets in the heading of this document) regarding this proposal. Received comments may be seen in the above office during working hours, Monday through Friday.

This action is taken under the Federal Food, Drug, and Cosmetic Act (secs. 402 (a)(3) and (4), 701(a), 52 Stat. 1046, 1055 (21 U.S.C. 342(a) (3) and (4), 371 (a)) and under authority delegated to the Commissioner (21 CFR 5.1) (recodification published in the FEDERAL REGISTER of June 15, 1976 (41 FR 24262)).

Dated: August 18, 1976.

JOSEPH P. HILE,
Acting Associate Commissioner for Compliance.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

[Docket No. 20891]

FM BROADCAST STATIONS IN RED OAK, IOWA AND MARYVILLE, MISSOURI

Proposed Table of Assignments

In the matter of amendment of § 73.202 (b), *Table of Assignments*, FM Broadcast Stations. (Red Oak, Iowa and Maryville, Missouri), Docket No. 20891, RM-2692.

1. The Commisison has before it a petition for rule making filed on April 23, 1976, by Red Oak Broadcasting Co., Inc. (petitioner), proposing the asignment of FM Channel 237A to Red Oak, Iowa, and the substitution of Channel 257A for Channel 237A at Maryville, Missouri. An opposition to the petition was filed by Nodaway Broadcasting Corp., licensee of FM Station KNIM-FM, operating on Channel 237A at Maryville, Missouri. The proposed change in the assignment at Maryville and the proposed assignment of a channel to Red Oak comply with the minimum mileage separation requirements.

2. Red Oak, Iowa, is a community of 6,210 persons[1] and is located in Montgomery County (pop. 12,781). It is situated in the southwestern part of Iowa, and 50 miles southeast of Omaha, Nebraska. It has one daytime-only AM station (KOAK), licensed to petitioner, and no FM assignments. Petitioner states that Red Oak has a mayor-council form of government, full-time fire and police departments, and elementary, junior high and high schools. It notes that the two banking institutions in Red Oak have deposits of $35,095,245, and total assets of $39,545,553. Petitioner adds that the six largest industries are Union Carbide, Thomas V. Murphy Co., Wilson Concrete Co., Red Oak Manufacturing Co., Red Oak Machine Co., and Na-Churs Plant Food Company, with the principal products produced being batteries, calendars, concrete products, pipe, agricultural-chemical packaging, metal fabrication and liquid fertilizer.

3. Nodaway Broadcasting Corp. (KNIM-FM), in its opposition alleges that the Red Oak Broadcasting Co., Inc. proposal which would require KNIM-FM to change channels, would be unfair to it, the public, merchants, and staff since they have put a lot of effort and expense into orienting the public to the station's format and location on the dial. KNIM-FM states that it has discussed this with the President of Red Oak Broadcasting Co., Inc., pointing out that this proposed change would cause a strain on the staff and management of KNIM-FM and a big loss of revenue which would be a very heavy burden. KNIM-FM urges the Commission not to proceed with the proposed change unless Red Oak and KNIM-FM are in agreement 100 percent. KNIM-FM contends that it has a large listening audience due to the effort of its staff in covering the needs of the public by working with the local, national and state news media; local market media; and local and state authorities. KNIM-FM states also that it covers all types of live sports direct from local. It argues that, in changing channels, it would lose a large number of listeners who would not know where KNIM-FM is located on the radio dial.

4. Red Oak states that in the event the proposed FM channel is assigned it will make application therefor, and, if granted, will promptly place the channel in operation. It also adds that it is ready, willing and able to reimburse Station KNIM-FM for those expenses reasonably and prudently expended in the required requested changeover from its present channel.

5. Although the proposed assignment is for a first Class A FM service and preclusion studies are not normally required, petitioner shows that the preclusion would occur only on Channels 237A and 257A. Substitution of Channel 257A for Channel 237A at Maryville would make available the assignment of Channel 237A to Falls City, Nebraska (pop. 5,444) which does not have any local aural broadcast service.

6. After careful consideration of the petitioner's proposal we believe it would be in the public interest to explore the possibility of making an FM assignment to Red Oak, Iowa, even though it would be inconvenient to the existing station (KNIM-FM) at Maryville, Missouri.

7. Accordingly, pursuant to our authority contained in sections 4(i), 303(r) and 307(b) of the Communications Act of 1934, as amended, it is proposed to amend § 73.202(b), the FM Table of Assignments, as follows:

City	Channel No. Present	Channel No. Proposed
Red Oak, Iowa		237A
Maryville, Mo	237A	257A

8. *It is ordered,* That, pursuant to section 316 of the Communications Act of 1934, as amended, and with the understanding that it will receive reasonable reimbursement of expenses incurred in changing the channel on which it has a license, the following licensee shall show cause why the license of the station should not be modified to specify operation on the new channel as proposed herein instead of the present channel:

Station	Location	Licensee
KNIM-FM	Maryville, Mo...	Nodaway Broadcasting Corp.

9. Pursuant to § 1.87 of the Commission's rules and regulations, the licensee of Station KNIM-FM may, not later than 1976, request that a hearing be held on the proposed modification. Pursuant to § 1.87(f), if the right to request a hearing is waived, Nodaway Broadcasting Corp. may, not later than September 27, 1976, file a written statement showing with particularity why its license should not be modified as proposed in the Order to Show Cause. If the right to request a hearing is waived and no written statement is filed by the date referred to above, Nodaway Broadcasting Corp. is deemed to consent to the modification as proposed in the Order to Show Cause and a final Order will be issued by the Commission if the channel change referred to in paragraph 7 above is found to be in the public interest.

10. *It is further ordered,* That the Secretary of the Commission shall send a copy of this order by Certified mail return receipt requested, to Nodaway Broadcasting Corp., Station KNIM-FM, Maryville, Missouri, the party to whom the Order to Show Cause is directed.

11. The Commission's authority to institute rule making proceedings; showings required; cut-off procedures; and filing requirements are contained below and are incorporated by reference herein.

12. Interested parties may file comments on or before September 27, 1976, and reply comments on or before October 18, 1976.

Adopted: August 13, 1976.

Released: August 20, 1976.

FEDERAL COMMUNICATIONS COMMISSION,

WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's rules and regulations, as set forth in the notice of proposed rulemaking.

2. Showings required. Comments are invited on the proposal(s) discussed in the notice of proposed rulemaking. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. Cut-off procedures. The following procedures will govern the consideration of filings in this proceeding.

[1] All population figures cited are from the 1970 U.S. Census.

V 41 164 AUG 23 76 UMI

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rulemaking which conflict with the proposal(s) in this notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. Comments and reply comments; service. Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the notice of proposed rulemaking. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's rules.)

5. Number of copies. In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. Public inspection of filings. All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

[FR Doc.76-24648 Filed 8-20-76;8:45 am]

[47 CFR Part 73]

[Docket No. 20892]

FM BROADCAST STATIONS IN GREEN BAY AND STURGEON BAY, WISCONSIN

Proposed Table of Assignments

In the matter of amendment of § 73.202(b), *Table of Assignments*, FM Broadcast Stations. (Green Bay and Sturgeon Bay, Wisconsin.

1. The Commission has for its consideration a petition filed on February 9, 1976, by Communications Properties, Inc. (Communications), licensee of standard broadcast Station WNFL in Green Bay, Wisconsin, for rule making to amend the FM Table of Assignments by the assignment of Channel 240A to Green Bay, Wisconsin, and the substitution of Channel 261A for unoccupied Channel 240A at Sturgeon Bay, Wisconsin. This proposal would not require any other changes in the FM Table of Assignments. Communications' petition is opposed by Ralph E. Evans Associates (Evans) in a document entitled "Engineering Exhibit—Comments in Response to Petition for Rule Making," which was filed on April 21, 1976. Subsequently, Communications replied by a letter, received on May 19, 1976, and by a document entitled "Comment Upon Engineering Exhibit in Opposition to Petition" which was filed on May 25, 1976. These documents will be considered below.

2. Green Bay, Wisconsin (pop. 87,809)[1] is the seat of Brown County (pop. 158,244) and is located approximately 100 miles north of Milwaukee at the tip of Green Bay, which is an arm of Lake Michigan. Petitioner points out that Green Bay has grown 39.6 percent in population between 1960 and 1970, and that Brown County's population has increased by 26.5% during this same period. Green Bay is presently served locally by three standard broadcast stations and two commercial FM stations—WNFL, a full-time Class III AM station licensed to the petitioner; WBAY, a full-time Class III AM station; WDUZ, a full-time Class IV AM station; WBAY–FM, a Class C station (Channel 266); and WDUZ–FM a Class C station (Channel 253).[2] There are also two noncommercial, educational FM stations serving Green Bay—WGBW (Channel 218A) and WPNE–FM, a Class C station (Channel 207).

3. Petitioner urges that the Commission should propose the assignment of Channel 240A to Green Bay because it is a growing community. Petitioner states that Green Bay is a major Lake Michigan port with numerous paper mills and other industries. In addition, petitioner alleges that Green Bay is the agricultural trading center for northeastern Wisconsin and that Green Bay is the home of an NFL pro-football team.

4. Communications states that, although its proposal for adding a Class A channel as a third FM assignment for Green Bay would result in the intermixture of one Class A channel with two Class C channels, this would not be inconsistent with the Commission's usual practice of avoiding intermixture because there is no Class C channel available for assignment to Green Bay and because the petitioner is willing to operate a Class A channel in competition with the two existing Class C channels. Moreover, petitioner points out that the Commission permitted intermixture of commercial Class A Channel 252A with commercial Class C Channel 266 for many years in Green Bay until Class C Channel 253 was recently substituted for Channel 252A. See footnote 2, *supra*.

5. On April 21, 1976, Evans filed an Opposition to Communications' petition in which Evans states that the proposed assignment of Channel 240A is contrary to the public interest because of the resulting intermixture of Class A and Class C channels and because of the inability of a low power Class A station to place a city-grade signal over all of Green Bay from the reference point used by the petitioner. Evans also questions whether there is any land available for use as a transmitter site from which a city grade signal could cover the entire city of Green Bay.

6. By a letter received on May 19, 1976, and by a document filed on May 25, 1976, Communications argues that the Commission should dismiss or disregard Evans' Opposition because it was filed approximately four weeks late in violation of § 1.405(a) of the Commission's rules. According to § 1.405(a), "Any interested person may file a statement in support of or in opposition to a petition for rule making prior to Commission action on the petition but not later than 30 days after 'Public Notice' * * * is given of the filing of such a petition." Communications points out that in conformity with Section 1.403 of the Commission's Rules, the Commission issued a Public Notice on February 20, 1976, of Communications' petition for rule making to assign Channel 240A to Green Bay and to substitute Channel 261A for Channel 240A at Sturgeon Bay. See Public Notice, Report No. 967, Mimeo No. 61287. However, petitioner points out that Evans did not file its Opposition until April 21, 1976.

7. Although § 1.405(a) could be applied here to dismiss Evans' filing due to the fact that it was submitted late and without a request for late acceptance, we believe that in this instance it is in the public interest to consider this filing as an opposition. Our consideration of this document will not result in prejudice to any of the parties, and the engineering issues discussed in the Opposition are part of the routine study by our engineering staff of the technical feasibility of a proposed amendment to the FM Table of Assignments. In any event, Evans' Opposition could still be considered as a comment to this notice of proposed rulemaking because the Opposition was filed before the cut-off dates for submitted comments or reply comments to this Notice as set out in paragraph 12 below. We would like to add that Communications' filing, which we shall treat as a reply, was submitted late on May 25, 1976, and without a request for a late acceptance in violation of § 1.405(b) which requires that a reply to statements in opposition to a petition for rulemaking be filed not later than 15 days after the filing of such a statement. Since Evans' Opposition was filed on April 21, 1976, the cut-off date for filing replies was May 6, 1976. However, due to the fact that our records do not indicate that Evans served its Opposition on the petitioner, we will excuse Communications' late filing.

8. Communications' Reply also asserts that there exists a three mile long area within which a Channel 240A transmitter site could be located to provide city-grade coverage over all of Green Bay. Petitioner alleges that such a transmitter site would maintain the full 65 mile separation from Station WCWC–FM (Channel 240A) in Ripon, Wisconsin. In addition, Communications submitted a letter from Barnard Corporation, a Green Bay realtor, affirming the availability for purchase or lease of several tracts of land within the designated three mile area which would be of adequate size for the proposed transmitter site. Because of the conflicting allegations over the existence of a transmitter site from which a city grade signal would cover all of Green Bay, we specifically request that the parties address the petitioner's statement in its Reply that there is a three mile long area which could be used as a transmitter site in conformity with out city-grade signal and minimum mileage separation rules.

9. We note that the addition of Channel 240A at Green Bay would not present any preclusion problems because there will be either no change in or reductions in the preclusion areas for Channels 237 through 243. Also, the substitution of Channels 258, 259, 260, and 262; however, will cause no additional preclusions for Channels 258, 259, 260, and 262; however, there will be small additional preclusions in land areas for Channels 261A, 263, and 264. Nevertheless, there are not communities in the precluded areas which are presently without an FM assignment.

10. In view of the above, the Commission proposes to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, with regard to Green Bay and Sturgeon Bay, Wisconsin, as follows:

City	Channel No.	
	Present	Proposed
Green Bay, Wis	253, 266	253, 266, 240A
Sturgeon Bay, Wis	230, 240A	230, 261A

11. The Commission's authority to institute rule making proceedings; showings required; cut-off procedures; and filing requirements are contained below and are incorporated herein.

12. Interested parties may file comments on or before September 27, 1976, and reply comments on or before October 18, 1976.

Adopted: August 13, 1976.

Released: August 20, 1976.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and Section 0.281(b)(6) of the Commission's rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's rules and regulations, as set forth in the Notice of proposed rulemaking.

2. Showings required. Comments are invited on the proposal(s) discussed in the notice of proposed rulemaking. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. Cut-off procedures. The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and public notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. Comments and reply comments; service. Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the notice of proposed rulemaking. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission rules.)

5. Number of copies. In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. Public inspection of filings. All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Airspace Docket No. 76-EA-59]

[14 CFR Part 71]

DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Proposed Alteration of Control Zone

The Federal Aviation Administration is considering amending § 71.171 of Part 71 of the Federal Aviation Regulations so as to alter the Plattsburgh, N.Y., Control Zone (41 FR 417).

A new LOC RWY 1 instrument approach procedure developed for Clinton County Airport, Plattsburgh, N.Y., requires alteration of the control zone to provide some additional controlled airspace protectin for aircraft executing the prcedure.

Interested parties may submit such written data or views as they may desire. Communications should be submitted in triplicate to the Director, Eastern Region, Attn: Chief, Air Traffic Division, Department of Transportation, Federal Aviation Administration, Federal Building, John F. Kennedy International Airport, Jamaica, New York 11430. All communications received on or before September 22, 1976 will be considered before action is taken on the proposed amendment. No hearing is contemplated at this time, but arrangements may be made for informal conferences with Federal Aviation Administration officials by contacting the Chief, Airspace and Procedures Branch, Eastern Region.

Any data or views presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official docket will be available for examination by interested parties at the Office of Regional Counsel, Federal Aviation Administration, Federal Building, John F. Kennedy International Airport, Jamaica, New York.

The Federal Aviation Administration, having completed a review of the airspace requirements for the terminal area of Plattsburgh, N.Y., proposes the airspace action hereinafter set forth:

1. Amend § 71.171 of Part 71 of the Federal Aviation Regulations so as to amend the description of the Plattsburgh, N.Y. Control Zone by adding the following:

within 3 miles each side of the Clinton County Airport ILS localizer south course, extending from the localizer to 3 miles south of the OM.

(Sec. 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348) and sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Jamaica, N.Y., on August 9, 1976.

L. J. CARDINALI,
Acting Director, Eastern Region.

[FR Doc.76-24365 Filed 8-20-76;8:45 am]

[1] Unless otherwise indicated, all population data is taken from the 1970 U.S. Census.

[2] The Commission, effective January 15, 1976, amended its FM Table of Assignments to substitute Class C Channel 253 for Channel 252A and to modify the license held by Green Bay Broadcasting Company for Station WDUZ–FM to specify operation on Channel 253 in lieu of Channel 252A (Report and Order, Docket No. 20467, 35 R.R. 2d 1059 (1976)). This eliminated intermixture of a Class A and a Class C channel in Green Bay. See discussion of intermixture in para. 4, infra.

Coast Guard

[33 CFR Part 117]

[CGD 76-138]

BLACK RIVER, MICHIGAN

Proposed Drawbridge Operation Regulations

At the request of the City of Port Huron, the Coast Guard is considering revising the regulations for the Military Street, Seventh Street and Tenth Street drawbridges across the Black River, Port Huron, Michigan, to provide more restrictive opening periods. The draws of each bridge are presently required to open on signal. This change is being considered because of a significant increase in vehicular traffic during the daylight hours and because of infrequent requests for opening during the night.

Interested persons may participate in this proposed rule making by submitting written data, views, or arguments to the Commander (oan), Nineth Coast Guard District, 1240 East Main Street, Cleveland, Ohio 44199. Each person submitting comments should include his name and address, identify the bridge, and give reasons for any recommended change in the proposal. Copies of all written communications received will be available for examination by interested persons at the office of the Commander, Ninth Coast Guard District.

The Commander, Ninth Coast Guard District, will forward any comments received before September 28, 1976, with his recommendations to the Chief, Office of Marine Environment and Systems, U.S. Coast Guard Headquarters, Washington, D.C., who will evaluate all communications received and take final action on this proposal. The proposed regulations may be changed in the light of comments received.

In consideration of the foregoing, it is proposed that Part 117 of Title 33 of the Code of Federal Regulations, be amended by: 1. Revoking § 117.641(f)(5).

2. Adding a new § 117.702 immediately before § 117.703 to read as follows:

§ 117.702 Black River, Port Huron, Michigan; bridges.

(a) The draws of the Military Street, and Seventh Street bridges shall open as follows:

(1) From May 1 through October 31—(i) From Monday through Saturday, except holidays, from 9 a.m. to 5:30 p.m., the draw need open only on the hour and half hour; and

(ii) From 5:30 p.m. to 9 a.m., and on Sundays and holidays, the draw shall open on signal.

(2) During the months of April and November—(i) From 8 a.m. to 4 p.m., the draws shall open on signal; and

(ii) From 4 p.m. to 8 a.m., the draws shall open on signal if at least three hours notice is given.

(3) From December 1 through March 31, the draws shall open on signal if at least twenty four hours notice is given.

(b) The draw of the Tenth Street bridge shall open as follows:

(1) From May 1 through October 31—(i) From 8 a.m. to 11 p.m., the draw shall open on signal; and

(ii) From 11 p.m. to 8 a.m., the draw shall open on signal if at least one hour notice is given.

(2) During the months of April and November, the draw shall open on signal if at least three hours notice is given.

(3) From December 1 through March 31, the draw shall open on signal if at least twenty four hours notice is given.

(c) Signals. (1) The opening signal from the vessel for each of these bridges is one long blast followed by one short blast of a whistle, horn, siren, or by shouting.

(2) The acknowledging signal from the drawbridge is—

(i) One long blast followed by one short blast when the draw will open promptly; and

(ii) Four short blasts when the draw will not open promptly, or is open and must be closed.

(d) The owners of or agencies controlling each bridge shall provide the necessary draw tenders and the proper mechanical appliances for the safe, prompt opening of the draw for the passage of vessels.

(e) Advance notice for the opening of the draws may be given to the dispatcher of the City of Port Huron Police Department.

(f) Public vessels of the United States, state or local government vessels used for public safety, and vessels in distress, shall be passed through the draws of these bridges as soon as possible at any time.

(g) The owner of or agency controlling each bridge shall keep a copy of the regulations in this section, together with a notice stating exactly how the dispatcher may be reached, conspicuously posted both upstream and downstream, either on the bridge or elsewhere in such a manner that it can easily be read from an approaching vessel at all times.

(Sec. 5, 28 Stat. 362, as amended, sec. 6(g)(2), 80 Stat. 937; 33 U.S.C. 499, 49 U.S.C. 1655(g)(2); 49 CFR 1.46(c)(5), 33 CFR 1.05-1(c)(4)).

Dated: August 16, 1976.

A. F. FUGARO,
Rear Admiral, U.S. Coast Guard, Chief, Office of Marine Environment and Systems.

[FR Doc.76-24639 Filed 8-20-76;8:45 am]

[33 CFR Part 117]

[CGD 76 161]

MIDDLE RIVER, CALIFORNIA

Proposed Drawbridge Operation Regulations

At the request of the Atchison, Topeka and Santa Fe Railroad, the Coast Guard is considering revising the regulations for the drawbridge across Middle River, mile 6.8, to permit the draw to remain closed to the passage of vessels. The draw is presently required to open on signal if at least 12 hours notice is given. This change is being considered because of the limited requests for the opening of the draw from vessels (one in the past 25 years).

Interested persons may participate in this proposed rule making by submitting written data, views, or arguments to the Commander (oan), Twelfth Coast Guard District, 630 Sansome Street, San Francisco, California 94126. Each person submitting comments should include his name and address, identify the bridge, and give reasons for any recommended change in the proposal. Copies of all written communications received will be available for examination by interested persons at the office of the Commander, Twelfth Coast Guard District.

The Commander, Twelfth Coast Guard District, will forward any comments received before September 28, 1976, with his recommendations to the Chief, Office of Marine Environment and Systems, U.S. Coast Guard Headquarters, Washington, D.C., who will evaluate all communications received and take final action on this proposal. The proposed regulations may be changed in the light of comments received.

In consideration of the foregoing, it is proposed that Part 117 of Title 33 of the Code of Federal Regulations, be amended by revising § 117.714(c)(1)(ii) to read as follows:

§ 117.714 San Joaquin River and its tributaries, California.

* * * * *

(c)(1) * * *

(ii) The Atchison, Topeka and Santa Fe Railroad bridge near Middle River Station. The draw need not open for the passage of vessels.

* * * * *

(Sec. 5, 28 Stat. 362, as amended, sec. 6(g)(2), 80 Stat. 937; 33 U.S.C. 499, 49 U.S.C. 1655(g)(2); 49 CFR 1.46(c)(5), 33 CFR 1.05-1(c)(4))

Dated: August 17, 1976.

A. F. FUGARO,
Rear Admiral, U.S. Coast Guard, Chief, Office of Marine Environment and Systems.

[FR Doc.76-24638 Filed 8-20-76;8:45 am]

FEDERAL RESERVE SYSTEM

[12 CFR Part 226]

[Reg. Z; Docket No. R-0053]

TRUTH IN LENDING

Proposed Interpretation on Disclosure of Amount of Dealer Participation

The Board of Governors of the Federal Reserve System proposes to adopt an interpretation of Regulation Z regarding disclosure of the amount of a dealer participation, commonly found in the financing of purchases of automobiles and other major consumer goods. In order to provide an opportunity for public discussion, the Board is publishing this interpretation for comment prior to any final action on this issue by the Board. The interpretation will not become effective until further notice by the Board.

The interpretation relates to the requirements of § 226.8(c)(8)(i) of Regulation Z with respect to identification of allocations by creditors to dealers of a portion of the finance charge on credit used to finance the purchase of automobiles and other consumer goods. The amount of dealer participation typically represents a portion of the interest component of a finance charge which is either allocated by the crediter to the dealer on the sale of its retail instalment contracts to that creditor or paid by the creditor to the dealer for arranging or referring a direct loan from the creditor.

The Board has been requested to determine whether these portions of the finance charge constitute finder's fees or similar charges within the meaning of § 226.4(a)(3) of the Regulation and whether they must be itemized as a separate component in disclosure of the finance charge under § 226.8(c)(8)(i).

Proponents of a requirement for separate disclosure of this amount take the position that the dealer participation represents a separate charge and that its specific disclosure would be beneficial to consumers. It is argued that disclosure of this amount would place the consumer in a more advantageous bargaining position with the dealer and that it would encourage a consumer to engage in further cost comparisons among various credit sources. Those in favor of this position apparently believe that this disclosure would indicate to the consumer that some portion of the cost of credit is attributable to the dealer's presence in the transaction. This awareness, they argue, would prompt the consumer to shop for better terms through direct financing.

Based on the information presently available, the Board does not believe that separate disclosure of these amounts is either required by the terms of the Regulation or mandated by the purposes of the Act. In the Board's view, a dealer participation differs from the concept of a finder's fee as that term is used in the Regulation. Unlike the dealer participation, a finder's fee or other charge of the type described in § 226.4(a)(3) is considered to be a separate charge imposed in addition to that portion of the finance charge which is attributable to a percentage rate or rates. Such fees are normally earned in full at the time of the transaction and are not subject to later adjustments on the basis of subsequent events.

A dealer participation, to the contrary, serves the purpose of apportioning the risk of loss on the credit transaction between the dealer and the financial institution. Through dealer reserve accounts and various recourse devices, the institution is able to accept a lower yield on dealer-related transactions where it does not bear the entire risk of loss. Because these amounts are frequently subject to later deductions for such occurrences as prepayment or default on the contract, the amount of dealer participation which would be disclosed to the customer may bear no relationship to the amount ultimately received by the dealer.

In the Board's view, the credit-shopping function of Truth in Lending is primarily served by disclosure of the total finance charge and annual percentage rate. These two terms, which already reflect any portion of the finance charge received by the dealer, provide the essential information needed for comparing credit sources and would not be enhanced by separate disclosure of the dealer participation. The present length and complexity of Truth in Lending disclosures argue against any additional disclosure which is not clearly mandated by the letter and the spirit of Truth in Lending and which may in fact detract from consumers' awareness of important credit terms.

For the reasons stated, the Board takes the position, in a proposed Interpretation § 226.821, that allocations of the finance charge between the dealer and the institution do not constitute finder's fees or similar charges and need not be separately described, when they represent a distribution of a portion of a finance charge which is computed by the application of a percentage rate or rates to the amount financed.

While the Board believes that the proposed interpretation correctly applies the present requirements of the Truth in Lending Act and Regulation Z, the Board is aware that this issue has been the subject of some controversy and wishes to provide an opportunity for public discussion before any final action is taken. Therefore, the Board invites written comments on the issue addressed in the interpretation. Comments should be addressed to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 and must be received by September 27, 1976. Comments should include a reference to Docket No. R-0053.

The text of the proposed interpretation is as follows:

§ 226.821 Disclosure of dealer participation.

(a) Section 226.8(c)(8)(i) requires the itemization of each component of a finance charge consisting of more than one type of charge. Section 226.4(a)(3) lists among the types of charges to be included in the finance charge a "finder's fee or similar charge." In certain credit transactions, such as the sale of automobiles and other consumer goods, where the finance charge is determined by application of a percentage rate or rates to the amount financed, a portion of that charge may be allocated to the dealer by the financial institution as a dealer participation. The question arises whether such allocations must be itemized as a separate component of the total finance charge in the nature of a finder's fee.

(b) The requirement for itemization of a finance charge which includes a finder's fee or other elements in addition to an interest component is intended to assure that the total finance charge disclosed to the customer properly reflects all components which must be included in that amount. Any component of the finance charge which is computed by the application of a percentage rate or rates to the amount financed constitutes a single charge of the type described in § 226.4(a)(1). As such, it must be included in the finance charge calculation and disclosure. A portion of such single component of the finance charge which is distributed to a dealer is not considered a "finder's fee or similar charge" and need not be separately identified or disclosed. The concept of a "finder's fee," as that term is used in § 226.4(a)(3), is intended to cover certain charges in the nature of brokerage fees which are imposed in addition to that portion of the finance charge attributable to the application of a percentage rate or rates to the amount financed. Any such separate fee must, of course, be separately itemized.

(Interprets and applies 12 CFR 226.8)

By order of the Board of Governors, August 17, 1976.

THEODORE E. ALLISON,
Secretary of the Board.

NUCLEAR REGULATORY COMMISSION

[10 CFR Part 70]

SPECIAL NUCLEAR MATERIAL

Reporting of Material Accounting Data

On November 6, 1973, the Atomic Energy Commission published amendments to its regulations in 10 CFR Part 70 which revised the materials control and accounting requirements for special nuclear material (38 FR 30542). Included in those revised requirements were provisions for the periodic performance of physical inventories, and for the determination of the quantity of special nuclear material unaccounted for (MUF) and its associated limit of error (LE MUF). The results of these determinations were required to be recorded along with supporting data describing the quantities of special nuclear material in each component of the material balance, and the quantities of special nuclear material added to or removed from the process. These records are presently available to the Nuclear Regulatory Commission on request. Licensees are required by 10 CFR Part 70 to report to the Commission when the material unaccounted for exceeds its associated limit of error and specified quantities of special nuclear material, or when the limit of error of the material unaccounted for exceeds specified limits.

The Nuclear Regulatory Commission is considering amendments to its regulations in 10 CFR Part 70, "Special Nuclear Material," which would specify additional material accounting reporting requirements. The proposed amendments would require the reporting of the results of each ending physical inventory and associated material accounting and measurement error data. The information received from licensees would pro-

V 41 164 AUG 23 76 UMI

vide an improved data basis from which the Nuclear Regulatory Commission would monitor the status of special nuclear material control and accounting in the commercial nuclear fuel cycle. The Commission considers such actions to be in the interest of the common defense and security and of the public health and safety. The new requirements would become effective 30 days after publication of this amendment in effective form in the FEDERAL REGISTER.

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, and Sections 552 and 553 of Title 5 of the United States Code, notice is hereby given that adoption of the following amendments to 10 CFR Part 70 is contemplated. All interested persons who desire to submit written comments or suggestions in connection with the proposed amendments should send them to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, by October 22, 1976. Copies of comments regarding the proposed amendments may be examined at the Commission's Public Document Room at 1717 H Street, NW., Washington, D.C.

1. Section 70.53 is amended by adding a new paragraph (c) to read as follows:

§ 70.53 Material status reports.

* * * * *

(c) Each licensee subject to the requirements of § 70.51(e) shall submit to the appropriate Regional Office of the NRC Office of Inspection and Enforcement listed in Appendix A of Part 73 of this chapter, promptly upon determination of the quantities described in paragraph (1), (2), and (3) of this paragraph (c), but not later than five calendar days after the material balance has been established following each ending physical inventory, a report containing for each plant (defined as a set of processes or operations coordinated into a single manufacturing, research and development, or testing effort identified by title, location and designated boundaries):

(1) The quantities of uranium and of fissile isotope contained in uranium enriched to less than 20 percent in the uranium-235 isotope, the quantities of uranium and of fissile isotope contained in uranium enriched to 20 percent or greater in the uranium-235 isotope, the quantities of uranium-233 and uranium element contained in uranium enriched in the uranium-233 isotope and the quantities of plutonium element associated with (i) the beginning plant inventory and the beginning inventory of the material in process, (ii) additions to the plant balance, and additions to material in process during the inventory interval, (iii) removals from the plant balance, and removals from material in process during the inventory interval by mode of removal, i.e., discards, encapsulated as sealed sources, tamper-safed product placed in storage, shipments to licensed waste disposal sites, burial, material shipped offsite, or to another plant, and (iv) the ending physical inventory, and the physical inventory of material in process;

(2) The calculated absolute quantities of material unaccounted for, for the entire plant material balance interval;

(3) The calculated quantities of material unaccounted for, for the in process material balance interval and the associated limit of error both (i) in terms of absolute quantity of element and, for uranium-235, or uranium-233, the fissile isotope, and (ii) relative to additions to and removals from material in process for the material balance interval.

The quantities reported pursuant to this paragraph (c) shall refer only to inventory results and material transactions pertinent to the material balance interval closed by the ending plant inventory for the current reporting period. Any adjustments to records related to prior inventory interval entries also shall be evaluated and reported separately.

(Secs. 53, 161i; Public Law 83-703, 68 Stat. 930, 948; Sec. 201(f), Pub. Law 93-438, 88 Stat. 1234 (42 U.S.C. 2073, 2201(i), 5841).)

Dated at Washington, D.C., this 18th day of August 1976.

For the Nuclear Regulatory Commission.

SAMUEL J. CHILK,
Secretary of the Commission.

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF STATE

[Public Notice CM-6/83]

ADVISORY COMMITTEE TO THE UNITED STATES NATIONAL SECTION OF THE INTER-AMERICAN TROPICAL TUNA COMMISSION

Meeting

Notice is hereby given, pursuant to the provisions of Public Law 92-463, that a meeting of the Advisory Committee to the United States National Section of the Inter-American Tropical Tuna Commission, will meet on September 23-25, 1976 in the auditorium of the Southwest Fisheries Center, National Marine Fisheries Service, 8604 La Jolla Shores Drive, La Jolla, California at 10:00 a.m. The meeting is to consider the 1975 fishery experience and outlook, the 1976 preliminary outlook for the fishery, and the domestic and international aspects of the tuna/porpoise problem. The meeting on September 23 will be open to the public. Persons wishing to attend the open session may participate in the discussions subject to instructions of the Chairman.

The Advisory Committee will also meet in closed session on September 24 and 25, 1976. At these sessions documents classified in accordance with Executive Order 11652 will be circulated and discussed and matters will be considered which the public interest requires be withheld from disclosure as provided in 5 USC 552(b)(1).

AUGUST 17, 1976.

ROZANNE L. RIDGWAY,
Deputy Assistant Secretary.

NATIONAL COMMITTEE FOR THE INTERNATIONAL TELEGRAPH AND TELEPHONE CONSULTATIVE COMMITTEE (CCITT)

Meeting

The Department of State announces that the U.S. National Committee for the International Telegraph and Telephone Consultative Committee (CCITT) will meet September 15, 1976 at 10 a.m. in Room 1105, Department of State, 2201 C Street NW., Washington, D.C.

The U.S. National Committee assists in the resolution of administrative/procedural problems pertaining to U.S. CCITT activities; provides advice on matters of policy and positions in the preparation for CCITT Plenary Assemblies and meetings of the International Study Groups; provides advice and recommendations in regard to the work of the U.S. CCITT Study Groups; and recommends the disposition of proposed U.S. contributions to the international CCITT which are submitted to the Committee for consideration.

The purpose of the meeting on September 15 will be to discuss preparations for U.S. participation at the VIth Plenary Assembly of the CCITT, to be held September 27-October 8, 1976, in Geneva, Switzerland.

Members of the general public may attend the meeting and join in the discussion subject to instructions of the Chairman. Admittance of public members will be limited to the seating available. In that regard, entrance to the Department of State building is controlled and entry will be facilitated if arrangements are made in advance of the meeting. It is therefore requested that prior to September 11, 1976, members of the general public who plan to attend the meeting inform Mr. Arthur L. Freeman, Office of International Communications Policy, Department of State, telephone (202) 632-1007, of their intention. All non-Government attendees must use the C Street entrance to the building.

ARTHUR L. FREEMAN,
Chairman,
National Committee.

Dated: August 12, 1976.

SHIPPING COORDINATING COMMITTEE

Meeting

An open meeting of the Shipping Coordinating Committee will be held at 9:30 a.m. on Thursday, September 23, 1976, in Room 8236 of the Department of Transportation, 400 Seventh Street, S.W. Washington, D.C.

The purpose of the meeting will be to discuss preparations for the 35th Session of the Maritime Safety Committee (MSC), a committee of the Intergovernmental Maritime Consultative Organization (IMCO), scheduled to meet in London commencing September 27, 1976. Included in the agenda will be reports by the various MSC subcommittees:

- Subcommittee on Fire Protection, 18th Session
- Subcommittee on Ship Design and Equipment, 15th Session
- Subcommittee on Bulk Chemicals, 1st Session
- Subcommittee on Carriage of Dangerous Goods, 26th Session
- Subcommittee on Containers and Cargoes, 17th Session
- Subcommittee on Subdivision, Stability and Load Lines, 19th Session

Also included in the agenda will be discussions on

- Substandard Ships
  - guidelines for judging a ship to be substandard
  - ships of non-Convention countries or those below Convention size
- Tonnage Measurement
  - treatment of ballast spaces of segregated water ballast tankers
  - matters related to the 1969 Tonnage Convention

Requests for further information on the meeting should be directed to Richard K. Bank, Chairman, Shipping Coordinating Committee. He may be reached by telephone on (area code 202) 632-0704.

The Chairman will entertain comments from the public as time permits.

AUGUST 10, 1976.

SHIPPING COORDINATING COMMITTEE

Meeting

An open meeting of the Shipping Coordinating Committee will be held at 9:30 a.m. on Friday, September 24, 1976, in Room 8236 of the Department of Transportation, 400 Seventh Street, S.W., Washington, D.C.

The purpose of the meeting will be to discuss preparations for the 37th Session of the Council of the Intergovernmental Maritime Consultative Organization (IMCO), scheduled to be held in London commencing October 5, 1976. Agenda items to be covered at the meeting include:

- status of the IMCO Convention (IMCO Membership)
- status of Coventions and other Multilateral Instruments deposited with IMCO since the 36th Session of the Council
- consideration of the reports of the subsidiary organs of the Council
  - report of the Legal Committee
  - report of the Committee on Technical Cooperation
- headquarters facilities and accommodation: report on progress achieved since the 36th Session of the Council

Requests for further information on the meeting should be directed to Richard K. Bank, Chairman, Shipping Coordinating Committee. He may be reached by telephone on (area code 202) 632-0704.

The Chairman will entertain comments from the public as time permits.

AUGUST 11, 1976.

SHIPPING COORDINATING COMMITTEE, SUBCOMMITTEE ON SAFETY OF LIFE AT SEA

Meeting

The working group on standards of training and watchkeeping of the Subcommittee on Safety of Life at Sea, a subcommittee of the Shipping Coordinating Committee, will hold an open meeting at 10:00 a.m. on Tuesday, September 14, 1976, in Room 7202 of the Department of Transportation, 400 Seventh Street, S.W., Washington, D.C.

The purpose of the meeting will be to

review the report of the Eighth Session of the Subcommittee on Standards of Training and Watchkeeping of the Intergovernmental Maritime Consultative Organization (IMCO) held in London, June 14–18, 1976

formulate the U.S. position on the agenda items of the Ninth Session of the Subcommittee on Standards of Training and Watchkeeping scheduled to be held in London December 13–17, 1976.

Requests for further information on the meeting should be directed to CDR B. E. Joyce, United States Coast Guard. He may be reached by telephone on (area code 202) 426–2251.

The Chairman will entertain comments from the public as time permits.

SHIPPING COORDINATING COMMITTEE, SUBCOMMITTEE ON SAFETY OF LIFE AT SEA

Meeting

The working group on ship design and equipment of the Subcommittee on Safety of Life at Sea, a subcommittee of the Shipping Coordinating Committee, will hold open meetings on September 14, 15 and 16, 1976, at 8:00 a.m. in Room 8334 of the Department of Transportation, 400 Seventh Street, S.W., Washington, D.C.

On September 14 and 15, the agenda topic is mobile offshore drilling units with specific consideration to the following:

Electrical and machinery requirements (including industrial systems and equipment).
Operations manual.
Crane and other lifting appliances.
Helicopter facilities.
Towing arrangements.
Mooring of offshore supply vessels.
Diving systems.

On September 16, the agenda topics will be draft requirements for segregated ballast tankers under 150 meters in length and electrical and machinery requirements for the following types of vessels:

Training vessels.
Oceanographic research and exploration vessels.
Offshore supply vessels.
Pipe-laying vessels.
Shipborne barges and barge carriers.

Requests for further information on the meeting should be directed to CAPT D. J. Linde, United States Coast Guard. He may be reached by telephone on (area code 202) 426–2167.

The Chairman will entertain comments on documents from the public as time permits.

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

(Notice No. 76–9; Reference: ATF O 1100.6)

FORMULAS FOR DENATURED ALCOHOL AND RUM REGULATIONS

Authorities of the Director in 27 CFR Part 212; Delegation Order

1. *Purpose.* This order is being issued to delegate certain authorities, now vested in the Director by regulations in 27 CFR part 212, to the Assistant Director, Technical and Scientific Services.

2. *Background.* The position of Director has been written in regulations as the position of final authority on numerous minor actions relating to formulas for denatured alcohol and rum. The position as used in regulations, has meant Division Director of the former Alcohol, Tobacco and Firearms Division of the Internal Revenue Service. With the establishment of the Bureau, the position of Director increased in stature from that of Division Director to that of Bureau Director. It has been administratively determined that certain authorities now vested in the Director by regulations in 27 CFR Part 212, Formulas For Denatured Alcohol and Rum Regulations, rightly belong at a lower organizational level and therefore should be delegated.

3. *Delegations.* Pursuant to the authority vested in the Director by Treasury Department Order No. 221, dated June 6, 1972, and by 26 CFR section 301.7701–9 there is hereby delegated to the Assistant Director, Technical and Scientific Services, the authority to take final action on the following matters relating to 27 CFR, Part 212, Formulas for Denatured Alcohol and Rum Regulations:

a. Approval or disapproval of ATF Forms 1479–A describing manufacturing processes in wich stocks of specially denatured alcohol formulas no longer authorized in this part will be used up pursuant to 27 CFR 212.3(b).

b. Authorizations for the addition of odorants, rust inhibitors or dyes to completely denatured alcohol under 27 CFR 212.10.

c. Authorizations, pursuant to Forms 1479–A, for the use of any formula of specially denatured alcohol or specially denatured rum for uses not specifically authorized in this part under 27 CFR 212.15(b).

d. Authorizations, pursuant to Forms 1479–A, for the use of Specially Denatured Alcohol Formula No. 2–B in other than closed and continuous systems under 27 CFR 212.17(c).

e. Authorizations, pursuant to Forms 1479–A, for the use of Specially Denatured Alcohol Formula No. 2–C in other than closed and continuous systems under 27 CFR 212.18(c).

f. Approval of applications to use chemicals other than acetaldehyde or ethyl acetate as denaturants in Specially Denatured Alcohol Formula No. 29 under 27 CFR 212.39(a).

4. *Redelegation.* The authorities delegated herein may be redelegated in Bureau Headquarters but not below the level of chemist in the Chemical Branch.

Effective date. This order becomes effective on August 13, 1976.

Signed: August 13, 1976.

JOHN S. KROGMAN,
Deputy Director.

[FR Doc.76–24577 Filed 8–20–76;8:45 am]

[Notice No. 76–10; Reference: ATF O 1100.67]

DISTRIBUTION AND USE OF DENATURED ALCOHOL AND RUM REGULATIONS

Authorities of the Director in 27 CFR Part 211; Delegation Order

1. *Purpose.* This order is being issued to delegate certain authorities now vested in the Director by regulations in 27 CFR part 211, to the Assistant Director, Technical and Scientific Services.

2. *Background.* The position of Director has been written in regulations as the position of final authority on numerous minor actions relating to the distribution and use of denatured alcohol and rum. The position as used in regulations, has meant Division Director of the former Alcohol, Tobacco and Firearms Division of the Internal Revenue Service. With the establishment of the Bureau, the position of Director increased in stature from that of Division Director to that of Bureau Director. It has been administratively determined that certain authorities now vested in the Director by regulations in 27 CFR Part 211, Distribution and Use of Denatured Alcohol and Rum Regulations, rightly belong at a lower organizational level and therefore should be delegated.

3. *Delegations.* Pursuant to the authority vested in the Director by the Treasury Department Order No. 221, dated June 6, 1972, and by 26 CFR section 301.7701–9 there is hereby delegated to the Assistant Director, Technical and Scientific Services, the authority to take final action on the following matters relating to 27 CFR Part 211, Distribution and Use of Denatured Alcohol and Rum Regulations:

a. Approval or disapproval of all formulas and processes submitted on ATF Forms 1479–A except formulas for rubbing alcohol and rubbing alcohol base under 27 CFR 211.23.

b. Approval or disapproval of new labels or facsimilies for adopted formulas under 27 CFR 211.62.

c. Requests for the submission of samples of (a) any ingredient included in formulas submitted on Forms 1479–A and (b) proprietary antifreeze solutions containing completely denatured alcohol under 27 CFR 211.107.

d. Restrictions on Forms 1479–A covering the size of containers in which an article may be sold, the maximum quantity which may be sold to any person at one time, the class of vendee to which an article may be sold and the specific use for which an article may be sold under 27 CFR 211.108.

e. Approval or disapproval of extraneous matter to be printed on labels for completely denatured alcohol under 27 CFR 211.121.

f. Approval or disapproval of materials for use in making containers for proprietary antifreeze solutions under 27 CFR 211.123.

g. Approval or disapproval of Forms 1479–A covering the manufacture of proprietary solvent formulations under 27 CFR 211.170.

h. Approval or disapproval of Forms 1479–A covering the use of proprietary solvents in the manufacture of articles for sale under 27 CFR 211.172.

i. Approval or disapproval of Forms 1479–A covering the manufacture of special industrial solvent formulations under 27 CFR 211.180.

j. Approval or disapproval of Forms 1479–A covering the use of special industrial solvents in the manufacture of articles for sale under 27 CFR 211.182.

k. Approval or disapproval of labels for products specified under paragraph 211.191 under 27 CFR 197.

l. Approval or disapproval of Forms 1479–A covering the reprocessing of duplicating and printing fluids containing 1 percent or more by weight of a glycol ether and 10 percent or more by weight of methyl alcohol into printing ink for sale under 27 CFR 211.200.

m. Approval or disapproval of Forms 1479–A covering the manufacture of solvents for own use (but not for sale) under 27 CFR 211.200.

n. Action to impose label requirements on containers of articles, other than those specified in this part, containing specially denatured alcohol under 27 CFR 211.201, and 27 CFR 211.108.

4. *Redelegation.* The authorities delegated herein may be redelegated in Bureau Headquarters but not below the level of chemist in the Chemical Branch.

Effective date: This order becomes effective on August 13, 1976.

Signed: August 13, 1976.

JOHN S. KROGMAN,
Deputy Director.

GRANTING OF RELIEF

Notice is hereby given that pursuant to 18 U.S.C. Section 925(c) the following named persons have been granted relief from disabilities imposed by Federal laws with respect to acquisition, transfer, receipt, shipment, or possession of firearms incurred by reason of their convictions of crimes punishable by imprisonment for a term exceeding one year.

It has been established to my satisfaction that the circumstances regarding the convictions of each applicant's record and reputation are such that the applicants will not be likely to act in a manner dangerous to public safety, and that the granting of the relief will not be dangerous to the public interest.

Ackerman, Thomas E., 1918 27th Street, Des Moines, Iowa, convicted on October 19, 1957, in the District Court, Warren County, Iowa.

Amaro, Leandro, 1466 Silver Lake Boulevard, Los Angeles, California, convicted on June 16, 1970, in the Superior Court, Los Angeles County, California.

Angle, James C., 2209 Simpson, Winfield, Kansas, convicted on June 2, 1950, in the District Court, Cowley County, Kansas.

Bark, Carey G., Route No. 1, Denver, Iowa, convicted on March 1, 1974, in the District Court, Brewer County, Iowa; and April 11, 1974, in the District Court, Black Hawk County, Iowa.

Barnes, Jeffrey D., 5705 S.E. 39th, Lacey, Washington, convicted on October 1, 1969, in the Thurston County Superior Court, Washington.

Barnes, Warren E., 303 North 10th Street, Manitowoc, Wisconsin, convicted on August 7, 1967, in the County Court, Manitowoc County, Wisconsin.

Notice of Granting of Relief Pursuant to Section 925(c), Title 18, United States Code.

Baskin, Klayton D., 1711 River Road, Yakima, Washington, convicted on October 24, 1972, in the Superior Court, Thurston County, Washington.

Beard, James L., 9137 South Laflin, Chicago, Illinois, convicted on March 3, 1966, in the Circuit Court of Cook County, Illinois.

Beasley, Harrison, Jr., 3561 Claymore, Apartment 3, Memphis, Tennessee, convicted on February 18, 1963, in the Circuit Court, Criminal Division, 10th Judicial Circuit, Alabama.

Bell, Gary D., 206 South Monroe, Carrollton, Missouri, convicted on October 14, 1968, in the Carroll County Circuit Court, Carrollton, Missouri.

Berry, Richard J., Route 3, Cedartown, Georgia, convicted on September 28, 1956, and July 15, 1966, and April 14, 1967, in the United States District Court, Northern District, Rome, Georgia.

Office of the Secretary

[Administrative Ruling 76–1]

TREATMENT OF INDIAN TRIBE AND ALASKAN NATIVE VILLAGE ADJUSTED TAXES

Revenue Sharing

This ruling sets forth the procedure the Office of Revenue Sharing will follow in using Indian tribe and Alaskan native village adjusted tax data when calculating entitlements, pursuant to § 108(b) and § 108(c) of the State and Local Fiscal Assistance Act of 1972 (P.L. 92–512).

For purposes of paragraphs (1), (2), (3), (5), 6(C), (6)(D) of § 108(b) and for purposes of § 108(c) of the Act, the recognized governing body of an Indian tribe or Alaskan native village which performs substantial governmental functions is excepted from treatment as a "unit of local government" by § 108(d)(1) of the Act.

It is the determination of the Department of the Treasury that the revised application of this above-mentioned language will result in a more equitable entitlement calculation procedure. When Indian adjusted tax data first became available, it was initially applied in the total entitlement calculation process under § 108 of the Act. Section 108(b)(4) of the Act, in describing the amount of allocations for Indian tribes and Alaskan native villages, provides that before § 108(b)(1) is applied there shall be allocated to such tribe or village a portion of the amount allocated to the county area for the entitlement period which bears the same ratio to such amount as the population of that tribe or village within that county area bears to the population of that county area. The allocation for Indian tribes and Alaskan native villages is therefore completed at this stage of the allocation process before application of § 108(b)(1) and succeeding subsections of the Act relating to the calculation of entitlement amounts. In order to improve the entitlement calculation process, Indian tribe and Alaskan native village adjusted tax data will only be applied under § 108(a) relating to allocations among county areas and pursuant to § 108(d)(1) will be excluded from allocation calculations under § 108(b) and § 108(c). This ruling will result in Indian tribe and Alaskan native village adjusted tax data being applied only to that portion of the entitlement calculation process which affects entitlement amounts for Indian tribes and Alaskan native villages.

The effective date for this procedure shall be for Entitlement Period Seven beginning July 1, 1976. Final allocations for Entitlement Period Seven shall be determined pursuant to this ruling.

JEANNA D. TULLY,
Director,
Office of Revenue Sharing.

Department of the Navy

CHIEF OF NAVAL OPERATIONS EXECUTIVE PANEL ADVISORY COMMITTEE

Meeting

Pursuant to the provisions of the Federal Advisory Commitee Act (5 U.S.C. App. I), notice is hereby given that the Chief of Naval Operations Executive Panel Advisory Committee will meet September 14 and 15, 1976, at the Pentagon, Washington, D.C. Sessions of the meeting will commence at 8:30 a.m. and terminate at 5:30 p.m. and the meeting will be closed to the public.

The agenda will consist of matters required by Executive Order to be kept secret in the interest of national defense, including special intelligence briefings on foreign naval operations and presentations on ocean surveillance, new technology, and U.S. Navy plans and programs. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in Section 552(b)(1) of Title 5, United States Code.

Dated: August 16, 1976.

JOHN S. JENKINS,
Captain, JAGC, U.S. Navy, Assistant Judge Advocate General (Civil Law).

CROW CEDED AREA COAL LEASE DEVELOPMENT PROPOSAL

Availability of Draft Environmental Statement

Pursuant to Section 102 (2) (c) of the National Environmental Policy Act, the Bureau of Indian Affairs has prepared a Draft Environmental Statement for the Westmoreland Resources Crow Ceded Area Coal Lease, Tracts II and III, which is located in Bighorn County, Montana.

The environmental statement considers human and physical environmental effects associated with the approval of an existing 30,876 acre lease area. Written comments are invited within forty-five (45) days of this notice.

The U.S. Geological Survey is currently preparing a draft environmental statement on a proposed 20 year plan of mining and reclamation on 2,151 acres within Tract III; this statement will be made available to the public about October 1, 1976.

Copies of the BIA statement will be available for inspection at the following locations:

Bureau of Indian Affairs, Division of Trust Facilitation, Room 4554, Department of the Interior Bldg., Washington, D.C. 20245, Telephone: (202) 343–4004.

Bureau of Indian Affairs, Billings Area Office, Billings, Montana 59103, Telephone: (406) 245–6711.

Bureau of Indian Affairs, Crow Indian Agency, Crow Agency, Montana 59022, Telephone: (406) 638–2671.

Copies of the Draft Environmental Statement may be obtained from the Area Director, Bureau of Indian Affairs in Billings, Montana.

STANLEY D. DOREMUS,
Deputy Assistant Secretary of the Interior.

Bureau of Land Management

LAKEVIEW DISTRICT ADVISORY BOARD

Meeting

Notice is hereby given that the Bureau of Land Management, Lakeview District Advisory Board will meet at 9:00 a.m., Pacific Standard Time, on September 17, 1976, at the Lakeview Community Center.

The agenda for the meeting will include discussion of:

1. New BLM Grazing Regulation.
2. Memorial Day Motorcycle Race.
3. Board Reorganization.
4. District Tour.

The meeting will be open to the public insofar as seating is available. Time will be available for brief statements from members of the public, but those wishing to make an oral statement must inform the Chairman in writing prior to the meeting. Interested persons may file a written statement with the Board for its consideration. Statements should be sent to: Chairman, Lakeview District Advisory Board, Care of District Manager, Bureau of Land Management, P.O. Box 151, Lakeview, Oregon 97630.

YUMA DISTRICT MULTIPLE USE ADVISORY BOARD

Meeting

Notice is hereby given that the Yuma District Multiple Use Advisory Board will convene on October 7, 1976, commencing at 9:00 a.m. at the Western Room, Chilton Inn, 300 E. 32nd Street, Yuma, Arizona.

The Board will discuss and make recommendations on proposed plans for Black Meadow Landing concession on Lake Havasu, standards for commercial and concession contracts, activity plans for wildlife habitat and recreation use areas, and the permit program developed under the Lower Colorado River Land Use Plan.

The meeting will be open to the public with seating provided for approximately 40 persons. Time will be available for a limited number of brief statements by members of the public beginning at 2:45 p.m. Those wishing to make oral statements should so inform the Bureau of Land Management, Yuma District Office, prior to the Board meeting. Written statements may also be filed with the Board for its consideration. Written statements may be submitted at the meeting or mailed to: Chairman, Yuma District Advisory Board, P.O. Box 5680, Yuma, Arizona 85364.

Prior to the meeting, the Board will tour the Laguna-Martinez areas on October 6, 1976. Members of the public may attend the tour but must furnish their own transportation.

Further information concerning the meeting may be obtained from H. Max Bruce, District Manager, at the above address. Telephone number: 602–726–2612.

Minutes of the meeting will be available for public inspection thirty (30) days after the meeting. Interested parties should contact the District Manager, Yuma District Office.

H. M. BRUCE,
District Manager.

Forest Service

WILDERNESS STUDY REPORT, LONE PEAK WILDERNESS STUDY AREA, UINTA AND WASATCH NATIONAL FORESTS

Availability of Final Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final environmental statement for the Wilderness Study Report, Lone Peak Wilderness Study Area, Uinta and Wasatch National Forests, Utah. The Forest Service report number is USDA–FS–FES (Adm) R4–76–1.

The action analyzed by the final environmental statement is the result of the Lone Peak Wilderness study and designation of the Lone Peak Scenic Area of approximately 28,440 acres. The Lone Peak Scenic Area will be established by the Regional Forester under the authority of Title 36, Code of Federal Regulations, Section 294.1.

This final environmental statement was transmitted to CEQ on August 16, 1976.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Bldg., Room 3230, 12th St. and Independence Ave., SW, Washington, D.C. 20250.

Wasatch National Forest, 4311 Federal Building, 125 South State Street, Salt Lake City, Utah 84138.

Regional Planning & Budget, USDA, Forest Service, Federal Building, Room 4408, Ogden, Utah 84401.

Salt Lake Ranger District, USDA, Forest Service 3070 East 33rd South, Salt Lake City, Utah 84109.

A limited number of single copies are available upon request to Forest Supervisor Chandler P. St. John, Wasatch National Forest, 8226 Federal Building, 125 South State Street, Salt Lake City, Utah 84138, or Acting Forest Supervisor Gordon A. Colby, Uinta National Forest, 88 West 100 North, Provo, Utah 84601.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ Guidelines.

AUGUST 16, 1976.

P. M. REES,
Director, Regional Planning and Budget.

Office of the Secretary

ADVISORY COMMITTEE ON FOREIGN ANIMAL DISEASES

Determination

Notice is hereby given that the Secretary of Agriculture intends to reestablish an Advisory Committee on Foreign Animal Diseases for a 2-year period. The Secretary has determined that establishment of the Committee is in the public interest in connection with duties imposed on the Department by law.

The purpose of the Committee will be to advise the Secretary regarding program operations and measures to prevent, suppress, control or eradicate an outbreak of foot-and-mouth disease or other destructive foreign animal diseases in the event such diseases should enter the United States. The economic consequences of such outbreaks could have disastrous effects on all segments of the public because of ever-changing methods of livestock production and distribution. The Chairman of the Committee will be the Assistant Secretary for Marketing and Consumer Services, United States Department of Agriculture, Washington, DC 20250. Plans are for the Committee to meet annually.

This notice is given in compliance with the Federal Advisory Committee Act (Pub. L. 92–463). Views and comments of interested persons may be submitted to the Administrator, Animal and Plant Health Inspection Service, Room 316–E, United States Department of Agriculture, Washington, D.C. until September 7, 1976. Such comments will be available for public inspection during regular business hours (7 CFR 1.27(b)).

Dated: August 18, 1976.

J. PAUL BOLDUC,
Assistant Secretary for Administration.

[FR Doc.76–24674 Filed 8–20–76;3:45 am]

ANIMAL AND PLANT HEALTH INSPECTION SERVICE CONSUMER ADVISORY COMMITTEE

Determination

Notice is hereby given that the Secretary of Agriculture intends to establish an Animal and Plant Health Inspection Service (APHIS) Consumer Advisory Committee for a two-year period. The Secretary has determined that establishment of the Committee is in the public interest in connection with duties imposed on APHIS by law.

The laws governing the programs of APHIS are for the purposes of protecting livestock and poultry health; protecting crop production against plant pests and diseases; assuring the humane treatment of certain classes of animals; and assuring that meat and poultry food products are wholesome, safe for human consumption, and truthfully and informatively labeled.

The purpose of the Committee will be to provide a forum for the expression of views of persons qualified to represent consumers when changes are being considered in policies and procedures of APHIS. The Committee will have a balanced membership of persons representing consumer interests from all sections of the United States.

The Chairman of the Committee will be the Assistant Secretary for Marketing and Consumer Services, United States Department of Agriculture, Washington, D.C. 20250. Plans are for the Committee to meet at least three times annually.

This notice is given in compliance with the Federal Advisory Committee Act (Pub. L. 92–463). Views and comments of interested persons may be submitted to the Administrator, APHIS, Room 316–E, United States Department of Agriculture, Washington, D.C. 20250 until September 7, 1976. Such comments will be available for public inspection during regular business hours (7 CFR 1.27(b)).

Dated: August 18, 1976.

J. PAUL BOLDUC,
Assistant Secretary for Administration.

V 41 164 AUG 23 76 UMI

Maintenance Services, Mobile Maintenance Services, 20 St. Lukes Avenue, Maidstone, Kent ME145AN, England, Respondents.

Pursuant to orders appearing in 30 F.R. 2687 (March 3, 1965), 32 F.R. 15646 (November 10, 1967) and 33 F.R. 3653 (March 1, 1968), respondents were denied all export privileges for an indefinite period for failure to furnish answers to interrogatories and to produce certain records or as related parties to Dukerswell. By letter dated May 21, 1976, Patrick Hughes and Mobile Maintenance Services were charged by the Director, Compliance Division, Office of Export Administration with violations of the Export Administration Act of 1949, as amended and supplemented, 15 U.S.C. App. § 2401 *et seq.*, and the regulations thereunder. Charges were made that the parties had violated the terms of the denial order and, on not less than eight occasions, had negotiated and purchased U.S. equipment. The charging letter was duly served upon respondents, however, they did not answer and are now in default.

The case was referred to the Hearing Commisioner pursuant to the authority of 15 CFR 388.4. He found that the failure to reply to the charges is deemed as confession of the truth thereof, i.e., the parties did violate the express terms of the prior denial orders. He recommended that a further denial order be issued against the respondents to deny them all export privileges in commodities requiring validated licenses for a period of five years.

I find the facts are as stated by the Hearing Commissioner and I accept his recommendation. I find that an order denying export privileges for a reasonable period of time is necessary to protect the public interest and to achieve effective enforcement of the Export Control Act of 1949. Therefore, pursuant to the authority of that Act and the Export Administration Regulations, 15 CFR 387.1, 388.1, it is:

ORDERED

(1) Except as otherwise specifically excepted herein or as otherwise expressly authorized, respondents are hereby denied all privileges or participating directly or indirectly, for a period ending May 31, 1981, in any manner or capacity, in any transaction involving export of U.S. commodities requiring a validated export license.

(2) The denial of export privileges shall extend to the respondents, their agents, employees and to any successor and to any person, firm, corporation, partnership, or other business organization with which respondents now or hereafter may be related by ownership, control, position of responsibility, affiliation, or other connection in the conduct of trade of related services.

(3) During the time when respondents are denied export privileges, no person, firm, corporation, partnership or other business organization, whether in the United States or elsewhere, without prior disclosure to and specific authorization from the Bureau of East-West Trade, shall do any of the above-mentioned acts, directly or indirectly or carry on negotiations with respect thereto in any manner or capacity, on behalf, or in any association with respondents or whereby respondents may obtain any benefit therefrom, or have any interest or participation therein directly or indirectly. The prohibtions of this paragraph are restricted to transactions subject to validated license controls.

This supersedes the orders of 1965, 1967 and 1968, *supra*.

RAUER H. MEYER,
Office of Export Administration.

Dated: August 3, 1976.

[File No. 23-577]

PORN AND DUNWOODY, LTD.

Export Privileges Restored

In the matter of Porn & Dunwoody, Ltd., Union Works, Bear Gardens, London, SE1 9EB, Respondent.

Written interrogatories were directed to respondent in connection with unauthorized diversions, which occurred in 1957, of diesel engine parts and roller bearings. Respondent failed to answer. Accordingly, pursuant to the authority of the export regulations, 15 CFR 388.15 (previously 382.15), respondent, by Order appearing in 24 F.R. 8683 (October 27, 1959), was denied all United States export privileges. The Order provided that it would remain in effect until reply was made or adequate reasons given for failure to respond.

Respondent now appears and petitions for restoration of export privileges and for full access to U.S. commodities. Respondent explains its failure to reply to the interrogatories resulted because of the termination of employment of its then managing director, now deceased. Respondent states that company employees cannot recall any details of the matter.

The Director, Compliance Division, reports respondent is not presently suspect of violating the Export Administration Regulations and is not known to have violated the terms of the denial order.

The Hearing Commissioner, in view of the Compliance Division's report, recommends respondent be restored to full export privileges and access to U.S. commodities.

I have examined the report and recommendations of the Commissioner. The record fails to disclose any adverse report. Respondent is not presently suspect in connection with any violation of the United States export laws or the Export Administration Regulations. It is fair, fitting and proper that one who manifests intention of continued compliance with the export regulations, be restored to full export privileges. Restoration to full access to American commodities is in accord with the purpose and intent of the law, the regulations and the policies of this Department. Therefore, it is

ORDERED

Porn and Dunwoody, Ltd., is unconditionally restored to all United States export privileges.

Dated: August 16, 1976.

RAUER H. MEYER,
Director, Office of Export Administration.

[Department Organization Order 10-4; Amdt. 2]

Domestic and International Business Administration

FOREIGN AVAILABILITY SUBCOMMITTEE OF THE COMPUTER SYSTEMS TECHNICAL ADVISORY COMMITTEE

Partially Closed Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. IV, 1974), notice is hereby given that a meeting of the Foreign Availability Subcommittee of the Computer Systems Technical Advisory Committee will be held on Tuesday, September 14, 1976, at 1:00 p.m. in Room 1096, Main Commerce Building, 14th and Constitution Avenue, N.W., Washington, D.C.

The Computer Systems Technical Advisory Committee was initially established on January 3, 1973. On December 20, 1974, the Acting Assistant Secretary for Administration approved the recharter and extension of the Committee for two additional years, pursuant to Section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c)(1) and the Federal Advisory Committee Act. The Foreign Availability Subcommittee of the Computer Systems Technical Advisory Committee was established on July 8, 1975, with the approval of the Director, Office of Export Administration, pursuant to the charter of the Committee.

The Committee advises the Office of Export Administration, Bureau of East-West Trade, with respect to questions involving technical matters, world-wide availability and actual utilization of production and technology, and licensing procedures which may affect the level of export controls applicable to computer systems, including technical data related thereto, and including those whose export is subject to multilateral (COCOM) controls. The Foreign Availability Subcommittee was formed to ascertain if certain kinds of equipment are available in non-COCOM and Communist bloc countries, and if such equipment is available, then to ascertain if it is technically the same or similar to that available elsewhere.

The Subcommittee meeting agenda has four parts:

GENERAL SESSION

(1) Opening remarks by the Subcommittee Chairman.

(2) Presentation of papers or comments by the public.

(3) Further review of technical evaluations on foreign availability provided by industry/government and discussion thereof.

EXECUTIVE SESSION

(4) Discussion of matters properly classified under Executive Order 11652, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The General Session of the meeting is open to the public, at which a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Subcommittee. Written statements may be submitted at any time before or after the meeting.

With respect to agenda item (4), the Acting Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on November 25, 1975, pursuant to Section 10(d) of the Federal Advisory Committee Act that the matters to be discussed in the Executive Session should be exempt from the provisions of the Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552 (b)(1), i.e., it is specifically required by Executive Order 11652 that they be kept confidential in the interest of the national security. All materials to be reviewed and discussed by the Subcommittee during the Executive Session of the meeting have been properly classified under the Executive Order. All Subcommittee members have appropriate security clearances.

Copies of the minutes of the open portion of the meeting will be available upon written request addressed to the Freedom of Information Officer, Domestic and International Business Administration, Room 3100, U.S. Department of Commerce, Washington, D.C. 20230.

For further information, contact Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Domestic and International Business Administration, Room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone: A/C 202-377-4196.

The complete Notice of Determination to close portions of the series of meetings of the Computer Systems Technical Advisory Committee and of any subcommittees thereof, was published in the FEDERAL REGISTER on December 5, 1975 (40 FR 56960).

Dated: August 17, 1976.

LAWRENCE J. BRADY,
Acting Director, Office of Export Administration, Bureau of East-West Trade, U.S. Department of Commerce.

Maritime Administration

CONSTRUCTION OF 125,000 CUBIC METER LIQUEFIED NATURAL GAS (LNG) VESSELS MA DESIGN LG8-S-102a

Recomputation of Foreign Cost; Amended Notice of Intent

In Doc. No. 76-2419 appearing in the FEDERAL REGISTER on July 23, 1976 (41 F.R. 30375) Notice was given of the intent of the Maritime Subsidy Board, pursuant to the provisions of section 502(b) of the Merchant Marine Act, 1936, as amended, to recompute the estimated foreign cost of construction of 125,000 cubic meter liquefied natural gas (LNG) vessels, MA Design LG8-S-102a, in view of the occurrence of a significant change in shipbuilding market conditions since the previous determination of estimated foreign cost was made.

Upon request of interested parties, good cause having been shown, the time for filing written statements with respect to said Notice is hereby extended to close of business on September 22, 1976.

Dated: August 18, 1976.

By Order of the Maritime Subsidy Board, Maritime Administration.

ROBERT J. PATTON, JR.,
Assistant Secretary.

[Docket No. S-506]

AMERICAN PRESIDENT LINES, LTD., SECTION 805(A) REQUEST ON ATLANTIC/STRAITS SERVICE

Prehearing Conference Memorandum of Bulk Food Carriers, Inc.[1]

Responsive to the Notice of Prehearing Conference issued July 7, 1976, and pursuant to leave granted in the Ruling On Petition For Leave To Intervene, issued by the Administrative Law Judge on August 11, 1976, intervener, Bulk Food Carriers, Inc. ("BFC") hereby respectfully submits its prehearing conference memorandum in this proceeding.

I. BFC's STATEMENT OF THE ISSUES

It is BFC's position that this proceeding raises the following issues within the purview of Section 805(a) of the Merchant Marine Act of 1936 (46 U.S.C. 1223):

A. Will the granting of this application result in unfair competition to BFC, a corporation operating exclusively in the intercoastal service?

B. Will the granting of this application be prejudicial to the objects and policy of the Act?

II. BFC's POSITION

BFC opposes the granting of a Section 805(a) waiver to applicant, American President Lines, Ltd. ("APL") unless the proposed intercostal operations of APL are appropriately restricted to preclude operations competitive with those of BFC. The latter has devoted considerable effort to providing needed service in the intercostal trade, which in recent years, has declined sharply with the abandonment of operations by numerous carriers. It would be both unfair and contrary to the public interest to subject BFC to the competition of a subsidized carrier.

III. PROSPECTIVE NUMBER OF BFC WITNESSES

It is BFC's present intention to present one witness who will descripe BFC's present and proposed domestic operations, the history and development of the company, and its present financial posture.

IV. SUGGESTED PLACE AND SCHEDULE FOR HEARING

BFC would prefer to reserve discussion of time and place of hearing until the prehearing conference but will undertake to cooperate fully in accommodating the convenience of the parties.

V. REQUESTS FOR DISCOVERY

BFC concurs in and adopts the requests for discovery of Sea-Land Service, Inc. In addition, inasmuch as BFC does not have access to the discovery responses of APL in Docket No. S-417, it is requested that APL furnish copies of such responses to the extent that the information contained therein is not included in or replaced by more current information furnished in response to the discovery requests in this proceeding.

VI. PRELIMINARY MOTIONS

BFC has no preliminary motions. It does, however, propose a stipulation which, if accepted by the parties and the Board, will satisfy BFC's interest in this proceeding. BFC proposes that APL stipulate that any waiver granted herein be restricted to the intercoastal transportation of cargo in containers in vessels that are exclusively designed and operated as containerships.

Respectfully submitted,

J. RAYMOND CLARK,
Attorney for Bulk Food Carriers, Inc.

Office of the Secretary

COMMERCE TECHNICAL ADVISORY BOARD

Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. IV 1974), notice is hereby given that the Commerce Technical Advisory Board will hold a meeting on Wednesday, September 22, 1976, from 9 a.m. to 5 p.m. and Thursday, September 23, from 8:30 a.m. to 12 m. in Room 6802 of the Main Department of Commerce Building, 14th and E Streets, NW., Washington, D.C.

V 41 164 AUG 23 76 UMI

The Board was established to study and evaluate the technical activities of the Department of Commerce and recommend measures to increase their value to the business community. The agenda for the meeting is as follows:

WEDNESDAY, SEPTEMBER 22, 1976

9 a.m. to 12:00 m. Morning session.
Opening remarks by Assistant Secretary Ancker-Johnson.
Technology policy issue paper draft review and critique.
12 m to 1 p.m. Lunch.
1 p.m. to 5 p.m. Afternoon session.
Technology policy issue paper draft (continued).
Report of the export administration subcommittee of the President's export council re. East-West trade technology controls.
CTAB panel on energy policy, status report.

THURSDAY, SEPTEMBER 23, 1976

8:30 a.m. to 12 m.
CTAB plans for the 1976–77 year.
12 m. Adjournment.

The meeting will be conducted in a manner to facilitate the orderly flow of business. Practical considerations may dictate alterations in the above agenda or schedule.

The meeting will be open to public observation. The public may submit written statements or inquiries to the Chairman before or after the meeting. Such communications shall be directly relevant to the above agenda items. Only comments and questions from members of the Board, DOC officials and invited participants will be entertained at the meeting. A limited number of seats will be available to the public and to the press on a first-come first-serve basis.

Copies of minutes or tape and materials distributed will be made available for reproduction, following certification by the Chairman, in accordance with the Federal Advisory Committee Act, at the U.S. Department of Commerce Central Reference and Inspection Facility, Washington, D.C. 20230.

Further information may be obtained from Frank Cacciapaglia, Jr., Executive Director, CTAB, Room 3877, U.S. Department of Commerce, Washington, D.C. 20230; telephone (202) 377–4595 after September 6, 1976.

Dated: August 17, 1976.

BETSY ANCKER-JOHNSON,
Assistant Secretary for Science and Technology.

ASSISTANT SECRETARY FOR ECONOMIC DEVELOPMENT

Delegation of Authority

This order effective August 19, 1976 further amends the materials appearing at 40 FR 56702 of December 4, 1975 and of 40 FR 58878 of December 19, 1975.

Department Organization Order 10–4 of September 30, 1975, is hereby amended as shown below. The purpose of this amendment is to delegate the authority of the Secretary to administer Title I of the Public Works Employment Act of 1976, P.L. 94–369, to the Assistant Secretary for Economic Development (subparagraphs 4.01g. and 5.o.).

1. In section 4. Delegation of authority. A new subparagraph .01g. is added to read as follows:

"g. The Local Public Works Capital Development and Investment Act of 1976, which is Title I of the Public Works Employment Act of 1976 (Public Law 94–369, 42 U.S.C. 6701 et seq.)".

2. In section 5. General functions. a. A new subparagraph o. is added to read as follows:

"o. Assure the adequate and effective administration of Title I of the Public Works Employment Act of 1976, including the monitoring and servicing of grants."

b. In pen and ink reletter the current subparagraph o. as p.

JOSEPH E. KASPUTYS,
Assistant Secretary for Administration.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Federal Council on the Aging

MEETING

The Federal Council on the Aging was established by the 1973 amendments to the Older Americans Act of 1965 (Pub. L. 93–29) for the purpose of advising the President, the Secretary of Health, Education, and Welfare, the Commissioner on Aging, and the Congress on matters relating to the special needs of older Americans.

Notice is hereby given pursuant to Pub. L. 92–463 that the Council will hold a regular quarterly meeting on September 13 and 14, 1976, from 9:30 a.m. to 5 p.m. in Room 4559 Donohoe Building, 400 Sixth Street, S.W., Washington, D.C. The agenda will consist of: President's response to FCA annual report and studies; Status of assets project; Recommendation for HUD assistance to minority housing sponsors; Response of aging agency network to Bicentennial Charter; Critique of 1971 White House Conference on Aging recommendations; Review of recommendations for services to the frail elderly; Status of Federal aging research plan; Status of FCA health manpower project; FCA project on older women; Review of Federal home health initiatives and FCA position on National Meals on Wheels legislative proposals.

This meeting will be open for public observation.

Further information on the Council may be obtained from: Cleonice Tavani, Executive Director, Federal Council on the Aging, Washington, D.C. 20201, telephone: (202) 245–0441.

CLEONICE TAVANI,
Executive Director, Federal Council on the Aging.

AUGUST 17, 1976.

Food and Drug Administration

ADVISORY COMMITTEES

Meetings

This notice announces forthcoming meetings of the public advisory committees of the Food and Drug Administration. It also sets out a summary of the procedures governing the committee meetings and the methods by which interested persons may participate in the open public hearings conducted by the committees. The notice is issued under section 10(a) (1) and (2) of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770–776 (5 U.S.C. App. I)). The following advisory committee meetings are announced:

Committee name	Date, time, and place	Type of meeting and contact person
1. Panel on Review of Gastroenterological and Urological Devices and its following subcommittees: Implants Subcommittee, Dialysis Devices Subcommittee, High Frequency Surgical Devices Subcommittee, and the Endoscope/Surgical Devices Subcommittee.	Sept. 26 and 27, 8 a.m., Captain's Room, Channel Inn Motel, 650 Water St. SW., Washington, D.C.	Open public hearing, Sept. 26, 8 a.m. to 9 a.m.; open committee discussion, Sept. 26, 9 a.m. to 5 p.m.; open public hearing, Sept. 27, 8 a.m. to 9 a.m.; open committee discussion, Sept. 27, 9 a.m. to 5 p.m.; Thomas L. Anderson, M.D. (HFK–460), 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7238.

General function of the committee. Reviews and evaluates available data concerning the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

Agenda—Open public hearing. Interested persons are encouraged to present information pertinent to the following list of devices to Thomas L. Anderson, M.D., executive secretary. Submission of data relative to tentative classification findings is also invited.

Open committee discussion—Implants Subcommittee (September 26, 9 a.m. to 12 m.). Discussion of the following devices: (1) Electrical implants: bladder pacemaker; electrical stimulator for incontinence. (2) Non-electrical implants: mechanical/hydraulic impotence devices; mechanical/hydraulic incontinence device; mesh steel; penile implants; prosthetic urethral sphincter; testicular implants; ureteral replacement; ureteral splints; ureterovesicle valves; urethral replacement; vas deferans implants. (3) Urine collecting devices: leg bag; ileostomy; ureterostomy; urosheath types incontinence devices. (4) Suprapubic drainage devices: malecot catheters; suprapubic catheters and tubes. (5) Surgical instruments: clips for suturing apparatus. (6) Intestinal (X-ray opaque) tubes: gastroenterostomy tube; ureteral catheters and accessories; ureteral catheters. (7) Urethral catheters: coude catheter; retention type catheter.

Dialysis Devices Subcommittee (September 26, 1 p.m. to 5 p.m.). Discussion of the following devices: (1) Blood circuit components: A–V shunt cannula; fistula needle; dialysis intracath, single needle dialyzer set; blood tubing set with and without anti-regurgitation valve. (2) Dialysate circuit components; proportioning subsystem. (3) Dialysate delivery systems: central multiple patient system; recirculating system; recirculating single pass system; sealed system; single pass system; single patient system; sorbent regenerated system. (4) Dialyzers: hollow fiber capillary dialyzer; disposable dialyzer; parallel flow dialyzer; single coil dialyzer; twin coil dialyzer. (5) Peritoneal devices: disposable single-use catheter; long term indwelling catheter; sorbent hemoperfusion apparatus; peritoneal automatic delivery system.

High Frequency Surgical Devices Subcommittee (September 27, 9 a.m. to 11 a.m.). Discussion of the following devices: (1) Electrosurgical units and accessories: flexible suction coagulator electrode; electrosurgical alarm systems; active electrosurgical electrodes; electrosurgical unit; solid state cautery devices; solid state coagulating devices. (2) Electric stone removal: electric bladder stone tripsors; high voltage stone fractionators. (3) Transurethral surgical instruments: electrodes; patient plates; resectoscope; transurethral disccators; tur loops; working element of resectoscope. (4) Ultrasound equipment: ultrasonic stone crusher.

Endoscopes/Surgical Devices Subcommittee (September 27, 12 m. to 5 p.m.). Discussion of the following devices: (1) Diagnostic light sources: routine fiberoptic light source. (2) Endoscopic equipment: diagnostic cystoscope; panendoscope (gastroduodenoscope); panendoscope (urethroscope). (3) Pressure and flow rate measuring devices: air cystometric device. (4) Physiologic function monitors: electrical recording cystometer; mechanical urinometer; urometer. (5) Surgical instruments: stomach and intestinal suturing apparatus. (6) Transabdominal instruments: automatic pneumoperitoneum apparatus. (7) Transurethral cryosurgical instruments: carbon dioxide delivery system; cryoprobe for carbon dioxide delivery system; cryoprobe for carbon dioxide monitoring system; cryoprobe for liquid nitrogen delivery system; cryoprobe for liquid nitrogen monitoring system liquid nitrogen delivery system; liquid nitrogen monitoring system. (8) Accessory therapeutic devices: disposable urological drapes; sheets. (9) Intraluminal therapy: hemostatic bag; endomagnetic retriever.

Committee name	Date, time, and place	Type of meeting and contact person
2. Gastrointestinal Drugs Advisory Committee.	Sept. 27 and 28, 9:30 a.m. (Sept. 28), Conference Rm. A, Parklawn Bldg., 5600 Fishers Lane, Rockville, MD.	Closed committee deliberations, Sept. 27, 9:30 a.m. to 12:30 p.m.; open committee discussion, Sept. 27, 1:30 p.m. to 4:30 p.m.; open public hearing, Sept. 28, 9:30 a.m. to 10:30 a.m.; open committee discussion, Sept. 28, 10:30 a.m. to 12:30 p.m.; Joan C. Standaert (HFD–110), 5600 Fishers Lane, Rockville, MD 20852, 301–443–4730.

General function of the committee. Reviews and evaluates available data concerning the safety and effectiveness of marketed and investigational prescription drugs for use in gastrointestinal diseases.

Agenda—Open public hearing. Any interested persons may present data, information, or views, orally or in writing, on issues pending before the committee.

Open committee discussion. Discussion of Carbex and issues for future consideration relative to hepatotoxicity.

Closed committee deliberations. Discussion of Metoclopramide (Reglan) NDA 17–854 and NDA 17–862. This portion of the meeting will be closed to permit discussion of trade secret data, to protect the free exchange of internal views, and to avoid undue interference with committee activities (5 U.S.C. 552(b) (4) and (5)).

Committee name	Date, time, and place	Type of meeting and contact person
3. Panel on Review of Ear, Nose, and Throat Devices.	Sept. 27 and 28, 9 a.m., Rm. 1409, FB–8, 200 C St. SW., Washington, D.C.	Open public hearing, Sept. 27, 9 a.m. to 10 a.m.; open committee discussion, Sept. 27, 10 a.m. to 4:30 p.m.; open committee discussion, Sept. 28, 9 a.m. to 4:30 p.m.; Harry R. Sauberman, P.E. (HFK–450), 8757 Georgia Ave., Silver Spring, Md. 20910, 301–427–7226.

General function of the committee. Reviews and evaluates available data concerning the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

Agenda—Open public hearing. Interested persons are encouraged to present information pertinent to devices to be classified at this meeting to Harry R. Sauberman, P.E., executive secretary. Submission of data relative to tentative classification findings is also invited.

Open committee discussion. Review of panel comments on procedures handbook for advisory panel members and executive secretaries. Review of provisions of medical device bill applicable to classification activities. Completion and review of supplementary classification data sheets for the following devices: Hearing aids; auditory impedance testers; audiometers; group hearing aids and auditory trainers; electrocochleographic devices; auditory evoked-response systems; nystagmographs; facial nerve stimulators; caloric irrigation baths; transdermal stimulators; anticholce devices (tongs and suction); columella; nasal struts; septal implants; gelfoam; silastic implant material; tantalum prosthesis wire; teflon implant material; esophageal tubes; esophageal prosthesis; stainless steel ear tubes (middle ear); polymer ear tubes (middle ear); multiple material ear tubes (middle ear); metal ossicular replacement; polymer ossicular replacement; multiple material ossicular replacement; sacculotomy tacks; cochlear implants.

As time is available, the panel will also complete supplementary data sheets for the following devices: Acoustic chambers; air conduction transducers; bone conduction transducers; hearing trumpets; mechanical noise generators; sisi adaptors; tuning forks; gustometers; nasomanometers; Toynbee diagnostic tubes; transilluminators; cuspidors; powered ENT examining/treatment chairs; ENT examining/treatment tables; ENT treatment units; oral lavage units; polymer middle earmold; otoplasty prosthesis; rhinoplasty prosthesis; cutting blocks; gelfoam punch; ossicular finger vise; piston cutting jigs; wire bending die; wire closure forceps; wire crimpers; wire cutting scissors.

V 41 164 AUG 23 76 UMI

Committee name	Date, time, and place	Type of meeting and contact person
4. Panel on Review of Obstetrical and Gynecological Devices.	Sept. 27 and 28, 9 a.m., Rm. 6821, FB-8, 200 C St. SW., Washington, DC.	Open public hearing, Sept. 27, 9 a.m. to 10 a.m.; open committee discussion, Sept. 27, 10 a.m. to 4 p.m. open public hearing, Sept. 28, 9 a.m. to 10 a.m. open committee, discussion, Sept. 28, 10 a.m. to 3 p.m.; Lillian Yin, Ph. D. (HFK-470), 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

General function of the committee: Reviews and evaluates available data concerning the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

Agenda—Open public hearing. Interested persons are encouraged to present information pertinent to the devices listed below to Lillian Yin, Ph. D., executive secretary. Submission of data relative to tentative classification findngs is also invted. On September 28, John B. Josimovich, M.D., will speak on patterns of infection with IUD use.

Open committee discussion: The panel will review classification of the following devices: Colpomicroscopes; colposcopes; pelvimeters; gyn biopsy forceps; cervical cytological spatula; fetoscopes (stethoscopic); aminiotomes; vaginal applicators; uterine insufflation cannula and accessories; circumcision clamps; umbilical clamps; uterine clamps; cleidoclast; lithotomy drape clips; craniotomes; craniotribes; uterine curettes; expandable dilators; fixed size dilators; vaginal dilators; uterine elevators; gynecological-surgical forceps and acessories; obstetrical forceps and accessories; fibroid hooks; obstetrical-destructive hooks; cervical cone knives; cerclage needles; uterine packers; vaginal retractors; episiotomy scissors; umbilical scissors; fibroid screws; uterine sounds; vaginal/illuminated specula; vaginal/non-illuminated specula; uterine tenacula; menstrual cups; vaginal douche kits; vaginal insufflator; menstrual pads; nonpowered sitz bath kits; abdominal binders; breast binders; maternity and nursing brassieres; maternity girdles; breast pads; manual breast pump; breast shields; vaginal electrical stimulators; ovulation detectors; bladder support implants; perineometer. The panel will review the draft guidelines for preclinical and clinical studies for a product development protocol for IUD's prepared by the Conception Control Devices Subcommittee.

Committee name	Date, time, and place	Type of meeting and contact person
5. Panel on Review of Ophthalmic Devices.	Sept. 27 and 28, 9:30 a.m., Rm. 4131, HEW-N, 330 Independence Ave. SW., Washington, DC.	Open public hearing, Sept. 27, 9:30 a.m. to 10:30 a.m.; open committee discussion, Sept. 27, 10:30 a.m. to 4:30 p.m.; open public hearing Sept. 28, 9:30 a.m. to 10:30 a.m.; open committee discussion, Sept. 28, 10:30 a.m. to 4:30 p.m.; James G. Dillon, Ph. D. (HFK-470), 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

General function of the committee. Reviews and evaluates available data concerning the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

Agenda—Open public hearing. Interested persons are encouraged to submit pertinent information in writing or to make an oral presentation to the panel. Any interested person who wishes to make a presentation should inform James Dillon, Ph. D., executive secretary, orally or in writing, prior to the meeting.

Open committee discussion. The panel will review clinical guidelines for the development of intraocular lenses. The panel, having completed classification of ophthalmic devices and having begun to summarize the reasons for the recommendations and identification of any risks to health that may be associated with the device, will continue with the summarization until it is completed.

Committee name	Date, time, and place	Type of meeting and contact person
6. Panel on Review of Topical Analgesics.	Sept. 27 and 28, 8 a.m. (Sept. 28), Hyatt Regency, 939 Ridge Lake Blvd., Memphis, TN.	Closed committee deliberations, Sept. 27, 11 a.m. to 7 p.m.; open public hearing, Sept. 28, 8 a.m. to 9 a.m.; closed committee deliberations, Sept. 28, 11 a.m. to 7 p.m.; Lee Geismar (HFD-510), 5600 Fishers Lane, Rockville, MD 20852, 301-443-4960.

General function of the committee. Reviews and evaluates available data concerning the safety and effectiveness of nonprescription drug products.

Agenda—Open public hearing. Any interested persons may present data, information, or views, orally or in writing, on issues pending before the committee.

Closed committee deliberations. The panel will review data submitted in confidence pursuant to the OTC review's call for data for this panel (see also 21 CFR 330.10(a)(2)). This will include product names, formulas and formulation process data, sales data, and in some cases, portions of pending or approved New Drug Applications. Also, discussions relating to labeling, drug class standards, and testing will often be intermixed with discussion of formulas, sales data, or NDA material in such a way that the two discussions often cannot be separated without seriously impeding the progress of the panel's deliberations.

The panel will be reviewing, voting upon, and modifying the content of summary minutes and categorization of ingredients and claims.

This portion of the meeting will be closed to permit discussion of trade secret data and to avoid undue interference with the panel's continuing review and investigation of the ingredients included in OTC drug products (5 U.S.C. 552(b) (4) and (5)).

Committee name	Date, time, and place	Type of meeting and contact person
7. Dermatology Advisory Committee.	Sept. 30, 8:30 a.m., Conference Rm. F, Parklawn Bldg., 5600 Fishers Lane, Rockville, MD.	Open public hearing, 8:30 a.m. to 9:30 a.m.; closed presentation of data, 9:30 a.m. to 12 m.; open committee discussion, 1 p.m. to 3 p.m.; closed committee deliberations, 3 p.m. to 5 p.m.; Mary K. Bruch (HFD-140), 5600 Fishers Lane, Rockville, MD 20852, 301-443-4310.

General function of the committee. Reviews and evaluates all available data concerning the safety and effectiveness of presently marketed and new prescription drug products proposed for marketing for use in the practice of dermatology.

Agenda—Open public hearing. Any interested persons may present data, information or views, orally or in writing, on issues pending before the committee.

Closed presentation of data. Review of Topicycline (NDA 50-493); presentations by Procter & Gamble and FDA reviewers. This portion of the meeting will be closed to permit discussion of trade secret data (5 U.S.C. 552(b)(4)).

Open committee discussion. Discussion of Kwell, and review of guidelines for topical corticosteroids.

Closed committee deliberations. Discussion of subjects shown in open session above. This portion of the meeting will be closed to permit the free exchange of internal views and to avoid undue interference with agency operations (5 U.S.C. 552(b)(5)).

Committee name	Date, time, and place	Type of meeting and contact person
8. Panel on Review of Oral Cavity Drug Products.	Sept. 30 and Oct. 1, 9 a.m., Conference Rm. B, Parklawn Bldg., 5600 Fishers Lane, Rockville, MD.	Open public hearing, Sept. 30, 9 a.m. to 10 a.m.; closed committee deliberations, Sept. 30, 10 a.m. to 4:30 p.m., Oct. 1, 9 a.m. to 4:30 p.m.; John T. McElroy (HFD-510), 5600 Fishers Lane, Rockville, MD 20852, 301-443-4960.

General function of the committee. Reviews and evaluates available data concerning the safety and effectiveness of nonprescription drug products.

Agenda—Open public hearing. Any interested persons may present data, information, or views, orally or in writing, on issues pending before the committee.

Closed committee deliberations. The panel will review data submitted in confidence pursuant to the OTC review's call for data for this panel (see also 21 CFR 330.10(a)(2)). This will include product names, formulas and formulation process data, sales data and, in some cases, portions of pending or approved New Drug Applications. Also, discussions relating to labeling, drug class standards, and testing will often be intermixed with discussion of formulas, sales data, or NDA material in such a way that the two discussions often cannot be separated without seriously impeding the progress of the panel's deliberations.

The panel will be reviewing, voting upon, and modifying the content of summary minutes and categorization of ingredients and claims.

This portion of the meeting will be closed to permit discussion of trade secret data and to avoid undue interference with the panel's continuing review and investigation of the ingredients included in OTC drug products (5 U.S.C. 552(b) (4) and (5)).

Each public advisory committee meeting listed above may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. The dates and times reserved for the separate portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairman determines will facilitate the committee's work.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this FEDERAL REGISTER notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairman's discretion.

Persons interested in specific agenda items to be discussed in open session may ascertain from the contact person the approximate time of discussion.

The Commissioner, with the concurrence of the Chief Counsel, has determined for the reasons stated that those portions of the Advisory committee meetings so designated in this notice shall be closed. Both the Federal Advisory Committee Act and 5 U.S.C. 552(b) permit such closed advisory committee meetings in certain circumstances. Those portions of a meeting designated as closed shall, however, be closed for the shortest time possible consistent with the intent of the cited statutes.

Generally, FDA advisory committees will be closed because the subject matter is exempt from public disclosure under 5 U.S.C. 552(b) (4), (5), (6), or (7), although on occasion the other exemptions listed in 5 U.S.C. 552(b) may also apply. Thus, a portion of a meeting may be closed where the matter involves a trade secret; commercial or financial information that is privileged or confidential; personnel, medical, and similar files, disclosure of which could be an unwarranted invasion of personal privacy; and investigatory files compiled for law enforcement purposes. A portion of a meeting may also be closed if the Commissioner determines: (1) That it involves inter-agency or intra-agency memoranda or discussion and deliberations of matters that, if in writing would constitute such memoranda, and which would, therefore, be exempt from public disclosure; and (2) that it is essential to close such portion of a meeting to protect the free exchange of internal views and to avoid undue interference with agency or committee operations.

Examples of matters to be considered at closed portions are those related to the review, discussion, evaluation or ranking of grant applications; the review, discussion, and evaluation of specific drugs or devices; the deliberation and voting relative to the formation of specific regulatory recommendations (general discussion, however, will generally be done during the open committee discussion portion of the meeting); review of trade secrets or confidential data; consideration of matters involving FDA investigatory files; and review of medical records of individuals.

Examples of matters that ordinarily will be considered at open meetings are those related to the review, discussion, and evaluation of general preclinical and clinical test protocols and procedures for a class of drugs or devices, consideration of labeling requirements for a class of marketed drugs and devices, review of data and information on specific investigational or marketed drugs and devices that have previously been made public, and presentation of any other data or information that is not exempt from public disclosure.

Dated: August 16, 1976.

SHERWIN GARDNER,
Acting Commissioner of Food and Drugs.

Food and Drug Administration

BACTERIOLOGICAL ANALYTICAL MANUAL FOR FOODS

Availability

The Food and Drug Administration (FDA) announces the public availability of the recently revised and expanded fourth edition of the Bacteriological Analytical Manual for Foods (BAM).

The purpose of this edition of the BAM, like previous editions, is to provide FDA laboratories with effective methods for qualitative and quantitative detection of microorganisms and some of their metabolic products. No claim is made that these methods are permanent. However, these methods are currently considered to be the most useful to FDA in enforcing the provisions of the Federal Food, Drug, and Cosmetic Act.

V 41 164 AUG 23 76 UMI

The contents of the BAM include procedures for sampling, handling and preparing samples, and conducting microscopic examination and aerobic plate counts. The chapters deal with specific organisms such as coliforms, enterococci, *Salmonella* (cultural and fluorescent antibody methods), *Shigella, Vibrio parahaemolyticus, Vibrio cholerae, Staphylococcus aureus* and its enterotoxins, *Clostridium botulinum, Clostridium perfringens*, and *Bacillus cereus*.

The manual also includes methods for enumeration of yeasts and molds in foods, examination of sterilized or microbiologically stable milk products, direct microscopic examination of eggs, and the detection of penicillin and other microbial inhibitors in milk and milk products. Appendices cover culture media, reagents, diluents, stains and staining procedures, and most-probable-number tables.

The manual is available from the Association of Official Analytical Chemists (AOAC), Box 540, Benjamin Franklin Station, Washington, DC 20044. The cost is $10.00 per copy, including postage and handling. Supplements will be forwarded automatically to purchasers at no additional charge. It is anticipated that supplements dealing with the examination of canned foods and can seams will be available in the near future.

Dated: August 17, 1976.

JOSEPH P. HILE, —
Acting Associate Commissioner for Compliance.

National Institutes of Health

STUDY SECTIONS

Meetings During October and November

Pursuant to Pub. L. 92-463, notice is hereby given of the meetings of the following study sections for October and November 1976 and the individuals from whom summaries of meetings and rosters of committee members may be obtained.

These meetings will be open to the public to discuss administrative details relating to Study Section business for approximately one hour at the beginning of the first session of the first day of the meeting. Attendance by the public will be limited to space available. These meetings will be closed thereafter in accordance with the provisions set forth in sections 552(b)(4), 552(b)(5) and 552(b)(6), Title 5 U.S. Code and section 10(d) of Pub. L. 92-463, for the review, discussion and evaluation of individual initial pending, supplemental and renewal grant applications. The closed portions of the meetings involve solely the internal expression of views and judgments of study section members on individual applications which contain information of a proprietary or confidential nature, including detailed research protocols, designs, and other technical information; financial data, such as salaries; and personal information concerning individuals associated with the applications.

Mr. Richard Turlington, Chief, Grants Inquiries Office of the Division of Research Grants, Westwood Building, National Institutes of Health, Bethesda, Maryland 20014, telephone area code 301-496-7441 will furnish summaries of the meetings and rosters of committee members. Substantive program information may be obtained from each Executive Secretary whose name, room number, and telephone number are listed below each study section. Anyone planning to attend a meeting should contact the Executive Secretary to confirm the exact meeting time.

Study section	October-November 1976 meetings	Time	Location
Allergy and Immunology, Dr. Mischa E. Friedman, Rm. 320, Tel. 301-496-7380.	Nov. 4-6	8:45	Holiday Inn, Chevy Chase, Md.

Office of the Assistant Secretary for Health

NATIONAL COMMISSION FOR THE PROTECTION OF HUMAN SUBJECTS OF BIOMEDICAL AND BEHAVIORAL RESEARCH

Meeting

Notice is hereby given that the National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research will meet on September 10, 11 and 12, 1976, in Conference Room 6, C Wing, Building 31, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20014. The meeting will convene at 9:00 a.m. each day and will be open to the public, subject to the limitation of available space. The meeting will be held on September 12 only if it is determined to be necessary at the session on September 11.

The agenda will include discussion of issues identified in the legislative mandate to the Commission under Pub. L. 93-348 and 94-278, including deliberations on psychosurgery, deliberations on research involving children and the institutionalized mentally infirm, reports on the moral status of children and the use of "distributive justice" in policy making, sections of a final report on institutional review boards relating to research involving children and the institutionalized mentally infirm, and preliminary reports on the Special Study (section 203 of Pub. L. 93-348).

In accordance with the provisions of 5 U.S.C. 552(b)(6) and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public from 4:00 p.m. to 5:00 p.m. on September 11, 1976 for the discussion of internal personnel matters, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Requests for information should be directed to Ms. Anne Ballard, (301) 496-7776, Room 125, Westwood Building, 5333 Westbard Avenue, Bethesda, Maryland 20016.

Dated: August 16, 1976.

CHARLES U. LOWE,
Executive Director, National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research.

[FR Doc.76-24657 Filed 8-20-76;8:45 am]

NATIONAL COMMISSION FOR THE PROTECTION OF HUMAN SUBJECTS OF BIOMEDICAL AND BEHAVIORAL RESEARCH

Meeting

The portion of the meeting of the National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research on September 11, 1976 from 4 p.m. to 5 p.m. listed in the notice as being closed involves the discussion of internal personnel matters, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy. For this reason, this portion of the meeting is concerned with matters exempt from mandatory disclosure under 5 U.S.C. 552(b)(6).

Therefore, it is hereby determined in accordance with the provision of section 10(d) of Pub. L. 92-463 (5 U.S.C. Appendix 1) that the portion of the meeting referred to above will be closed as indicated.

Dated: August 17, 1976.

JAMES F. DICKSON, III,
Acting Assistant Secretary for Health.

[FR Doc.76-24655 Filed 8-20-76;8:45 am]

Office for Civil Rights

TITLE VI OF THE CIVIL RIGHTS ACT OF 1964

Report on Nonpublic Schools Participating in Federal Programs

This Report is in response to questions concerning the participation by children enrolled in a nonpublic school in federally assisted programs administered by a public school.

Section 601 of Title VI of the Civil Rights Act of 1964 provides as follows:

No person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity which receives Federal financial assistance.

Any educational institution or system which applies to become a recipient of Federal financial assistance is required by the Office for Civil Rights (OCR) to submit an assurance of compliance form (HEW Form 441). See 45 CFR 80.4. In addition, the Office for Civil Rights requires such an applicant to provide adequate documentation relating to the policies and practices of participating institutions, in order to show that the program receiving Federal assistance will not be administered in a discriminatory manner.

The issue addressed here in whether OCR requires any information or documentation from a nonpublic school in order to determine that children enrolled in that nonpublic school are eligible to participate in a federally assisted program being administered by a public school or agency.

If the nonpublic school were a recipient of Federal financial assistance, apart from the federally assisted program administered by the public school, then the nonpublic school would be subject to the requirements, noted above, to submit a HEW Form 441 and other documentation. However, if the nonpublic school is not to be a recipient of Federal financial assistance, but merely seeks eligibility for its students to participate in the federally assisted program of the public institution, OCR does not require HEW Form 441 from the nonpublic school. Rather, OCR requires the public institution which is the recipient of Federal assistance to provide that form and the documentation referred to above. The recipient school is responsible for making sure that no discriminatory practices occur in the federally assisted program and, if any questions arise in this regard, OCR looks to the recipent for further information or compliance activities.

It should be noted, however, that the children enrolled in the nonpublic school cannot participate in the public school program if the nonpublic school engages in discriminatory practices prohibited by Title VI. Even though the nonpublic school is not a recipient, any discriminatory practices by it would, in our view, directly affect the federally assisted program.

Although the Regional Offices of OCR will be able to provide information about those schools which have become the subject of a compliance review, OCR does not maintain a list, as such, of approved nonpublic schools and we do not require a nonpublic school to be so listed in order that children enrolled there can participate in public school programs.

If there are any questions they should be sent to the appropriate Regional OCR

V 41 164 AUG 23 76 UMI

Director. Their names and addresses are as follows:

REGION I—CONNECTICUT, MAINE, MASSACHUSETTS, NEW HAMPSHIRE, RHODE ISLAND, VERMONT

Mr. John G. Bynoe, Director, Office for Civil Rights, Region I, Department of Health, Education, and Welfare, RKO General Building—Room 501, Bullfinch Place—Government Center, Boston, Massachusetts 02114.

REGION II—NEW JERSEY, NEW YORK, PUERTO RICO, VIRGIN ISLANDS

Ms. Barbara Walker, Acting Director, Office for Civil Rights, Region II, Department of Health, Education, and Welfare, 26 Federal Plaza—Room 3908, New York, New York 10007.

REGION III—DELAWARE, DISTRICT OF COLUMBIA, MARYLAND, PENNSYLVANIA, VIRGINIA, WEST VIRGINIA

Mr. Dewey E. Doods, Director, Office of Civil Rights, Region III, Department of Health, Education, and Welfare, Gateway Building, 3535 Market Street, Post Office Box 13716, Philadelphia, Pennsylvania 19101.

REGION IV—ALABAMA, FLORIDA, GEORGIA, KENTUCKY, MISSISSIPPI, NORTH CAROLINA, SOUTH CAROLINA, TENNESSEE

Mr. William Thomas, Director, Office for Civil Rights, Region IV, Department of Health, Education, and Welfare, 50 Seventh Street, N.E., Atlanta, Georgia 30308.

REGION V—ILLINOIS, INDIANA, MICHIGAN, MINNESOTA, OHIO, WISCONSIN

Mr. Kenneth A. Mines, Director, Office for Civil Rights, Region V, Department of Health, Education, and Welfare, 300 South Wacker Drive—8th Floor, Chicago, Illinois 60606.

REGION VI—ARKANSAS, LOUISIANA, NEW MEXICO, OKLAHOMA, TEXAS

Ms. Dorothy D. Stuck, Director, Office for Civil Rights, Region VI, Department of Health, Education, and Welfare, 1200 Main Tower Building—Room 960, Dallas, Texas 75202.

REGION VII—IOWA, KANSAS, MISSOURI, NEBRASKA

Mr. Taylor D. August, Director, Office for Civil Rights, Region VII, Department of Health, Education, and Welfare, 12 Grand Building, 12th & Grand Streets—7th Floor, Kansas City, Missouri 64106.

REGION VIII—COLORADO, MONTANA, NORTH DAKOTA, SOUTH DAKOTA, UTAH, WYOMING

Mr. David Florence, Director, Office for Civil Rights, Region VIII, Department of Health, Education, and Welfare, Federal Building, 1961 Stout Street—Room 11037, Denver, Colorado 80202.

REGION IX—ARIZONA, CALIFORNIA, HAWAII, NEVADA

Mr. Floyd L. Pierce, Director, Office for Civil Rights, Region IX, Department of Health, Education, and Welfare, 760 Market Street—Room 700, San Francisco, California 94102.

REGION X—ALASKA, IDAHO, OREGON, WASHINGTON

Ms. Marlaina Kiner, Director, Office for Civil Rights, Region X, Department of Health, Education, and Welfare, Arcade Plaza Building, 1321 Second Avenue, M/S 137, Seattle, Washington 98101.

Dated: August 16, 1976.

MARTIN H. GERRY,
Director, Office for Civil Rights.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[Docket No. 76-159]

DESIGN AND EQUIPMENT SOLAS WORKING GROUP

Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Act (Pub. L. 92-463; 5 U.S.C. App. I) notice is hereby given of a meeting of the Design and Equipment SOLAS Working Group, Ad-Hoc Working Group on Nuclear Ships to be held Friday, September 17, 1976 at NASSIF Building, Room 7200, 400 Seventh St., SW., Washington, D.C., at 9:30 a.m.

The agenda for this meeting is as follows: To discuss the development by the Inter-governmental Maritime Consultative Organization of an international code for the design, equipment and operation of nuclear powered merchant vessels.

Attendance is open to the interested public. With the approval of the Chairman, members of the public may present oral statements at the hearing. Persons wishing to attend and persons wishing to present oral statements should notify, not later than the day before the meeting, and information may be obtaind from, CDR J. DECK, III, Chief, Ship Design Branch, COMDT (G-MMT-4/82), U.S. Coast Guard, Washington, D.C. 20590 (Phone: 202-426-2197). Any member of the public may present a written statement to the Committee at any time.

Issued in Washington, D.C. 20590 on 16 August 1976.

W. W. BENKERT,
Chief, Office of Merchant Marine Safety.

[FR Doc.76-24644 Filed 8-20-76;8:45 am]

Federal Aviation Administration

FAA FLIGHT INFORMATION ADVISORY COMMITTEE (FIAC)

Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. I) notice is hereby given of a meeting (No. 2-76) of the Federal Aviation Administration (FAA) Flight Information Advisory Committee (FIAC) to be held beginning at 9:30 a.m., e.d.t., September 23, 1976, in Rooms 5A, B, C, at FAA Headquarters, 800 Independence Avenue, SW., Washington, D.C. The agenda for this meeting is as follows:

1. Approval of minutes of meeting 1-76.
2. Approval of agenda.
3. A status report and further discussion on the following subjects from previous meetings.
   a. Airport/facility directory.
   b. Criteria for frequencies to be shown on IAP Charts.
   c. IAP bound volume concept.
   d. The establishment of a Pacific FLIP similar to that in Alaska and other alternatives.
   e. New concept (VFR Radio Navigation) of World Aeronautical Chart (WAC).
   f. Minimum Terrain Elevation Figure (MTEF) and Minimum Elevation Figure (MEF).
   g. Pilot controlled lighting.
4. A discussion of the need for a new publication consolidated procedures from various sources for oceanic operations.

Attendance is open to the interested public but limited to the space available. With the approval of the Chairman, members of the public may present oral statements at the hearing. Persons wishing to attend and persons wishing to present oral statements should notify, not later than September 13, 1976, and information may be obtained from, Mr. Milton Wassmann, Executive Secretary, 800 Independence Avenue, SW., Washington, D.C. 20591, telephone No. (202) 426-3758. Any member of the public may present a written statement to the Committee at any time.

Issued in Washington, D.C. on August 17, 1976.

CHARLES V. HANNAN,
Chairman, Flight Information, Advisory Committee.

National Highway Traffic Safety Administration

[Docket No. EX76-4; Notice 2]

DAIHATSU MOTOR CO. LTD.

Petition for Temporary Exemption From Federal Motor Vehicle Safety Standard

This notice grants in part and denies in part the petition by Daihatsu Motor Co. Ltd. of Osaka, Japan, for a temporary exemption from portions of two Federal motor vehicle safety standards that apply to motorcycles. The basis of the petition was that it would facilitate the development and field evaluation of a low-emission vehicle.

Notice of the petition was published on June 3, 1976 (41 FR 22403) and an opportunity afforded for comment.

The vehicle for which exemption is sought is the Daihatsu Trike Model B20, an electric tricycle which has been developed for short distance on-road use. The B20's headlamp does not meet minimum photometric requirements specified for headlamps of motor-driven cycles in Motor Vehicle Safety Standard No. 108, *Lamps, Reflective Devices, and Associated Equipment*, nor will its parking brake system hold it for 5 minutes on a 30 percent grade in the reverse direction as required by Motor Vehicle Safety Standard No. 122, *Motorcycle Brake Systems*. The company argued that these nonconformances do not degrade the overall safety of the vehicle. The Daihatsu headlamp is said to be able to reveal an individual or vehicle at a distance of 300 feet, while it has its ability to stop within 15 feet from its top speed of 17.5 mph. Its maximum climbing ability is 10.5 percent which renders it unlikely ever to be parked on a grade that exceeds it. Its parking brake system however, holds it in a reverse direction on a 20-percent grade, but the vehicle begins to slide at any grade exceeding 20 percent. Petitioner argued that the exemption would allow evaluation of "one step of electric motor vehicle evolution". It will work to conform by July 15, 1978, and in the interim will not export more than 2,500 units of exempted B20's to the United States in any 12-month period for which an exemption is granted.

The California Highway Patrol supported the request for exemption from Standard No. 122 and opposed any exemption from Standard No. 108. No other comments were received. California agreed with petitioner's conclusion that the parking brake noncompliance with Standard No. 122 is relatively unimportant since it is unlikely that the low-powered B20 would ever be operated on a grade exceeding its ability to climb it. In its view, however, other electric motorcycles and tricycles are available with conforming lighting equipment, and for this reason it did not appear that an exemption from Standard No. 108 would facilitate low-emission vehicle development.

Under Section 123(a)(1)(C) of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1410(a)(1)(C)) the Administrator may provide the exemption that Daihatsu has requested if he finds that it "would facilitate the development or field evaluation of a low-emission motor vehicle and would not unreasonably degrade the safety of such vehicle." This authority implements national policy to encourage the development of engines whose toxic emissions are below the levels established by Congress, as well as those that may be acceptable alternatives to internal combustion power plants. Pursuant to this authority exemptions have been providcd a number of manufacturers of electric motor vehicles for a variety of transportation purposes—to an established manufacturer who had contracted to supply light trucks to the US Postal Service (AM General), to companies formed for the express purpose of electric vehicle production (Vanguard, Elcar); and to private entrepreneurs converting conventional motor vehicles to electric power (Electric Propulsion Systems, Waterman Industries, Jet Industries). The Daihatsu petition represents the first application on behalf of an electric powered motorcycle. While its range and carrying capacity appears limited, the B20 Trike is nevertheless an alternative form of transportation to a conventional motorcycle, deserving an opportunity to be tested under the competitive conditions of the American market. It is clear that an exemption would facilitate the field evaluation of a low-emission motor vehicle.

It is also clear, however, that an exemption from Standard No. 108 would unreasonably degrade the safety of the motor vehicle. With respect to Standard No. 122, the NHTSA agrees with Daihatsu, as concurred in by California, that a vehicle with a climbing ability of less than 11 percent is unlikely ever to be operated on a grade exceeding the ability of its parking brake to hold it there. However, the failure of the headlamp to meet the already-low photometric output required of motor driven cycle headlamps presents a different problem. While it may be true that the B20 can stop from its maximum speed of 17.5 mph in 15 feet, and its headlamps illuminate an object at a distance of 300 feet, there remains the question of whether the B20 will be accurately perceived by motorists approaching it from the opposite direction. The low silhouette and lessened speed of the B20 appear to make it as vulnerable as any other motor driven cycle such as a moped or motor scooter, in a traffic environment of heavier and faster moving motor vehicles. It ought, therefore, to be provided with the minimum headlamp output that Standard No. 108 requires if the overall safety of the vehicle is not to be degraded. There is a further consideration, too. The B20 headlamp uses a 24 volt bulb, not generally available on the American market. In the event of bulb failure, the inability to readily obtain a replacement would without doubt degrade the safety of the vehicle. The NHTSA asked Daihatsu whether it would be willing to use a 12 volt bulb, readily available on the American replacement market, which would require only a simple wiring change in the B20. The petitioner replied that this would cause a "power loss" and that it was more "convenient" to use the 24 volt bulb. The NHTSA has concluded that any such power loss should not be great and that a denial of the petition for exemption from Standard No. 108 ought not to prevent the introduction of the B20 into the American market, modified to accept a 12 volt bulb, and providing the headlamp output of other motordriven cycles.

In consideration of the foregoing, it is hereby found that a temporary exemption from the parking brake requirements of Standard No. 122 would facilitate the development and field evaluation of a low-emission motor vehicle and not degrade its overall safety. Accordingly, Daihatsu Motor Co. Ltd. is hereby granted NHTSA Exemption No. 76-4 from paragraph S5.6 of 49 CFR 571.122, Motor Vehicle Safety Standard No. 122, expiring July 1, 1978. The Administrator finds that an exemption from 49 CFR 571.108 Motor Vehicle Safety Standard No. 108 would degrade the overall safety of the vehicle, and Daihatsu's petition for exemption from this standard is hereby denied.

(Sec. 3, Pub. L. 92-548, 86 Stat. 1159 (15 U.S.C., 1410); delegation of authority at 49 CFR 1.50.)

Issued on August 13, 1976.

JOHN W. SNOW,
Administrator.

[Docket No. EX 76-3; Notice 2]

WAYNE CORP.

Petition for Temporary Exemption From Federal Motor Vehicle Safety Standard

This notice grants the petition by Wayne Corporation, through its Miller-Meteor Division of Piqua, Ohio, for a temporary exemption from Motor Vehicle Safety Standard No. 301-75, *Fuel System Integrity*, on the basis that compliance would cause it substantial economic hardship.

Miller-Meteor is a final-stage manufacturer of multi-purpose passenger vehicles, specifically funeral coaches and ambulances which it mounts on commercial chassis supplied by Cadillac Division of General Motors Corporation ("GM" hereafter). In the 12-month period March 1, 1975 through February 29, 1976, Miller-Meteor produced 551 such vehicles. In the same period Wayne produced approximately 5700 additional motor vehicles, primarily school buses, and specialized vehicles manufactured under contract. As required by 49 CFR Part 568, *Vehicles Manufactured in Two or More Stages*, GM as the manufacturer of an incomplete vehicle furnishes with each chassis information that the final-stage manufacturer, Miller-Meteor, may use to complete the vehicle so that it meets, and may be certified as meeting, all applicable Federal motor vehicle safety standards. On and after September 1, 1976, Standard No. 301-75 will apply to multi-purpose passenger vehicles including petitioner's products, and GM has informed the petitioner that it will make no representation as to conformity with Standard No. 301-75 on the grounds that compliance with it is not substantially determined by design of the incomplete vehicle. Petitioner has submitted itemized lists of fuel system compliance test programs for its vehicles based upon frontal barrier impact tests, estimating the cost of the 1977 model test program at $148,000, and the 1978 model test program at $71,000. It anticipates that modification in the body side and wheelhouse areas, and the "addition of deflection members, isolation plates and protective cages" will be required to effect compliance by September 1, 1978. To require compliance with Standard No. 301-75 in advance of that time would in its opinion add over $1,000 to the cost of an ambulance and in excess of 600 to that of a hearse. The company anticipates retail price increases of 15 to 20 percent for its 1977 models, without

V 41 164 AUG 23 76 UMI

including any 301 conformance costs. Although Wayne Corporation had a net profit of $2,992,000 before taxes in 1975, the Miller-Meteor Division had a net loss of $461,000 for that year, and projects a further net loss of $351,000 in 1976. The company argues that an exemption is in the public interest and consistent with traffic safety objectives since it provides employment in an economically troubled geographic area and only a small number of vehicles are involved.

No comments on the petition were received.

NHTSA depends upon cooperation between incomplete vehicle and final-stage manufacturers in effecting compliance of multi-stage vehicles with the Federal motor vehicle safety standards. In its review of Wayne's petition, this agency has been concerned with GM's position that it will make no representation as to conformity with Standard No. 301–75 "as compliance is not substantially determined by design of the incomplete vehicle". GM delivers its chassis to Wayne with fuel system components and power train already installed, some of which Wayne removes (in order to mount a body) and reinstalls. It is clear that compliance of the completed vehicle with Standard No. 301–75 is substantially determined by both the design of the incomplete vehicle and the manner of completion by the final-stage manufacturer. Therefore the factual context of the GM-Wayne relationship precludes GM from use of a disclaimer in the incomplete vehicle document. GM must instead include, pursuant to Part 568, a statement that the complete vehicle will conform if no alterations are made in identified components of the incomplete vehicle will conform to Standard No. 301–75. GM has been informed of NHTSA's views in this matter.

Wayne has argued that a 2-year exemption is necessary in order to allow it to conform with the additional requirements effective on September 1, 1977. Although Wayne argues that there will be a distinct difference between 1976-model and 1977-model commercial car chassis because of the shorter models planned by Cadillac for 1977, it is understood that modifications to the 1978-model chassis will be minor. Further, the requirements of Standard No. 301–75 effective September 1, 1977, have been a matter of public record for some time and it is probable that GM has already completed engineering studies of 1978-model chassis incorporating changes deemed necessary. Consequently NHTSA expects Wayne to obtain compliance information through cooperation with GM in advance of the September 1, 1977, effective date, and to ensure that sufficient technical information, experience with the redesigned chassis, or some combination of the two will be available to allow it to conform with the additional requirements that become effective September 1, 1977. Bodies might be redesigned in such a way that no change in chassis construction is necessary. Conversely, all the necessary protection might be incorporated in an improved chassis design. The determination of the most appropriate form of such design or the time that each manufacturer might consider desirable to effect the transition is best made through cooperation or negotiation between the private parties involved. The NHTSA is therefore providing an exemption only until September 1, 1977, which should be sufficient to cover all vehicles completed on 1977-model commercial car chassis, and to insure an orderly program of compliance with 1978-model requirements. On the other hand, it seems clear that insufficient time remains before the commencement of 1977-model production to effect any changes that might be required.

It has been determined that to require compliance with Standard No. 301–75 before September 1, 1977, would cause Wayne Corp. substantial economic hardship. Since only a limited number of vehicles are involved, it is further found that the exemption is in the public interest and consistent with the objectives of the National Traffic and Motor Vehicle Safety Act.

In consideration of the foregoing, Wayne Corp. is hereby granted NHTSA Exemption No. 76–3 from 49 CFR 571.301–75, Motor Vehicle Safety Standard No. 301–75, *Fuel System Integrity*, expiring September 1, 1977.

(Sec. 3, Pub. L. 92–548, 86 Stat. 1159 (15 U.S.C. 1410); delegation of authority at 49 CFR 1.50.)

Issued on August 13, 1976.

JOHN W. SNOW,
Administrator.

Pipeline Safety Operations Office

[Docket No. Pet. 75–13W]

TRANS-ALASKA CRUDE OIL PIPELINE

Grant of Waiver

By letter dated November 24, 1975, the Alyeska Pipeline Service Company (Alyeska) requested a waiver from compliance with the coating and cathodic protecton requirements of 49 CFR 195.238(a)(5) and 195.242(a) with respect to thermally insulated piping to be installed at the pump stations and the terminal on the Trans-Alaska crude oil pipeline.

Section 195.238(a)(5) provides: (a) No pipeline system component may be buried unless that component has an external protective coating that—

(5) Supports any supplemental cathodic protection.

Section 195.242(a) provides: (a) A cathodic protection system must be installed for all buried facilities to mitigate corrosion deterioration that might result in structural failure. A test procedure must be developed to determine whether adequate cathodic protection has been achieved.

The piping for which the waiver is sought is to be covered with an inner coating of inorganic zinc or Scotch-kote 202 and an outer coating of thermal insulation material. The outer coating consists of a high density closed-cell polyurethane foam and a vapor barrier sealant inside a rigid polyethylene jacket. This coating system precludes the effective operation of external cathodic protection. The insulation coating is necessary to maintain the temperature of oil in the piping and the temperature of the surrounding refrigerated soil.

Alyeska argues that a waiver is appropriate because the characteristics of the insulation coating and the low moisture content of the refrigerated soil virtually exclude the possibility that corrosion would occur on the piping. Alyeska further points out that these factors were determinative in the grant of waiver to Alyeska dated May 19, 1975 (40 FR 22579) regarding compliance with §§ 195.238(a)(5) and 195.242(a) for 4.3 miles of special, buried refrigerated sections of the pipeline.

In addition, Alyeska submits that the following procedures are to be followed in applying the insulation coating to the piping:

1. All insulation shall be examined upon receipt in the field and prior to application to determine integrity of vapor barrier and jacketing. If any discontinuities or flaws are found, they shall be coated or repaired (in accordance with applicable specifications). If repair is not feasible, they shall be replaced.

2. All joints shall be firmly butted together so that all voids are eliminated. Damaged butt ends or longitudinal faces shall be refitted or discarded. Insulating cement or vapor barrier material shall not be used to fill voids.

3. All circumferential and longitudinal joints shall have the polyethylene jacket sealed with a hot welding system in accordance with the manufacturer's recommendations.

4. When field conditions are such that manufacturer's recommendations for application temperatures cannot be met, or during inclement weather, the Contractor shall provide material and/or substrate heating, shelter, or other measures as necessary to insure successful application.

5. After sealing of all joints, contractor shall examine all joints or jacketing welds to insure integrity of jacketing and vapor barrier effectiveness. Examination shall be conducted by means of an electrical holiday detector.

The Materials Transportation Bureau (MTB) has reviewed the information submitted by Alyeska in connection with the requested waiver. Based on that review and other relevant information, MTB finds that a waiver is appropriate and consistent with pipeline safety for the following reasons: (1) the polyethylene jacket is a relatively impermeable barrier to moisture which is necessary for corrosion to occur; (2) in the event of a break in the outer jacket, the possibility of corrosion is minimized by the combination of a vapor barrier, low permeability of the polyurethane foam to water, and the existence of an underlying coating of Scotchkote 202 or inorganic zinc material; (3) if water does penetrate the thermal insulation, the supply of oxygen and its replenishment to support corrosion would be minimal; (4) the very high resistivity of the surrounding soil due to mechanical refrigeration virtually eliminates corrosive action; (5) the application procedures to be followed appear sufficient to insure the integrity of the insulation coating; and (6) the location of the piping at pump stations and the terminal facilitates inspection and observation of any leak which might occur.

Accordingly, effective immediately, the Alyeska Pipeline Service Company is hereby granted a waiver from compliance with the coating and cathodic protection requirements of 49 CFR 195.238(a)(5) and 195.242(a) with respect to thermaly insulated piping to be installed at the pump stations and the terminal on the Trans-Alaska crude oil pipeline.

(Sec. 6, Pub. L. 89–670, 80 Stat. 937 (49 USC 1655); (18 USC 831–835); 40 FR 43901, 49 CFR 1.53.)

Issued in Washington, D.C. on August 16, 1976.

JAMES T. CURTIS, JR.,
Director,
Materials Transportation Bureau.

Office of the Secretary

CITIZENS' ADVISORY COMMITTEE ON TRANSPORTATION QUALITY

Open Meeting

The Citizens' Advisory Committee on Transportation Quality of the Department of Transportation will meet at 9 a.m., September 13 and 14, 1976, in Room 2230, 400 7th Street, SW., Washington, D.C.

The Citizens' Advisory Committee on Transportation Quality recommends transportation initiatives to the Secretary of Transportation, and assesses transportation policies from the consumer's viewpoint.

The subject of the two-day meeting will be the Federal Motor Vehicle Safety Standard No. 208 (Occupant Crash Protection).

The meeting is open to public observation. Those wishing to attend or to obtain additional information should contact Gail Boyle, Acting Executive Director, Citizens' Advisory Committee on Transportation Quality, Office of the Secretary of Transportation, TES–40, 400 Seventh Street, SW., Washington, D.C. 20590, telephone 202/426–4542.

This notice is given pursuant to section 10 of the Federal Advisory Committee Act (Public Law 92–463).

Issued in Washington, D.C., on August 18, 1976.

JUDITH T. CONNOR,
Assistant Secretary for Environment, Safety and Consumer Affairs.

[FR Doc.76-24643 Filed 8-20-76;8:45 am]

DELAWARE RIVER BASIN COMMISSION

PUBLIC HEARING

Notice is hereby given that the Delaware River Basin Commission, P.O. Box 7360, West Trenton, N.J. 08628, will hold a public hearing on Wednesday August 25, 1976, commencing at 2 p.m. The hearing will be held in the main conference room of the Commission's headquarters building, 25 State Police Drive, West Trenton, N.J. The subject of the hearing will be as follows:

A. Applications for approval of the following projects as amendments to the Comprehensive Plan pursuant to Article 11 of the Compact and/or as project approvals pursuant to Section 3.8 of the Compact:

1. *Bristol Water and Sewer Authority (D–69–66 CP(Rev.)*. Revision to the Authority's sewage treatment plant expansion in Bristol Borough, Bucks County, Pa. The facility is designed to provide removal of 89 percent of BOD_5 from an average sewage flow of 2.7 million gallons per day. Treated effluent will discharge to the Delaware River.

2. *Weatherly Municipal Authority (D–76–75 CP)*. A well water supply project to augment public water supplies in Weatherly Borough, Carbon County, Pa. Designated as Well No. 2, the new facility is expected to yield 144,000 gallons per day.

3. *Mobil Oil Corp. (D–69–195 CP (Rev.)*. Extension of a wastewater outfall line at the company's plant in Greenwich Township, Gloucester County, N.J. Approximately 15.8 million gallons per day of heated waste water will discharge to the Delaware River in a prescribed heat mixing zone.

4. *Caloric Corp. (D–76–36)*. An industrial wastewater discharge at the company's manufacturing plant in the Borough of Topton, Berks County, Pa. Treatment will involve neutralization of acid wastewater and removal of metals. About 257,000 gallons per day of treated effluent will discharge to Toad Creek, a tributary of the Lehigh River.

5. *Firestone Tire & Rubber Co. (D–76–17)*. Upgrading of industrial waste treatment facilities at the company's plant in Lower Pottsgrove Township, Montgomery County, Pa. A clarifier and oil separator will be installed to treat an average wastewater flow of 1.3 million gallons per day. Effluent will discharge to the Schuylkill River.

6. *Eastern Associated Coal Corp. (D–75–145)*. A cooling water discharge at the company's Philadelphia Coke Division in the City of Philadelphia, Pa. Approximately 4.5 million gallons per day of cooling water will be discharged to the Delaware River. Process wastewater will be segregated from the cooling water and discharged to the City's sanitary sewer system.

7. *Jersey Central Power and Light Co. (D–71–167 (Rev.))*. Modifications to the plan of operation during periods of low stream flow at the company's Gilbert Generating Station, Holland Township, Hunterdon County, N.J.

Documents relating to the items listed above may be examined at the Commission's offices. Persons wishing to testify are requested to notify the Secretary prior to the hearing ((609) 883–9500).

AUGUST 11, 1976.

W. BRINTON WHITALL,
Secretary.

FEDERAL COMMUNICATIONS COMMISSION

[Report No. 819]

COMMON CARRIER SERVICES INFORMATION

Applications Accepted for Filing

AUGUST 16, 1976.

The applications listed herein have been found, upon initial review, to be acceptable for filing. The Commission reserves the right to return any of these applications, if upon further examination, it is determined they are defective and not in conformance with the Commission's Rules and Regulations or its policies.

Final action will not be taken on any of these applications earlier than 31 days following the date of this notice, except for radio applications not requiring a 30 day notice period (see § 309(c) of the Communications Act), applications filed under Part 68, or as otherwise noted. Unless specified to the contrary, comments or petitions may be filed concerning radio and Section 214 applications within 30 days of the date of this notice and within 20 days for Part 68 applications.

In order for an application filed under Part 21 of the Commission's Rules (Domestic Public Radio Services) to be considered mutually exclusive with any other such application appearing herein, it must be substantially complete and tendered for filing by whichever date is earlier; (a) the close of business one business day preceding the day on which the Commission takes action on the previously filed application; or (b) within 60 days after the date of the public notice listing the first prior filed application (with which the subsequent application is in conflict) as having been accepted for filing. In common carrier radio services other than those listed under Part 21, the cut-off date for filing a mutually exclusive application is the close of business one business day preceding the day on which the previously filed application is designated for hearing. With limited exceptions, an application which is subsequently amended by a major change will be considered as a newly filed application for purposes of the cut-off rule (See § 1.227(b)(3) and 21.30(b) of the Commission's Rules.)

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

22577–CD–P–76, **Phone Depots of Connecticut, Inc, d/b as Liberty Communications (KCC485)**, C.P. for additional facilities to operate on 152.03 MHz to be located at a new site described as Loc. No. 5: Corner Danbury and New Town Roads, Danbury, Connecticut.

22578–CD–P–76, Paging, Inc. (New), C.P. for a new station to operate on 152.21 MHz. (Base) and 459.200 MHz (Repeater) at Loc. No. 1 to be located at Peak knob, 1.3 miles Southeast of Pulaski; 454.200 MHz (Control) Loc. No. 2; to be located at 147 Jackson Street, Blacksburg, Virginia.

22579–CD–P–(2)–76, Radio Call Co. of New Jersey, Inc. (KEK290), C.P. to relocate, replace transmitter and change antenna system operating on 454.200 MHz. at Loc. No. 1 to be located at 8200 Kennedy Boulevard East, North Bergen: Change antenna system operating on 454.200 MHz at Loc. No. 3 located at 318 Eagle Rock Avenue, West Orange, New Jersey.

22580–CD–P–76, Great Eastern Communications Company (KWU242), C.P. to change antenna system operating on 35.58 MHz located 1 mile North on Rt. 662, Waterford, Virginia.

22588–CD–P–(3)–76, Radio Call Island, Inc. (KED367), C.P. to relocate and change antenna system operating on 454.200 MHz (Loc. No. 1); 1 Fairchild Avenue Plainview, and 454.200 MHz. (Loc. No. 2); E Side of Adirondack Dr., 300 feet S of Midvale Avenue, Selden, New York, and add a new site described as Loc. No. 3 to operate on 454.200 MHz. to be located at North Shore Towers, Grand Central Parkway, Glen Oaks, New York.

22589–CD–P–76, Radio Contact Corp. (KTS256), C.P. for additional facilities to operate on 158.70 MHz at a new site described as Loc. No. 3 to be located Near Buckhorn Mountain, 15.5 miles WNW of Fort Collins, Colorado.

22581–CD–TC–76, Radio Call Co. of Long Island, Inc. Consent to Transfer of Control from Marvin R. Neuwirth, Transferor to Long Island Message Centers, Inc. Transferee KED–367, Melville, New York.

22582–CD–P–(3)–76, The Mountain States Telephone & Telegraph Co. (KOA607), C.P. for additional facilities to operate on 454.450 and 454.600 MHz (Loc. No. 1) located 7.5 miles South of Phoenix: 152.78 MHz at (Loc. No. 3) to be located at White Tank Mountain. 8 miles WSW of Waddell, Arizona.

22683–CD–MP–76, AAA Anserphone, Inc., Jackson (KRS618), C.P. to relocated and change antenna system operating on 454.325 MHz. located 1½ miles NE of Petal, Mississippi.

22584–CD–P–ML–(2)–76, Southwestern Bell Telephone Company (KRS684), C.P. for additional facilities to operate on 152.57 MHz. to be located at 116 Ash Street, Pearsall, Texas.

22585–CD–AL–76, A–R Microwave Corporation. Consent to Assignment of License from A–R Microwave Corporation Assignor to Summit Mobile Radio Company. Assignee, Station KCA752, Auburn, Maine.

22586–CD–P–(2)–76, Mobilfone Service, Inc. (KKA402), C.P. to change antenna system operating on 459.25 MHz at Loc. No. 1 located at Magazine, 3 miles NE of Blue Mountain, Arkansas: 454.25 MHz at Loc. No. 3 located at Intersection of Yoakum and Choctaw streets, Arkoma, Oklahoma.

CORRECTION

22553–CD–TC–76, Correct entry to show Name of licensee as West Indies Communications and correct location to read St. Thomas, Virgin Islands. All other particulars to remain as previously Report No. 818, dated 8/9/76.

INFORMATIVE

This notice concerns the recent introduction of data processing to the licensing of applications in the Domestic Public Land Mobile Radio Service. The Mobile Services Division is currently issuing authorizations via the computer. In order to accomplish this mission it is necessary that we develop a data base for each authorized system (call sign). This process together with some remaining problems in the operation of our system has and will continue to cause an increase in the processing time of applications in the DPLMRS. The processing time for a non-contested, correctly completed application will increase to approximately 90 days from the date of its receipt at the Commission. It is anticipated that this increase in processing time will be temporary, lasting until the remaining new problems and procedures, which are inherent with the introduction of a data processing system, are resolved.

The benefits which can be expected due to a complete data base of all DPLMRS licensees and their facilities will far outweigh the consequences of a temporary increase in backlog.

We would therefore appreciate it if inquiries concerning the status of ones applications are not made until 90 days after the date it was filed.

On July 27, 1976, The Commission adopted Docket 19905 (FCC 76–719). It was released August 10, 1976. Included in this Report and Order is revised Section 21.33. New section 21.33 is titled Amendment of Applications and more clearly defines "Major Amendment" as used in Part 21 of the Rules. New Section 21.27(c)(1) of Docket 19905 indicates new filed applications will also be considered major or minor pursuant to the provisions of Section 21.23, subjecting them to the Public Notice requirements of Section 21.27.

At present FCC Form 401 does not provide a convenient location to indicate whether an application should be considered major or minor pursuant to Section 21.23. Effective September 17, 1976 and until FCC Form 401 is revised, all applications to be considered minor and meeting, the requirements of Section 21.23 should include as part of exhibit No. 1 (The environmental statement) a request that the application be considered minor and not subject to the Public Notice requirements of Section 21.27 (a) and (b) of the Commission's Rules.

RURAL RADIO:

60388–CR–P–(2)–76, RCA ALASKA COMMUNICATIONS, INC. (New), C.P. for a new Rural subscriber station to operate on 157.83 and 157.92 MHz to be located: Village located 8 miles ENE of Anchor Point, Nikolaevsk, Alaska.

60436–CR–P/L–(2)–76, RCA ALASKA COMMUNICATIONS, INC. (New), C.P. for a new Central Office Fixed station to operate on 87.50 MHz to be located 2.7 miles ESE of the Yakataga Airport, Yakataga, Alaska.

60437–CR–P/ML–76, Southwestern Bell Telephone Company (WIV29), C.P. for additional facilities to operate on 157.92 and 157.95 at 27.5 miles NNW of Laredo, Texas.

60438–CR–P/ML–76, Southwestern Bell Telephone Company (WPF–31), C.P. for additional facilities to operate on 157.92 and 157.98 MHz to be located at 24 miles North of Laredo, Texas.

60439–CR–P/ML–76, Southwestern Bell Telephone Company (WAQ583), C.P. for additional facilities to operate on 157.92 and 157.95 MHz to be located at 12 miles N.E. of Zapata, Texas.

4345–CF–P–76, Southwestern Bell Telephone Company (WDE62), IH20 & Hwy. 349, Midland, Texas. Lat. 31°58'37" N., Long. 102°-04'44" W. C.P. to change frequencies 6345.5V to 6286.2V toward Odessa RS, Texas on azimuth 283.2°; replace transmitter for this frequency and for 6226.9V toward Odessa RS.

4346–CF–P–76, Same, (KLT69), Odessa RS, 10 miles North, Odessa, Texas Lat. 32°02'-11" N., Long. 102°22'42" W. C.P. to change frequencies on 6093.5V 6034.2V toward Midland, Texas on azimuth 103.0°; change 5952.6H 6071.2H to 5974.8V 6034.2V MHz toward Andrens, Texas on azimuth 333.3°; replace transmitters on these frequencies and on 5974.8V MHz toward Midland RS, Texas.

4347–CF–P–76, Same, (KKK21), 1.7 miles North, Andrews, Texas Lat. 32°20'14" N., Long. 102°33'25" W. C.P. to change frequencies 6204.7H 6323.3H to 6226.9V 6286.-2V MHz toward Odessa RS, Texas on azimuth 153.2°; change 6278.9H 6397.4H to 6226.9V 6286.2V MHz toward Seminole, Texas on azimuth 348.7°; replace transmitters and antenna.

4348–CF–P–76, Same, (KLT52), 307 Southwest Third St. Seminole, Texas. Lat. 32°42'-57" N., Long. 102°38'48" W. C.P. to change frequencies 6026.7H 6145.3H to 5974.8V 6034.2V MHz toward Andrews, Texas on azimuth 168.6°; replace transmitters and antenna on these frequencies and on 5982.-3V 6100.9V MHz toward Hobbs, Texas on azimuth 268.3°; 5937.8V 6056.4V MHz toward Seagraves, Texas on azimuth 17.6°.

4725–CF–P–76, South Central Bell Tel. Company, (New), Almedia Rd. L&A R.R., Almedia, Louisiana Lat. 29°58'12" N., Long. 90°18'21" W. C.P. for a new station on frequencies 11485V 11485H MHz toward Norco, Louisiana on azimuth 288.9°.

4726–CF–P–76, Same, (new), Corner of Good Hope & 3rd, Norco, Louisiana. Lat. 30°00'-04" N., Long. 90°24'37" W. C.P. for a new station on frequencies 11035V 11035H MHz toward Almedia, Louisiana on azimuth 108.9°; and 11035V MHz toward Laplace, Louisiana on azimuth 316.4°.

4727–CF–P–76, Same, (New), Laplace Co. 821 Main Street, Laplace, Louisiana. Lat. 40°03'57" N., Long. 90°28'52" W. C.P. for a new station on frequency 11485V MHz toward Norco, Louisiana on azimuth 136.4°.

4758–CF–P–76, The Bell Telephone Company of Nevada, (New), 551 6th Street, Hawthorne Nevada Lat. 38°31'35" N., Long. 118°37'24" W. C.P. for a new station on frequencies 11485.0V 11325.0V MHz toward Skidue, passive reflector on azimuth 67.70°, and from passive reflector toward Rabbit Spring, Nevada on azimuth 284.5°.

4759–CF–P–76, Same, (KPF90), Rabbit Spring, 18.5 miles NW of Luning, Nevada. Lat. 38°39'16" N., Long. 118°18'40" W. C.P. to add point communication on frequencies 11035.0V 10875.0V MHz toward Skidue passive reflector on azimuth 104.4°, and from passive reflector toward Hawthorne, Nevada on azimuth 247.9°.

4760–CF–P–76, The Bell Telephone Company of Pennsylvania, (KYJ36), 210 Pine Street, Harrisburg, Pennsylvania Lat. 40°15'44" N., Long. 76°53'07" W. C.P. to replace transmitters and increase output power 11625H 11265V 11545H MHz Ramsey, Pennsylvania.

4761–CF–P–76, Same, (KYS58), Ramsey Hill 2.8 miles SW of Lewisberry, Pennsylvania Lat. 40°06'12" N., Long. 76°58'23' W. C.P. to replace transmitters on frequencies 10735H 11135H MHz toward Harrisburg, Pennsylvania and 11115H MHz toward Concordia, Pennsylvania; increase transmit antenna structure height and replace and move antenna on frequencies 11115H 6078.6V 6137.-9V 6019.3V MHz toward Concordia, Pennsylvania.

4762–CF–P–76, Same, (WDE64), Concordia 0.38 miles SW of Concordia Church, Pennsylvania Lat. 40°02'49" N., Long. 76°27'16" W. C.P. to replace transmitters and increase output power on frequency 11565H MHz toward Ramsey.

4776–CF–P–76, The Mountain States Telephone and Telegraph Company, (KPH60), Missoula Montana Lat. 46°51'21" N., Long. 113°55'18" W. C.P. to replace antennas and transmitters, increase output power on frequencies 10756V 10995H MHz toward TV Mountain, Montana.

4777–CF–P–76, Same, (KPH61), TV Mountain 9.5 miles N of Missoula, Montana Lat. 47°-01'09" N., Long. 114°00'41" W. C.P. to replace antennas and transmitters, increase power output on frequencies 11405V 11645H MHz toward Charlo, Montana, and 11445H 11685V MHz toward Missoula, Montana.

4778–CF–P–76, Same, (KPH62), Charlo 4.5 miles NW of Charlo, Montana Lat. 47°27'54" N., Long. 114°16'35" W. C.P. to replace antennas and transmitters, increase output power on frequencies 10715H 10956V MHz toward TV Mountain, Montana and 10755H 10995V MHz toward TM179, Montana; add 1 Hot Standby Transmitter to 6011.9H toward Ronan, Montana.

4779–CF–P–76, Same, (WOF83), Ronan, 21 Street & H Street, Ronan, Montana Lat. 47°31'47" N. Long. 114°05'52"W. C. P. to add a Hot Standby transmitter on frequency 6264H MHz toward Charlo, Montana.

4781–CF–P–76, Continental Telephone Company of California, (KPJ28), Parker, 912 12th Street Parker, Arizona Lat. 34°08'54" N., Long. 114°17'17"W. C. P. to add frequency 2114.0V MHz toward Black Peak, Arizona.

4782–CF–76, Same, (WQQ33), Black Peak 4.8 mile ESE of Parker, Arizona Lat. 34°07'29" N., Long. 114°12'36" W. C. P. to change frequency 2164.0V to 2172.0V MHz toward Bouse, Arizona; and frequency 2164.0V MHz toward Parker, Arizona; add 2164.0H MHz toward Poston, Arizona on azimuth 229.8 degrees; replace transmitter 2172.0H MHz toward Parker, Arizona.

4783–CF–P–76, Same, (WQQ32), Bouse, Plomosa Road, Bouse, Arizona Lat. 33°55'56" N., Long. 114°00'20" W. C. P. to change frequency 2114.0V to 2122.0V MHz toward Black Peak, Arizona.

4784–CF–P–76, Same, (New) Poston, Arizona Lat. 33°59'28" N., Long. 114°23'59"W. C. P. for a new station on frequency 2114.0H MHz Black Peak, Arizona on azimuth 49.7°

4763–CF–P/ML–76, Hawaiian Telephone Company, (KUQ83), Puu Kapele, Puu Kapele Trig., Hawaii. Lat. 22°04'58" N., Long. 159°40'10" W. C.P. and Mod. of License to change polarizations from horizontal to vertical on frequencies 6219.5 and 6278.8 Mhz toward Kapele passive reflector, and from passive reflector toward Kukuiolono, Hawaii.

4764–CF–P/ML–76, Same, (KXR51), Kukuiolono 0.9 miles S of Kalaheo, Hawaii Lat. 21°54'54" N., Long. 159°31'51" W. C. P. and Mod. of License to change polarization from horizontal to vertical on frequencies 5967.4 and 6026.7 MHz toward Kapele passive reflector and from passive reflector toward Puu Kapele.

4790–CF–P–76, The Offshore Telephone Company, (WGI40), EC216A Block 261 East Cameron Area, Gulf of Mexico Lat. 28°28'19" N., Long. 92°54'55" W. C. P. to change receive location for 2112.0H to West Cameron Block 513B; move antenna on 2120.0V to East Cameron Block 195A; add frequency 2128.0V toward East Cameron Block 323A on azimuth 147.6°

4791–CF–P–76, Same, (New), EC 322A Block 322 East Cameron Area, Gulf of Mexico Lat. 28°11'55" N., Long. 92°43'09" W. C. P. for a new station on frequency 2178.0V MHz toward East Cameron Block 261A on azimuth 327.7°.

4792–CF–MP–76, Same, (WAU231), Block 513 West Cameron, Gulf of Mexico Lat. 28°23'53" N., Long. 93°12'38" W. Mod. of C. P. (1169–CF–P–76) to delete West Cameron Block 513A as a point of communication; increase tower height move antennas and add frequencies 2162.0H Mhz East Cameron Block 261A on azimuth 74.0°; 2170.4V MHz toward High Island Area Block 309A on azimuth 63.8°; 2178.4H MHz toward West Cameron Block 605A on azimuth 172.6°.

4793–CF–P–76, Same, (New), Block A309, High Island Area. Gulf of Mexico Lat. 28°14'55" N., Long. 93°33'25" W. C. P. for a new station on frequencies 2120.0V MHz toward West Cameron Block 513B on azimuth 63.8°; 2126.5 Mhz toward High Island Block 330A on azimuth 155.6°.

4794–CF–P–76, Same, (New), Block A 330, High Island Area. Gulf of Mexico Lat. 28°05'47" N., Long. 93°28'43' W. C. P. for a new station on frequency 2177.0H MHz toward High Island Block 309A on azimuth 335.6°.

4795–CF–P–76, Same, (New). Block 605 West Cameron, Gulf of Mexico Lat. 28°04'36" N., Long. 93°09'48" W. C. P. for a new station on frequency 2128.4 MHz toward West Cameron Block 513B on azimuth 352.6°.

4671–CF–P–76, Southern Pacific Communication Co., (WLJ 66), Southern Pacific Bldg., Superstition Mtn., California. (Lat. 32°56'42" N., Long. 115°47'57" W.): Construction permit to add 6034.2V and 5947.8V MHz toward El Centro, California.

4672–CF–P–76, Southern Pacific Communications Co., (WQO 35), Southern Pacific Station, El Centro, California. (Lat. 32°47'36" N., Long. 115°33'03" W.): Construction permit to add 6226.9V and 6286.2V MHz toward Superstition Mtn. and Holtville, California on azimuth 95.4° toward Holtville.

4673–CF–P–76, Southern Pacific Communications Co., (WBA 878), 6.5 miles SE of Holtville, California. (Lat. 32°46'19" N., Long. 115°17'09" W.): Construction permit to add 5974.8H and 6034.2H MHz toward El Centro and 5945.2V and 5974.8H MHz toward Midway Wells, both in California on azimuths 27.5 and 114.6° respectively.

4674–CP–P–76, Southern Pacific Communications Co., (WQC 34), Southern Pacific Bldg. Midway Wells, California. (Lat. 32°42'36" N., Long. 115°07'33" W.): Construction permit to add 6226.9V and 6256.5H MHz toward Holtville, California and 3710.0H MHz toward Telegraph Pass, Arizona, on azimuth 294.7° toward Holtville, California.

4675–CF–P–76, Southern Pacific Communications Co., (WQO 32), Southern Pacific Bldg., Telegraph Pass, Arizona. (Lat. 32°40'13" N., Long. 14°20'05" W.): Construction permit to add 3950.0V MHz toward Oatman Mtn Arizona and 3750.0H MHz toward Midway Wells, California.

4676–CP–P–76, Southern Pacific Communications Co., (WQO 31), Southern Pacific Bldg., Oatman Mtn, Arizona. (Lat. 33°03'06" N., Long. 114°20'05" W.); Construction permit to add 3950.0V MHz toward Oatman Mtn Arizona and 3750.0H MHz toward Midway Wells, California.

4677–CF–P–76, Southern Pacific Communications Co., (WQO 30), Southern Pacific Bldg., Oatman Mtn, Arizona. (Lat. 33°03'06" N., Long. 113°08'03" W.): Construction permit to add 3850.0H) toward White Tank Mtn and Telegraph Pass, both in Arizona.

4678–CF–P–76, Southern Pacific Communications Co., (WQO 29), Union Station, Phoenix, Arizona. (Lat. 33°26'40" N., Long. 112°04'40" W.): Construction permit to add 3850.0V MHz toward Pinal Peak and 5960.0H MHz toward White Tank, both in Arizona.

4679–CF–P–76, Southern Pacific Communications Co., (WQO 28), Group 1, Lot 8. Pinal Peak, Arizona. (Lat. 33°16'49" N., Long. 110°49'11" W.): Construction permit to add 4030.0V MHz toward Mt. Lemmon and 3790.0H MHz toward Phoenix, both in Arizona.

4734–CF–P–76, Midwestern Relay Co., (WLJ 43), Merchandise Mart, Chicago, Illinois. (Lat. 41°53'28" N., Long. 87°38'07" W.): Construction permit to (a) add 6093.5H MHz, (b) change frequencies to 6034.2H and 6152.8H MHz toward existing point of communication, Glendale Heights, Illinois, on azimuth 273.2°.

4735–CF–P–76, Midwestern Relay Co., (WLJ 44), 0.5 mile East of Schmale Rd., Glendale Heights, Illinois. (Lat. 41°54'25" N., Long. 88°05'48" W.): Construction permit to add 6197.2H MHz toward Chicago #1 and Crystal Lake, Illinois, on azimuths 92.9 and 338.2°.

4736–CF–P–76, Midwestern Relay Co., (WLJ 45), 1.9 miles East of Crystal Lake, Illinois. (Lat. 42°15'14" N., Long. 88°17'02" W.): Construction permit to add 6034.2V MHz toward Glendale Heights, Illinois and 6152.8H MHz toward Lake Geneva #1, Wisconsin, on azimuths 158.0 and 350.9°.

4737–CF–P–76, Midwestern Relay Co., (WLJ 46), 3.0 miles East of Lake Geneva, Wisconsin. (Lat. 42°35'49" N., Long. 88°21'30" W.): Construction permit to add 6345.5V MHz toward Crystal Lake, Illinois on azimuth 170.8°.

4770–CF–P–76, American Microwave & Communications, Inc., (KQL 44), Millie Hill, 1 mile East of Iron Mtn., Michigan. (Lat. 45°49'15" N., Long. 88°02'30" W.): Construction permit to add 6219.5H 6278.8H, 6338.1H and 6397.4H MHz toward Iron Mtn. Headquarters, Michigan, on azimuth 281.0°.

4771–CF–P–76, American Microwave & Communications Inc., (KQM 45), 15 miles SE of Elmira, Michigan. (Lat. 45°02'23" N., Long. 84°50'23" W.): Construction permit to (a) add 6241.7V and 6360.3V MHz toward Gaylord, (b) 6241.7H and 6360.3H MHz toward Boyne City, both in Michigan, via power split, on azimuths 98.2 and 302.6°, respectively.

4772–CF–P–76, New England Microwave Inc. (New) 0.6 mile North of Wintechog Hill Rd, North Stonington, Connecticut. (Lat. 41°27'36" N., Long. 71°55'33" W.): Construction permit for new station—(a) 5989.6 MHz toward Westerly, (c) 5874.8H MHz toward Norwich, and (d) 5974.8V, 6034.2V, and 6093.5V MHz toward New London, all in Connecticut, on azimuths, 262.5, 121.5, 315.4, and 267.3°, respectively.

4773–CF–P–76, New England Microwave, Inc., (New), Killingworth, Connecticut. (Lat. 41°23'45" N., Long. 72°33'31" W.): Construction permit for new station—6212.0H and 6330.7H MHz toward Branford and 6301.0H and 6360.3H MHz toward Wintechog, both in Connecticut, on azimuths 261.8 and 82.1°, respectively.

4774–CF–P–76, New England Microwave, Inc., (New), 500 E. of Parsonage Hill Rd, Branford, Connecticut. (Lat. 41°22'05" N., Long. 72°48'38" W.): Construction permit for new station—5945.2H MHz toward Killingworth, Connecticut, on azimuth 81.6°.

V 41 164 AUG 23 76 UMI

4775–CF–P–1976, **Orange County Radiotelephone Service, Inc., (New), Santa Ana,** California. (Lat. 33°44'33" N., Long. 117°51'18" W.): Construction permit to add 11665H MHz toward **Panorama,** (MDS station) California, on azimuth 75.5°.

4680–CF–P–1976, Southern Pacific Communications Co., (WQO 26), Mt. Lemmon, Arizona. (Lat. 32°26'23" N., Long. 110°47'04" W.): Construction permit to add 3750.0V MHz toward Final Peak, Arizona.

4732–CF–MP–1976, MCI Telecommunications, Corp., (WLI 92), 1.0 miles NW of North Royalton, Ohio. (Lat. 41°19'25" N., Long. 81°44'24" W.): Construction permit to change antenna system on existing point of communication—5945.2V MHz toward Medina, Ohio, on azimuth 197.6°.

4733–CF–MP–1976, MCI Telecommunications Corp., (WAU 312) 3.0 miles SSE of Medina, Ohio. (Lat. 41°04'48" N., Long. 81°50'32" W.): Construction permit to change antenna system and to change frequencies toward existing points of communication—6404.8V MHz toward North Royalton, 3730.0V MHz toward Akron, and 6286.2H MHz toward Nova, all in Ohio, on azimuth 17.6, 89.5, and 256.5°, respectively.

MAJOR AMENDMENTS:

3523–CF–P–1976, American Telephone and Telegraph Company, (KYS56), 2.2 miles NW of Monmouth Junction, New Jersey. AMEND application to change azimuth toward Freehold, New Jersey to read 122.3° for frequencies 3750V 3830V.

CORRECTIONS

4620–CF–P–76, Microvideo, Inc., (KLH 35), 0.5 mile North of Silverton, Texas. FEDERAL HOME LOAN BANK BOARD

ALTERNATIVE MORTGAGE INSTRUMENTS RESEARCH STUDY ADVISORY COMMITTEE

Establishment

In accordance with the provisions of the Federal Advisory Committee Act (5 U.S.C. App. I (Supp. II, 1972)) and Office of Management and Budget Circular A–63 of March 1974, and after consultation with OMB, the Chairman of the Federal Home Loan Bank Board has determined that the establishment of the Alternative Mortgage Instruments Research Study Advisory Committee is in the public interest in connection with the performance of duties imposed on the Board by law.

The Committee will advise the Chairman, through the Director of the Office of Economic Research, on the direction, form and substance of the study as it develops. This study will entail a close examination of a wide variety of alternative new mortgage instrument designs from the practical perspective of both borrowers and lenders.

The Committee will consist of 25 members, with a balanced representation of borrowers, lenders, representatives of related industries, government and universities, etc., appointed by the Chairman of the Bank Board.

The Committee will function solely as an advisory body, and in compliance with the provisions of the Federal Advisory Committee Act. Its charter will be filed under the Act, 15 days from the date of the publication of this notice.

Interested persons are invited to submit comments regarding the establishment of the Alternative Mortgage Instruments Research Study Advisory Committee. Such comments, as well as any inquiries, may be addressed to Dr. Donald M. Kaplan, Director, Office of Economic Research, Federal Home Loan Bank Board, Washington, D.C. 20552, phone: 202–376–3131.

August 18, 1976.

GARTH MARSTON,
Acting Chairman.

FEDERAL MARITIME COMMISSION

CITY OF KODIAK AND SEA-LAND SERVICE, INC.

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before September 13, 1976. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

Gerald A. Malia, Esquire, Ragan & Mason, The Farragut Building, 900 Seventeenth Street, NW., Washington, D.C. 20006.

Agreement No. T–2582–2, between the City of Kodiak (City) and Sea-Land Service, Inc. (Sea-Land), modifies the basic agreement between the parties which provides for the preferential use by Sea-Land of a containership terminal constructed by the City for a term of 20 years, with renewal options. The purpose of the modification is to adjust the payment of overhead, maintenance and repair until June 30, 1978, biennially thereafter, at which time a review will be made and an adjusted amount will be negotiated. In addition, the payment of debt service by Sea-Land may, at Sea-Land's option, be made by the surrender of revenue bonds, which were issued by the City, and interest coupons instead of cash. The remainder of revenue bonds shall be counted for the purpose of computing the credit due Sea-Land under Paragraph 4.2.

By Order of the Federal Maritime Commission.

Dated: August 18, 1976.

FRANCIS C. HURNEY,
Secretary.

DART CONTAINERLINE CO.

Agreement Filed

Notice is hereby given that the following agreement has ben filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before September 13, 1976. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

MODIFICATION OF AGREEMENT

Notice of agreement filed by:

Edwin Longcope, Esquire, Hill, Betts & Nash, Suite 5215, One World Trade Center, New York, New York 10048.

Agreement No. 9745–2 modifies the basic agreement to (1) delete "Clarke Traffic Service, Ltd." as a listed party and substitute therefor "Consolidated Container Service Co., Ltd."; (2) delete "The Bristol City Line of Steamships, Ltd." as a listed party and substitute "Bristol City Line, Limited"; (3) expand the scope of the agreement to cover arrangements with other modes of transport for the movement of cargo to or from inland points in Europe and to or from ports on the U.S. Pacific Coast whether moving under a through bill of lading or otherwise and to cover intermodal and terminal rates, rules, charges and practices connected with or ancillary to such movements; and (4) identify the corporation established pursuant to the agreement as Dart Containerline Company Limited, a Bermuda Corporation.

Dated: August 17, 1976.

By order of the Federal Maritime Commission.

[Docket No. RI76-143]

CABOT CORP. (SW)

Order Providing for Hearing on and Suspension of Proposed Change in Rate, and Allowing Rate Change To Become Effective Subject to Refund

AUGUST 12, 1976.

Respondent has filed a proposed change in rate and charge for the jurisdictional sale of natural gas, as set forth in Appendix A hereof.

The proposed changed rate and charge may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is in the public interest and consistent with the Natural Gas Act that the Commission enter upon a hearing regarding the lawfulness of the proposed change, and that the supplement herein be suspended and its use be deferred as ordered below.

The Commission orders: (A) Under the Natural Gas Act, particularly Sections 4 and 15, the Regulations pertaining thereto [18 CFR, Chapter I], and the Commission's Rules of Practice and Procedure, a public hearing shall be held concerning the lawfulness of the proposed change.

(B) Pending hearing and decision thereon, the rate supplement herein is suspended and its use deferred until date shown in the "Date Suspended Until" column. This supplement shall become effective, subject to refund, as of the expiration of the suspension period without any further action by the Respondent or by the Commission. Respondent shall comply with the refunding procedure required by the Natural Gas Act and Section 154.102 of the Regulations thereunder.

(C) Unless otherwise ordered by the Commission, neither the suspended supplement, nor the rate schedule sought to be altered, shall be changed until disposition of this proceeding or expiration of the suspension period, whichever is earlier.

By the Commission.

KENNETH F. PLUMB,
Secretary.

APPENDIX A

Docket No.	Respondent	Rate schedule No.	Supplement No.	Purchaser and producing area	Amount of annual increase	Date filing tendered	Effective date unless suspended	Date suspended until	Cent per 1,000 ft[1] [2] Rate in effect	Cent per 1,000 ft[1] [2] Proposed increased rate	Rate in effect subject to refund in docket Nos.
RI76-143	Cabot Corp. (SW)	77	9	Southern Natural Gas Co. (Southern Louisiana).	$116,438	7-13-76		8-14-76	20.35	[3] 37.60	

[1] Unless otherwise stated, the pressure base is 15.025 lb/in²a.
[2] Unless otherwise stated, the rate shown is the total rate, inclusive of any applicable British thermal unit adjustment and tax.
[3] Includes 0.51¢/1,000 ft³ gathering allowance prescribed in opinion No. 749.

Cabot has filed a unilateral rate increase from its contractually authorized rate to the ceiling rate under Opinion No. 749. Cabot claims that the contract has been canceled, and thus it is entitled to make a unilateral filing. This is a question as to whether the contract has been canceled as a result of Cabot's determination not to replace the existing compression facilities at the current contract price.[1] Southern has indicated that it does not agree with Cabot that the contract has terminated. Cabot, in its filing, has stated that it has no objection to a one-day suspension pending resolution of the contract issue. Cabot's proposed rate increase is suspended for one day, pending such a determination and Cabot is permited to collect the rate thereafter subject to refund.

[1] Cabot filed on July 13, 1976, an abandonment application in Docket No. C176-681 with respect to the subject sales.

GETTY OIL COMPANY, ET AL.

Applications for Certificates, Abandonment of Service and Petitions To Amend Certificates[1]

AUGUST 16, 1976.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to Section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before September 9, 1976, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to be-

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

V 41 164 AUG 23 76 UMI

come parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates or the authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket Nos. CS76-924 *et al.*]

INSCOL PETROLEUM CO., ET AL.

Applications for "Small Producer" Certificates [1]

AUGUST 16, 1976.

Take notice that each of the Applicants listed herein has filed an application pursuant to Section 7(c) of the Natural Gas Act and Section 157.40 of the Regulations thereunder for a "small producer" certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce, all as more fully set forth in the applications which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before August 30, 1976, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

CITIES SERVICE GAS CO.

[Docket No. RP76-13]

Notice of Conference on Rates and Charges

AUGUST 16, 1976.

Take notice that on August 24, 1976, a conference of all parties to intervene in this proceeding, the Cities Service Gas Company, any interested customers, and the Commission Staff will be held in Conference Room No. 3200 at the Federal Power Commission, 941 North Capitol Street, NE., Washington, D.C., at 10:00 a.m. (d.s.t.).

Copies of this notice are being mailed this date to all jurisdictional customers and interested State Commissions.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-24615 Filed 8-20-76;8:45 am]

[Docket No. RI76-65]

DEVON CORPORATION, ET AL.

Order Setting Matter for Hearing, Establishing Procedures and Granting Intervention

AUGUST 17, 1976.

On November 18, 1975, Devon Corporation (Operator), *et al.* (Devon) filed in Docket No. RI76-65 a petition for special relief pursuant to Sections 2.56a(g) and 2.76 of the Commission's General Policy and Interpretations (18 C.F.R. §§ 2.56a (g), 2.76) and Section 154.107(e) of the Commission's Regulations under the Natural Gas Act (18 C.F.R. § 154.107(e)) seeking a rate higher than the applicable area or national rate ceilings for sales of natural gas from 50 wells located in West Virginia which Devon operates and in which Devon owns interests.

Prior to June 21, 1973, Commonwealth Gas Corporation (Commonwealth) made sales in interstate commerce from the 50 subject wells to Columbia Gas Transmission Corporation (Columbia), Consolidated Gas Supply Corporation (Consolidated), and Cities Service Oil Company (Cities). On June 21, 1973, Commonwealth assigned all of its interests in these wells, one-half to John W. Nichols, the President of Devon, and one-half to Eason Oil Company (Eason). On June 23, 1973, John W. Nichols assigned his interest to Devon and retained a 36 percent overriding royalty interest.

Devon and Eason, on whose behalf Devon also seeks special relief, are currently selling natural gas pursuant to rate schedules on file with the Commission to Columbia from 48 of the subject wells at 29 cents per Mcf, to Consolidated from one of the subject wells at 29 cents per Mcf, and to Cities from one of the subject wells at 16.65 cents per Mcf. In its original petition Devon stated that production from these wells has declined to the extent that reconditioning, deepening, and installation of additional equipment are necessary to permit continued operations. Devon proposes a five-year program in which it will conduct reworking operations on eight of the wells, recomplete 25 of the wells in other producing formations, deepen one of the wells, and install compression facilities on 21 of the wells. The proposed program involves performing additional work on each of the subject wells, except for the well from which gas is sold to Consolidated, and Devon estimates that an additional 9,977,870 Mcf will be made available to the interstate market by the program. In return for conducting the proposed program, Devon requested in its original petition for special relief that it be authorized to collect a rate of 70 cents per Mcf plus an annual escalation of one cent per Mcf for its sales from all 50 wells. On February 23, 1976, Devon filed an amendment to its petition for special relief in which Devon stated that it is also requesting special relief from the rates set forth in Opinion No. 749 pursuant to Section 2.56B(h) of the Commission's General Policy and Interpretations. In its amendment to its petition Devon stated that its recent actual operating expenses far exceeded the estimates made by Devon when it prepared its original petition, and thus Devon requested that it be authorized to collect a rate of $1.08 per Mcf plus an annual escalation of one cent per Mcf. The requested rate includes costs from all 50 wells, an allowance for Federal income taxes as provided in Opinion No. 749, and a 20 percent rate of return as was provided for small producers in Opinion No. 742.[1]

Of the three purchasers of the subject gas, Columbia has agreed to pay Devon whatever rate the Commission determines to be just and reasonable for the sales. However, Devon has not as yet obtained contractual authority for any rate increase from either Consolidated or Cities. If Devon fails to obtain such contract authority prior to the issuance of a Commission order in this proceeding, Devon requests that the Commission condition any relief such that such relief be effective for its sales to Consolidated and Cities only if contractual authorization is obtained.

Notice of Devon's petition for special relief was issued on December 4, 1975, and appeared in the FEDERAL REGISTER on December 12, 1975, at 40 FR 57845. Notice of Devon's amendment to its petition was issued on March 10, 1976, and appeared in the FEDERAL REGISTER on March 16, 1976, at 41 FR 11078. Columbia and Cities filed timely petitions to intervene, and the Public Service Commission of the State of New York (PSCNY) filed a notice of intervention.

The Commission Staff has conducted a field audit of Devon's books and an extensive analysis of the data submitted by Devon and has concluded that the proposed rate increase may not be cost justified. In light of the factual and legal issues raised by Devon's petition for special relief, this proceeding should be set for hearing in order to provide Devon and other interested parties an opportunity to present evidence on the issues raised and on any other matters considered to be relevant to the proceeding. Specifically, Devon and any supporting intervenors should present testimony and evidence on the following issues:

[1] Devon filed an application for a small producer certificate on May 24, 1976, in Docket No. CS76-842. Eason was issued a small producer certificate in Docket No. CS71-631 on April 11, 1972.

(1) Whether data pertaining to the two wells for which Devon does not have contractual authorization for the proposed rate should be treated separately or included in the overall cost calculations;

(2) Whether data pertaining to the well upon which Devon does not propose to do any additional work should be included in the overall cost calculations;

(3) The additional recoverable reserves that will result from Devon's proposed workover program;

(4) Whether to include in the cost calculations as working interest volumes of Devon those volumes of gas attributable to the overriding royalty interest retained by John W. Nichols, the President of Devon;

(5) Whether a Federal income tax allowance should be included in the cost calculations, and if so, whether Devon is entitled to claim a Federal income tax allowance of 48 percent;

(6) Whether Devon's estimated future annual operating expenses should be based on an annualization of four recent months of expenses rather than on an actual year's expenses.

The Commission finds: (1) It is necessary and in the public interest that the above-docketed proceeding be set for hearing.

(2) Good cause exists to grant the petitions to intervene of Columbia and Cities.

The Commission orders: (A) Pursuant to the authority of the Natural Gas Act, particularly Sections 4, 5, 7, 14, and 16 thereof, the Commission's Rules of Practice and Procedure, and the Regulations under the Natural Gas Act (18 C.F.R. Chapter 1), a public hearing shall be held in a hearing room of the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, to determine the lawfulness of Devon's proposed rate increase.

(B) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose (See Delegation of Authority, 18 C.F.R. § 3.5(d)) shall preside at the hearing in this proceeding, with authority to establish and change all procedural dates, and to rule on all motions (with the sole exception of petitions to intervene, motions to consolidate and sever, and motions to dismiss, as provided for in the Rules of Practice and Procedure).

(C) Devon and all intervenors supporting Devon shall file their direct testimony and evidence on or before September 15, 1976. All testimony and evidence shall be served upon the Presiding Administrative Law Judge, the Commission Staff, and all parties to this proceeding.

(D) The Presiding Administrative Law Judge shall preside at a pre-hearing conference to be held on September 30, 1976, at 9:30 A.M. EDT, in a hearing room at the address noted in Ordering Paragraph (A).

(E) Columbia and Cities are permitted to intervene in the above-entitled proceeding, subject to the rules and regulations of the Commission; *Provided, however,* That their participation shall be limited to matters affecting asserted rights and interests specifically set forth in their petitions for leave to intervene; and *Provided, further,* that their admission in the manner provided shall not be construed as recognition by the Commission that they might be aggrieved because of any order or orders entered in this proceeding, and that they agree to accept the record as it now stands.

(F) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP72-134 (PGA 76-18)]

EASTERN SHORE NATURAL GAS CO.

Purchased Gas Cost Adjustment to Rates and Charges

AUGUST 16, 1976.

Take notice that Eastern Shore Natural Gas Company (Eastern Shore) on July 30, 1976, tendered for filing Thirty-Second Revised Sheet No. 3A and Thirty-Second Revised PGA-1 to its FPC Gas Tariff, Original Volume No. 1. These revised tariff sheets, to be effective September 1, 1976, will increase the commodity or delivery charges of Eastern Shore's Rate Schedules CD-1, CD-E, E-1, I-1 and PS-1 by .003¢ per Mcf. These increases reflect corresponding "tracking" rate increases for advance payments by Transcontinental Gas Pipe Line Corporation (Transco), Eastern Shore's sole supplier, in its filing of July 16, 1976, in FPC Docket Nos. RP75-75 and AP-76.

Pursuant to § 154.51 of the Regulations under the Natural Gas Act, Eastern Shore respectfully requests waiver of the notice requirements of § 154.22 of those Regulations and of § 20.2 of the General Terms and Conditions of its Tariff, to the extent necessary, to permit the tariff sheets submitted to become effective as of September 1, 1976, to coincide with the effective date of Transco's rate changes. In support thereof, Eastern Shore states that Transco's July 16 filing of its revised tariff sheets prohibited Eastern Shore from fulfilling the prescribed notice requirements under the General Terms and Conditions of its Tariff.

Eastern Shore states that copies of the filing have been mailed to each of the Company's jurisdictional customers and to interested State Commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 30, 1976. Protests will be considered by the Commission in determining the appropriate action to be

V 41 164 AUG 23 76 UMI

taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER76-211]

FLORIDA POWER & LIGHT CO.

Settlement Conference

AUGUST 16, 1976.

Take notice that on September 10, 1976, a conference of all parties to intervene in these proceedings, Florida Power & Light Company, and the Commission Staff will be held in a Commission's Conference Room at 825 North Capitol Street NE., Washington, D.C., at 10:00 a.m.

Customers and other interested persons will be permitted to attend, but if such persons have not previously been permitted to intervene by order of the Commission, attendance at the conference will not be deemed to authorize intervention as a party in the proceedings.

All parties will be expected to come fully prepared to discuss the merits of all issues concerning the lawfulness of the proposed rate increase and any procedural matters preparatory to a full evidentiary hearing or to make commitments with respect to such issues and any offers of settlement or stipulations discussed at the conference.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP73-14]

MICHIGAN WISCONSIN PIPE LINE CO.

Filing of Report

AUGUST 16, 1976.

Take notice that on August 2, 1976, Michigan Wisconsin Pipe Line Company (Michigan Wisconsin) filed a report pursuant to Paragraph (C) of the Commission's Order dated May 10, 1976 in Docket Nos. RI74-56 and RI74-57.

Michigan Wisconsin states that pursuant to the provisions of the General Terms and Conditions of its tariff, Michigan Wisconsin will credit its Unrecovered Purchased Gas Cost Account with the amounts received ($45,029.81) from Phillips Petroleum Company ($36,803.60) and Kerr-McGee Corporation ($8,226.21) refunded pursuant to Paragraph (B) of the order referred to above.

Michigan Wisconsin further states that copy of its report has been mailed to each of Michigan Wisconsin's gas sales customers as well as to each of the following:

Illinois Commerce Commission
Public Service of Indiana
Iowa Commerce Commission
Kansas State Corporation Commission
Michigan Public Service Commission
Missouri Public Service Commission
Public Utilities Commission of Ohio
Tennessee Public Service Commission
Public Service Commission of Wisconsin

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 27, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP72-149 (PGA 76-12)]

MISSISSIPPI RIVER TRANSMISSION CORP.

Proposed Change in Rates

AUGUST 16, 1976.

Take notice that Mississippi River Transmission Corporation (Mississippi) on July 30, 1976, submitted for filing Forty-Fourth Revised Sheet No. 3A to its FPC Gas Tariff, First Revised Volume No. 1, to become effective September 1, 1976.

The instant filing is being made pursuant to the provisions of Mississippi's purchased gas cost adjustment clause to track a rate change filing of Natural Gas Pipeline Company of America made pursuant to the terms of the PGA provisions of its tariff.

Mississippi submitted schedules containing computations supporting the rate changes to be effective September 1, 1976. Mississippi states that copies of its filing were served on Mississippi's jurisdictional customers and the State Commissions of Arkansas, Illinois and Missouri.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10).

All such petitions or protests should be filed on or before August 27, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene unless such petition has previously been filed. Copies of the filing are on file with the Commission and are available for public inspection.

[Docket No. ER76-305]

NORTHERN STATES POWER CO. (WISCONSIN)

Filing of Settlement Agreement

AUGUST 16, 1976.

Take notice that on August 4, 1976, Northern States Power Company (Wisconsin) (NSP) tendered for filing a proposed Settle-Agreement in the above-referenced docket. In the Settlement Agreement the parties thereto state that the agreement is in full settlement of all issues arising in the proceeding in this docket.

In the proposed Settlement Agreement it is requested that the proposed settlement rates be made effective March 1, 1976.

Any person desiring to be heard or to protest said settlement agreement should file comments with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before September 3, 1976. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this agreement are on file with the Commission and are available for public inspection.

[Docket No. E-7172]

SOUTHWESTERN POWER ADMINISTRATION

Order Extending the Confirmation and Approval of Rate Schedules

AUGUST 17, 1976.

Pursuant to Section 5 of the Flood Control Act of 1944 (58 Stat. 887, 890), The Secretary of the Interior filed a request on May 20, 1976, on behalf of the Southwestern Power Administration (SWPA) requesting that the Commission extend for a maximum period of six months, to November 30, 1976, its confirmation and approval of the following system rate schedules and contractual rates and charges:

System rate schedules	*Contractual rates and charges*
F-1, firm power--- P-2 (Revised), peaking power. EE, excess energy-- IC, interruptible capacity.	Contract No. Ispa-356, with Oklahoma Gas and Electric Co. and Public Service Co. of Oklahoma (Oklahoma Companies). Contract No. 14-02-001-864 with Tex-La Electric Cooperative Inc. (Tex-La).

By order issued November 30, 1971, the Commission confirmed and approved all the system rate schedules listed above and the rates and charges set forth in Contract No. Ispa 356 (Oklahoma Companies). By order issued February 20, 1973, the Commission confirmed and approved the rates and charges set forth in Contract No. 14-02-001-864 (Tex-La). In both of the above orders, the rates and charges were approved for a period ending not later than May 31, 1974. By order issued May 31, 1974, the Commission extended its approval of the rates and charges for a period ending not later than May 31, 1975. By order issued July 3, 1975, the Commission extended its approval of the rates and charges for a period ending not later than November 30, 1975. By order issued February 9, 1976, the Commission extended its approval for an additional period ending not later than May 31, 1976.

SWPA currently markets the power and energy from an integrated system of 19 hydroelectric plants constructed and operated by the Corps of Engineers. The total installed capacity of the 19 plants is presently 1,839,200 kilowatts with an average annual generation of 5.08 billion kilowatt-hours.

CURRENT RATES AND CHARGES

The rates and charges currently in effect and for which Interior requests extention of the Commission's approval for up to six additional months are:

Rate Schedule F-1 for sale of firm power service to wholesale customers. The monthly demand charge is $1.60 per kilowatt, but a discount of $0.40 is given if service is taken from SWPA's high voltage grid. The monthly energy charge is 2.0 mills per kilowatt-hour for the first 150 kilowatt-hours per kilowatt, 3.0 mills for the next 290 kilowatt-hours per kilowatt, and 5.0 mills per kilowatt-hour for all in excess of 440 kilowatt-hours per kilowatt of billing demand.

Rate Schedule P-2 (Revised) for sale of peaking power at a monthly rate of $1.20 per kilowatt for capacity plus 2.0 mills per kilowatt-hour for energy, when service is taken from SWPA's high voltage grid. Where transmission service is provided beyond SWPA's high voltage grid and SWPA incurs additional costs therefor, the customer is required to pay an additional Transmission Service Charge equal to the cost to SWPA of providing such service.

Rate Schedule IC for sale of interruptible capacity at 4.5 cents per kilowatt per day with accompanying energy at 2.0 mills per kilowatt-hour.

Rate Schedule EE for sale of excess energy at 1.5 mills per kilowatt-hour.

Under Contract No. Ispa-356 wholesale sales of peaking power are made to the Oklahoma Companies at a monthly capacity charge of $1.20 per kilowatt and an energy charge of 3.4 mills per kilowatt-hour.

Under Contract No. 14-02-001-864 sale to Tex-La of 15,000 kilowatts of capacity and associated firm energy is made at a monthly capacity charge of $1.60 per kilowatt of billing demand, and energy charges of 2.0 mills per kilowatt-hour for the first 150 kilowatt-hour per kilowatt per month of billing demand, 3.0 mills per kilowatt-hour for the next 290 kilowatt-hours per kilowatt, and 5.0 mills per kilowatt-hour for energy in excess of 440 kilowatt-hours per kilowatt per month of billing demand.

STATUS OF REPAYMENT

In the filing of May 20, 1976, Interior made the following statements:

The Commission was advised in our letter dated November 28, 1975, requesting a six-month extension to May 31, 1976, that Federal court decisions concerning previous FPC approved rate increases involving approximately $3.7 million in annual revenue were pending and that in the event any one of these cases was decided within the six-month extension period, the repayment studies would be adjusted accordingly.

The action by the Supreme Court on October 6, 1975, denying the plaintiff's petition for certiorari in the suit brought by Associated Electric Cooperative, confirmed the November 1974 decision of the Court of Appeals which established the validity of the transmission service charge in SPA's Rate Schedule P-2 (Revised). This decision will result in additional gross revenue to SPA after resolution of the 'factual dispute' now pending before the District Court relating to the matter of computing such charge. SPA's proposed rate and repayment study has been revised to include an adjustment of $16.1 million in Fiscal Year 1976 as accounts receivable due from Associated Electric Cooperative, Inc., for Transmission Charges approved under Rate Schedule P-2 (Revised) for the period June 1, 1970, through June 30, 1976. The study also includes $2,647,100 per year thereafter expected to be recovered from Associated for Transmission Service Charges in the future.

At the time of preparation of the 1971 Study, SPA had repaid none of the original investment in power production and transmission facilities. In fact, on June 30, 1970, an accumulated deficit of over $28 million was recorded on financial records. SPA systematically reduced this deficit in succeeding years and eliminated it in FY 1974. Since then SPA has been able to commence repayment of the original investments and has applied almost $21 million to this purpose as of the end of FY 1975. At this time it appears that about another $7.0 million from sales of power will be applied to amortization in FY 1976. With the addition of the adjustment for past transmission service charges to Associated of $16.1 million, the total amount available for debt reduction will be about $23.1 million in 1976.

Studies completed by SPA, in anticipation of the expiration of the Commission's confirmation and approval of SPA's rate schedules disclose that revenues derived under these rate schedules will still not be adequate to fulfill SPA's repayment obligation during the payout period as required under Section 5 of the Flood Control Act of 1944. An increase of approximately $8.6 million per year in additional revenues will be required.

The extension requested will provide time during which SPA will conduct hearings on the study prepared in support of the proposed rates.

PUBLIC NOTICE

Public Notice of Interior's filing was issued June 1, 1976, and was published in the Federal Register on June 8, 1976. Comments or suggestions relative to the filing were requested to be submitted in writing on or before June 18, 1976.

COMMENTS RECEIVED

On June 17, 1976, the Oklahoma Companies filed a "Petition To Intervene And Protest." The Companies request permission to intervene and participate in a hearing if so ordered by the Commission. Alternatively, the Companies request that the Commission defer any action on Interior's request for extension of confirmation and approval of rates and charges until a final judgment has been rendered by the United States Court of Claims in pending litigation, and in connection with any appeal that may be taken therefrom. The Companies further state that the petition was filed to protect the Companies interest and to avoid any prejudice to their position in the litigation pending in the United States Court of Claims which might arise from a failure to respond to the Commission's notice of June 1, 1976.

The Commission finds: (1) The extension of its confirmation and approval of SWPA's above-listed system rate schedules and contractual rates and charges as hereinafter provided, will not be inconsistent with the provisions of the Flood Control Act of 1944.

(2) Grant of the requested extension through November 30, 1976, will not prejudice the rights of any party with respect to the litigation over Contract No. Ispa-356 between SWPA and the Oklahoma Companies now pending in the United States Court of Claims in *Public Service Company of Oklahoma and Oklahoma Gas & Electric Company vs. The United States of America*, No. 20-73.

The Commission orders: (A) The extension of its confirmation and approval of SWPA's above-listed system and contractual rates and charges for the period ending not later than November 30, 1976.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-24622 Filed 8-20-76;8:45 am]

[Docket No. ER76-92]

WESTERN POWER DIVISION, CENTRAL TELEPHONE & UTILITIES CORPORATION

Electric Rates; Order Denying Motion for Reconsideration and Granting Permission To Withdraw

AUGUST 17, 1976.

On July 12, 1976, Western Power Division, Central Telephone & Utilities Corporation (Western Power) filed a motion for reconsideration of a letter dated June 1, 1976, from the Secretary of the Commission advising Western Power that its filing of revised rates to reflect exclusion of construction work in progress (CWIP) from rate base was deficient. In the alternative, Western Power moves for permission to withdraw a portion of the rate change. For reasons hereinafter stated, we will deny reconsideration of the deficiency letter and grant Western Power's motion to withdraw.

This docket commenced on August 29, 1975, with Western Power's filing of a proposed rate increase to thirty-two wholesale customers. By letter dated September 24, 1975, Western Power was in-

V 41 164 AUG 23 76 UMI

formed that its filing was deficient by reason of stale test year data. On October 6, 1975, Western Power applied for rehearing of the September 24 deficiency letter and by order issued November 5, 1975, the Commission denied rehearing. On January 27, 1976, Western Power completed the filing upon submission of updated test year data. By order issued February 20, 1976, the Commission, inter alia, accepted for filing and suspended for one day the proposed rate changes and required Western Power to file revised rates reflecting the elimination of CWIP from rate base.

On April 6, 1976, Western Power filed revised rates based on the exclusion from rate base of the amount of CWIP included in the Period II test year (hereafter "Stale Period II") contained in its original filing of August 29, 1975. On May 4, 1976, Western Power's eleven wholesale cooperative customers (Cooperatives), intervenors herein, filed a "Protest of Revised Filing" claiming that Western Power had failed to utilize the Period II data underlying the January 27, 1976 filing (hereafter "Updated Period II") in computing the CWIP adjustment.

The argument advanced by Cooperatives in its May 4 protest is as follows: In its January 27 filing, Western Power relied upon Updated Period II, the 12 month period ending August 31, 1976, to present its test year support of the proposed rates. Based on such test year data, Western Power's cost-of-service analysis showed that the revenue increases of $59,074 to Central Kansas Electric Cooperative, Inc. (Central Kansas)[1] and $950,590 to the other ten cooperative customers yielded rates of return of 8.07% and 9.09% respectively. The April 6, 1976 filing of revised rates to reflect exclusion of CWIP from rate base used the Stale Period II data from Western Power's original filing to compute the CWIP adjustment thereby reducing the above referenced rate increases from $59,074 and $950,590 to $26,914 and $891,304, respectively. Testing those revised rates against the Updated Period II adjusted for exclusion of CWIP from rate base yielded rates of return of 8.76% and 9.96%, respectively. Cooperatives argue that insomuch as the Commission found Western Power's original filing deficient due to stale data, it is improper to compute the revised rate schedules on the Stale Period II included in such filing. Cooperatives claim that using Updated Period II data with a 9.09% return component, the CWIP adjustment would reduce the rate increase from $59,074 to negative $26,026 to Central Kansas and from $950,590 to $713,451 to the other cooperative customers.

By letter dated June 1, 1976, the Secretary of the Commission advised Western Power that its April 6 filing was deficient in that the revised rates were improperly based upon the Stale Period II and directed Western Power to submit revised rates reflecting the exclusion of CWIP from the rate base of Updated Period II.

In its motion for reconsideration of the June 1 deficiency letter, Western Power presumes that the policy underlying said letter is that when a revision is made by a utility in a pending rate increase filing, the rate of return proposed in the pending filing for any class of customers may not be exceeded and one item of cost of service may not be substituted for another item of cost of service to support the same rate of return level. Western Power argues that blind allegiance to such a policy can produce unfair results, such as here, where due to the change in test period from Stale Period II to Updated Period II there was a substantial increase in construction work in progress and a shift in the demand responsibility of the several classes of customers such that compliance with the June 1 deficiency letter would result in a rate decrease as to one rate schedule (i.e., Central Kansas) whereas rate increases would still be applicable to all other rate schedules.

We find Western Power's arguments unpersuasive. In a similar case the Commission rejected New England Power Company's attempt to rely upon a tax normalization alternative to justify its requested rate increase notwithstanding exclusion of CWIP from rate base.[2] In denying the company's motion for stay pending review of the Commission's orders in that case, Chief Judge Coffin of the U.S. Court of Appeals for the First Circuit had occasion to express the same rationale that underlies the Commission's actions here:

> For the present, neither claim persuades us in view of the administrative necessity of closing the books at a time certain and having a mechanism to prevent utilities from delaying refund orders by offering alternative justifications for the rate increases it has filed. FPC staff and intervenors cannot be expected to follow a moving target. Tax normalization was always and still remains an option for NEPCO. New data will often prove old projections wrong, but the risk of some shortfall because of interim refund orders is both recognized and inevitable. *F.P.C. v. Tennessee Gas Transmission Co.*, 371 U.S. 145 (1962).[3]

Accordingly, we shall deny Western Power's motion for reconsideration and grant permission to Western Power to withdraw Supplement 8 to Rate Schedule FPC No. 35 applicable to Central Kansas.

The Commission finds: (1) Good cause does not exist to grant Western Power's motion for reconsideration of the deficiency letter dated June 1, 1976.

(2) Good cause exists pursuant to 35.17(a) of the Regulations under the Federal Power Act to grant Western Power permission to withdraw Supplement No. 8 to Rate Schedule FPC No. 35.

The Commission orders: (A) Western Power's motion for reconsideration of the June 1, 1976 deficiency letter is hereby denied.

(B) Within 30 days of the issuance of this order, Western Power shall file revised rate schedules in compliance with the June 1, 1976 deficiency letter and shall otherwise comply with the refund provisions of our February 20, 1976 order in this proceedings.

(C) Western Power is hereby granted permission to withdraw Supplement No. 8 to Rate Schedule FPC No. 35 and is hereby ordered to refund within 30 days of the issuance of this order all increased amounts collected pursuant to the rates contained therein with interest at 9% per annum.

(D) Within 15 days after appropriate refunds have been made in accordance with Paragraphs (B) and (C) above, Western Power shall file with the Commission a compliance report detailing by customer the monthly billing determinants and revenues under the prior, originally proposed and revised rates and the monthly interest computation. The report shall also include a summary of the above information for the total refund period.

(E) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

FEDERAL OPEN MARKET COMMITTEE

DOMESTIC POLICY DIRECTIVE

July 19–20, 1976

In accordance with § 271.5 of its rules regarding availability of information, there is set forth below the Committee's Domestic Policy Directive issued at its meeting held on July 19–20, 1976.[1]

The information reviewed at this meeting suggests that growth in real output of goods and services, which had been vigorous in the first quarter, moderated in the second quarter as a consequence of a smaller advance in consumer spending and little change in the rate of inventory accumulation. In June growth in industrial production slowed and nonfarm payroll employment changed little. The unemployment rate edged up to 7.5 per cent from 7.3 per cent in May, but this increase may have partly reflected seasonal adjustment problems. Retail sales rebounded strongly in June. The rise in the wholesale price index for all commodities remained moderate, as the advance in average prices of farm products and foods slowed further. However, average prices of industrial commodities rose more than in other recent months. The advance in the index of average wage rates slowed considerably in June following a sharp rise in May; over the second quarter as a whole the index rose at about the same rate as in the first quarter.

The average value of the dollar against leading foreign currencies has remained relatively steady in recent weeks. In May there was a small surplus in the U.S. foreign trade balance.

M_1, which had grown moderately in May, declined slightly in June. From the first to the second quarter, however, M_1 expanded at an 8.4 per cent annual rate because of the exceptional rise in April. Growth in M_2 and M_3 moderated in June, mainly because of the decline in M_1, although inflows of the time and savings deposits included in the broader aggregates also slowed somewhat. Short-term market interest rates have declined somewhat in recent weeks, and most long-term rates have edged down.

In light of the foregoing developments, it is the policy of the Federal Open Market Committee to foster financial conditions that will encourage continued economic expansion, while resisting inflationary pressures and contributing to a sustainable pattern of international transactions.

To implement this policy, while taking account of developments in domestic and international financial markets, the Committee seeks to achieve bank reserve and money market conditions consistent with moderate growth in monetary aggregates over the period ahead.

By order of the Federal Open Market Committee, August 20, 1976.

ARTHUR L. BRODA,
Secretary.

FEDERAL TRADE COMMISSION

INTERLOCKING DIRECTORATES

Statement of Policy

On May 17, 1976, the Federal Trade Commission issued a complaint against Perpetual Federal Savings & Loan Association ("Perpetual"), Docket No. 9083. The complaint states that the Commission has reason to believe that Perpetual is violating Section 5 of the Federal Trade Commission Act by sharing common directors with competing banks in the Washington, D.C. area. The complaint alleges that Perpetual competes for savings deposits and residential loans with two of the largest banks in Washington and that six members of Perpetual's board of directors are also members of the boards of directors of one or the other of the two banks. A majority of the Commission voted to name Perpetual as a respondent but not the six individuals. A third Commissioner dissented from the motion to issue the complaint because the individuals were not also named as respondents.

The courts have recognized the Commission's discretion in determining who, among those who may be in violation of its act, should be made a respondent in a Commission proceeding.[1] This Statement of Policy is nonetheless being released to avoid misunderstanding in the legal and business communities concerning the susceptibility of individual directors to Commission process in interlock cases.

This Statement of Policy is only intended to provide general guidance and information. When time, circumstances, and the public interest require, this Statement may be superseded or amended by subsequent Commission action without prior notice. This Statement is not a rule or regulation. It does not modify the scope or coverage of any provision of the antitrust laws or the Federal Trade Commission Act. In issuing this Statement, the Commission has made no determination on the merits that Perpetual or any other person or corporation has actually violated the law by maintaining interlocking director relationships between a savings and loan association and a bank.

TRADITIONAL INTERLOCK ENFORCEMENT

In recent complaints that allege director interlocks to be violations of Section 5 of the Federal Trade Commission Act and Section 8 of the Clayton Act, the Commission's usual practice has been to name as respondents individual directors as well as the corporations they serve. Section 8 of the Clayton Act states that "no person at the same time shall be a director in any two or more [competing] corporations. • • •" (Emphasis added.) Section 5 of the FTC Act grants the Commission the authority to prevent "persons" as well as corporations from engaging in unfair acts, practices, and methods of competition. Although interlock cases terminated by consent generally result in resignations by the interlocked directors and, in the past, have often been concluded by orders issued against the offending corporations only the Commission has recently issued a final consent order against an individual respondent in an interlock case who had resigned after the issuance of the administrative complaint.[2]

The Commission traditionally has viewed compliance with the laws against director interlocks to be as much the responsibility of individual directors as of the affected corporations. Directors are expected to be consistently loyal to their corporations and to the shareholders of those corporations. They are not to place themselves in situations which entail actual or potential conflicts of interest.[3]

SAVINGS AND LOAN ASSOCIATIONS

Legal commentors have observed that savings and loan associations are subject

[1] *Moog Industries* v. *Federal Trade Commission*, 355 U.S. 411, 412 (1958).

[2] *See* In the Matter of Kraftco, Inc., SCM Corporation, and Richard G. Bond, Docket No. 9035, 41 F.R. 21442.

[3] *See generally*, 5. W. Fletcher, Private Corporations, ch. 20, § 441 (perm. ed. 1965); H. Henn, Handbook of the Law of Corporations, ch. 9, § 235 (2d ed. 1970).

VOL 41 NO 164 AUG 23 76 UM

to the antitrust laws and the FTC Act.[4] The Federal Home Loan Bank Board has advised regulated savings and loan associations of their susceptibility to antitrust and FTC Act liability.[5]

While the reach of Section 8 of the Clayton Act to interlocks between banks and other corporations such as savings and loans may not be clear,[6] no similar express statutory provision is contained in Section 5 of the FTC Act. The Commission has cited Section 5 as an independent basis of liability in interlock cases.[7]

In the case of savings and loan/bank interlocks there are two factors underlying the Commission's determination to emphasize a prospective approach to enforcement against individuals.

The first factor is the longstanding and apparently widespread nature of the practice of interlocking banks with savings and loan associations. According to publicly available information,[8] there may be over a thousand interlocks between banks and their savings and loan competitors, many of longstanding duration. The sheer number and duration of these may have reinforced the erroneous impression that these interlocks would never be subject to Federal Trade Commission scrutiny.

The second factor affecting the Commission's decision is that the agencies which are the principal regulators of banks and savings and loan associations have never prohibited the interlocks. The Federal Reserve Board has maintained that it lacks the statutory authority to address these interlocks.[9] The Federal Home Loan Bank Board has proposed regulations on the subject but has not promulgated final regulations.[10]

These factors would not justify future non-involvement by the Commission. Accordingly, the Commission will henceforth in appropriate situations adhere to its customary practice of naming individuals as well as corporations in interlock complaints subject to the Commission's jurisdiction. The Commission recognizes, however, that, in view of the apparent ubiquity of savings and loan association interlocks with banks, immediate resignations by interlocking directors might be disruptive. The Commission, therefore, believes that a short grace period may be appropriate as a matter of policy.[11] It is the Commission's intention, however, that after January 1, 1977, savings and loan association directors will be charged invidually in complaints which may from time to time issue challenging allegedly unlawful interlocks of this nature which it has reason to believe remain in existence on or after that date.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46; 80 Stat. 378; (5 U.S.C. 552).)

By direction of the Commission dated August 3, 1976.

CHARLES A. TOBIN,
Secretary.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-27]

CHICORY ROOT: CRUDE AND PREPARED

Notice and Order

CONCERNING REVISED PROCEDURE FOR COMMISSION ACTION

Notice is hereby given that—

1. The United States International Trade Commission has extended the time, from August 16, 1976, to August 23, 1976, by which the presiding officer in this proceeding is to submit to the Commission his recommended determination concerning whether there is reason to believe that there is a violation of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. § 1337). In connection therewith, the Commission has also extended its own administrative deadline for issuing its determination from August 25, 1976, to September 3, 1976.

2. The Commission will hold a hearing beginning at 10:00 a.m., e.d.t., August 30, 1976, in the Commission's Hearing Room, Room 331, 701 E Streeet NW., Washington, D.C., for the purpose of (1) hearing oral argument with respect to the recommended determination of the presiding officer concerning whether there is reason to believe, in this matter, that there is a violation of section 337 of the Tariff Act of 1930; (2) hearing oral argument concerning appropriate relief in the event the Commission determines that there is reason to believe that there is a violation of section 337 and determines that there should be relief; and (3) receiving information and hearing oral argument, as provided for in section 210.14(a) of the Commission's Rules of Practice and Procedure (41 F.R. 17710), concerning relief, bonding, and the public interest factors set forth in sections 337(e) and (f) of the Tariff Act which the Commission is to consider in the event it determines there is reason to believe that there is a violation of section 337 and determines that there should be relief.

For the purpose of this hearing, parties wishing to make oral argument with respect to the recommended determination shall be limited to no more than 30 minutes time per party, 10 minutes of which may be reserved by complainant for rebuttal; and parties wishing to make oral argument with respect to relief shall be limited to no more than 15 minutes time per party.

The Commission will take information and hear argument concerning relief, bonding, and the public interest factors from all parties and interested persons and agencies. Each participant will be limited to no more than 30 minutes time for making his presentation, and each participant will be permitted an additional 5 minutes time for closing arguments after all of the 30 minute presentations have been concluded.

For the duration of this hearing, the intervenor parties, Wm. B. Reily & Co., Inc., Community Coffee Co., Inc., and American Coffee Co., Inc., will jointly share the time limits allocable to one party, since they are similarly situated.

Requests for appearances at the hearing should be filed, in writing, with the Secretary of the Commission at his office in Washington no later than noon, Friday, August 27, 1976. Requests should indicate the part of the hearing (i.e., with respect to the recommended determination; relief; or relief, bonding, and the public interest factors) in which the requesting person desires to participate.

NUCLEAR REGULATORY COMMISSION

[DOCKET NO. 50-261]

CAROLINA POWER AND LIGHT COMPANY

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 22 to Facility Operating License No. DPR-23 issued to Carolina Power & Light Company which revised Technical Specifications for operation of the H. B. Robinson Steam Electric Plant Unit No. 2, located in Darlington County, Hartsville, South Carolina. The amendment is effective as of its date of issuance.

The amendment requires operability and surveillance of shock suppressors (snubbers) required to protect the primary coolant system and all other safety related systems and components.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental statement, negative declaration or environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated January 28, 1976, (2) Amendment No. 22 to License No. DPR-23, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Hartsville Memorial Library, Home and Fifth Avenues, Hartsville, South Carolina. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 11th day of August 1976.

For the Nuclear Regulatory Commission.

ROBERT W. REID,
Chief, Operating Reactors Branch No. 4, Division of Operating Reactors.

[FR Doc.76-24393 Filed 8-20-76;8:45 am]

[Docket No. 50-10]

COMMONWEALTH EDISON CO.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 16 to Facility Operating License No. DPR-2, issued to the Commonwealth Edison Company (the licensee), which revised Technical Specifications for operation of Unit No. 1 of the Dresden Nuclear Power Station (the facility) located in Grundy County, Illinois. The license amendment is affective as of its date of issuance.

The license amendment revised Technical Specifications for the facility to require limiting conditions for operation and surveillance requirements for safety-related shock suppressors.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, negative declaration or environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated March 16, 1976, (2) Amendment No. 16 to License No. DPR-2, and (3) the Commission's concurrently issued related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 9th day of August 1976.

For the Nuclear Regulatory Commission.

DENNIS L. ZIEMANN,
Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

INTERNATIONAL ATOMIC ENERGY AGENCY DRAFT SAFETY GUIDE

Availability of Draft for Public Comment

The International Atomic Energy Agency (IAEA) is developing a limited number of internationally acceptable codes of practice and safety guides for nuclear power plants. These codes and guides will be developed in the following five areas: Government Organization, Siting, Design, Operations, and Quality Assurance. The purpose of these codes and guides is to provide IAEA guidance to countries beginning nuclear power programs.

The IAEA Codes of Practice and Safety Guides are developed in the following way. The IAEA receives and collates relevant existing information used by member countries. Using this collation as a starting point, an IAEA Working Group of a few experts then develops a preliminary draft. Following this, an IAEA Technical Review Committee reviews the preliminary draft and modifies it to the extent necessary to develop a draft acceptable to the IAEA Technical Review Committee. This draft Code of Practice or Safety Guide is then sent to the IAEA Senior Advisory Group which reviews and modifies the draft as necessary to reach agreement on the draft and then forwards it to the IAEA Secretariat to obtain comments from the member states.

As a part of this program, Safety Guide SG-S4 "Population Distribution Around Nuclear Power Plants" has been developed and the NRC staff is soliciting comments on this Guide from the U.S. public.

An IAEA Working Group consisting of Mr. L. Namestek of Czechoslovakia, Mr. R. Gerald of France, Mr. T. Sarma of India, Mr. W. Gutschmidt of the Federal Republic of Germany, and Mr. W. Ramsay (Resources for the Future) of the United States developed the draft from an IAEA collation during a meeting that was held in Vienna, Austria on June 28 to July 16, 1976.

As the next step in its development the draft Safety Guide is scheduled to be reviewed by the IAEA Technical Review Committee on Siting at a meeting in Vienna, Austria on September 27–October 1, 1976. Comments received by September 15, 1976 will be useful to this review. Single copies of this draft may be obtained by a written request to the Director, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

(5 U.S.C. 522(a))

Dated at Rockville, Maryland, this 12th day of August 1976.

For the Nuclear Regulatory Commission.

ROBERT B. MINOGUE,
Director, Office of Standards Development.

INTERNATIONAL ATOMIC ENERGY AGENCY DRAFT SAFETY GUIDE

Availability of Draft for Public Comment

The International Atomic Energy Agency (IAEA) is developing a limited number of internationally acceptable codes of practice and safety guides for nuclear power plants. These codes and guides will be developed in the following five areas: Government Organization, Siting, Design, Operations, and Quality Assurance. The purpose of these codes and guides is to provide IAEA guidance to countries beginning nuclear power programs.

The IAEA Codes of Practice and Safety Guides are developed in the following way. The IAEA receives and collates relevant existing information used by member countries. Using this collation as a starting point, an IAEA Working Group of a few experts then develops a preliminary draft. Following this, an IAEA Technical Review Committee reviews the preliminary draft and modifies it to the extent necessary to develop a draft acceptable to the IAEA Technical Review Committee. This draft Code of Practice or Safety Guide is then sent to the IAEA Senior Advisory Group which reviews and modifies the draft as necessary to reach agreement on the draft and then forwards it to the IAEA Secretariat to obtain comments from the member states.

As a part of this program, Safety Guide SG–S3b "Meteorology—Extreme Meteorological Conditions in Nuclear Power Plant Siting" is being developed. The draft of this Safety Guide was approved by the IAEA Technical Review Committee on Siting which met in June 1976.

As the next step in its development the draft Safety Guide is scheduled to be reviewed by the IAEA Senior Advisory Group at a meeting in Vienna, Austria on December 6–10, 1976. Comments received by September 30, 1976 will be useful to this review. Single copies of this draft may be obtained by a written request to the Director, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

Docket Nos. 50-282 and 50-306

NORTHERN STATES POWER CO.

Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 14 and 8 to Facility Operating License Nos. DPR–42 and DPR–60, issued to the Northern States Power Company (the licensee), which revised Technical Specifications for operation of Unit Nos. 1 and 2 of the Prairie Island Nuclear Generating Plant (the facilities) located in Goodhue County, Minnesota. The amendments are effective as of their date of issuance.

The amendments specify operability and surveillance requirements for shock suppressors (snubbers) to protect the primary coolant system and all other safety related systems and components of the facilities.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental statement, negative declaration or environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendments dated April 30, 1976, (2) Amendment No. 14 and 8 to License Nos. DPR–42 and DPR–60, respectively, and (3) the Commission's concurrently issued related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at The Environmental Conservation Library of the Minneapolis Public Library, 300 Nicollet Mall, Minneapolis, Minnesota 55401. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 11th day of August 1976.

For the Nuclear Regulatory Commission.

DENNIS L. ZIEMANN,
Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

[FR Doc.76-24391 Filed 8-20-76;8:45 am]

[Docket Nos. 50-282 and 50-306]

NORTHERN STATES POWER CO.

Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 15 and 9 to Facility Operating License Nos. DPR–42 and DPR–60, issued to the Northern States Power Company (the licensee), which revised Technical Specifications for operation of Units 1 and 2 of the Prairie Island Nuclear Generating Plant (the facilities) located in Goodhue County, Minnesota. The amendments are effective as of their date of issuance.

The amendments revised the Appendix A portion of the Technical Specifications for the facilities to allow a one-month extension of the maximum interval for refueling outage surveillance tests for the first operating cycle of Unit No. 2 of the Prairie Island Nuclear Generating Plant. This action also incorporated a temporary exemption from the requirements of Section III.D of Appendix J of 10 CFR Part 50 that allows containment leak rate tests for the first operating cycle of Unit No. 2 to be postponed for one month.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement, negative declaration or environmental impact appraisal need not be prepared in connection with issuance of the amendments.

For further details with respect to this action, see (1) the application for amendment dated May 27, 1976, (2) Amendment Nos. 15 and 9 to License Nos. DPR–42 and DPR–60, respectively, (3) the Commission's concurrently issued related Safety Evaluation, and (4) the Commission's letter to the Northern States Power Company being issued concurrently with this Notice. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at The Environmental Conservation Library of the Minneapolis Public Library, 300 Nicollet Mall, Minneapolis, Minnesota 55401. A copy of items (2), (3) and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 11th day of August 1976.

For the Nuclear Regulatory Commission.

DENNIS L. ZIEMANN,
Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS

Proposed Meetings

In order to provide advance information regarding proposed meetings of ACRS Subcommittees, Working Groups, and the full Committee, the following preliminary schedule is being published. This preliminary schedule reflects the current situation, taking into account additional meetings which have been scheduled and meetings which have been postponed or cancelled since the list of proposed meetings published in FR Vol. 41, Monday, July 19, 1976, page 29764. Those meetings that are definitely scheduled have had, or will have, an individual notice published in the FEDERAL REGISTER approximately 15 days (or more) prior to the meeting. These Subcommittee and Working Group meetings for which it is anticipated that there will be a portion or all of the meeting open to the public are indicated by an asterisk (*). It is expected that the sessions of the full Committee meeting designated by an asterisk (*) will be open in whole or in part to the public. Information as to whether a meeting has been firmly scheduled, cancelled, or rescheduled, or whether changes have been made in the agenda for the September 9–11, 1976 ACRS full Committee meeting can be obtained by a prepaid telephone call to the Office of the Executive Director of the Committee (telephone 202/634–1406, Attn: Mary E. Vanderholt) between 8:15 a.m. and 5 p.m., e.d.t.

SUBCOMMITTEE AND WORKING GROUP MEETINGS

Peaking Factors, August 20, 1976, Washington, DC to continue discussion of methods of measuring power distribution in reactors whose cores are fabricated by the Babcock and Wilcox Company. Notice has been published in FR Vol. 41, August 5, 1976, page 32796.

Environmental, August 24 and 25, 1976, Washington, DC to discuss proposed revisions to Regulatory Guides on emergency planning and occupation radiation exposure. Notice has been published in FR Vol. 41, August 9, 1976, page 33341.

Montague Nuclear Power Station, Units 1 and 2, August 26–27, 1976, Turners Falls, MA to review the application of the Northeast Nuclear Energy Company for a permit to construct Units 1 and 2. Notice has been published in FR Vol. 41, August 9, 1976, page 33342.

Diablo Canyon Nuclear Station, Unit 2, rescheduled from August 31 to September 29, 1976, Los Angeles, CA.

Emergency Core Cooling Systems (ECCS), September 2, 1976, Washington, DC to discuss the effect of upper-head injection (UHI) on the Westinghouse Electric Corporation's analytical models formulated to meet current ECCS criteria. Notice has been published in FR Vol. 41, August 16, 1976, page 34705.

Regulatory Guides, September 8, 1976, Washington, DC to review working papers regarding future Regulatory Guides and proposed changes to existing Guides.

Three Mile Island Nuclear Station, Unit 2, September 23–24, 1976, Harrisburg, PA to review the application of the Metropolitan Edison Company for an operating license.

Clinch River Breeder Reactor, September 28–29, 1976, Oak Ridge, TN to develop information for consideration by the ACRS in its review of the combined application of the U.S. Energy Research and Development Administration, the Tennessee Valley Authority, and the Project Management Corporation for a permit to construct this nuclear power plant.

Diablo Canyon Nuclear Power Station, Units 1 and 2, September 29, 1976 (rescheduled from August 31, 1976), Los Angeles, CA to continue the review of the application of the Pacific Gas and Electric Company for an operating license for Units 1 and 2. Notice has been published in FR Vol. 41, August 16, 1976, page 34704 and notice of the change of date appears elsewhere in this issue.

Floating Nuclear Plant, September 30–October 1, 1976, Los Angeles, CA to review the liquid pathway study, emergency core cooling, and probabilities of shipping accidents as part of the review for a manufacturing license.

Marble Hill Nuclear Generating Station, Units 1 and 2, October 1, 1976, Louisville, KY to review the application of the Public Service Company of Indiana for a permit to construct Units 1 and 2.

Reactor Safety Study, October 12, 1976 (tentative), Washington, DC to continue Working Group review of WASH–1400 (NUREG–75/014), "An Assessment of Accident Risks in U.S. Commercial Nuclear Power Plants."

North Anna Power Station, Units 1 and 2, October 13, 1976, Washington, DC. Concurrent meetings will be held to review steam generator and reactor coolant pump support questions at one meeting, and to continue the review of the application of the Virginia Electric Power Company for an operating license for Units 1 and 2 at the other meeting.

San Joaquin Nuclear Project, October 29, 1976, Bakersfield, CA to develop information for consideration by the ACRS in its review of the report on the suitability of the proposed site of the Department of Water and Power of the City of Los Angeles for the San Joaquin Nuclear Project.

FULL COMMITTEE MEETINGS

September 9–11, 1976

A. *Montague Nuclear Power Station, Units 1 and 2—Construction Permit Review

B. *Emergency Core Cooling Systems Upper-Head Injection—Review of Analytical Models

October 14–16, 1976

Agenda to be announced.

Dated: August 17, 1976.

SAMUEL J. CHILK,
Secretary of the Commission.

[FR Doc.76-24625 Filed 8-20-76;8:45 am]

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS; SUBCOMMITTEE ON THE DIABLO CANYON NUCLEAR POWER STATION UNITS 1 AND 2

Change of Meeting Date

The Aug. 31, 1976 meeting of the ACRS Subcommitte on the Diablo Canyon Nuclear Power Station, Units 1 and 2, announced in FR Vol. 41, page 34704, Aug. 16, 1976 will be held on Sept. 29, 1976 at the same location.

Persons desiring to mail written comments may do so as indicated in the FR notice cited above. Comments postmarked no later than Sept. 22, 1976 will normally be received in time to be considered at this meeting.

Further information regarding the meeting can be obtained by a prepaid telephone call on Sept. 28, 1976 to the Office of the Executive Director of the Committee (telephone 202/634–1374 ATTN: Mr. John C. McKinley) between 8:15 a.m. and 5 p.m., e.d.t.

A copy of the transcript of the open portion of the meeting and a copy of the minutes of the meeting will be available for inspection on October 6, 1976 and December 29, 1976, respectively, at the NRC Public Document Room, 1717 H Street NW., Washington, DC 20555 and at the San Luis Obispo County Free Library, San Luis Obispo, CA 93406.

All other matters pertaining to this meeting remain unchanged.

Dated: August 17, 1976.

SAMUEL J. CHILK,
Secretary of the Commission.

[FR Doc.76-24626 Filed 8-20-76;8:45 am]

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS; SUBCOMMITTEE ON REGULATORY GUIDES

Meeting

In accordance with the purposes of sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b.), the Advisory Committee on Reactor Safeguards Subcommittee on Regulatory Guides will hold a meeting on September 8, 1976 in Room 1062, 1717 H Street, NW., Washington, DC 20555. This meeting will have both open and closed sessions.

The following constitutes that portion of the Subcommittee's agenda for the above meeting which will be open to the public:

Wednesday, September 8, 1976, 9 a.m. until about 11 a.m. The Subcommittee will hear presentations from the NRC Staff and will hold discussions with this group pertinent to the following items:

(1) Regulatory Guide 1.106, Revision 1, "Thermal Overload Protection for Electric Motors on Motor-Operated Valves."

(2) Regulatory Guide 1.107, Revision 1, "Qualifications for Cement Grouting for Prestressing Tendons in Containment Structures."

In connection with the above agenda items, the Subcommittee may hold one or more Executive Sessions, not open to the public, at approximately 8:30 a.m. and 11 a.m. to consider matters related to the above reviews. These sessions will involve an exchange of opinions and discussions of preliminary views and recommendations of Subcommittee members and internal deliberations for the purpose of formulating recommendations to the ACRS.

After the above portion of the meeting is concluded, the Subcommittee will meet in closed session with the NRC Staff and any consultants at about 11 a.m. until the close of business to discuss working papers on Regulatory Guide 1.XX, "Acceptable Model and Related Statistical Methods for Analysis of Fuel Densification."

This portion of the meeting may include Executive Sessions both before and after the closed session with the NRC Staff.

I have determined, in accordance with subsection 10(d) of Pub. L. 92–463, that it is necessary to conduct the above closed sessions to protect the free interchange of internal views in the final stages of the Subcommittee's deliberative process and that other closed sessions will be held to discuss and exchange views on

V 41 164 AUG 23 76 UMI

working papers (5 U.S.C. 552(b)(5)). Separation of factual material from individuals' advice, opinions, and recommendations while closed Executive Sessions are in progress is considered impractical.

Practical considerations may dictate alterations in the above agenda or schedule. The Chairman of the Subcommittee is empowered to conduct the meeting in a manner that, in his judgment, will facilitate the orderly conduct of business, including provisions to carry over an incompleted open session from one day to the next.

With respect to public participation in the open portion of the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding Regulatory Guides 1.106 and 1.107 may do so by providing a readily reproducible copy to the Subcommittee at the beginning of the meeting. Such comments shall be based upon documents on file and available for public inspection at the NRC Public Document Room, 1717 H St., NW., Washington, DC 20555.

Persons desiring to mail written comments may do so by sending a readily reproducible copy thereof in time for consideration at this meeting. Comments postmarked no later than September 1, 1976 to Mr. G. R. Quittschreiber, ACRS, NRC, Washington, DC 20555 will normally be received in time to be considered at this meeting.

(b) Those persons wishing to make an oral statement at the meeting should make a written request to do so, identifying the topics and desired presentation time so that appropriate arrangements can be made. The Committee will receive oral statements on topics relevant to the Committee's purview at an appropriate time chosen by the Chairman of the Subcommittee.

(c) Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call on September 7, 1976 to the Office of the Executive Director of the Committee (telephone 22/634–1374, Attn: Mr. G. R. Quittschreiber) between 8:15 a.m. and 5 p.m., e.d.t.

(d) Questions may be propounded only by members of the Subcommittee and its consultants.

(e) The use of still, motion picture, and television cameras, the physical installation and presence of which will not interfere with the conduct of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will not, however, be allowed while the meeting is in session.

(f) A copy of the transcript of the open portion of the meeting will be available for inspection on or after September 15, 1976 at the NRC Public Document Room, 1717 H St., NW., Washington, D.C. 20555.

Copies of the minutes of the meeting will be made available for inspection at the NRC Public Document Room, 1717 H St., NW., Washington, D.C. 20555 after December 8, 1976. Copies may be obtained upon payment of appropriate charges.

Dated: August 17, 1976.

SAMUEL J. CHILK,
Secretary of the Commission.

[FR Doc.76-24627 Filed 8-20-76;8:45 am]

[Docket No. 50-318]

BALTIMORE GAS AND ELECTRIC CO., CALVERT CLIFFS NUCLEAR PLANT, UNIT 2

Issuance of a Facility Operating License

Notice is hereby given that the Nuclear Regulatory Commission (the Commission) has issue Facility Operating License No. DPR–69 to Baltimore Gas and Electric Company authorizing operation of the Calvert Cliffs Nuclear Plant, Unit 2 in accordance with the provisions of the license and the Technical Specifications. The Calvert Cliffs Nuclear Plant, Unit 2 is a pressurized water nuclear reactor located at the licensee's site in Calvert County, Maryland, about 10½ miles southeast of Prince Frederick, Maryland.

The Commission has made appropriate findings regarding the environmental impact associated with issuing an operating license for testing purposes. These findings are contained in documents entitled "Negative Declaration Regarding Issuance of a Limited Facility License DPR–69, Calvert Cliffs Nuclear Power Plant, Unit 2" and "Environmental Impact Appraisal of Issuance of Fuel Loading, Criticality Lower-Power Testing Operating License for Calvert Cliffs Nuclear Power Plant, Unit 2". Pursuant to the findings in these documents, Facility Operating License No. DPR–69 authorizes operation of the facility at a reactor core power level not to exceed 25.6 megawatts thermal for testing purposes. License No. DPR–69 is conditioned to provide a sequential approach to one percent power by accounting for a series of incomplete construction items, preoperational tests, startup tests and other items which must be completed prior to attaining one percent power, and provides for further Commission approval at various stages of these activities.

The Commission has made appropriate findings as required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license. The application for the license complies with the standards and requirements of the Act and the Commission's rules and regulations.

A copy of (1) Facility Operating License No. DPR–69, complete with Technical Specifications (Appendices "A" and "B"); (2) the "Negative Declaration Regarding Issuance of a Limited Facility License DPR–69, Calvert Cliffs Nuclear Power Plant, Unit 2," (3) the Environmental Impact Appraisal of Issuance of Fuel Loading, Criticality Low-Power Testing Operating License for Calvert Cliffs Nuclear Power Plant, Unit 2," (4) the report of the Advisory Committee on Reactor Safeguards, dated January 14, 1974; (5) the Office of Nuclear Reactor Regulation's Safety Evaluation Report and Supplements 1, 2, 3, 4, 5 and 6 thereto, dated August 28, 1972, May 4, 1973, December 4, 1973, June 14, 1974, December 27, 1974, August 10, 1976, and August 13, 1976, respectively; (6) the Final Safety Analysis Report and amendments thereto; (7) the applicant's Environmental Report dated November 1970 and supplements thereto; (8) the Draft Environmental Statement dated January 1972; and (9) the Final Environmental Statement dated April 1973, are available for public inspection at the Commission's Public Document Room at 1717 H Street, NW., Washington, D.C. and the Calvert County Library, Prince Frederick, Maryland. Single copies of items (1), (2), (3), (4), (5) and (9) may be obtained upon request addressed to the United States Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Project Management.

Dated at Bethesda, Maryland, this 13th day of August 1976.

For the Nuclear Regulatory Commission.

R. C. DEYOUNG,
Deputy Director, Division of Project Management, Office of Nuclear Reactor Regulation.

[FR Doc.76-24629 Filed 8-20-76;8:45 am]

[Docket No. 50-318]

CALVERT CLIFFS NUCLEAR POWER PLANT, UNIT 2

Negative Declaration Regarding Issuance of a Limited Facility License DPR–69

The U.S. Nuclear Regulatory Commission (the Commission) is issuing a limited Facility Operating License No. DPR–69 to Baltimore Gas and Electric Company, for authorizing certain operations of the Calvert Cliffs Nuclear Power Plant, Unit 2 located in Calvert County, Maryland.

The license would authorize operation of the facility at not more than 1 percent of full power for the purpose of testing the facility.

The Commission has prepared an environmental impact appraisal for the limited license and has concluded that an environmental impact statement for this particular action is not warranted because there will be no environmental impact significantly affecting the quality of the human environment.

The environmental impact appraisal is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Calvert Cliffs Library, Prince Frederick, Maryland 20678. A copy may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Project Management.

Dated at Bethesda, Maryland, this 13th day of August 1976.

For the Nuclear Regulatory Commission.

DANIEL R. MULLER,
Deputy Director, Division of Site Safety and Environmental Analysis Office of Nuclear Reactor Regulation.

[FR Doc.76-24630 Filed 8-20-76;8:45 am]

[Docket Nos. 50-329 and 50-330]

CONSUMERS POWER CO.

Establishment of Atomic Safety and Licensing Board

Pursuant to delegation by the Commission dated December 29, 1972, published in the FEDERAL REGISTER (37 FR 28710) and §§ 2.105, 2.700, 2.702, 2.714, 2.714a, 2.717 and 2.721 of the Commission's Regulations, all as amended, an Atomic Safety and Licensing Board is being established in the following proceeding:

CONSUMERS POWER CO.

(MIDLAND PLANT, UNITS NO.1 AND NO.2) CONSTRUCTION PERMIT NOS. CPPR–81 AND CPPR–82

This action is in reference to the Memorandum and Order of the Commission dated August 16, 1976, directing that an Atomic Safety and Licensing Board for the Midland Facility be reconvened for the limited purpose of considering whether construction permits for that facility should be continued, modified or suspended until an interim fuel cycle rule has been made effective.

The Members of the Board and their addresses are as follows:

Daniel M. Head, Esq., Chairman, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

Dr. Emmeth A. Luebke, Member, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

Dr. J. Venn Leeds, Jr., Member, 10807 Atwell, Houston, Texas 77096.

Dated at Bethesda, Maryland, this 17th day of August 1976.

Atomic Safety and Licensing Board Panel.

ROBERT M. LAZO,
Acting Chairman.

[FR Doc.76-24631 Filed 8-20-76;8:45 am]

[Docket No. 50-272]

PUBLIC SERVICE ELECTRIC AND GAS CO., ET AL.

Issuance of a Facility Operating License

Notice is hereby given that the Nuclear Regulatory Commission (the Commission) has issued Facility Operating License No. DPR–70 to Public Service Electric and Gas Company, Philadelphia Electric Company, Delmarva Power and Light Company, and Atlantic City Electric Company. License No. DPR–70 authorizes operation of the Salem Nuclear Generating Station, Unit No. 1 by the Public Service Electric and Gas Company in accordance with the provisions of the license and the Technical Specifications. The Salem Nuclear Generating Station, Unit No. 1 is a pressurized water nuclear reactor located at the licensees' site in Lower Alloways Creek Township, Salem County, New Jersey.

The Commission has made appropriate findings regarding the environmental impact associated with issuing an operating license for testing purposes. These findings are contained in documents entitled, "Negative Declaration Regarding Issuance of a Limited Facility License DPR–70, Salem Nuclear Generating Station, Unit No. 1," and "Environmental Impact Appraisal of Issuance of Fuel Loading, Criticality Low-Power Testing Operating License for Salem Nuclear Generating Station Unit No. 1." Pursuant to the findings in these documents, Facility Operating License No. DPR–70 authorizes operation of the Salem Nuclear Generating Station, Unit No. 1 at a reactor core power level not to exceed 33.38 megawatts thermal for testing purposes. License No. DPR–70 is conditioned to provide a sequential approach to one percent power by accounting for a series of incomplete construction items, preoperational tests, startup tests and other items which must be completed prior to attaining one percent power, and provides for further Commission approval at various stages of these activities.

The Commission has made appropriate findings as required by the Atomic Energy Act (the Act) of 1954, as amended, and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license. The application for the license complies with the standards and requirements of the Act and the Commission's rules and regulations.

A copy of (1) Facility Operating Licensing No. DPR–70, complete with Attachment 1 and Technical Specifications (Appendices "A" and "B"); (2) the "Negative Declaration Regarding Issuance of a Limited Facility License DPR–70, Salem Nuclear Generating Station, Unit No. 1," (3) the "Environmental Impact Appraisal of Issuance of Fuel Loading, Criticality Low-Power Testing Operating License for Salem Nuclear Generating Station Unit No. 1," (4) the report of the Advisory Committee on Reactor Safeguards, dated February 14, 1975; (5) the Office of Nuclear Reactor Regulation's Safety Evaluation Report and Supplements Nos. 1 and 2 thereto, dated October 11, 1974, June 28, 1976, and August 13, 1976 respectively; (6) the Final Safety Analysis Report and amendments thereto; (7) the applicants' Environmental Report dated June 30, 1970 and supplements thereto; (8) the Draft Environmental Statement dated October 1972; and (9) the Final Environmental Statement dated April 1973, are available for public inspection at the Commission's Public Document Room at 1717 H Street, N.W., Washington, D.C., and the Salem Free Public Library, 112 West Broadway, Salem, New Jersey. Single copies of items (1), (2), (3), (4), (5) and (9) may be obtained upon request addressed to the United States Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Project Management.

Dated at Bethesda, Maryland, this 13th day of August 1976.

For the Nuclear Regulatory Commission.

R. C. DEYOUNG,
Deputy Director, Division of Project Management, Office of Nuclear Reactor Regulation.

[FR Doc.76-24632 Filed 8-20-76;8:45 am]

[Docket No. 50-272]

SALEM NUCLEAR GENERATING STATION UNIT NO. 1

Negative Declaration Regarding Issuance of a Limited Facility License DPR–70

The U.S. Nuclear Regulatory Commission (the Commission) is issuing a limited Facility Operating License No. DPR–70 to Public Service Electric and Gas Company, for authorizing certain operations of the Salem Nuclear Generating Station Unit No. 1, located in Salem County, New Jersey.

The license would authorize operation of the facility at not more than 1 percent of full power for the purpose of testing the facility.

The Commission has prepared an environmental impact appraisal for the limited license and has concluded that an environmental impact statement for this particular action is not warranted because there will be no environmental impact significantly affecting the quality of the human environment.

The environmental impact appraisal is available for public inspection at the Commission's Public Document, 1717 H Street, NW., Washington, D.C., and at the Salem Free Public Library, 112 West Broadway, Salem, New Jersey 08079. A copy may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Project Management.

Dated at Bethesda, Maryland, this 13th day of August 1976.

For the Nuclear Regulatory Commission.

DANIEL R. MULLER,
Deputy Director, Division of Site Safety and Environmental Aanalysis, Office of Nuclear Reactor Regulation.

[FR Doc.76-24633 Filed 8-20-76;8:45 am]

[Docket No. STN 50-485]

ROCHESTER GAS AND ELECTRIC CORP. (STERLING POWER PROJECT NUCLEAR UNIT NO. 1)

Evidentiary Hearing

The evidentiary hearing in this matter will resume on Monday, August 30, 1976, at 1:30 p.m., at the Green Room, First Floor, Holiday Harbor Hotel, East

V 41 164 AUG 23 76 UM

Bridge Street (Route 57), Oswego, New York. The hearing will continue through Friday, September 3, 1976.

It is so ordered.

Dated at Bethesda, Maryland, this 16th day of August 1976.

The Atomic Safety and Licensing Board.

EDWARD LUTON,
Chairman.

[FR Doc.76-24628 Filed 8-20-76;8:45 am]

[Docket No. 50-271]

VERMONT YANKEE NUCLEAR POWER CORP.

Establishment of Atomic Safety and Licensing Board

Pursuant to delegation by the Commission dated December 29, 1972, published in the FEDERAL REGISTER (37 FR 28710) and §§ 2.105, 2.700, 2.712, 2.714, 2.714a, 2.717 and 2.721 of the Commission's Regulations, all as amended, an Atomic Safety and Licensing Board is being established in the following proceeding:

VERMONT YANKEE NUCLEAR POWER CORPORATION

(VERMONT YANKEE NUCLEAR POWER STATION) FACILITY OPERATING LICENSE NO. DPR-28

This action is in reference to the Memorandum and Order of the Commission dated August 16, 1976, directing that an Atomic Safety and Licensing Board for the Vermont Yankee Facility be reconvened for the limited purpose of considering whether the operating license for that facility should be continued, modified or suspended until an interim fuel cycle rule has been made effective.

The Members of the Board and their addresses are as follows:

Samuel W. Jensch, Esq., Chairman, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

Dr. David B. Hall, Member, Los Alamos Scientific Laboratory, P.O. Box 1663, Los Alamos, New Mexico 87544.

Dr. Paul W. Purdom, Member, 245 Gulph Hills Road, Radnor, Pennsylvania 19087.

Dated at Bethesda, Maryland, this 17th day of August 1976.

ATOMIC SAFETY AND LICENSING BOARD PANEL,
ROBERT M. LAZO,
Acting Chairman.

[FR Doc.76-24634 Filed 8-20-76;8:45 am]

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS

Meeting

In accordance with the purposes of Sections 29 and 182 b. of the Atomic Energy Act (42 U.S.C. 2039, 2232 b.), the Advisory Committee on Reactor Safeguards will hold a meeting on September 9-11, 1976, in Room 1046, 1717 H Street, NW, Washington, DC.

The agenda for the subject meeting will be as follows:

Thursday, September 9, 1976

8:30 a.m. to 9:30 a.m.: Executive Session (Closed)—The Committee will meet in closed executive session to exchange and discuss the personal opinions of individual members leading to the formulation of advice and recommendations regarding candidates for ACRS membership, procedures for conduct of ACRS meetings and related records, and proposed procedures for ACRS discussions with representatives of foreign governments. The Committee will also discuss the individual opinions and recommendations of ACRS members and consultants who may be present regarding proposed construction of the Montague Nuclear Power Station Units 1 & 2.

9:30 a.m. to 1:30 p.m.: Montague Nuclear Power Station Units 1 & 2 (Open)—The Committee will meet with representatives of the applicants and the NRC Staff to hear presentations and hold discussions regarding the request for a construction permit for this facility. Portions of this session will be closed if required to discuss proprietary information related to the design, construction or operation of these units. Closed portions will also be held if necessary to discuss security provisions for this facility and for Committee deliberative sessions.

2:30 p.m. to 3:15 p.m.: Executive Session (Closed)—The Committee will discuss the individual opinions and recommendations of ACRS members and consultants who may be present regarding the request for approval of the Upper Head Injection System proposed for Westinghouse Nuclear Power Plants.

3:15 p.m. to 5 p.m.: Upper Head Injection System (Open)—The Committee will hear presentations and hold discussions regarding the request for approval of this proposed change in the emergency core cooling systems for Westinghouse Electric Corporation nuclear steam supply systems. Portions of this session will be closed if required to discuss proprietary material related to this system modification. Closed Sessions will also be held for Committee deliberative sessions.

5 p.m. to 6:30 p.m.: Executive Session (Closed)—The Committee will meet in closed session to exchange personal opinions and recommendations of ACRS members leading to the formulation of advice and recommendations related to the evaluation of the Heavy Section Steel Technology Program and the Crystal River Nuclear Generating Plant and proposed Regulatory Guides.

Friday, September 10, 1976

8:30 a.m. to 9:30 a.m.: Executive Session (Closed)—The Committee will meet with the Executive Director for Operations to discuss NRC Staff review of internal practices and policies regarding backfitting of nuclear facilities and inspection of nuclear facilities.

9:30 a.m. to 11 a.m.: Meeting with NRC Staff (Open)—The Committee will meet with members of the NRC Staff to hear presentations and to discuss reactor operating experience and licensing actions, resolution of generic items related to light-water reactors and the future schedule for ACRS activities.

11 a.m. to 12:30 p.m.: Executive Session (Closed)—The Committee will meet in closed session to exchange and discuss the personal opinions and recommendations of individual members leading to the formulation of advice regarding items considered at this meeting.

1:30 p.m. to 3 p.m.: Report on Enrichment Facilities (Closed)—The Committee will hear presentations by representatives of the NRC Staff and ERDA regarding the design of and security provisions related to nuclear fuel enrichment facilities. This portion of the meeting will be closed to discuss material classified as Restricted Data.

3 p.m. to 6:30 p.m.: Executive Session (Closed)—The Committee will meet in closed session to exchange and discuss the personal opinions of ACRS members leading to the formulation of advice regarding management of radioactive wastes and safeguards provisions for nuclear facilities.

Saturday, September 11, 1976

8:30 a.m. to 4 p.m.: Executive Session (Closed)—The Committee will meet in closed executive session to exchange and discuss personal opinions and recommendations leading to the formulation of advice with respect to the items considered at this meeting. Proposed ACRS activities and reports on generic matters such as underground siting of nuclear plants and safety of mixed-oxide fuels will also be discussed.

I have determined in accordance with Subsection 10(d) of Public Law 92-463 that it is necessary to close portions of the meeting as noted above to protect classified restricted data (5 U.S.C. 552 (b)(3)), proprietary data (5 U.S.C. 552 (b)(4)), to protect the free exchange of opinion during the Committee's deliberative process (5 U.S.C. 552(b)(5)). These closed sessions will cosist primarily of deliberative discussion among the Committee members leading to the formulation of advice and recommendations to the Nuclear Regulatory Commission. Separation of factual information from the individual advice, opinion or recommendations of ACRS members and consultants during this discussion is not considered practical.

Practical considerations may dictate alterations in the above agenda or schedule. The Chairman of the Committee is empowered to conduct the meeting in a manner that in his judgment will facilitate the orderly conduct of business, including provisions to carry over an incompleted open session from one day to the next.

With respect to public participation in the open portion of the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda items may do so by providing a readily reproducible copy to the Committee at the beginning of the meeting. Comments should be limited to safety related areas within the Committee's purview. Persons desiring to mail written comments may do so by mailing a readily reproducible

copy thereof in time for consideration at this meeting. Comments postmarked no later than September 2, 1976, to the Executive Director, Advisory Committee on Reactor Safeguards, Nuclear Regulatory Commission, Washington, DC 20555 will normally be received in time to be considered at this meeting. Background information concerning items to be considered at this meeting can be found in documents on file and available for public inspection at the Nuclear Regulatory Commission's Public Document Room, 1717 H Street, NW, Washington, DC 20555 and at the following Public Document Rooms:

Montague Nuclear Power Station, Units 1 & 2, Carnegie Library, Avenue A, Turner Falls, MA 01376.

(b) Those persons wishing to make oral statements regarding agenda items at the meeting should make a request to do so prior to the meeting, identifying the topics and desired presentation time so that appropriate arrangements can be made. The Committee will receive oral statements in safety related areas within the Committee's purview at an appropriate time chosen by the Chairman of the Committee.

(c) Further information regarding topics to be discussed, whether the meeting or portions of the meeting have been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements, and the time allotted therefor, can be obtained by a prepaid telephone call on September 8, 1976, to the Office of the Executive Director of the Committee (Telephone: 202-634-1371) between 8:15 AM and 5:00 PM, Eastern Time. It should be noted that the above schedule is tentative, based on the anticipated availability of related information, etc. It may be necessary to reschedule items to accommodate required changes. The ACRS Executive Director will be prepared to describe these changes on September 8, 1976.

(d) Questions may be propounded only by members of the Committee and its consultants.

(e) The use of still, movie, and television cameras, the physical installation and presence of which will not interfere with the course of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will not, however, be allowed while the meeting is in session.

(f) Persons with agreements or orders permitting access to proprietary information other than safeguards information may attend portions of ACRS meetings where this material is being discussed upon confirmation that such agreements are effective and relate to the material being discussed.

The Executive Director of the ACRS should be informed of such an agreement at least 3 days prior to the meeting so that the agreement can be confirmed and a determination can be made regarding the applicability of this agreement to the material that will be discussed during the meeting. Minimum information provided should include information regarding the date of the agreement, the scope of material included in the agreement, the project or projects involved, and the names and titles of the persons signing the agreement. Additional information may be requested to identify the specific agreement involved. A copy of the executed agreement should be provided to the Executive Director at the beginning of the meeting.

(g) A copy of the transcript of the open portions of the meeting will be available for inspection during the following workday at the Nuclear Regulatory Commission's Public Document Room, 1717 H Street, NW, Washington, DC. Copies of the minutes of the meeting will be made available for inspection at the Nuclear Regulatory Commission's Public Document Room, 1717 H Street, NW, Washington, DC, on or after December 10, 1976. Copies may be obtained upon payment of appropriate charges.

Dated: August 19, 1976.

SAMUEL J. CHILK,
Secretary of the Commission.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on 08/17/76 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

Requests for extension which appear to raise no significant issues are to be approved after brief notice thru this release.

Further information about the items on this daily list may be obtained from the clearance office, Office of Management and Budget, Washington, D.C. 20503 (202-395-4529), or from the reviewer listed.

REVISIONS

DEPARTMENT OF AGRICULTURE

Agricultural Stabilization and Conservation Service:
Report of Acreage and Marketing of Peanuts to Non-Established Buyers, MQ-98-1, Annually, Lowry, R. L., 395-3772.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

National Institutes of Health:

FEDERAL PROCUREMENT POLICY

Cost Comparisons Under OMB Circular A-76

Proposed Transmittal Memorandum to OMB Circular A-76, Providing Cost Factors to be Used in Determining the Cost of Government Commercial and Industrial Activities.

OMB Circular A-76, originally issued in 1966 and revised on August 30, 1967, states the Government's general policy of reliance on the private enterprise system for needed products and services. The Circular provides that exceptions to that policy may be justified when direct Government performance can be shown to be in the National interest. One basis for such an exception is a demonstrated cost saving from Government operation of a commercial or industrial activity. When executive agencies make a comparative cost analysis between commercial and Government sources, the cost to be incurred under each alternative must be determined in accordance with prescribed procedures.

The cost of commercial performance can be established primarily from a contract bid or proposal, but Government costs must be developed from less specific cost data. Circular A-76 states that Government costs must include: "all elements of compensation and allowances for both military and civilian personnel, including the full cost to the Government of retirement systems, calculated on a normal cost basis."

Both the employing agency and the employee contribute 7% of salary to the Civil Service Retirement System. The agency's 7% contribution is currently used in cost comparisons as the full cost to the Government, although it is widely recognized that the actual cost to the Government is substantially higher. The discrepancy results from the fact that agency and employee contributions are based on a "static" projection of the normal cost for the system; i.e., a projection which assumes that there will be no general increases in Civil Service wage

V 41 164 AUG 23 76 UMI

scales and no increases in benefit payments to retirees under the Consumer Price Index (CPI) escalator provisions. When these increases do occur, they create a deficit in funding of the system that is paid by additional Government contributions from general Treasury funds distributed over a thirty-year period. Underfunding prior to 1969 created an unfunded liability which is being stabilized by annual direct transfers of interest payments from the Treasury to the Civil Service Retirement Trust Fund.

In order to achieve greater accuracy 90801 Thoren 8–20–76 D. Lino Mach 52 and uniformity in agency cost studies, standard factors which reflect the full cost to the Government must be provided for use by all executive agencies. At the request of OMB, the Civil Service Commission developed cost factors for the Civil Service Retirement System and for Government contributions to employee insurance programs.

The retirement system factor was first approached from the standpoint of the cost of financing the system under current conditions, while excluding any cost attributable to past failures of the Government to make payments into the fund when due. The resulting figure, 19.9% of salary, included the agency contribution to the system, thirty-year payments to cover benefit improvements, and a portion of the interest on the unfunded liability. This retirement cost factor was criticized on the basis that it reflected the cost of financing obligations which have already been incurred, and that it did not include the impact of future salary and benefit increases, which must be anticipated. It was also recognized that a factor computed on this basis would increase each year as additional thirty-year payments are initiated. For example, the 19.9% factor, which was based on FY 1975 data, increased to 20.4% when recomputed with FY 1976 data.

An alternative approach was developed to determine a factor that reflects full Government cost for the system through the use of "dynamic" rather than "static" normal costs. Calculation of normal costs on a "dynamic" basis provides a more realistic measure of system costs by anticipating future changes in salaries, interest rates, and retirement benefits. This method has been recommended by the Board of Actuaries of the Civil Service Retirement System and the Comptroller General of the United States. Dynamic normal costs were calculated using the actuarial models of the Civil Service Retirement System.

In developing a cost factor on this basis, it was necessary to make economic assumptions about future average annual wage increases to civil service employee and average annual interest rates for money in the fund. Using empirical analyses of historical data and judgments as to how trends might change in the future, the following economic assumptions were developed:

Average annual real wage increase 1.3 percent.

Average annual real interest rate 1.6 percent.

The annual real interest rate of 1.6 percent was the prevailing rate between 1952 and 1964, our last period of sustained stability in inflation rates. If periods of erratic inflation had been included, the interest rate would have been lower. The average annual real wage increase was based on 1948–1973 real GNP growth per manhour worked, corrected for factors such as intersectoral shifts, and increased quality of workers. Data for 1974 and 1975 were excluded from the computation because of the greatly reduced GNP growth during those recession years. In addition, a conservative set of assumptions (from the point of view of retirement costs) was established, setting the real wage growth rate at 1.0 percent, and real interest rate at 2.0 percent. A third economic assumption that was required by the actuarial model was the expected rate of inflation. However, because the effect of different inflation rates proved to be essentially irrelevant, a zero inflation rate was used and the analysis was carried out in constant dollar terms.

The Civil Service Commission actuary was asked to calculate normal costs under the following three combinations of assumptions, assuming in addition that the "one percent kicker" on CPI initiated benefit increases will be discontinued.

Case	Annual real wage increase (percent)	Annual real interest rate (percent)
1	1.3	1.6
2	1.0	2.0
3	1.3	2.0

The actuary projected the costs of retirement in each case as a percentage of payroll costs. These were: Case 1, 36.6%; Case 2, 31.7%; and Case 3, 33.0%. Since the individual contributes 7 percent of his salary to the retirement system, costs to the Government become 29.6, 24.7, and 26.0 percent, respectively.

The 24.7% cost to the Government, which results from use of the set of assumptions most favorable to minimum retirement costs, has been selected for use in all cost comparisons under Circular A–76.

To ensure uniformity and consistency in cost studies performed by different agencies within the executive branch, the following Transmittal Memorandum to Circular A–76 has been prepared. All interested parties are invited to submit their views and comments on this memorandum for consideration by the Office of Federal Procurement Policy. Responses should be received by September 20, 1976 and should be addressed to:

Administrator for Federal Procurement Policy, Office of Management and Budget, 726 Jackson Place, NW, Washington, D.C. 20503.

HUGH E. WITT,
Administrator.

Subject: Policies for Acquiring Commercial or Industrial Products and Services for Government Use

1. *Purpose.* This Transmittal Memorandum provides guidance and specific cost factors to be used when agencies prepare a cost analysis under OMB Circular A–76.

2. *Background.* OMB Circular A–76 expresses the Government's general policy of relying upon the private enterprise system to supply its needs for products and services, in preference to engaging in commercial or industrial activity. This policy reflects the fundamental concept that the Government should generally perform only those functions which are governmental in nature and should utilize the competitive incentives of the private enterprise system to provide the products and services which are necessary to support governmental functions. Those commercial or industrial activities which the Government performs directly for itself are not inherently governmental functions, but rather are exceptions to the fundamental concept, and their performance by Government personnel must be justified as being in the National interest.

3. *Supplemental Guidance.* Circular A–76 sets forth specific circumstances under which it may be in the National interest for the Government to provide directly some products and services for its own use. One of these circumstances permits justification of Government commercial or industrial activity if a detailed comparative cost analysis demonstrates that Government performance would result in sufficient savings to justify involvement in such activity. However, the Circular does not require that a cost study be made in every case to support a decision in compliance with the policy preference for reliance on commercial sources. A cost analysis is not needed in circumstances where the Government's economic interests would be protected, such as the existence of a competitive commercial market, unless the agency has some unique economic advantage which would permit it to supply the needed product or service at less than commercial cost. In determining whether a cost study should be undertaken, consideration should be given to the delay and expense involved in a study sufficiently detailed and comprehensive to provide valid results.

Cost studies, when conducted, should be made in accordance with the guidelines in Section 6 of Circular A–76, and must cover all identifiable costs of both commercial and Government performance. Instructions for the determination of costs incurred by Government activities in providing products and services are set forth in paragraph 6.C. of the Circular. In computing the cost of civilian personnel services for a Government activity, the actual cost to the Government for employee benefits, such as retirement and insurance programs, must be included. Guidance in calculating these cost elements has been provided by the U.S. Civil Service Commission, which has determined current percentage factors for Government contributions to employee insurance programs and the full cost to the Government of the Civil Service Retirement System.

4. *Cost Factors.* (a) For the convenience of Federal agencies making cost studies, the following percentages of base pay will be used in computing the costs of civilian personnel services: Retirement, 24.7 percent; Health Insurance, 3.5 percent; Life Insurance, .5 percent.

(b) Cost comparisons made under the provisions of Circular A–76 should be sufficiently complete and documented to permit ready audit by qualified financial personnel. Copies will be made available to interested persons, on a cost reimbursable basis, when requested under the provisions of the Freedom of Information Act.

5. *Effective Date.* This Transmittal Memorandum is effective immediately.

6. *Inquiries.* Inquiries or requests for assistance should be directed to the Office of Federal Procurement Policy, telephone 395–3327.

PRIVACY PROTECTION STUDY COMMISSION

PERSONAL-DATA RECORD-KEEPING PRACTICES IN EDUCATIONAL INSTITUTIONS

Hearings

On October 7 and 8, 1976, the Privacy Protection Study Commission will hold public hearings on personal-data record-keeping practices in educational institutions including elementary, secondary, and post-secondary schools. The October 7 and 8 hearings will be held in Room 8544, Federal Building, 300 North Los Angeles Street, Los Angeles, California, from 9:30 a.m. to 5:00 p.m. on October 7 and from 9:00 a.m. to 5:00 p.m. on October 8. Additional hearings will also be held on the East coast at a date and place to be announced.

These two Commission hearings will consider the protections afforded parents and students by th Family Educational Rights and Privacy Act of 1974, (FERPA) 20 U.S.C. § 1232g, and the Federal regulations issued thereunder. Because FERPA and its implementing regulations represent one approach to establishing a nationwide fair information practices policy, the Commission is interested in hearing about its feasibility and practical effects. In particular, the Commission wishes to understand the effects of FERPA on the record-keeping practices of educational institutions as applied in different school settings and in the context of different State statutes. Necessarily included in this inquiry will be the school records about students which are used by institutions that share responsibilities with educational institutions—for example, juvenile courts, law enforcement units, social service agencies, and persons conducting research in schools.

Section I below indicates the information needed for both sets of hearings. Section II focuses specifically on the matters to be handled in the Los Angeles hearings in October. As to the East Coast hearings, they will be partly devoted to matters not treated in the Los Angeles hearings, such as questions pertaining to the practices of organizations maintaining personal records related to school admissions or financial aid; resources and strategy for implementing FERPA; sanctions for violations of FERPA; and computer-based information systems. The notice announcing the time and place of the East Coast hearings will give further details on their subject matter.

To assist in the development of these inquiries the Commission wishes to learn about the experiences and views of interested parties, including students, parents, educational institutions and members of the public, prior to the Los Angeles hearings. Statements should be made in writing to the Executive Director, Privacy Protection Study Commission, Suite 424 2120 L Street, N.W., Washington, D.C. 20506, and should be received in the Commission offices no later than September 24, 1976.

I. REQUEST FOR BACKGROUND INFORMATION

The Commission needs additional background information on the actual practices of educational institutions that maintain records on students, former students, parents, and applicants. Accordingly, written submissions which deal with the following topics are requested.

The Commission needs detailed descriptions of the record-keeping systems in which different types of educational institutions maintain information on students, parents, former students, and applicants. FERPA recognizes six categories for records maintained by educational institutions: (a) education records; (b) medical records; (c) law enforcement records; (d) directory information; (e) research records; (f) "desk drawer" notes. In each case, the Commission would like to learn what type of information is typically contained in such records.

In addition, the Commission needs detailed answers to the following questions regarding the management of information that educational institutions maintain on students, former students, parents, and applicants. (1) Are explicit criteria of data relevance and reliability established and enforced in the day-to-day record-keeping practices of an educational institution and if so, who establishes them and what are they? (2) What training is provided staff who work with records about individuals? (3) What information is kept permanently and what is destroyed? (4) What information is maintained by electronic means? (5) What precautions are taken to avoid unauthorized access to information? (6) How are records linked within an institution and with records maintained by other organizations, including other educational institutions? (7) What procedures and standards govern routine use of recorded personal information by employees and other users? (8) What institutional policies and practices govern the security, sharing, and release of informal ("desk drawer") records and notes about students developed by individual teachers, counselors, law enforcement officers, medical personnel, and others working directly with students in schools? (9) How and why do breaches of policy, good practice, or security occur?

Although the following topics will be covered more extensively in the later East Coast hearings on FERPA, the Commission would also like written comments and background information on them at this time.

1. Practices of organizations that provide testing or screening services related to admissions and financial aid.

2. Encroachments on students' and parents' control over the dissemination of information about themselves which FERPA may have unintentionally ratified.

3. Resources and strategy for implementation of FERPA by the Department of Health, Education and Welfare (DHEW).

4. Adequacy of the current sanctions (withholding Federal funds) for violations of FERPA and alternatives that might be considered.

5. Development and funding of computer-based information systems containing individually identifiable data about parents, students and applicants for auditing, eligibility determination, or providing special services in schools.

6. Interaction of Federal statutes with current and pending State legislation.

II. SUBJECT OF OCTOBER HEARINGS

For its October 7 and 8 hearings the Commission will focus on and seek written submissions and public testimony on the following matters.

POLICIES OF EDUCATIONAL INSTITUTIONS PURSUANT TO FERPA.

The FERPA regulations issued by the Department of Health, Education and Welfare on June 17, 1976, require that local educational institutions formulate and adopt policies and procedures for informing parents and students of their rights under the Act and for carrying out the minimum requirements of the Act. (1) What policies have individual educational agencies developed and how have they developed them? (2) Which features of such policies are the product of State statutes and which are the product of FERPA requirements? (3) What evidence is there that these policies have produced parent and student awareness of their rights with respect to the records that are kept about them? (4) Are the FERPA grievance and redress requirements practical for schools and timely and convenient for students and parents? (5) What actual experiences have parents and students had in exercising their rights under local policies and procedures? (6) Have such policies increased the specificity, objectivity, and substantiation of the information that educational institutions record about students, former students, parents, and applicants?

Waivers of Rights. FERPA provides that the right to inspect and review certain education records (e.g., letters of recommendation) may be waived by a student. The Commission is interested in information concerning how and under what circumstances such waivers are obtained, the impact of the use of such waivers, and the consequences of an individual's decision not to waive his rights. The Commission would also like to learn whether the fact that a record, recommendation, or other information has been or may be reviewed by its subject might lead educators to treat it as less credible than would otherwise be the case, or as incomplete. For example, is it becoming necessary to verify or

V 41 164 AUG 23 76 UMI

supplement "reviewed" statements through oral inquiries of which no formal record is made or kept? Is a "reviewed" statement readily distinguishable on its face from one that has not been reviewed by its subject? Are there specific documentable situations in which permitting a student to read a candid appraisal of his qualifications, potential, or performance can be shown to have been harmful to him, to the individual making the appraisal, or to the educational institution requesting it? If there are such situations, how could the waiver provision in the Act be modified to deal specifically with them?

Access to Recorded Information by Law Enforcement Officials. Records maintained by the law enforcement unit(s) of an educational institution are exempted from the subject access requirements of FERPA provided that four conditions are met (1) such records are used solely for law enforcement purposes; (2) such records are kept separately from "education records"; (3) such records are not disclosed to "individuals other than law enforcement officials from the same jurisdiction"; and (4) the "education records" of the educational institution are not disclosed to its law enforcement officials. The Act further provides that educational agencies may disclose "education record" information without the consent of the student or his parents "to State or local officials or authorities to whom the information is specifically required to be reported or disclosed pursuant to State statute adopted prior to November 19, 1974."

These provisions appear to give law enforcement officials outside an educational institution considerable access to recorded information about a student. The Commission is interested in learning about the extent of release of information to law enforcement agencies, and the standards of relevance and reliability that are imposed on information so released. What standards should define the circumstances under which education records are released to law enforcement officials?

The Commission is interested in learning how effectively records maintained by law enforcement units of an educational institution are restricted from other uses. How are such records distinguished from education records? For example, is the term "education record" being construed so as to give internal or external law enforcement officials broad access to information obtained for research or educational uses? Do law enforcement agency records affect educational decisions? To what extent does the disclosure of recorded information to outside law enforcement officials adversely affect the ability of schools to fulfill their primary missions? Would the fact that a student is said in an education record to be taking a medically prescribed but popularly abused drug be disclosed or disclosable to law enforcement officials within or outside the educational institution? How are records concerning a student's participation in "predelinquent" or "diversionary" programs used by an educational institution in making educational decisions about the student?

The DHEW regulations do not explicitly indicate what the phrase "same law enforcement jurisdiction" should be construed to mean in practice. Given that records might be released to law enforcement officials only under explicitly specified standards, how should the term "same jurisdiction" be defined. Should it be defined in personal/geographic terms? Or, should "same" be defined in terms of subject-matter jurisdiction; e.g., the FBI might use education records in cases of interstate car theft, while the State highway patrol might use education records in cases of State motor vehicle code violations.

Disclosures to Parents of a Minor Student. By providing parents the right to inspect their minor students' records, FERPA appears to make it impossible for school officials to guarantee a minor student that education record information he divulged about himself will be held in confidence. Does this conflict with protections afforded by State statutes?

The student may have volunteered sensitive information or opinions about his parents to school officials—regarding alcoholism or abuse of a sibling, for example. Mere record of contact with a school screening or information project concerning drug abuse or venereal disease, might also provide parents with information that would not be in the best interest of their child for them to have. Should any records of the student be withheld from parents, and if so, why? Are parents securing inappropriate access to medical records regarding a child?

Present and Pending State Legislation in California. A number of State legislatures have been very attentive to matters bearing on the creation, use, and management of records maintained by educational institutions. In California, for example, both current laws and proposed new statutes go beyond FERPA in a variety of ways and thus may anticipate matters that should be taken into account in considering amendments to FERPA. Accordingly, the Commission wishes information on present and pending State legislation affecting the personal-data recordkeeping practices of educational institutions in California. What arguments and facts have been cited concerning such State legislation? What experiences have States had in implementing such State laws? What is the rationale for current laws and pending legislation? What problems do current and proposed laws seek to resolve? How has FERPA affected current and proposed State statutes? How are State requirements for individually identifiable data (e.g., for program auditing) treated in State laws on personal data recordkeeping in education?

Research Conducted in Educational Institutions. Schools are a major source of data for social science researchers and for research training. Schools are often the subject of considerable public interest in particular, concerning the propriety, equity or effectiveness of local educational practices. FERPA and existing regulations under the act require the prior consent of subjects for research using educational records where such research is *not* conducted for or on behalf of either specified Federal authorities or an educational agency or institution.

The Commission needs to learn how FERPA requirements are being interpreted in the field, and how those interpretations are affecting research conducted in schools. How are local educational agencies deciding *who* can conduct research in schools without prior consent of subjects? Are FERPA requirements restricting research trainees' opportunities for data collection? Are students', citizens', or public interest research groups' inquiries into the propriety, equity, or effectiveness of educational practices being constrained by FERPA? Are FERPA requirements for prior consent for access to education records making retrospective longitudinal research strategies infeasible?

Whether or not subject to FERPA requirements, research in schools raises a number of additional questions. Should parents or law enforcement officials have access to data collected from students for research purposes? Under what circumstances should sensitive information about a student's family or teachers be solicited from the student? What practices are followed regarding consent of students or parents for student participation in research? How consistently do researchers use confidentiality-preserving modes of recording, reporting, and storing their data? How effective are these procedures when used? What safeguards should be used to protect against redisclosure of personal data in the course of reanalysis for purposes other than those for which the data were originally collected? Does collection of research information authorized under FERPA conflict with State statutes or local policies which establish tighter rules for data collection, use, and dissemination? Should information generated about individuals by clinical research studies be used for individual decision making.

Dated: August 17, 1976.

DAVID F. LINOWES,
Chairman.
CAROLE W. PARSONS,
Executive Director.

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. 34-12703; File No. SR-CBOE-1976-16]

CHICAGO BOARD OPTIONS EXCHANGE, INC.

Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1) as amended by Pub. L. Nos. 94-29, 16 (June 4, 1975), notice is hereby given that on August 4, 1976 the above mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows: (deletions, bracketed; additions italicized)

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

Rule 1.1(v) Primary Market. The term "primary market" in respect of an underlying security *which is principally traded on a national securities exchange* means the principal *exchange* market in which the underlying security is traded, and *in respect of an underlying security principally traded in the over-the-counter market means the over-the-counter market reflected in the National Association of Securities Dealers Automated Quotation System (NASDAQ).*

RESTRICTION OF OUT-OF-THE MONEY OPTIONS

Rule 4.17.[1] (a) Subject to the provisions of paragraphs (b) through (d), no member on behalf of a customer or for his own account, shall enter any order for an opening transaction (purchase or writing) in any call option contract as to which (i) the exercise price is more than $5 above the closing price of, *or, where applicable, the mean between the final representative bid and asked quotation for,* the underlying security in the primary on the last previous day on which the underlying security was traded and (ii) the closing price of the option on the Exchange was less than $0.50 per unit of trading on the last previous day on which the option was traded; and no member, on behalf of a customer or for his own account, shall enter any order for an opening transaction (purchase or writing) in any put option contract as to which (x) the exercise price is more than $5 below the closing price of, *or, where applicable, the mean between the final representative bid and asked quotation for,* the underlying security in the primary market on the last previous day on which the underlying security was traded and (y) the closing price of the option on the Exchange was less than $0.50 per unit of trading on the last previous day on which the option was traded.

* * * Interpretations and Policies: .01 It is contemplated that the authority given in paragraph (c)(ii) to make exceptions, modifications or additions will be applied primarily when an unusual intra-day trading movement in the price of the option or the *price of or representative quotations for* the underlying security is such that the President and Floor Officials determine that the prior day's [close] *closing price or final representative quotations* should no longer be decisive as to the application of the Rule.

APPROVAL OF UNDERLYING SECURITIES

Rule 5.3. The underlying securities of option contracts traded on the Exchange shall be approved for Exchange transactions by the Board following the recommendations of the Securities Committee. In approving underlying securities, both the Securities Committee and the Board shall give due regard to, and the Board shall promulgate guidelines relative to, the following factors:

(a) Underlying securities approved for Exchange transactions shall be characterized by a large number of outstanding units which are widely held and actively traded in the primary market;

(b) Underlying securities shall *either* be duly listed and registered on a national securities exchange[;] or, *shall be designated as "OTC Margin Stock" pursuant to Regulation T under the Securities Exchange Act of 1934;*

(c) The list of approved underlying securities shall be representative of issuers engaged in a wide variety of business activities; and

(d) Underlying securities shall meet the requirements set forth in the agreements of the Exchange with the Clearing Corporation.

TERMS OF OPTION CONTRACTS

Rule 5.6. (a) The expiration month and exercise price of option contracts of each series of options shall be determined by the Securities Committee at the time each series of options is first opened for trading. [Unless the Securities Committee otherwise provides and so indicates at the post at which the option contract is traded, option contracts shall expire in the months of January, April, July and October, and] Series of options of a given expiration month shall generally be opened for trading about nine months prior to such expiration month (e.g., October options will generally be opened during the preceding January). The exercise price of each series of options shall be fixed at a price per unit which is reasonably close to the price per unit at which the underlying security is traded in the primary market at the time such series of options is first opened for trading. Additional series of options of the same class may be opened as the market price of the underlying security moves substantially from the initial price or prices.

TRADING ROTATIONS

Rule 6.2. * * * Interpretations and Policies: .01 Trading rotations shall be employed at the opening and at the close of the Exchange each business day. For each class of option contracts that has been approved for trading, the opening and closing rotation shall be conducted by the Board Broker acting in such class of options. The rotations shall be conducted in the following manner.

(a) Opening Rotations. The opening rotation in each class of options shall be held promptly following *either* the opening of the underlying security on the principal exchange where it is traded [.] *or, in the case of underlying securities principally traded in the over-the-counter market, the availability of representative quotations through the NASDAQ system.* As a rule, a Board Broker acting in more than one class of options should open them in the same order in which opening transactions are reported *or representative quotations are available* in the underlying securities. In conducting each such opening rotation, the Board Broker should first open the one or more series of options of a given class having the nearest expiration, then proceed to series of options having the next most distant expiration, and so forth, until all series have been opened.[2] Except as otherwise provided by the Floor Procedure Committee, if both puts and calls covering the same underlying security are traded, the Board Broker shall determine which type of option should open first, and may alternate the opening of put series and call series or may open all series of one type before opening any series of the other type, depending on current market conditions.

In the event an underlying security *which is listed on an Exchange* has not opened *or current represenative quotations are not available for an underlying security which is principally traded in the over-the-counter market,* within a reasonable time after 9:00 a.m. (Chicago Time), the Board Broker acting in option contracts on such security shall report the delay to a Floor Official and an inquiry shall be made to determine the cause of the delay. The opening rotation for option contracts in such security shall be delayed until *either* the underlying security *which is listed on an exchange* has opened *or until current representative* quotations *are available for the underlying security which is principally traded in the over-the-counter market,* unless two Floor Officials determine that the interests of a fair and orderly market are best served by opening trading in the option contracts.

TRADING HALTS

Rule 6.3. (a) Halts. Any Floor Official may halt trading in any option contract in the interests of a fair and orderly market for a period not in excess of two consecutive business days. Among the factors that may be considered by the Floor Official are that:

(i) Trading in the underlying security has been halted or suspended in the primary market,

(ii) The opening of such underlying security in the primary market, *where the primary market is a national securities exchange,* has been delayed because of unusual circumstances,

(iii) Current representative quotations are not available for underlying securities principally traded in the over-the-counter market, or

[iii](*iv*) Other unusual conditions or circumstances are present.

b. Resumptions. Trading in an option contract that has been the subject of a halt under paragraph (a) above may be resumed upon a determination by the

[1] The text of Rule 4.17(a) reflects a proposed amendment filed under Rule 19b-4 in file No. SR-CBOE-1975-7.

[2] The text of paragraph (a) of interpretation 6.2.01 following the asterisk reflects a proposed amendment filed under Rule 19b-4 in file No. SR-CBOE-1975-7.

V 41 164 AUG 23 76 UMI

majority of Floor Officials that the conditions which led to the halt are no longer present or that the interests of a fair and orderly market are best served by a resumption of trading.

SUSPENSION OF TRADING

Rule 6.4. (a) Suspension. The Board may suspend trading in an option contract in the interests of a fair and orderly market. Among the factors that may be considered by the Board are that:

(i) Trading in the underlying security has been suspended in the primary market,

(ii) Representative quotations are unavailable for underlying securities principally traded in the over-the-counter market,

[(ii)] *(iii)* Trading in the option contract has been halted for two business days by the Floor Official acting in accordance with Rule 6.3, and the conditions which led to such halt are still present, or

[(iii)] *(iv)* Other unusual conditions or circumstances are present.

(b) Resumptions. Trading in an option contract that has been the subject of a suspension under paragraph (a) above may be resumed upon a determination of the Board that the conditions which led to the suspension are no longer present or that the interests of a fair and orderly market are best served by a resumption of trading.

RESPONSIBILITIES OF FLOOR BROKERS

Rule 6.73. (a) General Responsibility. A Floor Broker handling an order is to use due diligence to execute the order at the best price or prices available to him, in accordance with the Rules.

(b) Contingency order or one-cancels-the-other order. A Floor Broker handling a contingency order or a one-cancels-the-other order that is dependent upon the price of, *or the representative quotation for*, the underlying security shall be responsible for satisfying the dependency requirement on the basis of the last reported price of, *or representative quotation for*, the underlying security in the primary market that is generally available on the floor of the Exchange at any given time. Unless mutually agreed by the members involved, an execution or non-execution that results shall not be altered by the fact that such price *or representative quotation* is subsequently found to have been erroneous.

(c) Spread orders at the opening or close. A Floor Broker shall not be held responsible for executing a spread order based upon transaction prices that are established at the opening or close of trading or during any trading rotation employed in accordance with Rule 6.2.

OBLIGATIONS OF MARKET-MAKERS

Rule 8.7 • • • (a) • • •

(b) Principal Appointment • • •

(i) • • •

(ii) Bidding no more than $1 lower and/or offering no more than $1 higher than the last preceding transaction price for the particular option contract. However, this standard shall not ordinarily apply if the *representative bid or offer for, or* price per share (or other unit of trading) of, the underlying security has changed by more than $1 since the last preceding transaction for the particular option contract.

CBOE'S STATEMENT OF BASIS AND PURPOSE

The principal purpose of the proposed rule changes is to permit selected securities that are traded in the over-the-counter market and are not listed on any national securities exchange to serve as underlying securities for options traded on CBOE. (These are referred to herein as "OTC underlying securities".) Prior to reflecting the proposed rule changes, under CBOE's rules each underlying security in respect of options traded on CBOE must itself be duly listed and registered on a national securities exchange. The purpose of each particular rule change that is proposed herein may be explained as follows:

Rule 1.1(v). The purpose of this amendment is to define the "primary market" in respect of securities principally traded in the OTC market to mean that market as reflected in the National Association of Securities Dealers Automated Quotation System (NASDAQ).

Rule 4.17. It is proposed to amend Rule 4.17 and Interpretation .01 thereunder to provide that for purposes of imposing restrictions on certain transactions in out-of-the-money options covering OTC underlying securities, the mean between the final representative bid and asked quotation on NASDAQ will be utilized as the current market price of the underlying security.

Rule 5.3. The proposed amendment to Rule 5.3 would permit CBOE to select for options trading underlying securities that are designated as "OTC Margin Stock" pursuant to Regulation T, provided that such securities meet all of the other requirements which presently pertain to the selection of underlying securities.

Rule 5.6. The proposed amendment to Rule 5.6, which is unrelated to the proposal to trade options covering OTC underlying securities, reflects the deletion from Rule 5.6 of the provision that unless otherwise designated, options shall expire in the months of January, April, July and October. This provision has been made obsolete by CBOE's practice of introducing options having expiration cycles other than as stated in the Rule.

Interpretation .01 of Rule 6.2. It is proposed to amend this Interpretation to provide that the opening rotation of options covering OTC underlying securities shall commence each trading day following the availability of representative quotations on NASDAQ.

Rules 6.3 and 6.4. Rule 6.3 is proposed to be amended to permit a Floor Official to halt trading in an option covering an OTC underlying security whenever current representative quotations for the underlying security are not available. Similarly, it is proposed to amend Rule 6.4 to permit the Board of Directors to suspend trading in such an option in the event such representative quotations are not available.

Rule 6.73. It is proposed to amend Rule 6.73, which describes various contingency orders that are dependent upon the market price of underlying securities, to provide that in the case of options covering OTC underlying securities, such contingency orders will depend upon representative quotations for the underlying securities in the over-the-counter market.

Rule 8.7. The proposed amendment to Rule 8.7 reflects that, in the case of options covering OTC underlying securities, changes in the representative bid or offer for the underlying security serve to determine the circumstances under which a market maker may change his option quotation by more than $1.00.

CBOE believes that it is consistent with the standards of the Act designated for the protection of investors and the public interest to select as underlying securities for options transactions certain of the most widely held and actively traded securities that are traded in the over-the-counter market and are not listed on any national securities exchange. In the case of such securities, the availability of current quotations via the NASDAQ system will enable options premiums to fairly reflect the current market value of the underlying security in the same manner as options premiums for listed securities are today determined on the basis of the last reported sale price. For this purpose, CBOE will make available at each post where options covering OTC underlying securities are traded a current updated Level I NASDAQ display showing the current representative bid and offer for each such security. In addition, CBOE is considering providing Level II NASDAQ information showing the bids and offers of each market maker in each such underlying security through interrogation devices on the CBOE trading floor. The availability of Level II NASDAQ information will depend upon whether arrangements can be made with the NASD and what the costs of providing such information would be. In all other material respects, trading in options covering OTC underlying securities is no different from the options trading that presently takes place in listed underlying securities.

Although formal comments have not been solicited or received, opinions informally expressed to CBOE have been in support of the proposal to extend options trading to selected OTC underlying securities.

The proposed rule changes will impose no burden on competition.

On or before September 27, 1976, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(a) By order approve such proposed rule change, or

(b) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments

concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Washington, D.C., 20549. Copies of the filing with respect to the foregoing and all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before September 13, 1976.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

AUGUST 12, 1976.

[FR Doc.76-24566 Filed 8-20-76;8:45 am]

[Rel. No. 34-12704; File No. SR-CBOE-1976-15]

CHICAGO BOARD OPTIONS EXCHANGE, INC.

Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1) as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on July 27, 1976, the above mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

Statement of the Terms of Substance of the Proposed Rule Change

The text of the proposed rule change is as follows (language to be deleted is included in brackets):

BROKERS' BLANKET BONDS

Rule 9.22, Interpretations and Policies. .01.5(a) A member organization may choose to maintain coverage in excess of the minimum requirements as set forth above in paragraph .01.2, and in such case, a deductible provision of up to $5,000 or 10% of the amount of the blanket bond coverage, whichever is greater, may be included in the bond purchased. However, the excess of this greater deductible amount over the maximum permissible deductible amount as described above in paragraph .01.5 must be subtracted from the member organization's net worth in the calculation of the member organization's net capital under SEC Rule 15c3-1 [If the member organization is a subsidiary of another exchange member which guarantees the subsidiary's net capital in writing, the excess deductible amount may instead be subtracted from the parent company's net worth.]

STATEMENT OF THE BASIS AND PURPOSE

The purpose of the proposed rule change is to delete the provision contained in the last sentence of Interpretation .01.5(a) under Rule 9.22 of the CBOE rules which provides that a member-subsidiary which carries bonding coverage greater than the minimum requirements for the firm would be permitted to have the amount of excess deductible in its bond subtracted from the parent's net worth, rather than from the subsidiary's net worth, in the calculation of the subsidiary's net capital pursuant to Section 240.15c3-1 (the "Uniform Net Capital Rule"). It appears that this provision is inconsistent with the purposes of the Uniform Net Capital Rule inasmuch as Appendix "C" thereto prohibits flow through capital benefits of this kind. Accordingly, the proposed rule change is being made in order to render Rule 9.22 consistent with the purposes of the Uniform Net Capital Rule in this regard.

Section 6(b)(1) under the Act provides, among other things, that an exchange shall not be registered as a national securities exchange unless "such exchange is so organized and has the capacity to be able to carry out the purposes of this title and to comply, and • • • to enforce compliance by its members and persons associated • • • with the provisions of this title, the rules and regulations thereunder, and the rules of the exchange." This section establishes the basis for the Exchange's proposal to amend Rule 9.22 in order to render it consistent with the purposes of the Uniform Net Capital Rule, particularly with respect to the policies set forth in Appendix "C" thereto.

Comments on the proposed rule were not solicited from members.

The Exchange does not believe that the proposed rule change will impose any burden upon competition.

On or before September 27, 1976, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and all written submissions will be available for inspection and copying in the Public Reference Room, 1100 "L" Street, NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before September 13, 1976.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

AUGUST 12, 1976.

[FR Doc. 76-24565 Filed 8-20-76; 8:45 am]

[Rel. No. 34-12708; File No. SR-DTC-76-7]

DEPOSITORY TRUST CO.

Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on August 4, 1976, the above mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The proposed rule change provides for a new Certificate as to Citizenship to be executed by all Participants of The Depository Trust Company (DTC). The primary differences between the new Certificate and the former Certificate are that the new Certificate (a) deals more specifically with the requirements of Section 310 of Title 47 of the United States Code (restricting alien ownership of radio station licensees' capital stock), (b) encompasses the deposited capital stock of all corporate radio station licensees which securities are Eligible Securities under DTC's Rules, without naming the licensees, and (c) requires indemnification by the Participant of DTC and each officer, director, employee and DTC Participant against liabilities to which they may become subject due to action taken by DTC in reliance upon the new Certificate.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change is as follows:

3. *Purpose of Proposed Rule Change.* The purpose of the proposed rule change is to enable corporate radio station licensees whose capital stock is eligible for deposit at DTC to comply with Section 310 of Title 47 of the United States Code which restricts allen ownership of said capital stock.

4. *Basis under the Act for Proposed Rule Change.* (a) Not Applicable.

(b) The proposed rule change relates to DTC's carrying out the purposes of Section 17A of the Securities Exchange Act of 1934 (the Act) by increasing DTC's capacity to facilitate the prompt and accurate clearance and settlement of securities transactions in that the proposed rule change allows DTC to make issues eligible for deposit which, due to governmental restrictions on citizenship of stockholders, might otherwise have to be excluded from eligibility.

V 41 164 AUG 23 76 UMI

(c) Not Applicable.

5. *Comments Received from Members, Participants or Others on Proposed Rule Change.* No comments have been solicited.

6. *Burden on Competition.* None.

The foregoing rule change has become effective, pursuant to Section 19(b)(3) of the Securities Exchange Act of 1934. At any time within sixty days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the public reference room, 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should be submitted on or before September 13, 1976.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

OPTIONS CLEARING CORP.

Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on August 6, 1976, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The proposed rule change would permit each Clearing Member of OCC to effect settlements in respect of exercised option contracts through a clearing corporation designated by the Clearing Member for that purpose.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change is as follows:

The primary purpose of the proposed rule change is to permit each Clearing Member of OCC to effect settlements in respect of exercised option contracts through the clearing corporation of its choice. OCC's present Rules assume that exercise settlements will be effected through an omnibus account maintained by OCC for its Clearing Members with a single clearing corporation. The proposed rule changes would permit each Clearing Member to designate a clearing corporation for exercise settlement purposes and to maintain an exercise settlement account directly with its designated clearing corporation.

The specific purpose of each of the proposed rule changes set forth under Item 1 is as follows:

1. The definition of "correspondent clearing corporation" in the OCC By-Laws is revised to incorporate the definition of "clearing agency" in the Securities Exchange Act of 1934, as amended, and to conform to the revised definition of "exercise settlement account" referred to below.

2. The term "designated clearing corporation" is made a defined term for the purpose of simplifying subsequent provisions.

3. The definition of "exercise settlement account" is revised to indicate that such accounts are to be maintained by Clearing Members directly, rather than through OCC (see paragraph 7, below), and to provide that the only settlements to be effected through such an account are settlements in respect of options exercised by the Clearing Member for which the account is maintained. Settlements in respect of the Clearing Member's assignments would be effected through its regular clearing account, so as to permit netting against other securities transactions.

4. A technical change is made in the definition of "long value position" and the term "short value position" is made a defined term to simplify the drafting of subsequent provisions.

5. Definitions are added for the terms "Receiving Clearing Member" and "Delivering Clearing Member" to simplify the drafting of subsequent provisions.

6. Article VIII, Sections 1 and 5 of the By-Laws are amended to clarify their application to losses incurred by OCC in connection with exercised option contracts.

7. New Rule 212 would require each Clearing Member to be a participant of at least one correspondent clearing corporation. Prior to or concurrently with the effectiveness of the proposed rule changes filed herein, OCC anticipates entering into exercise settlement agreements with Stock Clearing Corporation, American Stock Exchange Clearing Corporation, Midwest Clearing Corporation,[2] Pacific Clearing Corporation and Stock Clearing Corporation of Philadelphia. OCC understands that all but approximately five of its Clearing Members are currently participants of at least one of those clearing agencies, and anticipates that the remainder will voluntarily become participants prior to the effectiveness of proposed Rule 212.

[2] The new exercise settlement agreement will supersede OCC's present agreement with MCC and Midwest Securities Trust Company.

8. Technical changes have been made in Rule 909 and 912.

9. Proposed Rule 913(a) establishes a procedure whereby each Clearing Member is to designate the clearing corporation through which it wishes to effect option exercise settlements. It is anticipated that each Clearing Member will initially designate a single clearing corporation, but the Rule permits procedures to be developed in the future for designating different clearing corporations for different classifications of option contracts (e.g. contracts relating to particular underlying securities or contracts traded on particular exchanges).

10. A number of changes, largely of a technical nature, have been made in Rule 913(b) formerly Rule 913(a)), and a provision has been added permitting OCC to net (in reporting exercises to correspondent clearing corporations) a Clearing Member's rights to receive securities against its obligations to deliver securities of the same class on the same exercise settlement date.

11. Subparagraphs (c), (d) and (e) (formerly (b), (c) and (d)) of Rule 913 have been revised to conform their provisions to amended subparagraphs (a) and (b) of the Rule.

12. Rule 914 has been amended to clarify its provisions and to regulate positions resulting from settlements in respect of put option contracts.

13. The changes in subparagraphs (a) through (d) of Rule 915 are largely of a technical nature. A new subparagraph (e) has been added to prescribe the obligations of a Clearing Member after a buy-in of a long value position with a correspondent clearing corporation. Former subparagraphs (e), (f) and (g) have been redesignated and certain technical changes have been made therein.

14. Present Rule 916 is proposed to be deleted. Its purpose was to reduce OCC's exposure in the exent that a Clearing Member defaulted in its obligations to a correspondent clearing corporation. However, under the new exercise settlement system, OCC would no longer be exposed to loss in the event of such a default, because Clearing Members would maintain their exercise settlement accounts directly, rather than through OCC, and the correspondent clearing corporation would have no recourse against OCC in the event of a default.

15. New Rule 916 would provide a sell-out procedure for Clearing Members with short value positions in exercise settlement accounts in the event of the failure of a correspondent clearing corporation. The procedure generally parallels the buy-in procedure provided in amended Rule 915(f) for Clearing Members with long value positions. Under proposed Rule 916, no distinction is made, in terms of remedies, between a Clearing Member with a short value position which has not yet delivered securities in against that position and a Clearing Member which has delivered securities in but has not yet been paid. The latter would be required to seek either the return of the securities or payment of the applicable price from the

correspondent clearing corporation directly.

The proposed rule change relates to the prompt and accurate clearance and settlement of securities transactions, fosters cooperation and coordination with persons engaged in the clearance and settlement of securities transactions, and removes impediments to and perfects the mechanism of a national system for the prompt and accurate clearance and settlement of securities transactions.

Comments were not and are not intended to be solicited with respect to the proposed rule change.

OCC does not believe that the proposed rule change would impose any burden on competition. To the contrary, the proposed rule change would enhance competition among clearing agencies.

On or before September 27, 1976, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change; or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before September 13, 1976.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

AUGUST 17, 1976.

TEXT OF PROPOSED RULE CHANGE

Brackets indicate deletions, Italics indicate new material.

ARTICLE I, SECTION 1 OF BY-LAWS

Definitions. Section 1. Unless the context requires otherwise, the terms defined herein shall, for all purposes of these By-Laws and the Rules of the Corporation, have the meanings herein specified.

(a) through (aaa): [No change].

Correspondent Clearing Corporation. (bbb) The term "correspondent clearing corporation" means *a clearing agency (as defined in Section 3(a) of the Securities Exchange Act of 1934, as amended) which, by agreement with the Corporation, provides facilities for settlements in respect of exercised option contracts.* [clearing corporation (as that term is defined in Article 8 of the Uniform Commercial Code of the State of Illinois, or of such other State as may from time to time be designated by the Board of Directors, as the same may be amended from time to time) with which the Corporation maintains exercise settlement accounts.]

Designated Clearing Corporation. (ccc) *The term "designated clearing corporation," when used with respect to a Clearing Member and an exercised option contract for which the Clearing Member is the exercising or the Assigned Clearing Member, means the correspondent clearing corporation designated by that Clearing Member to act on its behalf in accordance with Chapter IX of the Rules in effecting settlement in respect of such exercised option contract.*

Exercise Settlement Account. (ddd) [(ccc)] The term "exercise settlement account" means an account maintained by a *Clearing Member* [the Corporation] with a correspondent clearing corporation [on behalf of a clearing Member for the purpose of facilitating] *for the sole purpose of effecting* settlements in respect of option contracts exercised by [or assigned to] such Clearing Member.

Free Position. (eee) [(ddd)] The term "free position," when used with respect to an exercise setlement account of a Clearing Member, means the position of the Clearing Member with respect to a security credited to such account for which the Clearing Member has fully paid or such account has been charged.

Long Value Position. (fff) [(eee)] The term "long value position," when used with respect to a security in an exercise settlement account of a Clearing Member, means the position of the Clearing Member with respect to the security when, under the rules and procedures of the correspondent clearing corporation carrying such account, the correspondent clearing corporation is obligated to deliver the security to the Clearing Member against payment of a [stipulated settlement] price *fixed pursuant to the rules of the correspondent clearing corporation* and the Clearing Member is obligated to receive the security and to pay such [settlement] price.

Short Value Position. (ggg) *The term "short value position," when used with respect to a security in an exercise settlement account of a Clearing Member, means the position of the Clearing Member with respect to the security when, under the rules and procedures of the correspondent clearing corporation carrying such account, the Clearing Member is obligated to deliver the security to the correspondent clearing corporation against payment of a price fixed pursuant to the rules of the correspondent clearing corporation and the correspondent clearing corporation is obligated to receive the securirty and pay such price.*

(fff) through (mmm). [Redesignated as (hhh) through (ooo); no change in text.]

Receiving Clearing Member. (ppp) *The Term "Receiving Clearing Member," when used (i) with respect to a call option contract, shall mean the exercising Clearing Member; and (ii) with respect to a put option contract shall mean the Assigned Clearing Member.*[1]

Delivering Clearing Member. (qqq) *The term "Delivering Clearing Member," when used (i) with respect to a call option contract shall mean the Assigned Clearing Member; and (ii) with respect to a put option contract shall mean the exercising Clearing Member.*[1]

ARTICLE VIII, SECTION 1 OF BY-LAWS

Maintenance and Purpose of the Clearing Fund.—Section 1. The Corporation shall maintain a Clearing Fund, to which each Clearing Member shall contribute, as provided in this Article VIII, to make good losses suffered by the Corporation as a result of the failure of any Assigned Clearing Member to perform its obligations under any assigned option contract, or as a result of the failure of any correspondent clearing corporation to *make any payment or delivery required with respect to an* [deliver securities credited or long value positions in] exercise settlement account[s], [to Clearing Members entitled thereto,] or as the result of any liquidation of a Clearing Member's open positions with the Corporation *or obligations in respect of exercised option contracts for which settlement has not yet been made,* or as a result of the failure by any Clearing Member to make any required payment to the Corporation or *any required payment* to a correspondent clearing corporation *which the Corporation makes on behalf of the Clearing Member.*

ARTICLE VIII, SECTION 5 OF BY-LAWS

Application of Clearing Fund.—Section 5. If any Clearing Member shall fail to discharge duly any obligation on or arising from any Exchange transaction accepted by the Corporation or any option contract assigned to such Clearing Member, or if the Clearing Member fails to make any required payment to the Corporation, or if the Clearing Member fails to make any required payment to a correspondent clearing corporation and the Corporation makes such payment on its behalf, or if the Corporation suffers any loss upon the liquidation of the Clearing Member's open long and short positions *or the Clearing Member's obligations in respect to exercised option contracts for which settlement has not yet been made,* [(including positions maintained at a correspondent clearing corporation)], then the Corporation shall apply the Clearing Member's Clear-

[1] The addition of this definition was proposed in SR-OCC-75-7, which is currently pending.

V 41 164 AUG 23 76 UMI

ing Fund contribution to the discharge of such obligation, the making of such payment or the reimbursement of such loss. If the amount of the undischarged obligation, payment or loss exceeds the amount of the Clearing Member's total Clearing Fund contribution, and if the Clearing Member fails to pay the Corporation the amount of any such deficiency within 24 hours, the amount of the deficiency shall be paid out of the Clearing Fund and charged pro rata against all other Clearing Members' contributions as fixed at the time, but the Clearing Member who failed to pay the deficiency shall remain liable to the Corporation for the full amount of such deficiency until repayment thereof by such Clearing Member. If a correspondent clearing corporation shall fail to *make any required payment or delivery with respect to any* [deliver to a Clearing Member securities credited to a long value position in an] exercise settlement account, [of such Clearing Member], and *as a result thereof,* [such] securities are bought *in or sold out* for the account of in accordance with the Rules, [and the correspondent clearing corporation fails to reimburse the Corporation for all losses in connection therewith], the amount of [such unreimbursed] *any* loss[es] *incurred by the Corporation in connection with such buy-in or sell-out* shall be paid to the Corporation out of the Clearing Fund and charged pro rata against all Clearing Members' contributions as fixed at the time. [but without prejudice to the rights of the Corporation against such correspondent clearing corporation.]

PARTICIPATION IN CORRESPONDENT CLEARING CORPORATION

Rule 212. Every Clearing Member shall be and remain a participant in good standing of at least one correspondent clearing corporation.

NOTICE OF DELIVERY AND PAYMENT

Rule 909. Unless settlement is made through correspondent clearing corporations pursuant to Rule 913, the delivering Clearing Member and the receiving Clearing Member shall each promptly notify the Corporation, on forms prescribed by the Corporation, when delivery and payment have been made. Such notice shall be submitted to the Corporation as promptly as possible and in any event not later than 11:00 A.M. Central Time (12:00 noon Eastern Time) on the business day following the day on which delivery occurs. Notwithstanding the foregoing, in the event that a receiving Clearing Member is informed by the Corporation that a delivering Clearing Member has notified the Corporation that delivery has been made to such receiving Clearing Member, and the receiving Clearing Member does not advise the Corporation to the contrary by the close of business on the succeeding business day, the receiving Clearing Member's failure to do so shall constitute its acknowledgment to the Corporation that delivery has been made in the manner indicated in the notice furnished by the delivering Clearing Member. A delivering Clearing Member shall also notify the Corporation whenever it ships securities (whether through a bank, a correspondent broker, another clearing system or otherwise) for the purpose of effecting delivery, which notice shall state the certificate numbers of the securities being shipped.

DELIVERY AFTER "EX" DATE

Rule 912. *Subject to the provisions of Rule 913(e),* when an exercise notice is properly tendered to the Corporation pursuant to Rule 801 prior to an "ex" date (as fixed by the primary market for the underlying security) for a distribution that causes an adjustment to be made pursuant to the By-Laws, the delivering Clearing Member shall make delivery as required by such adjustment unless the parties otherwise agree. When an exercise notice is properly tendered to the Corporation prior to such an "ex" date for a distribution that does not cause an adjustment to be made pursuant to the By-Laws, and delivery of the underlying security is made too late to enable the receiving Clearing Member to transfer the security into its name and to receive such distribution, the delivering Clearing Member shall, at the time of delivery, issue its due bill check to the receiving Clearing Member for the amount of the distribution, which check shall be payable on the payment date of such distribution.

SETTLEMENT THROUGH CORRESPONDENT CLEARING CORPORATIONS

Rule 913. (a) *Each Clearing Member shall designate, in such manner as the Corporation shall from time to time prescribe, a correspondent clearing corporation of which the Clearing Member is a participant in good standing to serve as the Clearing Member's designated clearing corporation for the purposes of these Rules. Such a designation shall be maintained in effect at all times by each Clearing Member. The Corporation may establish procedures whereby a Clearing Member may appoint different designated clearing corporations for different classifications of exercised option contracts.*

(b) Notwithstanding anything to the contrary in Rules 901 through 912, the Corporation may specify in any Delivery Advice issued pursuant to Rule 803 that settlement in respect of the exercised option contract or contracts designated therein shall be made through the facilities of correspondent clearing corporations. In such event, *the Corporation shall report the exercise to the designated clearing corporations of the Delivering and the Receiving Clearing Member, furnishing such information with respect thereto as shall be necessary to enable settlement to be effected in respect of such exercise in accordance with the respective rules of such designated clearing corporations on the exercise settlement date (or, if any such designated clearing corporation is not open for business on that date, on the next date on which such clearing corporation is open for business).* [the Corporation will communicate the names of the exercising and Assigned Clearing Members, the quantity and description of the underlying securities to be delivered, the exercise settlement date and the exercise settlement amount to such correspondent clearing corporation, which, as of the opening of business on the exercise settlement date (or, if the correspondent clearing corporation is not open for business on that date, as of the opening of business on its next business day), shall credit the exercise settlement account of the exercising Clearing Member and debit the exercise settlement account of the Assigned Clearing Member with the amount of underlying securities specified in the Delivery Advice.] If settlement is to be made through [a] correspondent clearing corporations, the Delivery Advice issued to the *Receiving* [exercising] Clearing Member need not specify the name of the *Delivering* [Assigned] Clearing Member, and the Delivery Advice issued to the *Delivering* [Assigned] Clearing Member need not specify the name or address of the *Receiving* [exercising] Clearing Member. *In reporting exercises to a Clearing Member's designated clearing corporation hereunder, the Corporation may net exercised option contracts for which such Clearing Member is the Delivering Clearing Member against exercised option contracts for which such Clearing Member is the Delivering Clearing Member against exercised option contracts relating to the same underlying security and having the same exercise settlement date for which such Clearing Member is the Receiving Clearing Member.*[3]

(c) *If an exercise is reported to the designated clearing corporations of the Delivering and Receiving Clearing Members in accordance with paragraph (b) hereof, full settlement shall be deemed (for the purposes of these Rules) to have been made in respect of such exercise when the exercise settlement account of the exercising Clearing Member is credited or debited, as the case may be, with the quantity of underlying securities required to be delivered pursuant to the exercise. To the extent that an exercise is netted by the Corporation against an assignment in accordance with the last sentence of subparagraph (b) hereof, full settlement shall be deemed to have been made in respect of such exercise at the opening of business of the Corporation on the exercise settlement date; provided, however, that if the Corporation takes action with respect to such exercise pursuant to subparagraph (d) hereof, settlement shall be made in accordance with the provisions of subparagraph (d). From and after the time when settlement is deemed to have been made in respect of any exercise pursuant to the preceding provisions of this subparagraph (c), the Corporation shall have no further obligation in respect thereof, except as provided in Rules 915 and 916, and the obligations of the Delivering and the Receiving Clearing Member in respect of such exercise, and any long or short value positions or other obligations resulting from settlement in respect thereof, shall be determined by the rules and procedures of their designated clearing corporations.*

[(b) The making of the credits and debits provided for in subparagraph (a) hereof on the position records of the correspondent clearing corporation shall constitute full settlement in respect of the option contract or contracts in respect of which such credits and debits were made, and (except to the extent set forth in Rule 915) shall relieve the Corporation of any further obligation in respect thereof. From and after such settlement, the obligations of the respective Clearing Members in respect of the positions resulting from such credits and debits shall be subject to the rules and procedures of the correspondent clearing corporation.]

(d) [(c)] A specification in any Delivery Advice that settlement is to be made through the facilities of [a] correspondent clearing corpoartions may be revoked by the Corpoartion at any time prior to the opening of business on the exercise settlement date by an appropriate notice to the [exercising and Assigned] *Receiving and Delivering* Clearing Members. In the event of such revocation, delivery and payment shall be made in accordance with Rules 902 through 912 at the office established pursuant to Rule 201 by the *Receiving* [exercising] Clearing Member; provided, however, that the President of the Corpoartion may, upon the application of the *Receiving* [exercising] or the *Delivering* [Assigned] Clearing Member, extend or postpone the time for delivery to a date not more than five business days after the date of such revocation.

(e) [(d)] When an exercise notice is properly tendered to the Corporation pursuant to Rule 801 prior to an "ex" date (as fixed by the primary market for the underlying security) for any distribution, whether or not an adjustment is required to be made pursuant to the By-Laws, Clearing Members effecting settlement in respect of exercised option contracts pursuant to this Rule shall have such rights and obligations in respect of such distribution as may be provided under the rules and procedures of *their designated* [the correspondent] clearing corporations; [through which settlement is made]; provided, however, that the Board of Directors of the Corporation may in its discretion direct that additional adjustments be made as between *Receiving* [exercising] and *Delivering* [assigned] Clearing Members to prevent inequities in respect of any distribution.

[3] Previous filings under Rule 19b–4A with respect to this subparagraph (then designated as Rule 913(a)) were SR–OCC–75–1 (approved December 22, 1975) and SR–OCC–75–7 (currently pending). The proposed changes reflected in this filing incorporate certain changes proposed in SR–OCC–75–7.

MAINTENANCE AND ELIMINATION OF POSITIONS IN EXERCISE SETTLEMENT ACCOUNTS

Rule 914. (a) Positions of Clearing Members in exercise settlement accounts shall at all times be maintained in accordance with all applicable laws and governmental regulations and the rules and procedures of the correspondent clearing corporations carrying such accounts, including, without limitation, rules and procedures relating to the maintenance and elimination of long *and short* value positions and open fails to deliver or receive.

(b) No Clearing Member shall maintain a long value position with respect to any security in an exercise settlement account for a period in excess of thirty consecutive *calendar* days unless, during such *thirty-day period, the Clearing Member shall have duly demanded delivery of such security and shall have maintained such demand in effect continuously thereafter.*

(c) *No Clearing Member shall maintain a short value position or an open fail to deliver with respect to any security in an exercise settlement account without tendering delivery of such security for a period in excess of thirty consecutive days.*

FAILURE TO DELIVER BY CORRESPONDENT CLEARING CORPORATION

Rule 915. If a Clearing Member shall request the *immediate* delivery by a correspondent clearing corporation of securities *in respect of any* [credited to a] long value position in an exercise settlement account and shall comply with all applicable rules and procedures of the correspondent clearing corporation in connection with such request, and the correspondent clearing corporation shall fail, for a period of thirty or more calendar days thereafter, to deliver such securities to the Clearing Member *against payment therefor, or if a Clearing Member shall have an open fail to receive from a correspondent clearing corporation in an exercise settlement account for a period of thirty or more consecutive calendar days,* the Clearing Member may, not more than twenty days after the expiration of such thirty-day period, issue a written buy-in notice with respect to the undelivered securities. [Copies of] Such notice shall be delivered to the Corporation [and the correspondent clearing corporation] not later than 12:00 noon Central Time (1:00 P.M. Eastern Time) of the business day preceding the day when the buy-in is proposed to be executed. Such notice shall specify the date of the withdrawal request *or the settlement date for the open fail to receive* and the quantity and description of the undelivered securities, and shall state that unless delivery is made at or before a specified time, which may not be prior to 12:00 noon Central Time (1:00 P.M. Eastern Time) of the business day following the delivery of the notice, the undelivered securities shall be bought in on the date specified.

(b) Upon the failure of the Corporation or the correspondent clearing corporation to effect delivery *prior to the time specified in* [in accordance with] the buy-in notice, or to obtain a stay as hereinafter provided, the Clearing Member may purchase for "cash" in the best available market, or at the option of the Clearing Member for guaranteed delivery not later than five business days after the regular settlement date for such purchase, for the account and liability of the Corporation, all or any part of the securities necessary to complete the required delivery. In the event a buy-in is not completd pursuant hereto on the day specified in the notice, or as such date may be extended pursuant to subparagraph (c) hereof, the buy-in notice shall remain in force for five business days thereafter. Except as the Corporation may otherwise authorize, the Clearing Member shall buy in prior to the expiration of the buy-in notice. In all cases, Clearing Members must be prepared to defend the price at which the buy-in is executed relative to the current market at the time of the buy-in.

(c) If prior to the execution of a buy-in, the Clearing Member receives from the Corporation or the correspondent clearing corporation written notice stating that the securities are in transfer or in transit or *available for immediate delivery to the Clearing Member,* [are being shipped that day, and giving the certificate numbers] then the Clearing Member may not execute the buy-in for a period of five business days from the date delivery was due under the buy-in notice. [Upon request of the correspondent clearing corporation,] The Corporation may *extend such five-day period if* [grant additional extensions of time provided] the securities are in transfer and, due to the transfer agent, transfer is delayed.

(d) The Clearing Member executing a buy-in hereunder shall as promptly as possible on the day of execution notify the Corporation [and the correspondent clearing corporation] as to the description and quantity of the securities purchased and the price paid, and shall promptly mail or deliver formal confirmation thereof. [The Corporation shall promptly and in any event] Prior to 10:00 A.M. Central Time (11:00 A.M. Eastern Time) of the [following] business day following the *Corporation's receipt of such confirmation, the Corporation shall* pay the Clearing Member *an amount equal to the excess* [the difference] (if any) of (i) [between] the price paid on such buy-in [and] *over* (ii) the amount which would have been payable by the Clearing Member to the correspondent clearing corporation by reason of the delivery of the securities bought in if delivery thereof had been made by the correspondent clearing corporation on the business day preceding the date of the buy-in; *or, if (ii) exceeds (i), the Clearing Member shall pay to the Cor-*

V 41 164 AUG 23 76 UMI

poration an amount equal to such excess.

(e) Unless the Corporation shall direct otherwise, from and after the execution of any buy-in hereunder, the Clearing Member which executed the buy-in shall continue to maintain with its designated clearing corporation the long value position or open fail in respect of which the buy-in was executed, and shall pay to or receive from the Corporation, on a daily basis, any mark-to-the-market payments received or payable by the Clearing Member in respect of such long value position or open fail under the rules and procedures of the correspondent clearing corporation. The Clearing Member shall maintain in effect, with respect to any such long value position, a withdrawal request of the highest priority permissible under the rules and procedures of the correspondent clearing corporation. Any securities delivered by the correspondent clearing corporation after the date of the buy-in to the Clearing Member in respect of such long value position or open fail shall be sold out promptly by the Clearing Member, in the best available market. Prior to 10:00 A.M. Central Time (11:00 A.M. Eastern Time) of the business day following the date of such sell-out, the Corporation shall pay to the Clearing Member an amount equal to the excess (if any) of (i) the amount paid by the Clearing Member to the correspondent clearing corporation by reason of the delivery of such securities over (ii) the amount realized on such sell-out; or, (ii) exceeds (i), the Clearing Member shall pay to the Corporation an amount equal to such excess.

(f) [(e)] Notwithstanding the foregoing *provisions of this Rule*, if a correspondent clearing corporation shall become insolvent or shall fail to meet its obligations with respect to any exercise settlement account, Clearing Members *having* [then holding] long value positions *or open fails to receive* in exercise settlement accounts with such correspondent clearing corporation shall *immediately apply to the Corporation for instructions; and* unless the Corporation directs otherwise, *shall* [immediately] request the *immediate* delivery of [all] securities [then held] in *respect of all of* such *long value* positions. If the correspondent clearing corporation shall fail to comply in full with any such request at or before 12:00 noon Central Time (1:00 P.M. Eastern Time) on the business day following the filing thereof, *or if the Clearing Member shall have an open fail to receive as of that time in respect of such exercise settlement account,* the Clearing Member which filed the request shall, unless the Corporation directs otherwise, promptly issue a written buy-in notice and buy in the undelivered securities in the manner specified in the preceding subparagraphs of this Rule. In the event of a buy-in pursuant to this subparagraph (*f*) [(e)], the amount payable by the Corporation to the Clearing Member in respect thereof shall be the *excess* [difference] (if any) [between] *of* (i) the price paid on such buy-in [and] *over* (ii) the amount which would have been payable by the Clearing Member to the correspondent clearing corporation by reason of the delivery of the securities bought in if delivery thereof had been made by the correspondent clearing corporation on the date when such correspondent clearing corporation became insolvent or failed to meet its obligations, adjusted by any mark-to-market payments received *or paid* by the Clearing Member in respect of the undelivered securities on or after that date; *or, if* (ii) *exceeds* (i); *the Clearing Member shall pay to the Corporation an amount equal to such excess.*

(g) [(f)] The Corporation shall have no responsibility to any Clearing Member *and no Clearing Member shall have any responsibility to the Corporation* in respect of any *long value position or open fail to receive in any* exercise settlement account except to the extent provided in the preceding subparagraphs of this Rule.

(h) [(g)] The Corporation shall have no responsibility under this Rule in respect of any long value position *or open fail to receive* maintained in violation of Rule 914.

DEFAULT BY CLEARING MEMBER

Rule 916. [Deleted] [1]

FAILURE TO RECEIVE BY CORRESPONDENT CLEARING CORPORATION

Rule 916. *(a) If a correspondent clearing corporation shall fail or refuse to receive or to pay for any securities delivered to it in good deliverable form and otherwise in accordance with its rules and procedures against a Clearing Member's short value position or open fail to deliver in an exercise settlement account, or if a correspondent clearing corporation shall become insolvent or shall fail to meet its obligations with respect to any exercise settlement account, Clearing Members having short value positions or open fails to deliver in exercise settlement accounts with such correspondent clearing corporation or rights to payment in respect of securities delivered against such short value positions or open fails, shall immediately apply to the Corporation for instructions; and unless the Corporation directs otherwise, shall promptly sell out in the best available market, for the account of the Corporation, all securities required to be delivered against such short value positions or open fails or securities of the same description and quantity as those previously delivered against such short value positions or open fails and not yet paid for.*

(b) Any Clearing Member executing a sell-out pursuant to subparagraph (a) shall promptly deliver written notice thereof to the Corporation, specifying the description and quantity of the securities sold out and the price received. Prior to 10:00 A.M. Central Time (11:00 A.M. Eastern Time) of the business day following the Corporation's receipt of such notice, the Corporation shall pay to the Clearing Member an amount equal to the excess (if any) of (i) the amount which would have been received by the Clearing Member from the correspondent clearing corporation by reason of the delivery of the securities sold out if payment therefor had been made by the correspondent clearing corporation on the date of the event giving rise to the sell-out, adjusted by any applicable mark-to-market payments received or paid by the Clearing Member thereafter, over (ii) the amount received on such sell-out; or, if (ii) exceeds (i), the Clearing Member shall pay to the Corporation an amount equal to such excess.

(c) The Corporation shall have no responsibility to any Clearing Member, and no Clearing Member shall have any responsibility to the Corporation, in respect of any short value position or open fail to deliver in any exercise settlement account except to the extent provided in the preceding subparagraphs of this Rule.

(d) The Corporation shall have no responsibility under this Rule in respect of any such short value position or open fail to deliver maintained in violation of Rule 914.

[1] Rule 916 was added to the Rules by SR-OCC-75-6 (approved January 28, 1976).

[Rel. No. 34-12701; File No. SR-PSE-76-27]

PACIFIC STOCK EXCHANGE INC.

Proposed Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on July 27, 1976, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

Pacific Stock Exchange Incorporated ("PSE") hereby proposes to amend Section 1, Rule V of of its Rules as follows (italics indicate new language):

Section 1. Every member organization shall maintain a minimum net capital in accordance with the provisions of Rule 15c3-1 under the Securities Exchange Act of 1934, as amended. Each member organization shall promptly notify the Exchange if its net capital does not equal or exceed the appropriate minimum required by this paragraph. *If, in order to comply with the Constitution and Rules of the Exchange, the terms of Rule 153c-4 and any amendment or proposed amendment thereto, or any other Rule under the Securities Exchange Act of 1934, as amended, the member organization is required to deposit any sum of money into an escrow account for purposes of meeting minimum net capital requirements, then such sum, together with the proceeds from the sale of the membership under which the member organization does business on the Exchange, shall be subject to the prior claims of the Exchange, the Pacific Clearing Corporation and claims arising from member contracts as provided in Article VII, Section 4 of the Exchange's Constitution.*

STATEMENT OF BASIS AND PURPOSE

The purpose of the proposed rule change is to provide for the financial responsibility of floor brokers and the availability of assets to settle contracts and claims upon the transfer of membership. PSE has previously received a no-action letter from the Commission Staff with respect to Floor Brokers on PSE who elect to comply with the alternative financial responsibility standard set forth in the proposed amendment to Rule 15c3-1(b)(2), as contained in Securities Exchange Act Release No. 11969, dated January 2, 1976.

Specifically, these Floor Brokers would be complying with the Rule, pending its final adoption, that the value of their exchange membership (based on the lesser of the most recent sale price or current bid price for an exchange membership) shall be not less than $15,000, or an amount equal to the excess of $15,000 over the value of the exchange membership shall be held by an independent agent in escrow. Since the proposed amendment further provides that exchange rules must require that sums held in escrow will on transfer of the membership be subject to the prior claims of the exchange, its clearing corporation, and for the settlement of member contracts, it is the purpose of the instant proposed rule change to make PSE rules fully consistent with the pending amendment to Rule 15c3-1(b)(2).

The proposed rule change facilitates (i) compliance by PSE members with the terms of proposed Rule 15c3-1(b)(2) by providing a mechanism for carrying out the purposes of insuring financial responsibility of floor brokers; (ii) equitable allocation of charges by insuring that sufficient assets are available to satisfy claims upon transfer of membership; (iii) protection of investors and the public interest by insuring that sufficient assets are available to satisfy member contracts upon a transfer of membership.

No comments have been solicited or received.

Any burden on competition brought about by the above rule change is necessary and appropriate in furtherance of the purpose of the Act to provide safeguards, with respect to the financial responsibility and related practices of brokers and dealers, and to protect customers' funds and securities.

On or before September 27, 1976, or within such longer period (i) as the Commission may designate up to ninety (90) days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) by order approve such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection in the Public Reference Room, 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before twenty-one days after the date of this publication. For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

AUGUST 12, 1976.

ALLEGHENY POWER SYSTEM, INC. ET AL.

Application for Exemption for Advances Made To Employees for Moving Expenses Related To Transfers Within a Holding Company System

In the matter of Allegheny Power System, Inc., Allegheny Power Service Corporation, 320 Park Avenue, New York, New York 10022; Monongahela Power Company, 1310 Fairmont Avenue, Fairmont, West Virginia; The Potomac Edison Company, Downsville Pike, Hagerstown, Maryland 21740, West Penn Power Company, 800 Cabin Hill Drive, Greensburg, Pennsylvania 15601.

Notice is hereby given that Allegheny Power System, Inc., a registered holding company, and its wholly-owned subsidiary companies, Allegheny Power Service Corporation, Monongahela Power Company, The Potomac Edison Company, and West Penn Power Company (collectively referred to as the "Allegheny System"), have filed a declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act") designating section 9 of the Act and Rule 48(b) promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transaction.

The Allegheny System has adopted a policy ("Policy") to govern the making of advances to employees transferred to new geographical locations within the Allegheny System. The Policy allows a company to make a cash advance, limited in amount to the employee's equity in his old home, to a transferred employee who, either because of delays in selling his old residence or because the closing date of the sale of the old residence is later than the closing date of the new residence, may not have sufficient funds to make the equity down payment on his new residence on the closing date. Such advances must be approved by the Executive Vice President and General Manager or the Vice President, Administration, and it is the approving officer who makes a determination as to the value of the employee's equity interest in his old residence. Advances must be repaid by the employee when his residence in the old location is sold or within three months from the date of the loan, whichever is shorter. Under unusual circumstances the loan period may be extended on written authorization of the approving officer. Renewal under these circumstances will be on a month-to-month basis and interest will be charged at the rate of ½ of 1 percent per month.

Rule 48(b) requires Commission approval for any loan to an employee in excess of $10,000, even pursuant to the Policy, unless a first mortgage is obtained by the company to secure such loan. The Allegheny System states that as a practical matter, the circumstances which generally bring about the need for such a loan, thereby making the Policy applicable, would make it impossible for the employee to give the company a first mortgage, unless the amount of the loan were increased to cover not only the employee's equity in the old residence, but the entire value of the house, since in virtually all cases, the employee will have a first mortgage on his residence which would have to be paid before a first mortgage on the property could be given to the company.

Accordingly, the Allegheny System requests that it be excepted from the requirement of Rule 48(b)(2)(iii), that personal advances to employees in an aggregate amount of over $10,000 be secured by a first mortgage on a residence occupied by the employee, provided such advances are made pursuant to the terms of the Policy.

The fees and expenses to be incurred in connection with the proposed transaction are estimated at $2,300. It is stated that no State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than September 9, 1976, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by the filing which he desires to controvert; or he may request that he be notified of the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the declarants at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as filed or

as it may be amended, may be permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20 (a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices or orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

FREMONT CORP. AND BLACKSTONE INTERNATIONAL CORP.

Suspension of Trading

AUGUST 13, 1976.

It appearing to the Securities and Exchange Commission that the summary suspension of trading in the securities of Fremont Corp. and Blackstone International Corp. being traded on a national securities exchange or otherwise is required in the public interest and for the protection of investors;

Therefore, pursuant to section 12(k) of the Securities Exchange Act of 1934, trading in such securities on a national securities exchange or otherwise is suspended, for the period from 10:00 a.m., E.D.T. August 13, 1976 through August 22, 1976.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

[70-5882]

INDIANA & MICHIGAN ELECTRIC CO.

Proposed Sale of Utility Assets

Notice is hereby given that Indiana & Michigan Electric Company ("I&M"), 2101 Spy Run Avenue, Fort Wayne, Indiana 46801, an electric utility subsidiary company of American Electric Power Company, Inc. ("AEP"), a registered holding company, has filed a declaration with this Commission designating section 12(d) of the Public Utility Holding Company Act of 1935 ("Act") and Rule 44 promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transaction.

I&M proposes to sell to United Telephone Company of Indiana, Inc. ("United"), which is not affiliated with either I&M or AEP, 2587 of I&M's poles located in certain portions of the State of Indiana in which both companies operate.

The purchase is made pursuant to a Joint Use Agreement between I&M and United dated January 1, 1969. By this agreement, either party has the option to purchase from the other any number of poles up to the number necessary to obtain the objective percentage by that party of the jointly-used poles specified in the agreement. United has exercised its option to purchase 2587 of I&M's poles which will give it ownership of 45 percent of the jointly-used poles under the agreement. The selling price, which is based on the depreciated replacement cost, will be $128,930. The original installed cost of these facilities was $138,686.

The fees and expenses to be incurred by I&M or AEP in connection with the proposed transaction are estimated at $2,300. It is stated that the Public Service Commission of Indiana has jurisdiction over the proposed transaction and that no other state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than September 7, 1976, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as filed or as it may be amended, may be permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[75-5890]

MIDDLE SOUTH ENERGY, INC.

Proposal by Generation Subsidiary To Issue and Sell Long-Term Unsecured Debentures; Request for Exception From Competitive Bidding

Notice is hereby given that Middle South Energy, Inc. ("MSEI"), 225 Baronne Street, New Orleans, Louisiana 70112, an electric utility subsidiary of Middle South Utilities, Inc. ("Middle South"), a registered holding company, has filed an application-declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating sections 6 and 7 of the Act and Rule 50(a)(5) promulgated thereunder as applicable to the following proposed transaction. All interested persons are referred to the application-declaration, which is summarized below, for a complete statement regarding the proposed transaction.

MSEI was incorporated in 1974 under the laws of Arkansas to own and finance certain future generating capacity for the five Middle South system operating companies. By order dated June 21, 1974 (HCAR No. 18437), MSEI was authorized to acquire the Grand Gulf Nuclear Electric Station Project ("Grand Gulf Project") from Mississippi Power & Light Company, one of the five operating companies. When completed, the Grand Gulf Project will be a two-unit nuclear plant with a total capability of 2,500 mw. The first unit is scheduled to become operational in 1980, and the second unit in 1984.

The Commission also authorized various proposals relating to the construction, financing and operation of the Grand Gulf Project, including a bank loan agreement ("Loan Agreement") between MSEI and a group of commercial banks. As amended, the Loan Agreement permits MSEI to borrow up to $465 million through December 31, 1979. As of August 5, 1976, MSEI had borrowed an aggregate of $229.5 million. All borrowings under the Loan Agreement are payable on December 31, 1982. Under the terms of a capital funds agreement, Middle South agreed to supply equity capital to MSEI in an amount sufficient to maintain MSEI's equity at not less than 35 percent of capitalization. As of August 5, 1976, Middle South had provided MSEI with $120.5 million through the purchase of 120,500 shares of its common stock. MSEI has no other securities outstanding. MSEI also entered into power supply agreements with each of the Middle South system operating companies.

MSEI estimates that the cost of completing the Grand Gulf Project will be $1,733 million. Of this, MSEI expects to borrow approximately $1,126 million, or more than twice the maximum borrowings available to MSEI under its existing Loan Agreement. Accordingly, to secure the additional funds needs for future capital expenditures, MSEI proposes to arrange for an alternative source of debt financing. MSEI believes that there are practical restrictions in the alternative forms of debt financing available to it. Specifically, MSEI states that it is limited in the amount of short-term construction financing readily avialable from commercial banks. MSEI also does not believe it is desirable to sell first mortgage bonds to finance construction of the Grand Gulf Project, inasmuch as the company does not have earnings or an operating history to which prospective purchasers could look as security.

As an alternative to what MSEI believes are less attractive sources for its future debt financing, the company now proposes to issue and sell its unsecured long-term debentures ("Debentures") to a group of insurance companies and similar institutions. The Debentures will be issued in an amount not to exceed $400 million and will mature not less than 10 nor more than 20 years from the date of issuance thereof.

It is stated that the terms and conditions of the indenture under which the Debentures will be issued have not been determined but will be filed by amendment to this application-declaration. MSEI anticipates, however, that there will be two closings with respect to the Debentures. The first will involve the issuance of approximately $300 million on or about December 31, 1976; and the second will involve issuance of approximately $100 million on or about June 30, 1977. It is also contemplated that the Debentures will be noncallable for refunding purposes at a lower effective interest rate for a number of years (to be determined) from the issuance thereof and will have a sinking fund designed to retire the entire issue by maturity.

MSEI does not believe that a public offering of securities of this nature, in so great an amount, by an issuer such as MSEI is practical. Accordingly, MSEI proposes to offer the Debentures in a negotiated private sale, and requests an exception from the competitive bidding requirements of Rule 50 under clause (a)(5) thereof. MSEI cites, as representative of the special circumstances it faces, the company's lack of earnings or an operating history and its expectation that the Grand Gulf Project, now only 18 percent complete, will not become operational for at least four more years. MSEI believes that only through a negotiated sale could it effectively bargain for terms and conditions in the offering which will provide the company the flexibility it needs to cope with its special problems or any unanticipated changes in the company's circumstances. MSEI has retained Citibank, N.A., to act as its financial advisor in connection with the offering.

A statement of the fees, commissions and expenses incurred in connection with the proposed transaction will be supplied by amendment. MSEI proposes to pay Citibank, N.A., $800,000 on the proposed $400 million transaction. In the event that an amount less than $400 million were to be raised, the total fee would be 2/10 of 1 percent with a minimum fee of $25,000. It is stated that no State or Federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than September 16, 1976, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicant-declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20 (a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

UNITED STATES SINAI SUPPORT MISSION

[Delegation of Authority 1; Revision No. 1]

DIRECTOR, SINAI FIELD MISSION

Delegation of Authority Regarding General Administrative Functions

Pursuant to the authority vested in me by Executive Order 11896, issued January 13, 1976, I hereby delegate the following functions and authorities to the Director, Sinai Field Mission, to be exercised at or in support of the Sinai Field Mission:

1. Approve and authorize travel and hospitalization related to medical evacuation.
2. Approve and authorize TDY travel.
3. Authorize and issue GTR's.
4. Approve travel advances.
5. Approve travel vouchers.
6. Approve and authorize local expenditures for administrative support (including employment of local nationals in Tel Aviv and Cairo) or for emergency purposes when not provided by the contractor.
7. Sign Time and Attendance cards.
8. Approve and authorize premium compensatory work.

The functions and authorities delegated herein may be redelegated.

Delegation of Authority No. 1 issued February 6, 1976, and published in the FEDERAL REGISTER on February 17, 1976, page 7185, is hereby revoked.

This delegation of authority is effective immediately.

Dated: August 17, 1976.

C. WILLIAM KONTOS,
Director, United States Sinai Support Mission.

FOURTH SECTION APPLICATION FOR RELIEF

AUGUST 18, 1976.

An application, as summarized below, has been filed requesting relief from the requirements of Section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the General Rules of Practice (49 CFR 1100.40) and filed on or before September 7, 1976.

FSA No. 43215—*Iron or Steel Articles to Points in Texas.*

Filed by Southwestern Freight Bureau, Agent, (No. B-627), for interested rail carriers. Rates on iron or steel articles, in carloads, as described in the application, from Alton, Federal, and Sterling, Illinois, also Kansas City, Mo.-Kans., to specified points in Texas. Grounds for relief—Market competition. Tariff—Supplement 216 to Southwestern Freight Bureau, Agent, tariff 301-F, I.C.C. No. 5098. Rates are published to become effective on September 15, 1976.

FSA No. 43216—*Methanol from Bishop, Texas.* Filed by Southwestern Freight Bureau, Agent, (No. B-628), for interested rail carriers. Rates on methanol, in tank-car loads, as described in the application, from Bishop, Texas, to Celriver, South Carolina. Grounds for relief—Market competition. Tariff—Supplement 15 to Southwestern Freight Bureau, Agent, tariff 11-G, I.C.C. No. 5217. Rates are published to become effective on September 15, 1976.

By the Commission

ROBERT L. OSWALD,
Secretary.

[Notice No. 107]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

AUGUST 18, 1976.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 C.F.R. § 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication on or before September 7, 1976. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the I.C.C. Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 21455 (Sub-No. 42TA), filed August 11, 1976. Applicant: GENE MITCHELL CO., 1106 Division St., West Liberty, Iowa 52776. Applicant's representative: Kenneth F. Dudley, P.O. Box 279, Ottumwa, Iowa 52501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Wheat products* (except in bulk), from ports of entry on the United States-Canadian International Boundary line located at Grand Rapids, Minn., and Champlain, N.Y., to Vernon, Calif.; Chicago and Schaumberg, Ill.; Terre Haute, Ind.; Hastings, Minn.; Kansas City, Mo.; Port Elizabeth, N.J.; Yonkers, N.Y.; Columbus and Worthington, Ohio; and Seattle and Spokane, Wash., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Industrial Grain Products, P.O. Box 6089, Montreal H3C 3H1, Quebec, Canada. Send protests to: Herbert W. Allen, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 518 Federal Bldg., Des Moines, Iowa 50309.

No. MC 58035 (Sub-No. 9 TA) (Correction), filed July 8, 1976, published in the FEDERAL REGISTER issue of July 26, 1976, and republished as corrected this issue. Applicant: TRANS-WESTERN EXPRESS, LTD., 48 East 56th Ave., Denver, Colo. 80216. Applicant's representative: Charles J. Kimball, 350 Capitol Life Center, 1600 Sherman St., Denver, Colo. 80203. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Electric household appliances and equipment; kitchen and bathroom appliances and equipment; oral hygiene appliances and equipment; hydro therapy equipment; sink and shower fixtures; smoke alarms; food processing machines; and filters;* (A) between the plantsites and storage facilities of Teledyne Water Pik, located in Larimer County, Colo., and at Los Angeles, Calif.; (B) from the plansites and storage facilities of Teledyne Water Pik, located in Larimer County, Colo., and at Los Angeles, Calif., to points in the following named cities and their commercial zones: Denver, Colorado Springs, Pueblo and Grand Junction, Colo.; Albuquerque, Santa Fe and Gallup, N. Mex.; Phoenix, Tucson and Flagstaff, Ariz.; Salt Lake City and Provo, Utah; Las Vegas, Sparks and Reno, Nev.; and points in California, and (2) *Materials, equipment and supplies* used in the manufacture or distribution of the commodities named in (1) above; (A) between the plantsites and storage facilities of Teledyne Water Pik, located in Larimer County, Colo., and at Los Angeles, Calif.; and (B) from Alhambra, El Monte, Berkeley, Newbury Park, Monrovia, Los Angeles, Gardena, and Oxnard, Calif., to the plantsites and storage facilities of Teledyne Water Pik, located in Larimer County, Colo., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Teledyne Water Pik, 1730 East Prospect St., Fort Collins, Colo. 80521. Send protests to: Roger L. Buchanan, District Supervisor, Interstate Commerce Commission, 492 U.S. Customs House, Denver, Colo. 80202. The purpose of this republication is to state that Larimer County is in Colorado in lieu of California.

No. MC 96607 (Sub-No. 8 TA), filed August 10, 1976. Applicant: RUCKER BROTHERS TRUCKING, INC., 1820 Stewart, Tacoma, Wash. 98421. Applicant's representative: Michael D. Duppenthaler, 515 Lyon Bldg., 607 Third Ave., Seattle, Wash. 98104. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Prefabricated houses*, Chehalis, Wash., to points in Montana, for 180 days. Supporting shipper: West Mills, Inc., 887 N. W. Ave., Chehalis, Wash. 98532. Send protests to: L. D. Boone, Transportation Specialist, Bureau of Operations, Interstate Commerce Commission, 858 Federal Bldg., 915 Second Ave., Seattle, Wash. 98174.

No. MC 107403 (Sub-No. 983 TA), filed August 10, 1976. Applicant: MATLACK, INC., Ten West Baltimore Ave., Lansdowne, Pa. 19050. Applicant's representative: John Nelson (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Liquid chemicals*, in bulk, in tank vehicles; (2) *Ferric sulphate*, in bulk, in tank vehicles, (1) from the plantsite of Pearl River Chemical Co., at or near Pearl River, La., to points in Alabama, Arkansas, Florida, Georgia, Mississippi, Tennessee and Texas; (2) from Copperhill, Tenn., to points in Louisiana, for 180 days. Supporting: Pearl River Chemical Company, P.O. Box 1202, Slidell, La. 70459. Send protests to: Monica A. Blodgett, Transportation Assistant, Interstate Commerce Commission, 600 Arch St., Room 3238, Philadelphia, Pa. 19106.

No. MC 111434 (Sub-No. 91 TA), filed August 9, 1976. Applicant: DON WARD, INC., 241 West 56th Ave., Denver, Colo. 80216. Applicant's representative: J. Albert Sebald, 1700 Western Federal Bldg., Denver, Colo. 80216. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fly ash*, in bulk, from Pueblo, Colo., to points in Kansas, Oklahoma, New Mexico, Nebraska, Wyoming, Utah and Texas, for 180 days. Supporting shipper: Darold R. Tabor, Inc., P.O. Box 11354, Pueblo, Colo. Send protests to: Roger L. Buchanan, District Supervisor, Interstate Commerce Commission, 721 19th St., 492 U.S. Customs House, Denver, Colo. 80202.

No. MC 114789 (Sub-No. 55 TA), filed July 27, 1976. Applicant: NATIONWIDE CARRIERS, INC., P.O. Box 104, Maple Plain, Minn. 55359. Applicant's representative: Allan L. Timmerman (same address as applicant). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Floor coverings, stair treads, wall tile, china bath accessories, counter top coverings, mouldings and the materials and supplies* used in the installation, maintenance and repair of the commodities described above, from Elmsford, N.Y.; Roselle Park, Keyport and East Brunswick, N.J.; Philadelphia and Gettysburg, Pa., to points in the Minneapolis-St. Paul, Minn. Commercial Zone as defined by the Commission, under a continuing contract with Minnesota Tile Supply, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Minnesota Tile Supply, 4825 France Ave., North, Minneapolis, Minn. 55429. Send protests to: A. N. Spath, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 414 Federal Bldg., and U.S. Courthouse, 110 S. 4th St., Minneapolis, Minn. 55401.

No. MC 117119 (Sub-No. 591 TA), filed August 11, 1976. Applicant: WILLIS SHAW FROZEN EXPRESS, INC., P.O. Box 188, Elm Springs, Ark. 72728. Applicant's representative: L. M. McLean (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meat, meat products, meat by-products and articles distributed by meat packinghouses* (except hides and commodities in bulk), from the facilities of Maverick Beef Packers, Inc., at or near Eagle Pass, Tex., to points in Georgia, Arkansas, Tennessee, South Carolina, North Carolina, Virginia, Kentucky, Illinois, Indiana, Ohio, West Virginia, Maryland, Pennsylvania, Delaware, Rhode Island, New Jersey, New York, Connecticut, Massachusetts, Vermont, New Hampshire, Maine, Michigan, Wisconsin, Missouri, Iowa, Minnesota, North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, New Mexico, Texas, Colorado, Utah, Nevada, Arizona, California, and the District of Columbia, for 180 days. Supporting shipper: Maverick Beef Packers, Inc., P.O. Box 617, Eagle Pass, Tex. 78852. Send protests to: William H. Land, Jr., District Supervisor, 3108 Federal Office Bldg., 700 West Capitol, Little Rock, Ark. 72201.

No. MC 118535 (Sub-No. 89 TA), filed August 6, 1976. Applicant: TIONA TRUCK LINES, INC., 111 S. Prospect, Butler, Mo. 64730. Applicant's representative: Jim Tiona, Jr. (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Recycled waste materials*, in bulk, in pneumatic tank vehicles, from Washington, D.C., San Jose, Calif., and San Diego, Calif., to points in Wisconsin, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting Shipper: Wisconsin Solid Waste Recycling Authority, 3321 West Beltline Highway, Madison, Wis. 53702. Send protests to: John V. Barry, District Supervisor, Interstate Commerce Commission, 600 Federal Bldg., 911 Walnut St., Kansas City, Mo. 64106.

No. MC 119302 (Sub-No. 23TA), filed August 11, 1976. Applicant: MILLER TRANSFER AND RIGGING CO., P.O. Box 6077, Akron, Ohio 44312. Applicant's representative: A. David Milliner, 167 Fairfield Ave., P.O. Box 1409, Fairfield, N.J. 07006. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Machinery and machinery parts*, moving with the machinery or separately, between the plantsite of Elliott Co., Division of Carrier Corporation, at Donora, Pa., on the one hand, and, on the other, points in the United States (except Alaska and Hawaii), under a continuing contract with Elliott Co., Division of Carrier Corporation, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Elliott Co., Division of Carrier Corporation, North 4th St., Jeannette, Pa. 15644. Send protests to: James Johnson, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 181 Federal Office Bldg., 1240 East Ninth St., Cleveland, Ohio 44199.

No. MC 123091 (Sub-No. 17TA), filed August 10, 1976. Applicant: NICK STRIMBU, INC., 3500 Parkway Road, Brookfield, Ohio 44403. Applicant's representative: Edwin H. van Deusen, P.O. Box 97, 220 West Bridge St., Dublin, Ohio 43017. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Treated lumber and plywood*, from the facilities of Dixie Wood Preserving Company, at or near Thomson, Ga., to points in Delaware, Illinois, Indiana, Kentucky, Maryland, Michigan, New Jersey, New York, Ohio, Pennsylvania, Virginia, West Virginia and the District of Columbia, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Dixie Wood Preserving Company, P.O. Box 746, Thomson, Ga. 30824. Send protests to: James Johnson, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 181 Federal Office Bldg., 1240 East Ninth St., Cleveland, Ohio 44199.

No. MC 127539 (Sub-No. 52TA), filed August 10, 1976. Applicant: PARKER REFRIGERATED SERVICE, INC., 1108 54th Ave. East, Tacoma, Wash. 98421. Applicant's representative: Michael D. Duppenthaler, 515 Lyon Bldg., 706 Third Ave., Seattle, Wash. 98104. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Butter*, in cartons or packages, in vehicles equipped with mechanical refrigeration, from Hughson and Willows, Calif., to the facilities of Brown & Haley Candy Company, at Tacoma, Wash., for 180 days. Supporting shipper: Brown & Haley Candy Company, 1940 East 11th, Tacoma, Wash., 98421. Send protests to: L. D. Boone, Transportation Specialist, Bureau of Operations, Interstate Commerce Commission, 858 Federal Bldg., Seattle, Wash. 98174.

No. MC 129032 (Sub-No. 25TA), filed August 11, 1976. Applicant: TOM INMAN TRUCKING, INC., 6015 S. 49th West Ave., P.O. Box 9667, Tulsa, Okla. 74107. Applicant's representative: John Paul Fischer, 256 Montgomery St., San Francisco, Calif. 94104. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Canned seafood*, from Seattle and Bellingham, Wash., to Lubbock, San Angelo, Dallas and San Antonio, Tex.; Shreveport, La.; Little Rock, Ark.; Memphis, Tenn., and Pauline, Kans., for 180 days. Supporting shipper: Kelley Clarke Company, 2460 Sixth Ave., South, Seattle, Wash. 98124. Send protests to: Joe Green, District Supervisor, Room 240 Old Post Office Bldg., 215 Northwest Third St., Oklahoma City, Okla. 73102.

No. MC 133119 (Sub-No. 97 TA), filed August 10, 1976. Applicant: HEYL TRUCK LINES, INC., 200 Norka Drive, P.O. Box 206, Akron, Iowa 51001. Applicant's representative: Donald Heyl (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Agricultural* chemicals (except in bulk), from Des Moines, Iowa and the plantsite and warehouse facilities of Monsanto Company, at or near Muscatine, Iowa, to ports of entry located on the International Boundary between Canada and the United States in Montana, North Dakota, and Minnesota, restricted to transportation of shipments destined to points in Alberta, Saskatchewan and Manitoba, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Richard E. Schrick, Agricultural Transportation Supervisor, Monsanto Company, 800 North Lindbergh Blvd., St. Louis, Mo. 63166. Send protests: to Carroll Russell, District Supervisor, Interstate Commerce Commission, Suite 620, 110 North 14th St., Omaha, Nebr. 68102.

No. MC 135381 (Sub-No. 4 TA), filed August 11, 1976. Applicant: DRUM

TRANSPORTATION CO., R.D. No. 1, Montgomery, Pa. 17752. Applicant's representative: J. G. Dail, Jr., P.O. Box 567, McLean, Va. 22101. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Traffic and maintenance paints;* (2) *Thermoplastic and cold applied plastic* for street and highway marking; (3) *Street and highway marking machines*, and (4) *Materials, components, and supplies* used in the manufacture of the commodities named in (1) and (2) above, between the facilities of Prismo Universal Corporation, at Montgomery and Pennsdale, Pa., and Marble Falls, Tex., and points in the United States in and east of North Dakota, South Dakota, Nebraska, Colorado, and Arizona, under a continuing contract with Prismo Universal Corporation, for 180 days. Supporting shipper: Prismo Universal Corporation, Montgomery, Pa. 17752. Send protests to: Paul J. Kenworthy, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 134 U.S. Post Office Bldg., Scranton, Pa. 18503.

No. MC 136228 (Sub-No. 23 TA), filed August 3, 1976. Applicant: LUISI TRUCK LINES, INC., P.O. Box 606, Milton-Freewater, Oreg. 97862. Applicant's representative: Philip Skofstad, 18448 SE. Pine St., Portland, Oreg. 97233. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fresh hanging* beef, fresh and frozen boxed meat, from Wallula, Wash., to Sublimity, Oreg., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Columbia Foods, Inc., P.O. Box 926, Pasco, Wash. 99301. Send protests to: W. J. Huetig, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 114 Pioneer Courthouse, Portland, Oreg. 97204.

No. MC 136407 (Sub-No. 13TA), filed August 6, 1976. Applicant: COORS TRANSPORTATION CO., 5101 York St., Denver, Colo. 80216. Applicant's representative: Leslie R. Kehl, 1600 Lincoln Center Bldg., 1660 Lincoln St., Denver, Colo. 80203. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Malt beverages*, from points in Jefferson County, Colo., to points in Montana and Washington, under a continuing contract or contracts with Adolph Coors Company of Golden, Colo.; and (2) *Equipment, materials* (except in bulk), *and supplies* (except in bulk), used and dealt in by breweries, from points in Louisiana, Montana, and Washington, to points in Boulder and Jefferson Counties, Colo., under a continuing contract with Adolph Coors Company of Golden, Colo., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Adolph Coors Company, Golden, Colo. Send protests to: Herbert C. Ruoff, District Supervisor, Interstate Commerce Commission, 492 U.S. Customs House, Denver, Colo. 80202.

No. MC 139858 (Sub-No. 9 TA), filed August 10, 1976. Applicant: AMSTAN TRUCKING, INC., 1255 Corwin Ave., Hamilton, Ohio 45015. Applicant's representative: Chandler L. VanOrman, 704 Southern Bldg., Washington, D.C. 20005. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *All products* manufactured and distributed by American Standard and its subsidiaries including, but limited to *plumbing fixtures and fittings, folding doors or partitions, fabric covered wall panels, fireplaces and chimney assemblies, safes and security equipment, steel doors*, printed and advertising matter, railway equipment, off road vehicle parts, air quality equipment, heat exchangers, and related equipment and supplies for each product line (except commodities in bulk and those which because of size or weight, require the use of special equipment), from American Standard's Corporate Distribution Center in Hamilton, Ohio, to Phoenix and Tucson, Ariz.; Oakland, Sacramento, San Diego, San Francisco, San Jose, San Pablo, Stockton, and Redwood City and Los Angeles County and Orange County, Calif.; Denver, Colo.; Las Vegas and Reno, Nev.; Albuquerque, N. Mex.; Portland, Oreg.; Salt Lake City, Utah; and Seattle, Wash., under a continuing contract with American Standard Inc., for 180 days. Supporting shipper: James P. Nelligan, General Traffic Manager, American Standard Inc., P.O. Box 2003, New Brunswick, N.J. 08903. Send protests to: Paul J. Lowry, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 5514–B Federal Bldg., 550 Main St., Cincinnati, Ohio 45202.

No. MC 140389 (Sub-No. 8 TA), filed August 11, 1976. Applicant: OSBORN TRANSPORTATION, INC., P.O. Box 1830, Gadsden, Ala. 35902. Applicant's representative: Jerome F. Marks (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Rugs, carpets* and textile products, from points in Georgia, to points in California, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: There are approximately 13 statements of support attached to the application, which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: Clifford W. White, District Supervisor, Bureau of Operations, Interstate Commerce Commission, Room 1616, 2121 Bldg., Birmingham, Ala. 35203.

No. MC 141328 (Sub-No. 3 TA), filed August 6, 1976. Applicant: MID-STATES HAULING CONTRACTORS, INC., P.O. Box 13, 106 North 25th St., Lexington, Md. 64067. Applicant's representative: Tom B. Kretsinger, 910 Brookfield Bldg., 101 West Eleventh St., Kansas City, Mo. 64105. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Rock, sand and gravel*, from points in Hot Springs, Sevier, Pulaski, Howard and Clark Counties, Ark., to points in Louisiana, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shippers: (1) Pensacola Construction Company, 4745 Poplar, Suite 307, Memphis, Tenn. 38117 and (2) Souter Construction Co., Inc., P.O. Box 876, Conway, Ark. 72032. Send protests to: Vernon V. Coble, District Supervisor, Interstate Commerce Commission, 600 Federal Bldg., 911 Walnut St., Kansas City, Mo. 64106.

No. MC 142205 (Sub-No. 2 TA), filed August 11, 1976. Applicant: LOUDOUN TRANSFER, INC., P.O. Box 703, Leesburg, Va. 22075. Applicant's representative: Thomas G. Jewell (same address as applicant). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Custom molded expandable polystryene packaging*, from the plantsite at Sterling Va., to points in Connecticut, Massachusetts, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, North Carolina, South Carolina, Ohio and West Virginia, under a continuing contract with Preferred Plastics, Inc. Applicant intends to tack its existing authority with MC 142205, for 180 days. Applicant also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Preferred Plastics, Inc., State Rte. 634, P.O. Box 58, Sterling, Va. 22170. Send protests to: Interstate Commerce Commission, 12th & Constitution Ave., NW., Room 1413, W. C. Hersman, District Supervisor, Washington, D.C. 20423.

No. MC 142338 TA, filed August 10, 1976. Applicant: JOHN E. WHATCOTT, doing business as TRADE SPECIALTIES, 1020 South Center, Mesa, Ariz. 85202. Applicant's representative: John E. Whatcott, 345 South Hobson, Mesa, Ariz. 85201. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Asphalt roofing materials, and such commodities* as are used in the construction and installation of roofs, from Barstow, Camarillo, Corona, Long Beach, Los Angeles, Oakland, Riverside, San Francisco, San Leandro, Santa Clara, Southgate and Wilmington, Calif., to Phoenix, Mesa, and Tucson, Ariz., under a continuing contract with Southwest Roofing Supply Company, and A & H Supply Co., Inc., for 180 days. Supporting shippers: Southwest Roofing Supply Company, 3151 W. Osborn Road, Phoenix, Ariz. and A & H Supply Co., Inc., 1702 East Jackson St., Phoenix, Ariz. 85034. Send protests to: Andrew V. Baylor, District Supervisor, Interstate Commerce Commission, Room 3427 Federal Bldg., 230 N. First Ave., Phoenix, Ariz. 85025.

No. MC 142339 TA, filed August 10, 1976. Applicant: KITSAP DELIVERY, INC., 6816 Kitsap Way, Bremerton, Wash. 98310. Applicant's representative: James Sells, 245 4th St. Bldg., Bremerton, Wash. 98310. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General freight* not exceeding 1000 lbs. per delivery (except in bulk, in tank vehicles, between Seattle and points in King County and Tacoma and points in Pierce County and Bremerton and Points in Kitsap County. Applicant intends to interline at Seattle and Tacoma, Wash., for 180 days. Supporting shipper: Bennett Ford, 5101 Kean, Bremerton, Wash. 98310. Send protests to: L. D. Boone, Transportation Specialist, Bureau of Operations, Interstate Commerce Commission, 858 Federal Bldg., 915 Second Ave., Seattle, Wash. 98174.

No. MC 142340 TA, filed August 10, 1976. Applicant: HERBERT F. CLARK, JR., INC., R.D. 2, Box 357 D, Selkirk, N.Y. 12158. Applicant's representative: Neil D. Breslin, 99 Washington Ave., Suite 1111, Albany, N.Y. 12210. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Scrap metal*, from Village of Green Island, N.Y., to Providence, R.I., Newark, N.J., Port of Entry at Niagara Falls, N.Y., Fairless Hills, Pa., Greenfield, Mass. and Sayerville, N.Y., for 180 days. Supporting shipper: Freedman & Son, Inc., P.O. Box 1533, Green Island, N.Y., 12183. Send protests to: Robert A. Radler, District Supervisor, P.O. Box 1167, Albany, N.Y. 12201.

PASSENGER APPLICATION

No. MC 142185 (Sub-No. 2 TA), filed August 2, 1976. Applicant: T.V. TRAVEL INC., doing business as T.V. WORLD TRAVEL SERVICE, Winters Bank Tower, Second and Jefferson Streets, Dayton, Ohio 45402. Applicant's representative: Richard S. Ewing, 1229 Nineteenth St., NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers*, in round-trip sightseeing excursions, beginning and ending at Hilton Head Island, S.C., and extending to points in Beaufort, Berkeley, Charleston, Colleton, Dorchester and Jasper Counties, S.C., and Chatham and Effingham Counties, Ga., restricted to the transportation of not more than 15 passengers in any one vehicle, in special operations, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shippers: There are approximately 9 statements of support attached to the application, which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: Paul J. Lowry, District Supervisory, Bureau of Operations, Interstate Commerce Commission, 5514–B Federal Bldg., 550 Main St., Cincinnati, Ohio 45202.

By the Commission.

[AB 69 (Sub-No 2)]

WESTERN MARYLAND RAILWAY CO.

Abandonment Near Cumberland, Allegany County, Md., and Bedford County, Commonwealth of Pa.

AUGUST 13, 1976.

The Interstate Commerce Commission hereby gives notice that its Environmental Affairs staff has concluded that the proposed abandonment by the Western Maryland Railway Company of its State Line branch between Georges Creek Junction in Allegany County, Md., and State Line, in Bedford County, Pa., a distance of 4.52 miles, if approved by the Commission, does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. §§ 4321, et seq., and that preparation of a detailed environmental impact statement will not be required under section 4332(2)(C) of the NEPA.

It was concluded, among other things, that inasmuch as no traffic has moved over the line for several years, abandonment of the line will not result in diversion to motor carriers and the attendant environmental impacts. In view of the absence of developmental plans in the vicinity of the subject line, the proposed action will not have a serious adverse effect on community and rural development. The right-of-way, most of which is subject to reversionary interests, has not been found suitable for alternative public use.

This conclusion is contained in a staff-prepared environmental threshold assessment survey, which is available on request to the Interstate Commerce Commission, Office of Proceedings, Washington, D.C. 20423; telephone 202–275–7011.

Interested persons may comment on this matter by filing their statements in writing with the Interstate Commerce Commission, Washington, D.C. 20423, on or before September 23, 1976.

It should be emphasized that the environmental threshold assessment survey represents an evaluation of the environmental issues in the proceeding and does not purport to resolve the issue of whether the present or future public convenience and necessity permit discontinuance of the line proposed for abandonment. Consequently, comments on the environmental study should be limited to discussion of the presence or absence of environmental impacts and reasonable alternatives.

ROBERT L. OSWALD,
Secretary.

ENVIRONMENTAL PROTECTION AGENCY

CONTROL OF AIR POLLUTION FROM NEW MOTOR VEHICLES AND NEW MOTOR VEHICLE ENGINES

■

Final Evaporative Emission Regulations for Light Duty Vehicles and Trucks

V41 I164 AUG 23 76 UMI

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

[FRL 595–1]

PART 86—CONTROL OF AIR POLLUTION FROM NEW MOTOR VEHICLES AND NEW MOTOR VEHICLE ENGINES

Final Evaporative Emission Regulations for Light Duty Vehicles and Trucks

On January 13, 1976 a notice of proposed rulemaking (NPRM) was published in the FEDERAL REGISTER (41 FR 2022), setting forth proposed amendments to Subparts A and B of Part 86 of the Code of Federal Regulations (CFR) to become effective with 1978 model year light duty vehicles and light duty trucks. The NPRM announced the Agency's intention to revise the evaporative emission test procedures and establish standards of 6 g/test for 1978 and 2 g/test for 1979 and subsequent model years.

The issue of a 2 gram per test standard for 1979 is much more complex than the revised test procedures and the 1978 standard. Yet the current 1978 standard represents so large (about 70%) of a reduction from current light duty vehicle and truck evaporative emission levels that accepting the real risk of not being able to implement a 6 g/test standard for 1978, due to the additional time necessary to thoroughly study and evaluate the technical feasibility, relationship between a 2 g/test standard and background emission levels, cost and lead time associated with the 2 gram level, is not justified. Therefore, in order to allow implementation of the revised test procedure and the 6 g/test standard for 1978, the originally proposed regulatory action has been divided into two separate rulemaking actions. The revised test procedure and 1978 standard are being promulgated at this time. The final rulemaking for a longer term evaporative emission standard is presently being considered by the Agency. The 1978 standard will remain in effect for subsequent model years until revised.

Fuel evaporative hydrocarbon emissions have been studied and measured since 1958. Federal control of evaporative emission levels was first proposed in the FEDERAL REGISTER (32 FR 2448) in 1967 when a novel and relatively untried measurement procedure, the use of a vehicle enclosure, was proposed. These rules would have become effective for the 1969 model year. Final rulemaking published in 1968 (33 FR 8304) abandoned the vehicle enclosure measurement procedure in favor of a better known procedure (carbon trap method) which utilizes the adsorption of hydrocarbon on activated charcoal that is weighed before and after the test to determine the mass of hydrocarbon adsorbed. Because of manufacturing lead time requirements, the implementation of the standards was delayed until the 1971 model year, and the emission level was set at 6 g/test. The evaporative emission standard was reduced to a 2 g/test for 1972 and subsequent model years.

The current carbon trap method for measuring evaporative emissions has been found through testing with a more accurate measurement method to greatly underestimate actual evaporative emissions. The more accurate testing method is the Society of Automotive Engineers (SAE) recommended procedure for measuring evaporative emissions (SAE J171a) and involves collecting the evaporative emissions in a large sealed enclosure containing the test vehicle. Results from the 1972 EPA surveillance test program (as reported in Supplement No. 5 of AP–42) of "controlled" in-use vehicles indicate an average emisison level of about 24 g/test by the vehicle enclosure method, more than 12 times the current standard established for the carbon trap method. Thus, the amount of control thought to exist for evaporative emissions does not in actuality exist. Therefore, revised regulations are being implemented to reduce this major source of hydrocarbon air pollution.

The most significant change in the regulations is the revised evaporative emission test procedure which applies to both light duty vehicles and light duty trucks. The standard 6 g/test is established for the 1978 model year which appears to be higher than the present 2 g/test standard as measured by the "carbon trap method." However, when the 6 g/test standard is required to be met by the new test procedure, evaporative hydrocarbons emissions will be reduced from about 1.76 g/mile to 0.6 g/mile. This action will reduce nationwide hydrocarbon emissions from all mobile sources by as much as 46 percent by the year 1990. For certain Air Quality Control Regions that are expected to have difficulty meeting the ambient air quality standards for oxidants, this action will reduce hydrocarbon emissions from all sources by 7.8 percent by the year 1985.

It is estimated that the increased retail cost to the consumer will average about $7.30 for control system components to meet the new evaporative emission standard. No lifetime costs due to increased fuel consumption or maintenance are expected. It is estimated that the major impact on industry will be due to any decrease in sales resulting from this action; however, this is expected to be less than 0.16%. The cost of certification over the next five years that the manufacturers must bear is expected to increase by $2.2 million. The government's cost increase over the same five year period is expected to be $0.4 million. The total national capital investment over the first five years is estimated to total $530 million. This compares to a projected $230 billion in retail sales of new cars and light duty trucks during the same time period, i.e., 1978–1982.

The revised standard and procedure will provide improved air quality at a cost of about $50 per ton of hydrocarbon removed. As a comparison, the cost-effectiveness of reducing automotive exhaust hydrocarbon emissions from the current standard (1.5 g/mile) to the statutory standard (0.41 g/mile) is between $500 and $1400 per ton of hydrocarbon removed. This additional control of evaporative emissions is one of the more cost effective strategies available for reducing hydrocarbon emissions.

Comments on the NPRM were received from many motor vehicle manufacturers and from several other interested parties. All of the comments were analyzed and considered in the preparation of the final rulemaking. The major issues have been summarized here. For the minor technical issues, only the changes to the procedure will be identified. A complete analysis of comments on all issues has been prepared and is available for public review.

On July 18, 1975, the Environmental Protection Agency (EPA) published a decision in the FEDERAL REGISTER (40 FR 30311) which granted the State of California a waiver of Federal preemption under section 209(b) of the Clean Air Act to enable California to enforce an evaporative emission standard for 1977 and subsequent model year light duty vehicles and light duty trucks of 6 g/test as measured by the vehicle enclosure method. The decision granted the waiver to the extent that a Federal standard of equal or greater stringency was not subsequently established. At the same time, EPA announced that all reasonable efforts would be made to establish a more stringent Federal evaporative emission standard based on the vehicle enclosure measurement method. Since the Federal standard hereby published is of equal stringency to the 1978 California standard, the waiver granted to California on July 18, 1975, will no longer be in effect as of the date these Federal standards become effective.

MAJOR ISSUES

Feasibility and lead time requirements of a 6 g/test standard. Most manufacturers responded that a 6 g/test standard, measured by the proposed procedure, is feasible and desirable. Some stated that a delay until 1979 in the implementation of the standard would be more desirable. The consensus of opinion though, is that implementation for 1978 is achievable, although lead time constraints may present some problems.

Cost of a 6 g/test standard. The manufacturers estimated costs to the consumer that range from $1 to $15 per vehicle depending upon the control technique chosen. The sales weighted average of the manufacturers' cost estimates is $7.40 which is essentially the same as the value used in the draft economic impact statement ($7.30). An independent study performed by Exxon Research and Engineering Company for EPA indicated that costs of only about $2 per vehicle are possible. This indicates that the EPA estimate of $7.30 is conservative, and may be high.

Evaporative family concept for certification. The purpose of developing an evaporative family concept was to require evaporative emission testing of only those exhaust test vehicles which represent unique evaporative control systems. This would result in a reduction in the required test load. Those manufacturers who understood the proposal agreed that the test load would be reduced and favored the proposal. Others thought that evaporative test vehicles would be added to the exhaust test vehicles thus increasing the test fleet and therefore the test load. Modifications have been made to the regulations to clarify the requirements in this regard.

Durability and evaporative system deterioration. Most manufacturers suggested that durability testing should not be required. Some commented that EPA must demonstrate the need for durability testing before it can be required. Others contended that no durability data exist, that they can not be obtained for 1978, and that component life testing is sufficient demonstration of system durability. Others said that existing data demonstrate that systems do not deteriorate. The data presented do show that at least some systems deteriorate. The EPA is required, under the provisions of section 206(a)(1), to make a determination that a control system to be installed on vehicles will be effective for the useful life of the vehicle, prior to issuing a Certificate of Conformity for such vehicle. Useful Life has been defined as 50,000 miles. For exhaust emission control system evaluation, the testing protocols include the operation of a limited number of test vehicles over a defined 50,000 mile run. The 50,000 miles are usually accumulated during a 3 month period. However, there are technical reasons for believing that the durability of evaporative emission control systems may be more significantly affected by time than by mileage; extensive use of plastic-like materials is expected to be made to seal possible sources of evaporative emissions, and such materials tend to deteriorate as a function of time, rather than miles. Thus there is considerable question about the validity of utilizing the 50,000 mile test as a basis for evaluating the durability of evaporative emission control systems.

The EPA is currently unable to specify a single test protocol that would be applicable to all vehicles that could be demonstrated to be a valid test of the durability of evaporative emission control systems. Thus, for the purpose of satisfying the requirement that the EPA evaluate the durability of evaporative emission control systems, as well as for the purpose of generating data on alternative test protocols some of which may have industry-wide applicability, the regulations require that each manufacturer specify in his Part I application the test procedures that he intends to utilize to evaluate the durability of his evaporative emission control system and to develop a Deterioration Factor for such systems. The data from these test programs, and the derived Deterioration Factor, are required to be submitted with the Part II Application. From the data thus submitted the EPA expects, for some subsequent model year, to be able to promulgate a standardized durability testing protocol that will apply on an industry-wide basis.

Need for evaporative regulations. Some manufacturers contended that the value from the 1973 EPA surveillance test program cited in the NPRM was the result of a defective test procedure and that the actual values are much lower. EPA has investigated the test procedures used in the study in question and finds that the tests were conducted properly. Due to the computational errors, however, it has been determined that the average value should have been 26.5 g/test rather than 31 g/test as reported in the NPRM.

The value used in the economic impact statement was based on the results of the 1972 surveillance study which showed emissions to be at a 24 g/test level (1.76 g/mi equivalent). The 24 g/test level has undergone the scrutiny required to be incorporated as a part of the Compilation of Air Pollutant Emission factors, AP-42 (Supplement No. 5). The results from the 1973 surveillance program have not yet undergone such scrutiny and therefore were not used.

Background emissions. EPA originally proposed to include non-fuel evaporative hydrocarbon (background) emissions in the evaporative emission measurement and expected manufacturers to provide test vehicles with stabilized background emissions. Manufacturers responded that they sometimes use brand new cars (less than 60–90 days old) which do not have stabilized background emissions. The manufacturers did not address whether artificial aging of new vehicles or obtaining aged vehicles from other sources would be viable solutions to the problem. EPA analysis indicates that both of these are viable options for assuring stabilized background emission levels. At least one study has shown that new car background emissions can be reduced quickly by baking the car for several hours which is not prohibited under the current regulations. Regarding alternative sources of aged vehicles, manufacturers already have the option to rebuild existing vehicles into certification vehicles. Therefore vehicles can be obtained from a variety of sources, and rebuilt into certification vehicles. EPA will place no restrictions on the manufacturers' ability to provide test vehicles with stabilized background emissions.

In addition, manufacturers have a number of options available to them to minimize background emissions that come from new paint, from plastic in the interior of vehicles, from newly manufactured tires, and from road oil and oil drippings on the engine. The regulations do not require test cars to be painted, to contain plastic headliners or seatcovers, or to be equipped with recently-manufactured tires; the regulations do not prohibit the steam cleaning of cars prior to emission testing. Inasmuch as manufacturers typically take advantage of every possible regulatory provision to minimize measured emissions on test vehicles, it is reasonable to expect manufacturers to do everything that they may legally do to minimize background evaporative emissions from their test vehicles. Providing a factor to account for possible background emissions (e.g., 1 g/test) would thus have the practical effect of easing the intended fuel evaporative emission standard by whatever the background allowance might be since manufacturers would still be expected to provide test vehicles with minimized background emissions. For that reason, the proposal of several manufacturers to provide an allowance for background emissions has not been adopted.

EPA is aware of the fact that the options available to the manufacturer to reduce background emissions from prototype vehicles used in certification testing are not available when vehicles may be tested in in-use vehicle emission surveillance programs, or on the assembly line. As regards in-use vehicles, such vehicles would not normally be tested by EPA before they are a year or more older, at which time background emissions can reasonably be expected to have stabilized and be minimal. If, however, a manufacturer uses paints or plastic materials that will continue for long periods of time to emit significant levels of background emissions, these emissions should properly be charged against the in-use vehicle inasmuch as such emissions are real hydrocarbons that contribute to air pollution. Thus, for in-use vehicles the only additional preconditioning that would be undertaken would be removal of spilled or leaked oil, and miscellaneous deposits of road oils.

As regards assembly-line testing, the Agency recognizes that newly assembled vehicles may have high background emissions unrepresentative of typical in-use background emissions. Thus, testing of such vehicles is expected to utilize analytical procedures, yet to be specified, which enable fuel evaporative emissions to be distinguished from emissions from non-fuel sources.

TEST PROCEDURE CHANGES

The amount of fuel for preconditioning is changed from 2 gallons (as proposed in the NPRM) to 40 percent of nominal tank capacity to prevent abnormal loading of the evaporative control system.

The diurnal test has been modified to require installation of the fuel cap when the fuel temperature reaches 60±2° F instead of immediately after fueling as proposed. This test procedure change will eliminate unrepresentative loading of the evaporative control system. This change requires that capping take place in the enclosure with the purge blowers operating.

The diurnal test has also been modified to allow artificial heating of the fuel tank(s) to bring the liquid fuel up to the prescribed starting temperature. The prescribed initial fuel temperature specification has been broadened from the proposed 60±1° F to 60±2° F. The temperature rise has been changed to a 24±1° F temperature rise (above the initial fuel temperature) instead of the proposed 60±1° F to 84±1° F temperature rise. Also, the temperature control limits during the diurnal have been broadened from ±2° F to ±3° F. These modifications should improve test repeatability

V 41 164 AUG 23 76 UM

and provide a more practical test procedure.

Because of the changes to the diurnal test, the proposed requirement to use type T thermocouples is no longer necessary. Therefore, the type J thermocouples currently used can continue to be used without decreased accuracy.

Data show that vehicle idle times of up to 7 minutes have no effect on hot soak emissions. Time between the exhaust and the hot soak tests is changed from a total of 5 minutes, with no more than 1 minute of engine off time to a total of 7 minutes with no more than 2 minutes of engine off time.

The proposed regulations did not specify the exact amount of mixing required or specific fan location. The air circulation is now specified as not less than 200 cfm nor more than 1000 cfm. Multiple fans may be used, but the air stream(s) may not be directed toward the vehicle.

The proposed regulations did not specify the amount of propane to be used for the enclosure calibration. A nominal amount of propane (4g) is given as a convenient quantity for the enclosure calibration in the final regulations. Also, the criteria for an acceptable retention check have been changed. The final value (after 4 hours) may not differ by more than 4 percent of the initial value.

Enclosure background measurements need only be made after maintenance which can be expected to affect enclosure background levels rather than after any maintenance.

The proposed calculation of evaporative emissions required the use of a nominal value of 50 ft^3 for the volume of the vehicle. The final regulations add the option of allowing a manufacturer to measure the actual vehicle volume for all of his test vehicles.

These regulations do not change the requirement for evaporative emission testing at high altitude.

One further modification to the test procedures may be included in future rulemaking (expected to apply with the implementation of the longer term evaporative emission standard), but due to lead time requirements to develop such procedures is not included as a part of the 1978 regulations. This modification will be to place controls on the tank vapor temperature during the diurnal test to insure that the temperature rise in the vapor space is representative of actual use, since the vapor temperature rise is the principal driving force for diurnal emissions and recent data indicate that, although the liquid fuel temperature rises 24° F, the vapor temperature may rise only 12° to 14° F.

The proposed regulations reorganized Subpart B to promote clarity. Subpart B is further modified in the final regulations by the insertion of reserved sections for possible future expansion of the regulations.

The new numbering system that was proposed for Subpart B is adopted. The model year designation appears as a suffix following the section number and is separated by a hyphen. A section will remain effective until it is superseded. This change will make republishing for each model year unnecessary. Also, when a section is amended for an upcoming model year it will appear following the current section. This will enable the reader to quickly find the changes that have been made.

Comments which were received in response to the NPRM, EPA's analysis of the comments, and the Final Environmental Impact Statement are available for inspection and copying during normal business hours at the U.S. Environmental Protection Agency, Public Information Reference Unit, Room 2922 (EPA Library), 401 M Street, SW., Washington, D.C. 20460. As provided in 40 CFR Part 2, a reasonable fee may be charged for copying services.

Single copies of the Final Environmental Impact Statement for this regulation are available in limited number upon request from the Public Information Center (PM–215), U.S. Environmental Protection Agency, Washington, D.C. 20460.

This notice of final rulemaking is issued under authority of sections 202, 206, 207, 208, and 301(a) of the Clean Air Act, as amended (42 U.S.C. 1857f–1, 1857f–5, 1957f–5a, 1857f–6, and 1857g(a)).

It is hereby certified that the economic and inflationary impacts of this regulation have been carefully evaluated in accordance with Executive Order 11821.

Effective date: This revision of Part 86 becomes effective on September 22, 1976.

Dated: August 12, 1976.

RUSSELL E. TRAIN,
Administrator.

Part 86 of Chapter I, Title 40 of the Code of Federal Regulations is amended by revising Subparts A and B as follows:

Subpart A—General Provisions for Emission Regulations for 1977 and Later Model Year New Light Duty Vehicles, 1977 and Later Model Year New Light Duty Trucks and for 1977 and Later Model New Heavy Duty Engines

1. A new § 86.078–2 is added and reads as follows:

§ 86.078–2 Definitions.

The following definitions apply beginning with the 1978 model year. Section 86.077–2 remains effective excepting those definitions which are hereby superseded.

"Accuracy" means the difference between a measurement and true value.

"Basic Engine" means a unique combination of manufacturer, engine displacement, number of cylinders, fuel system (as distinguished by number of carburetor barrels or use of fuel injection), catalyst usage, and other engine and emission control system characteristics specified by the Administrator.

"Body Type" means a name denoting a group of vehicles that are either in the same car line or in different car lines provided the only reason the vehicles qualify to be considered in different car lines is that they are produced by separate divisions of a single manufacturer.

"Calibration" means the set of specifications, including tolerances, unique to a particular design, version, or application of a component or component assembly capable of functionally describing its operation over its working range.

"Car line" means a name denoting a group of vehicles within a make or car division which has a degree of commonality in construction (e.g., body, chassis). Car line does not consider any level of decor or opulence and is not generally distinguished by characteristics as roof line, number of doors, seats or windows except for station wagons or light duty trucks. Station wagons and light duty trucks are considered to be different car lines than passenger cars.

"Diurnal breathing losses" means evaporative emissions as a result of the daily range in temperature.

"Engine Code" means a unique combination, within an engine system combination, of displacement, carburetor (or fuel injection) calibration, choke calibration, distributor calibration, auxiliary emission control devices and other engine and emission control system components specified by the Administrator.

"Engine—system combination" means an engine family-exhaust emission control system combination.

"Evaporative emission code" means a unique combination in an evaporative emission family—evaporative emission control system combination, of purge system calibrations, fuel tank and carburetor bowl vent calibrations and other fuel system and evaporative emission control system components and calibrations specified by the Administrator.

"Evaporative emissions" means hydrocarbons emitted into the atmosphere from a motor vehicle, other than exhaust and crankcase emissions.

"Evaporative vehicle configuration" means a unique combination of basic engine, engine code, body type, and evaporative emission code.

"Fuel system" means the combination of fuel tank(s), fuel pump, fuel lines, and carburetor or fuel injection components, and includes all fuel system vents and fuel evaporative emission control system components.

"Hot soak losses" means evaporative emissions after termination of engine operation.

"Malfunction" means not operating according to specifications listed in the application for certification.

"Model Type" means a unique combination of car line, basic engine, and transmission class.

"Nominal Fuel Tank Capacity" means the volume of the fuel tank(s), specified by the manufacturer to the nearest tenth of a U.S. gallon, which may be filled with fuel from the fuel tank filler inlet.

"Precision" means the standard deviation of replicated measurements.

"Tank fuel volume" means the volume of fuel in the fuel tank(s), which is determined by taking the manufacturer's nominal tank(s) capacity and multiplying by 0.40, the result being rounded using ASTM E29–67 to the nearest tenth of a U.S. gallon.

"Transmission Class" means the basic type of transmission, e.g., manual, automatic, semi-automatic.

"Transmission Configuration" means a unique combination, within a transmission class, of the number of the forward gears and, if applicable, overdrive. The Administrator may further subdivide a transmission configuration (based on such criteria as gear ratios, torque convertor, multiplication ratio, stall speed and shift calibration, etc.), if he determines that significant fuel economy or exhaust emission differences exist within that transmission configuration.

"Vehicle configuration" means a unique combination of basic engine, engine code, inertia weight, transmission configuraton, axle ratio.

"Zero (0) Miles" means that point after initial engine starting (not to exceed 10 miles of vehicle operation, or one hour of engine operation) at which normal assembly line operations adjustments are completed.

2. A new § 86.078–3 is added and reads as follows:

§ 86.078–3 Abbreviations.

(a) The abbreviations in this section apply to this subpart and also to Subparts B, H, I and J of this part.

(b) The abbreviations used in this subpart have the following meanings in both capital and lower case:

AECD—Auxiliary Emission Control Device.
API—American Petroleum Institute.
ASTM—American Society for Testing and Materials.
BHP—Brake horsepower.
BSCO—Brake specific carbon monoxide.
BSHC—Brake specific hydrocarbons.
BSNOx—Brake specific oxides of nitrogen.
C—Celsius.
cfh—Cubic feet per hour.
CFV—Critical flow venturi.
CL—Chemiluminescence.
CO_2—Carbon dioxide.
CO—Carbon monoxide.
Conc.—Concentration.
cfm—Cubic feet per minute.
CT—Closed Throttle.
cu. in.—Cubic inch(es).
CVS—Constant volume sampler.
EP—End point.
Evap.—Evaporated.
F—Fahrenheit.
FID—Flame ionization detector.
ft.—Feet.
FL—Full load.
gal.—U.S. gallon(s).
g—Grams.
GVW—Gross Vehicle Weight.
H_2O—Water.
HC—Hydrocarbon(s).
HFID—Heated flame ionization detector.
Hg—Mercury.
Hi.—High.
Hp—Horsepower.
Hr—Hour.
IBP—Initial boiling point.
ID—Internal diameter.
in.—Inches.
km/h—kilometers per hour.
kPa—Kilopascal(s).
Lb—Pound(s).
LFE—Laminar flow element.
Lb-ft—Pound-feet.
m—Metre.
Max.—Maximum.
Min.—Minimum.
Min.—Minute(s).
ml—Milliliter(s).
mph—Miles per hour.
mm—Millimeter(s).
mv—Millivolt(s).
N_2—Nitrogen.
NDIR—Nondispersive infrared.
NO—Nitric oxide.
NO_2—Nitrogen dioxide.
NOx—Oxides of nitrogen.
No.—Number.
Pb—Lead.
PDP—Positive displacement pump.
ppm—Parts per million by volume.
ppm C—Parts-per million, carbon.
psi—Pounds per square inch.

3. A new § 86.078–8 is added and reads as follows:

§ 86.078–8 Emission standards for 1978 light duty vehicles.

(a) (See paragraph (a) of § 86.077–8)

(b)(1) Evaporative emissions from gasoline fueled light duty vehicles shall not exceed:

(i) *Hydrocarbons.* 6.0 grams per test.

(2) The standard set forth in paragraph (b)(1) of this section refers to a composite sample of the evaporative emissions collected under the conditions set forth in Subpart B of this part and measured in accordance with those procedures.

(c) (See paragraph (c) of § 86.077–8)

4. A new § 86.078–9 is added and reads as follows:

§ 86.078–9 Emission standards for 1978 light duty trucks.

(a) (See paragraph (a) of § 86.077–9)

(b)(1) Evaporative emissions from 1978 model year gasoline fueled light duty trucks shall not exceed:

(i) *Hydrocarbons.* 6.0 grams per test.

(2) The standard set forth in paragraph (b)(1) of this section refers to a composite sample of the evaporative emissions collected under the conditions set forth in Subpart B of this part and measured in accordance with those procedures.

(c) (See paragraph (c) of § 86.077–9)

5. A new § 86.078–21 is added and reads as follows:

§ 86.078–21 Application for certification.

(a) through (b)(3) (See paragraphs (a) through (b)(3) of § 86.077–21)

(4)(i) A description of the proposed mileage (or service) accumulation procedure for durability testing.

(ii) A description of the test procedures to be used to establish the evaporative emission deterioration factors required to be determined and supplied in § 86.077–23(a)(2).

(b)(5) through (c) (See paragraphs (b)(5) through (c) of § 86.077–21)

6. A new § 86.078–22 is added and reads as follows:

§ 86.078–22 Approval of application for certification test fleet selections.

(a) through (c) (See paragraphs (a) through (c) of § 86.077–22)

(d) The Administrator does not approve the test procedures for establishing the evaporative emission deterioration factors. The manufacturer shall submit the procedures as required in § 86.078–21(b)(4)(ii) prior to the Administrator's selection of the test fleet under § 86.078–24(b)(1) and if such procedures will involve testing of durability data vehicles selected by the Administrator or elected by the manufacturer under § 86.078–24(c)(1), prior to initiation of such testing.

7. A new § 86.078–23 is added and reads as follows:

§ 86.078–23 Required data.

The manufacturer shall perform the tests required by the applicable test procedures, and submit to the Administrator the following information:

(a)(1) Exhaust emission durability data on such vehicles (or engines) tested in accordance with applicable test procedures and in such numbers as specified, which will show the performance of the systems installed on or incorporated in the vehicle (or engine) for extended mileage (or extended operation), as well as a record of all pertinent maintenance (all maintenance and servicing for diesel heavy duty engines) performed on the test vehicles (or test engines).

(2) Evaporative emission deterioration factors for each evaporative emission family—evaporative emission control system combination and all test data, that are derived from testing described under § 86.078–21(b)(4)(ii) designed and conducted in accordance with good engineering practice to assure that the vehicles covered by a certificate issued under § 86.078–30 will meet the evaporative emission standards in § 86.078–8 for the useful life of the vehicle.

(b)(1)(i) (See paragraph (b)(1)(i) of § 86.077–23).

(ii) Emission data on those vehicles selected under §§ 86.078–24(b)(1)(v) and 86.078–24(b)(1)(vii)(D) and tested in accordance with the applicable test procedures of this subpart and in such numbers as therein specified, which shall be tested at zero kilometers (zero miles) at any altitude, and under high altitude conditions after 6436 kilometers (4000 miles) of operation at any altitude.

(b)(2) through (d)(2) (See paragraphs (b)(2) through (d)(2) of § 86.077–23)

(3) For evaporative emission durability, a statement of compliance with paragraph (a)(2) of this section.

8. A new § 86.078–24 is added and reads as follows:

§ 86.078–24 Test vehicles and engines.

(a)(1) through (a)(4) (See paragraphs (a)(1) through (a)(4) of § 86.077–24)

(5) The gasoline fueled vehicles covered by an application for certification will be divided into groupings which are expected to have similar evaporative emission characteristics throughout their useful life. Each group of vehicles with similar evaporative emission characteristics shall be defined as a separate evaporative emission family.

(6) To be classed in the same evaporative emission family, vehicles must be identical in all of the following respects:

V 41 164 AUG 23 76 UM

(i) Vapor storage device (e.g., canister, air cleaner, crankcase, induction system).

(ii) Basic canister design.

(iii) Fuel system.

(7) Where vehicles are of a type which cannot be divided into evaporative emission families based on the criteria listed above, the Administrator will establish families for those vehicles based upon the features most related to their evaporative emission characteristics.

(b) (1) (i) (See paragraph (b) (1) (i) of § 86.077–24).

(ii) Vehicles of each engine family will be divided into engine displacement-exhaust emission control system combinations as applicable. A projected sales volume will be established for each combination for the model year for which certification is sought. One vehicle of each combination will be selected in order of decreasing projected sales volume until 70 percent of the projected sales of a manufacturer's total production of vehicles of that engine family is represented, or until a maximum of four vehicles is selected. If any single combination represents over 70 percent, then two vehicles of that combination may be selected. The vehicle selected for each combination will be specified by the Administrator as to such features as engine code, transmission type, fuel system, and inertia weight class.

(iii) through (v) (See paragraphs (b) (1) (iii) through (b) (1) (v) of § 86.077–24).

(vi) The Administrator may combine testing requirements for any vehicle selected under paragraph (b) (1) (v) or (b) (1) (vii) (D) of this section with the testing requirements for any similar vehicle in the same engine-system combination selected under paragraph (b) (1) (ii), (iii), or (iv) of this section or any similar vehicle in the same engine-system, evaporative emission family, evaporative emission control system combination selected under (b) (1) (vii) (A) or (B) of this section. The testing requirements may be combined by the Administrator requiring a vehicle selected for testing under paragraphs (b) (1) (ii), (iii), (iv), (vii) (A), or (vii) (B) of this section to be modified (if necessary) after mileage accumulation and emission testing for the purpose of demonstrating compliance with § 86.078–23 (b) (1) (ii).

(vii) (A) Vehicles of each evaporative emission family will be divided into evaporative emission control systems. One vehicle of each evaporative emission control system within the evaporative emission family will be selected.

(B) The Administrator may select a maximum of four (4) additional vehicles within each evaporative emission family based upon features indicating that they may have the highest evaporative emission levels of vehicles in that family.

(C) The Administrator may determine that the vehicles selected under paragraphs (b) (1) (i) through (vi) of this section may be used to satisfy the requirements of paragraphs (b) (1) (vii) (A) and (B) of this section.

(D) The Administrator will also select one vehicle for each evaporative emission control system within each evaporative family for which vehicles are to be sold at high altitude.

(E) Vehicles selected under paragraph (b) (1) (v) of this section may be used to satisfy the requirements of paragraph (b) (1) (vii) (D) of this section.

(b) (2) through (g) (See paragraphs (b) (2) through (g) of § 86.077–241).

9. A new § 86.078–25 is added and reads as follows:

§ 86.078–25 Maintenance.

(a) (1) (See paragraph (a) (1) of § 86.077–25).

(a) (2) (i) Scheduled maintenance on the engine, emission control system, and fuel system of durability vehicles, selected by the Administrator or elected by the manufacturer under § 86.078–24(c) (1), shall be scheduled for performance during durability testing at the same mileage intervals that will be specified in the manufacturer's maintenance instructions furnished to the ultimate purchaser of the motor vehicle. Such maintenance shall be performed, except as provided in paragraph (a) (6) (iii) of this section, only under the following provisions.

(a) (2) (i) (A) through (a) (2) (v) (A) (1) (See paragraphs (a) (2) (i) (A) through (a) (2) (v) (1) of § 86.077–25).

(2) Has made a determination that the need for maintenance or repairs is indicated by an overt indication of malfunction such as persistent misfire, vehicle stall, overheating, fluid leakage, loss of oil pressure, or charge indicator warning. For the evaporative system, this overt indication may be indicated by such items as fuel odor or fluid leakage.

(a) (2) (v) (B) through (a) (3) (i) (See paragraphs (a) (2) (v) (B) through (a) (3) (i) of § 86.077–25).

(a) (3) (ii) Maintenance on Emission data vehicles selected under § 86.078–24 (b) (1) (v) or 24(b) (1) (vii) (D) and permitted to be tested for purposes of § 86.078–23(b) (1) (ii) under the provisions of § 86.078–24(b) (1) (vi) may be performed in conjunction with emission control system modifications at the 6436 kilometer (4000 mile) test point, and shall be performed in accordance with the maintenance instructions to be provided to the ultimate purchaser required under § 86.077–38.

(a) (3) (iii) through (d) (See paragraphs (a) (3) (iii) through (d) of § 86.077–25)

10. A new § 86.078–26 is added and reads as follows:

§ 86.078–26 Mileage and service accumulation; emission measurements.

(a) (1) and (a) (2) (See paragraphs (a) (1) and (a) (2) of § 86.077–26)

(3) Emission data vehicles.

(i) Gasoline-fueled.

(A) Each gasoline-fueled emission data vehicle shall be driven 4000 miles with all emission control systems installed and operating. Complete exhaust emission tests shall be conducted at zero miles and 4000 miles on those vehicles selected under § 86.178–24(b) (1) (i) through (b) (1) (vi). Complete evaporative emission tests shall be conducted at 4000 miles on those vehicles selected under § 86.078–24(b) (1) (vii). The manufacturer may at his option test the vehicles selected under § 86.078–24(b) (1) (vii) up to three times at the 4000 mile test point as long as the ±250 mile test tolerance is adhered to. The Administrator may determine under § 86.078–24(f) that no testing is required.

(B) The emission data vehicle(s) selected for testing under § 86.078–24 (b) (1) (v) or (b) (1) (vii) (D) shall be driven 6436 kilometers (4000 miles) at any altitude. Emission tests shall be conducted at zero kilometers (zero miles) at any altitude and 6436 kilometers (4000 miles) under high altitude conditions.

(C) The emission data vehicle(s) selected for testing under § 86.078–24 (b) (1) (v) or (b) (1) (vii) (D) and permitted to be tested for purposes of § 86.078–23(b) (1) (ii) under the provisions of § 86.078–24(b) (1) (vi) shall be driven 6436 kilometers (4000 miles) at low altitude. Emission tests shall be conducted at zero kilometers (zero miles) at low altitude and 6436 kilometers (4000 miles) under both low and high altitude conditions. For the purposes of this subparagraph, low altitude means any elevation less than 549 meters (1800 feet).

(a) (3) (ii) through (a) (3) (ii) (C) (See paragraphs (a) (3) (ii) through (a) (3) (ii) (C) of § 86.077–26)

(4) Durability data vehicles

(i) *Gasoline Fueled.* Each gasoline fueled durability data vehicle selected by the Administrator or elected by the manufacturer under § 86.078–24(c) (1) shall be driven, with all emission control systems installed and operating for 50,000 miles or such lesser distance as the Administrator may agree to as meeting the objective of this procedure. Complete exhaust emission tests shall be made on all durability data vehicles selected by the Administrator or elected by the manufacturer under § 86.078–24(c) at the following mileage points: 0; 5000; 10,000; 15,000; 20,000; 25,000; 30,000; 35,000; 40,000; 45,000; 50,000. The Administrator may determine under § 86.078–24(f) that no testing is required.

(a) (4) (ii) through (a) (10) (See paragraphs (a) (4) (ii) through (a) (10) of § 86.077–26)

(a) (11) This section does not apply to testing conducted to meet the requirements of § 86.078–23(a) (2).

(b) through (c) (see paragraphs (b) through (c) of § 86.077–26)

11. A new § 86.078–28 is added and reads as follows:

§ 86.078–28 Compliance with emission standards.

(a) (1) through (a) (3) (see paragraphs (a) (1) through (a) (3) of § 86.077–28)

(4) The procedure for determining compliance of a new motor vehicle with exhaust emission standards is as follows:

(i) Separate emission deterioration factors shall be determined from the exhaust emission results of the durability data vehicle(s) for each engine-system condition. A separate factor shall be established for exhaust HC, exhaust CO, and exhaust NOx for each engine system combination. A separate evaporative emission deterioration factor shall be determined for each evaporative emission family-evaporative emission control system combination from the testing conducted by the manufacturer.

(A) The applicable results to be used in determining the exhaust emission deterioration factors for each engine-system combination shall be:

(1) All valid exhaust emission data from the tests required under § 86.078–26(a) (4), except the zero mile tests. This shall include the official test results, as determined in § 86.078–29 for all tests conducted on all durability data vehicles of the combination selected under § 86.078–24(c) (including all vehicles elected to be operated by the manufacturer under § 86.078–24(c) (1) (ii)).

(2) All exhaust emission data from the tests conducted before and after the scheduled maintenance provided in § 86.078–25(a).

(3) All exhaust emission data from tests required by maintenance approved under § 86.078–25, in those cases where the Administrator conditioned his approval for the performance of such maintenance on the inclusion of such data in the deterioration factor calculation.

(B) All applicable exhaust emission results shall be plotted as a function of the mileage on the system, rounded to the nearest mile, and the best fit straight lines, fitted by the method of least squares, shall be drawn through all these data points. The interpolated 4,000- and 50,000-mile points on this line must be within the standards provided in § 86.078–8 or § 86.078–9, as applicable, or the data will not be acceptable for use in calculation of a deterioration factor, unless no applicable data point exceeded the standard. An exhaust emission deterioration factor shall be calculated for each engine-system combination as follows:

factor=Exhaust emissions interpolated to 50,000 miles/exhaust emission interpolated to 4,000 miles.

These interpolated values shall be carried out to a minimum of four places to the right of the decimal point before dividing one by the other to determine the deterioration factor. The results shall be rounded to three places to the right of the decimal point in accordance with ASTM E 29–67.

(C) An evaporative emissions deterioration factor shall be determined from the testing conducted as described in § 86.078–21(b) (4) (ii), for each evaporative emission family-evaporative emission control system combination to indicate the evaporative emission level at 50,000 miles relative to the evaporative emission level at 4,000 miles as follows:

factor=Evaporative emission level at 50,000 miles *minus* the evaporative emission level at 4,000 miles.

The factor shall be established to a minimum of two places to the right of the decimal.

(ii) (A) The official exhaust emission test results for each emission data vehicle at the 4000 mile test point shall be multiplied by the appropriate deterioration factor: *Provided,* That if a deterioration factor as computed in paragraph (a) (4) (i) (B) of this section is less than one, that deterioration factor shall be one for the purposes of this paragraph.

(B) The official evaporative emission test results for each evaporative emission data vehicle at the 4000 mile test point shall be adjusted by addition of the appropriate deterioration factor: *Provided,* That if a deterioration factor as computed in paragraph (a) (4) (i) (c) of this section is less than zero, that deterioration factor shall be zero for the purposes of this paragraph.

(a) (4) (iii) (See paragraph (a) (4) (iii) of § 86.077–28)

(iv) Every test vehicle of an engine family must comply with the exhaust emission standards, as determined in paragraph (a) (4) (iii) of this section, before any vehicle in that family may be certified.

(v) Every test vehicle of an evaporative emission family must comply with the evaporative emission standards, as determined in paragraph (a) (4) (iii) of this section, before any vehicle in that family may be certified.

(b) through (c) (See paragraphs (b) through (c) of § 86.077–28)

12. A new § 86.078–29 is added and reads as follows:

§ 86.078–29 Testing by the Administrator.

(a) (1) through (a) (3) (i) (See paragraphs (a) (1) through (a) (3) (i) of § 86.077–29)

(ii) Whenever the Administrator does not conduct a test on a test vehicle at a test point, the manufacturer's test data will be accepted as the official data for that test point: *Provided,* That if the Administrator makes a determination based on testing under paragraph (a) (2) of this section, that there is a lack of correlation between the manufacturer's test equipment and the test equipment used by the Administrator, no manufacturer's test data will be accepted for purposes of certification until the reasons for the lack of correlation are determined and the validity of the data is established by the manufacturer, and further provided, that if the Administrator has reasonable basis to believe that any test data submitted by the manufacturer is not accurate or has been obtained in violation of any provisions of this part, the Administrator may refuse to accept that data as the official data pending retesting or submission or further information. If the manufacturer conducts more than one test on a vehicle, as authorized under § 86.078–26(a) (3) (i) (A), the data from the last test in that series of tests on that vehicle, will constitute the official data.

(a) (3) (iii) (A) (See paragraph (a) (3) (iii) (A) of § 86.077–29)

(B) If the Administrator determines that the test data developed on an emission data vehicle under paragraph (a) (3) (i) of this section would cause that vehicle to fail due to excessive 4000 mile emissions or by application of the appropriate deterioration factor, then the following procedure shall be observed:

(a) (3) (iii) (B) (1) through (b) (See paragraphs (a) (3) (iii) (B) (1) through (b) of § 86.077–29)

13. A new § 86.078–30 is added and reads as follows:

§ 86.078–30 Certification.

(a) (1) and (a) (2) (See paragraphs (a) (1) and (a) (2) of § 86.077–30)

(3) One such certificate will be issued for each engine family—evaporative family combination and will certify compliance with no more than one set of applicable standards.

(a) (4) through (a) (7) (See paragraphs (a) (4) through (a) (7) of § 86.077–30)

(b) (1) The Administrator will determine whether a vehicle (or engine) covered by the application complies with applicable standards by observing the following relationships:

(i) Light duty vehicles and light duty trucks.

(A) The durability data vehicle(s) selected under § 86.078–24 (c) (1) (i) shall represent all vehicles of the same engine-system combination.

(B) The emission data vehicle(s) selected under § 86.078–24 (b) (1) (ii), (b) (1) (iii), and (b) (1) (iv) shall represent all vehicles of the same engine-system combination as applicable to be sold below 4000 ft.

(C) The emission data vehicle(s) selected under § 86.078–24 (b) (1) (vii) (A) and (b) (1) (vii) (B) shall represent all vehicles of the same evaporative control system within the evaporative family, as applicable, to be sold below 4000 ft.

(D) The emission data vehicle(s) selected under § 76.078–24(b) (1) (v) shall represent all vehicles of the same engine system combination to be sold at high altitude.

(E) The emission data vehicle(s) selected under § 86.078–24(b) (1) (vii) (D) shall represent all vehicles of the same evaporative control system within the evaporative family sold at high altitude.

(b) (1) (ii) through (b) (1) (iii) (C) (See paragraphs (b) (1) (ii) through (b) (1) (iii) (C) of § 86.077–30)

(2) The Administrator will proceed as in paragraph (a) of this section with respect to the vehicles belonging to an engine family—evaporative family combination, all of which comply with all applicable standards.

(3) (See paragraph (b) (3) of § 86.077–30)

(4) The manufacturer may, at his option, proceed with any of the following alternatives with respect to an emission

V 41 164 AUG 23 76 UMI

data vehicle determined not in compliance with all applicable standards for which it was tested.

(i) Request a hearing under § 86.078–6; or

(ii) Remove the vehicle configuration (or evaporative vehicle configuration as applicable) which failed from his application;

(A) If the failed vehicle was tested for compliance with exhaust emission standards only: The Administrator may select, in place of the failed vehicle, in accordance with the selection criteria employed in selecting the failed vehicle, a new emission data vehicle to be tested for exhaust emission compliance only.

(B) If the failed vehicle was tested for compliance with both exhaust and evaporative emission standards: The Administrator may select, in place of the failed vehicle, in accordance with the selection criteria employed in selecting the failed vehicle, a new emission data vehicle which will be tested for compliance with both exhaust and evaporative emissions standards. If one vehicle cannot be selected in accordance with the selection criteria employed in selecting the failed vehicle, then two vehicles may be selected (i.e., one vehicle to satisfy the exhaust emission vehicle-selection criteria, and one vehicle to satisfy the evaporative emission vehicle-selection criteria) both of which will be tested for compliance with both exhaust and evaporative emission standards; or

(iii) Remove the vehicle configuration (or evaporative vehicle configuration, as applicable) which failed from his application and add a vehicle configuration(s) (or evaporative vehicle configuration(s) as applicable) not previously listed. The Administrator may require if applicable that the failed vehicle be modified to the new engine code (or evaporative emission code as applicable) and demonstrate by testing that it meets applicable standards for which it was originally tested. In addition, the Administrator may select, in place of the failed vehicle, a new emission data vehicle (or vehicles) which may be tested for compliance with both exhaust and evaporative emissions standards; or

(iv) Correct a component or system malfunction and show that with a correctly functioning system or component, the failed vehicle meets applicable standards for which it was originally tested. The Administrator may require, a new emission data vehicle, of identical vehicle configuration (or evaporative vehicle configuration as applicable) to the failed vehicle, to be operated and tested for compliance with the applicable standards for which the failed vehicle was originally tested.

(c) (See paragraph (C) of § 86.077–30)

14. A new § 86.078–35 is added and reads as follows:

§ 86.078–35 Labeling.

(a) Through (a) (1) (iii) (B) (See paragraphs (a) through (a) (1) (iii) (B) or § 86.077–35)

(C) Engine displacement (in cubic inches), engine family identification and evaporative family identification.

(a) (1) (iii) (D) through (c) (See paragraph (a) (1) (iii) (D) through paragraph (c) of § 86.077–35).

15. Subpart B is enlarged by adding §§ 86.101–78 through 86.145–78 (effective for the 1978 model year) which read as follows:

Subpart B—Emission Regulations for 1977 and Later Model Year New Light Duty Vehicles and New Light Duty Trucks; Test Procedures

AUTHORITY: Secs. 202, 206, 207, 208, and 301 (a) of the Clean Air Act, as amended (42 U.S.C. 1857F–1, 1857F–5, 1857F–5a, 1857F–6, 1857g(a))

Subpart B—Emission Regulations for 1977 and Later Model Year New Light Duty Vehicles and New Light Duty Trucks; Test Procedures

§ 86.101–78 General applicability.

(a) The provisions of this subpart are applicable to 1977 and later model year new light duty vehicles and light duty trucks.

(1) Sections 86.101–78 through 86.145–78 apply for 1978 and later model years.

(2) Sections 86.177–1 through 86.177–23 apply for the 1977 model year only.

(b) Provisions of this subpart apply to tests performed by both the Administrator and motor vehicle manufacturers.

§ 86.102–78 Definitions.

The definitions in §§ 86.077–2 and 86.078–2 apply to this subpart.

§ 86.103–78 Abbreviations.

The abbreviations in § 86.078–3 apply to this subpart.

§ 86.104–78 Section numbering, construction.

(a) The model year of initial applicability is indicated by the section number. The two digits following the hyphen designate the first model year for which a section is effective. A section remains effective until superseded.

Example. Section 86.111–78 applies to the 1978 and subsequent model years until superseded. If a § 86.111–81 is promulgated it would take effect beginning with the 1981 model year; § 86.111–78 would apply to model years 1978 through 1980.

(b) Unless indicated, all provisions in this subpart apply to both gasoline and diesel fueled vehicles.

§ 86.105–78 Introduction, structure of subpart.

(a) This subpart describes the equipment required and the procedures to follow in order to perform exhaust and evaporative emission tests on light duty vehicles and light duty trucks. This Subpart A sets forth the testing requirements and test intervals necessary to comply with EPA certification procedures.

(b) Three topics are addressed in this subpart. Sections 86.106 through 86.115 set forth specifications and equipment requirements; §§ 86.116 through 86.126 discuss calibration methods and frequency; test procedures and data requirements are listed (in approximate order of performance) in §§ 86.127 through 86.145.

§ 86.106–78 Equipment required; overview.

(a) This subpart contains procedures for both exhaust and evaporative emissions tests on diesel or gasoline fueled light duty vehicles and light duty trucks. Certain items of equipment are not necessary for a particular test, e.g., evaporative enclosure when testing diesel vehicles. Equipment required and specifications are as follows:

(1) *Evaporative emission tests, gasoline fueled vehicles.* The evaporative emission test is closely related to and connected with the exhaust emission test. All vehicles tested for evaporative emissions must be tested for exhaust emissions. Further, unless the evaporative emission test is waived by the Administrator under § 86.077–26, all gasoline fueled vehicles must undergo both tests. (Diesel vehicles are excluded from the evaporative emission standard.) Section 86.107 specifies the necessary equipment.

(2) *Exhaust emission tests.* All vehicles subject to this subpart are tested for exhaust emissions. Diesel and gasoline fueled vehicles are tested identically with

the exception of hydrocarbon measurements; diesel vehicles require a heated hydrocarbon detector, § 86.109. All gasoline fueled vehicles are either tested for evaporative emissions or undergo a diurnal heat build, diesel vehicles are excluded from this requirement. Equipment necessary and specifications appear in §§ 86.108 through 86.114.

(3) *Fuel, analytical gas, and driving schedule specifications.* Fuel specifications for exhaust and evaporative emission testing and for mileage accumulation for gasoline and diesel fueled vehicles are specified in § 86.113. Analytical gases are specified in § 86.114. The EPA Urban Dynamometer Driving Schedule for use in exhaust testing is specified in § 86.115 and Appendix I.

§ 86.107–78 Sampling and analytical system, evaporative emissions.

(a) Component description (evaporative emissions sampling system). The following components will be used in evaporative emissions sampling systems for testing under this subpart.

(1) *Evaporative emission measurement enclosure.* The enclosure shall be readily sealable, rectangular in shape, with space for personnel access to all sides of the vehicle. When sealed, the enclosure shall be gas tight in accordance with § 86.117. Interior surfaces must be impermeable to hydrocarbons. One surface should be of flexible, impermeable material to allow for minor volume changes, resulting from temperature changes. Wall design should promote maximum dissipation of heat, and if artificial cooling is used, interior surface temperatures shall not be less than 68° F (20° C).

(2) *Evaporative emission hydrocarbon analyzers.* A hydrocarbon analyzer utilizing the hydrogen flame ionization principle (FID) shall be used to monitor the atmosphere within the enclosure. Instrument bypass flow may be returned to the enclosure. The FID shall have a response time to 90 percent of final reading of less than 1.5 s, and be capable of meeting performance requirements expressed as a function of C_{std}; where C_{std} is the specific enclosure hydrocarbon level, in ppm, corresponding to the evaporative emission standard:

(i) Stability of the analyzer shall be better than 0.01 C_{std} ppm at both zero and C_{std}±5 ppm over a 15 minute period on all ranges used;

(ii) Repeatability of the analyzer, expressed as one standard deviation, shall be better than 0.005 C_{std} ppm at both zero and C_{std}±5 ppm on all ranges used.

(3) *Evaporative emission hydrocarbon data recording system.* The electrical output of the FID shall be recorded at least at the initiation and termination of each diurnal or hot soak. The recording may be by means of a strip chart potentiometric recorder, by use of an on-line computer system or other suitable means. In any case, the recording system must have operational characteristics (signal to noise ratio, speed of response, etc.) equivalent to or better than those of the signal source being recorded, and must provide a permanent record of results. The record shall show a positive indication of the initiation and completion of each diurnal or hot soak along with the time elapsed between initiation and completion of each soak.

(4) *Tank fuel heating system.* The tank fuel heating system shall consist of a heat source and a temperature controller. A typical heat source is a 2000 w heating pad. Other sources may be used as required by circumstances. The temperature controller may be manual, such as a variable voltage transformer, or may be automated. The heating system must not cause hot spots on the tank wetted surface which could cause local overheating of the fuel. Heat must not be applied to the vapor in the tank above the liquid fuel. The temperature controller must be capable of controlling the fuel tank temperature during the diurnal soak to within ±3° F (1.7° C) of the following equation:

$$F = T_o + 0.4\,t$$

or for SI units:

$$C = T_o + (2/9)\,t$$

Where:

F = Temperature in °F
C = Temperature in °C
t = Time since start of test in minutes
T_o = Initial temperature

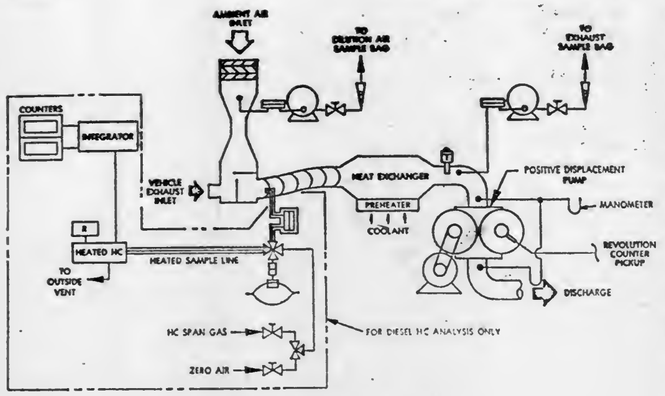
(5) *Temperature recording system.* Strip chart recorder(s) or automatic data processor shall be used to record enclosure ambient and vehicle fuel tank temperature during the evaporative emissions test. The temperature recorder or data processor shall record each temperature at least once every minute. The recording system shall be capable of resolving time to ±15s and capable of resolving temperature to ±0.75° F (0.42° C). The temperature recording system (recorder and sensor) shall have an accuracy of ±2° F (1.1° C). The recorder (data processor) shall have a time accuracy of ±15s and a precision of ±15s. Two ambient temperature sensors, connected to provide one average output, shall be located in the enclosure. These sensors shall be located at the approximate vertical centerline of each side wall extending 4 inches (nominally) into the enclosure at a height of 3±0.5 ft (0.9±0.2 m). The vehicle fuel tank temperature sensor shall be located in the fuel tank so as to measure the temperature of the prescribed test fuel at the approximate mid-volume of the fuel. Manufacturers shall arrange that vehicles furnished for testing at Federal certification facilities be equipped with iron-constantan Type J thermocouples for measurement of fuel tank temperature.

(6) *Purge blower.* One or more portable or fixed blowers shall be used to purge the enclosure. The blowers shall have sufficient flow capacity to reduce the enclosure hydrocarbon concentration from the test level to the ambient level between tests. Actual flow capacity will depend upon the time available between tests.

(7) *Mixing blower.* One or more small blowers or fans with a total capacity of 200 to 1000 cfm shall be used to mix the contents of the enclosure during evaporative emission testing. No portion of the air stream shall be directed towards the vehicle. Maintenance of uniform concentrations throughout the enclosure is important to the accuracy of the test.

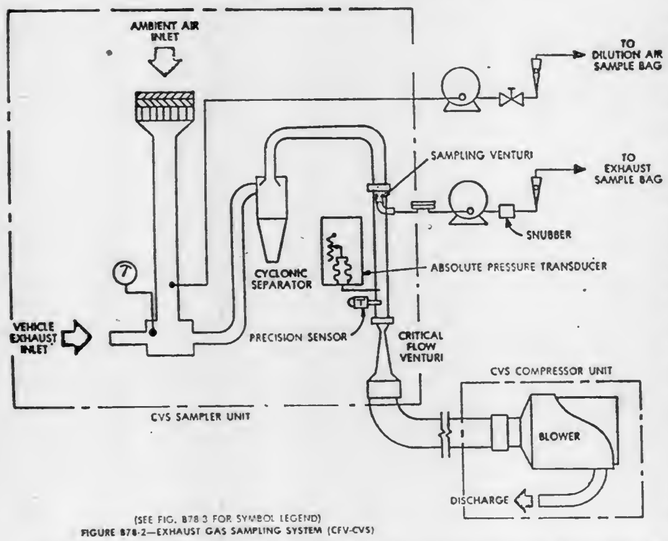
§ 86.108–78 Dynamometer.

The dynamometer shall have a power absorption unit for simmulation of road load power and flywheels or other means of simulating the inertia weight as specified in § 86.129.



§ 86.109–78 Exhaust gas sampling system.

(a) (1) *General.* The exhaust gas sampling system is designed to measure the true mass emissions of vehicle exhaust. In the CVS concept of measuring mass emissions, two conditions must be satisfied; the total volume of the mixture of exhaust and dilution air must be measured, and a continuously proportioned sample of volume must be collected for analysis. Mass emissions are determined from the sample concentration and totalized flow over the test period.



(2) *Positive Displacement Pump.* The Positive Displacement Pump-Constant Volume Sampler (PDP–CVS), Figure B78–1, satisfies the first condition by metering at a constant temperature and pressure through the pump. The total volume is measured by counting the revolutions made by the calibrated positive displacement pump. The proportional sample is achieved by sampling at a constant flow rate.

(3) *Critical Flow Venturi.* The operation of the Critical Flow Venturi-Constant Volume Sample (CFV–CVS), Figure B78–2, is based upon the principles of fluid dynamics associated with critical flow. Proportional sampling throughout temperature excursions is maintained by use of a small CFV in the sample line. The variable mixture flow rate is maintained at sonic velocity, which is directly proportional to the square root of the gas temperature, and is computed continuously. Since the pressure and temperature are the same at both venturi inlets, the sample volume is proportional to the total volume.

V 41 164 AUG 23 76 UMI

(SEE FIG. B78-3 FOR SYMBOL LEGEND)
FIGURE B78-1—EXHAUST GAS SAMPLING SYSTEM (PDP-CVS)

(SEE FIG. B78-3 FOR SYMBOL LEGEND)
FIGURE B78-2—EXHAUST GAS SAMPLING SYSTEM (CFV-CVS)

(4) *Diesel sampling.* Diesel vehicles require a heated flame ionization detector (HFID) for hydrocarbon analysis. The sample must be taken as close as practical to the mixing point of the dilution air and exhaust sample. The HFID, by design, draws its sample at a constant flow rate. Unless compensation for varying flow is made the HFID must be used with a constant flow system to insure a representative sample.

(5) *Other systems.* Other sampling systems may be used if shown to yield equivalent results, and if approved in advance by the Administrator (e.g., a heat exchanger with the CFV–CVS; an electronic flow integrator without a heat exchanger, with the PDP–CVS; or, for diesel HC measurements, an electronic flow compensator with the CFV–CVS).

(b) *Component description, PDP–CVS.* The PDP–CVS, Figure B78–1, consists of a dilution air filter and mixing assembly, heat exchanger, positive displacement pump, sampling system, and associated valves, pressure and temperature sensors. The PDP–CVS shall conform to the following requirements:

(1) Static pressure variations at the tailpipe(s) of the vehicle shall remain within ±5 inches of water (1.2 kPa) of the static pressure variations measured during a dynamometer driving cycle with no connection to the tailpipe(s). (Sampling systems capable of maintaining the static pressure to within ±1 inch of water (0.25 kPa) will be used by the Administrator if a written request substantiates the need for this closer tolerance.)

(2) The gas mixture temperature, measured at a point immediately ahead of the positive displacement pump, shall be within ±10° F (5.6° C) of the designed operating temperature at the start of the test. The gas mixture temperature variation from its value at the start of the test shall be limited to ±10° F (5.6° C) during the entire test. The temperature measuring system shall have an accuracy and precision of ±2° F (1.1° C).

(3) The pressure gauges shall have an accuracy and precision of ±3 mm Hg (0.4 kPa).

(4) The flow capacity of the CVS shall be large enough to eliminate water condensation in the system (300 to 350 cfm, 0.140 to 0.165 m³/s, is sufficient for most vehicles).

(5) Sample collection bags for dilution air and exhaust samples shall be of sufficient size so as not to impede sample flow.

(c) *Component description, CFV–CVS.* The CFV–CVS, Figure B78–2 consists of a dilution air filter and mixing assembly, cyclone particulate separator, sampling venturi, critical flow venturi, sampling system, and assorted valves, pressure and temperature sensors. The CFV–CVS shall conform to the following requirements:

(1) Static pressure variations at the tailpipe(s) of the vehicle shall remain within ±5 inches of water (1.2 kPa) of the static pressure variations measured during a dynamometer driving cycle with no connection to the tailpipe(s). (Sampling systems capable of maintaining the static pressure to within ±1 inch of water (0.25 kPa) will be used by the Administrator if a written request substantiates the need for this closer tolerance.)

(2) The temperature measuring system shall have an accuracy and precision of ±2° F (1.1° C) and a response time of 0.100 s to 62.5% of a temperature change (as measured in hot silicone oil).

(3) The pressure measuring system shall have an accuracy and precision of ±3 mm Hg (0.4 kPa).

(4) The flow capacity of the CVS shall be large enough to virtually eliminate water condensation in the system (300 to 350 cfm, 0.142 to 0.165 m³/s, is sufficient for most vehicles).

(5) Sample collection bags for dilution air and exhaust samples shall be of sufficient size so as not to impede sample flow.

§ 86.110–78 [Reserved]

§ 86.111–78 Exhaust gas analytical system.

(a) *Schematic drawings.* Figure B78–3 is a schematic drawing of the exhaust gas analytical system. The schematic of the hydrocarbon analysis train for diesel fueled vehicles is shown as part of Figure B78–1. Since various configurations can produce accurate results, exact conformance with either drawing is not required. Additional components such as instruments, valves, solenoids, pumps and switches may be used to provide additional information and coordinate the functions of the component systems.

(b) *Major component description.* The analytical system, Figure B78–3, consists of a flame ionization detector (FID) for the determination of hydrocarbons, nondispersive infrared analyzers (NDIR) for the determination of carbon monoxide and carbon dioxide and a chemiluminescence analyzer (CL) for the determination of oxides of nitrogen. A heated flame ionization detector (HFID) is used for the continuous determination of hydrocarbons from diesel fueled vehicles, Figure B78–1. The exhaust gas analytical system shall conform to the following requirements:

(1) The chemiluminescence analyzer requires that the nitrogen dioxide present in the sample be converted to nitric oxide before analysis. Other types of analyzers may be used if shown to yield equivalent results and if approved in advance by the Administrator.

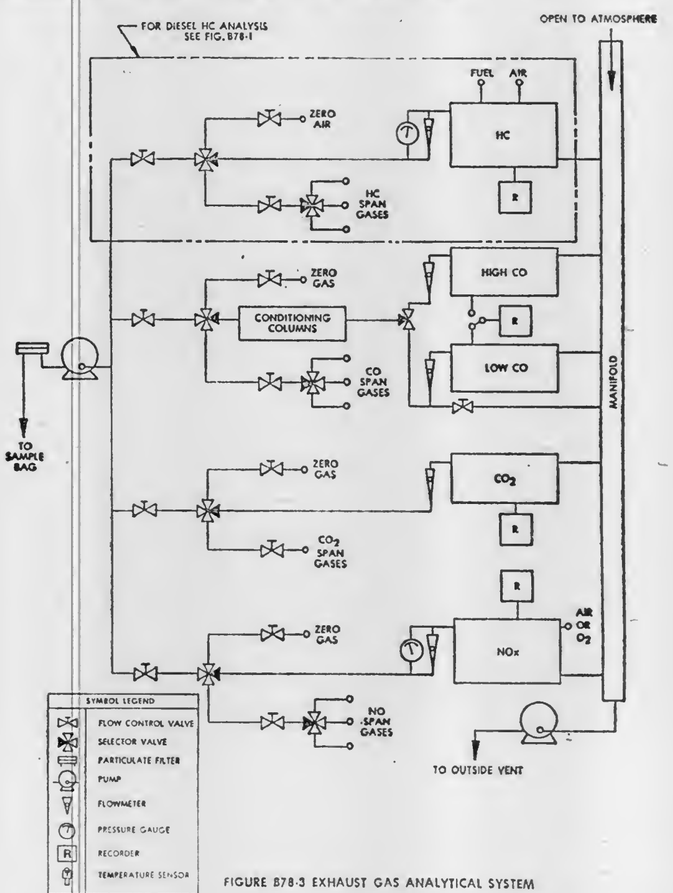


FIGURE B78-3 EXHAUST GAS ANALYTICAL SYSTEM

(2) The carbon monoxide (NDIR) analyzer may require a sample conditioning column containing $CaSO_4$, or indicating silica gel to remove water vapor and containing ascarite to remove carbon dioxide from the CO analysis stream.

(i) If CO instruments which are essentially free of CO_2 and water vapor interference are used, the use of the conditioning column may be deleted, see §§ 86.122 and 86.144.

(ii) A CO instrument will be considered to be essentially free of CO_2 and water vapor interference if its response to a mixture of 3 percent CO_2 in N_2 which has been bubbled through water at room temperature produces an equivalent CO response, as measured on the most sensi-

V 41 164
AUG 23 76
UM

tive CO range, which is less than 1 percent of full scale CO concentration on ranges above 300 ppm full scale or less than 3 ppm on ranges below 300 ppm full scale, see § 86.122.

(3) For diesel fueled vehicles a continuous sample shall be measured using a heated analyzer train as shown in Figure B78–1. The train shall include a heated continuous sampling line, a heated particulate filter and a heated hydrocarbon instrument (HFID) complete with heated pump, filter and flow control system.

(i) The response time of this instrument shall be less than 1.5 seconds for 90 percent of full-scale response.

(ii) Sample transport time from sampling point to inlet of instrument shall be less than 4 seconds.

(iii) The sample line and filter shall be heated to a set point ±10° F (±5.6° C) between 300 and 390° F (149 and 199° C).

(c) *Other analyzers and equipment.* Other types of analyzers and equipment may be used if shown to yield equivalent results and if approved in advance by the Administrator.

§ 86.112–78 [Reserved]

§ 86.113–78 Fuel specifications.

(a) *Gasoline.* (1) Gasoline having the following specifications will be used by the Administrator in exhaust and evaporative emission testing. Gasoline having the following specifications or substantially equivalent specifications approved by the Administrator, shall be used by the manufacturer in exhaust and evaporative testing, except that the lead and octane specifications do not apply.

Item	ASTM	Leaded	Unleaded
Octane, research, minimum	D2699	100	96

[2] For testing at altitudes above 1,219 m (4,000 ft) the specified range is 75–105.
[3] For testing which is unrelated to evaporative emission control, the specified range is 8.0–9.2.
[4] For testing at altitudes above 1,219 m (4,000 ft) the specified range is 7.0–9.2.
[5] Remainder.

(2) Gasoline representative of commercial gasoline which will be generally available through retail outlets shall be used in service accumulation. For leaded gasoline the minimum lead content shall be 1.4 grams per U.S. gallon, except that where the Administrator determines that vehicles represented by a test vehicle will be operated using gasoline of different lead content than that prescribed in this paragraph, he may consent in writing to use of a gasoline with a different lead content. The octane rating of the gasoline used shall be no higher than 4.0 research octane numbers above the minimum recommended by the manufacturer. The Reid Vapor Pressure of the gasoline used shall be characteristic of the motor fuel used during the season in which the service accumulation takes place.

(3) The specification range of the gasoline to be used under paragraph (a)(2) of this section shall be reported in accordance with § 86.077–21(b)(3).

(b) *Diesel fuel.* (1) The diesel fuels employed for testing shall be clean and bright, with pour and cloud points adequate for operability. The diesel fuel may contain nonmetallic additives as follows: Centane improver, metal deactivator, antioxidant, dehazer, antirust, pour depressant, dye, and dispersant.

(2) Diesel fuel meeting the following specifications, or substantially equivalent specifications approved by the Administrator, shall be used in exhaust emissions testing. The grade of diesel fuel recommended by the engine manufacturer commercially designated as "Type 1–D" or "Type 2–D", shall be used.

Item	ASTM	Type 1–D	Type 2–D

(4) Other petroleum distillation fuel specifications:

(i) Other petroleum distillate fuels may be used for testing and service accumulation provided they are commercially available, and

(ii) Information, acceptable to the Administrator, is provided to show that only the designated fuel would be used in customer service, and

(iii) Use of a fuel listed under paragraphs (b)(2) and (b)(3) of this section would have a detrimental effect on emissions or durability, and

(iv) Written approval from the Administrator of the fuel specifications must be provided prior to the start of testing.

(5) The specification range of the fuels to be used under paragraphs (b)(2), (b)(3), and (b)(4) of this section shall be reported in accordance with § 86.077–21(b)(3).

§ 86.114–78 Analytical gases.

(a) Analyzer gases.

(1) Gases for the CO and CO_2 analyzers shall be single blends of CO and CO_2 respectively using nitrogen as the diluent.

(2) Gases for the hydrocarbon analyzer shall be single blends of propane using air as the diluent.

(3) Gases for NOx analyzer shall be single blends of NO named as NOx, with a maximum NO_2 concentration of 5 percent of the nominal value using nitrogen as the diluent.

(4) Fuel for the evaporative emission enclosure FID shall be a blend of 60 percent helium and 40 percent hydrogen containing less than 1 ppm equivalent carbon response. 98 to 100 percent hydrogen fuel may be used with advance approval by the Administrator.

(5) The allowable zero gas (air or nitrogen) impurity concentrations shall not exceed 1 ppm equivalent carbon response, 1 ppm carbon monoxide, 0.04 percent (400 ppm) carbon dioxide and 0.1 ppm nitric oxide.

(6) "Zero grade air" includes artificial "air" consisting of a blend of nitrogen and oxygen with oxygen concentrations between 18 and 21 mole percent.

(b) Calibration gases should be known to within ±2 percent of the true values.

§ 86.114–79 Analytical gases.

(a) Analyzer gases.

(1) Gases for the CO and CO_2 analyzers shall be single blends of CO and CO_2 respectively using nitrogen as the diluent.

(2) Gases for the hydrocarbon analyzer shall be single blends of propane using air as the diluent.

(3) Gases for NOx analyzer shall be single blends of NO named as NOx, with a maximum NO_2 concentration of 5 percent of the nominal value, using nitrogen as the diluent.

(4) Fuel for the evaporative emission enclosure FID shall be a blend of 40±2% hydrogen with the balance being helium. The mixture shall contain less than 1 ppm equivalent carbon response. 98 to 100 percent hydrogen fuel may be used with advance approval by the Administrator.

(5) The allowable zero gas (air or nitrogen) impurity concentrations shall not exceed 1 ppm equivalent carbon response, 1 ppm carbon monoxide, 0.04 percent (400 ppm) carbon dioxide and 0.1 ppm nitric oxide.

(6) "Zero grade air" includes artificial "air" consisting of a blend of nitrogen and oxygen with oxygen concentrations between 18 and 21 mole percent.

(b) Calibration gases shall be traceable to within 1 percent of NBS gas standards, or other gas standards which have been approved by the Administrator.

(c) Span gases shall be accurate to within 2 percent of true concentration, where true concentration refers to NBS gas standards, or other gas standards which have been approved by the Administrator.

§ 86.115–78 EPA urban dynamometer driving schedule.

(a) The dynamometer driving schedule is listed in Appendix I. The driving schedule is defined by a smooth trace drawn through the specified speed vs. time relationships. It consists of a nonrepetitive series of idle, acceleration, cruise, and deceleration modes of various time sequences and rates.

(b) The speed tolerance at any given time on the dynamometer driving schedule prescribed in Appendix I or as printed on a driver's aid chart approved by the Administrator, when conducted to meet the requirements of § 86.137 is defined by upper and lower limits. The upper limit is 2 mph (3.2 km/h) higher than the highest point on the trace within 1 second of the given time. The lower limit is 2 mph (3.2 km/h) lower than the lowest point on the trace within 1 second of the given time. Speed variations greater than the tolerances (such as may occur during gear changes) are acceptable provided they occur for less than 2 seconds on any occasion. Speeds lower than those prescribed are acceptable provided the vehicle is operated at maximum available power during such occurrences. When conducted to meet the requirements of § 86.128 the speed tolerance shall be as specified above, except that the upper and lower limits shall be 4 mph (6.4 km/h).

V 41 164 AUG 23 76 UM

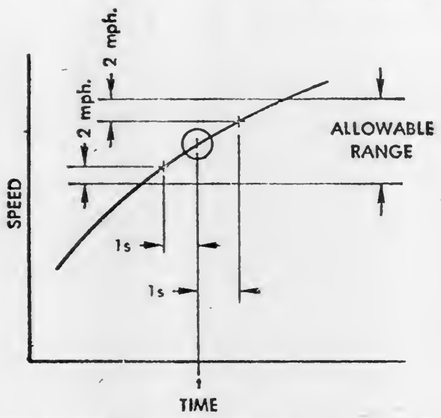

FIGURE B78-4a—DRIVERS TRACE, ALLOWABLE RANGE

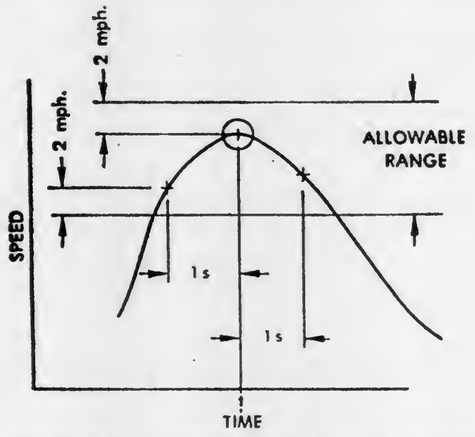

FIGURE B78-4b—DRIVERS TRACE, ALLOWABLE RANGE

(c) Figure B78–4 shows the range of acceptable speed tolerances for typical points. Figure B78–4(a) is typical of portions of the speed curve which are increasing or decreasing throughout the two second time interval. Figure B78–4 (b) is typical of portions of the speed curve which include a maximum or minimum value.

§ 86.116–78 Calibrations, frequency and overview.

(a) Calibrations shall be performed as specified in §§ 86.117 through 86.126.

(b) At least yearly or after any maintenance which could alter background emission levels, enclosure background emission measurements shall be performed.

(c) At least monthly or after any maintenance which could alter calibration, the following calibrations and checks shall be performed:

(1) Calibrate the hydrocarbon analyzers (both evaporative and exhaust instruments), carbon dioxide analyzer, carbon monoxide analyzer, oxides of nitrogen analyzer.

(2) Calibrate the dynamometer. If the dynamometer receives a weekly performance check (and remains within calibration) the monthly calibration need not be performed.

(3) Perform a hydrocarbon retention check and calibration on the evaporative emission enclosure.

(d) At least weekly or after any maintenance which could alter calibration, the following calibrations and checks shall be performed:

(1) Check the oxides of nitrogen converter efficiency, and

(2) Perform a CVS system verification, and

(3) Run a performance check on the dynamometer. This check may be omitted if the dynamometer has been calibrated within the preceding month.

(e) The CVS positive displacement pump or Critical Flow Venturi shall be calibrated following initial installation, major maintenance or as necessary when indicated by the CVS system verification (described in § 86.119).

(f) Sample conditioning columns, if used in the CO analyzer train, should be checked at a frequency consistent with observed column life or when the indicator of the column packing begins to show deterioration.

§ 86.117–78 Evaporative emission enclosure calibrations.

The calibration of the evaporative emission enclosure consists of three parts: Initial and periodic determination of enclosure background emissions; initial determination of enclosure internal volume; and periodic hydrocarbon retention check and calibration.

(a) *Initial and periodic determination of enclosure background emissions.* Prior to its introduction into service, annually thereafter, and after any repair which can affect the enclosure background emissions, the enclosure shall be checked to determine that it does not contain materials which will themselves emit hydrocarbons. Proceed as follows:

(1) Zero and span (calibrate if required) the hydrocarbon analyzer.

(2) Purge the enclosure until a stable background hydrocarbon reading is obtained.

(3) Turn on the mixing blower (if not already on).

(4) Seal enclosure and measure background hydrocarbon concentration, temperature, and barometric pressure. These are the initial readings C_{HCi}, T_i, and P_{Bi} for the enclosure background determination.

(5) Allow the enclosure to stand undisturbed without sampling for four hours.

(6) Measure the hydrocarbon concentration on the same FID. This is the final concentration, C_{HCf}. Also measure final temperature and barometric pressure.

(7) Calculate the mass change of hydrocarbons in the enclosure according to the equations in paragraph (d) of this section. The enclosure background emissions shall not be greater than 0.4g for the 4 hours.

(b) *Initial determination of enclosure internal volume.* Prior to its introduction into service the enclosure internal volume shall be determined by the following procedure.

(1) Carefully measure the internal length, width and height of the enclosure, accounting for irregularities (such as braces) and calculate the internal volume.

(2) Perform an enclosure calibration check according to paragraph (c)(1) through (7) of this section.

(3) If the calculated mass does not agree within 2 percent of the injected propane mass, then corrective action is required.

(c) *Hydrocarbon retention check and calibration.* The hydrocarbon retention check provides a check upon the calculated volume and also measures the leak rate. Prior to its introduction into service and at least monthly thereafter the enclosure leak rate shall be determined as follows:

(1) Zero and span (calibrate if required) the hydrocarbon analyzer.

(2) Purge the enclosure until a stable background hydrocarbon reading is obtained.

(3) Turn on the mixing blower (if not already on).

(4) Seal enclosure and measure background hydrocarbon concentration, temperature and barometric pressure. These are the initial readings C_{HCi}, T_i and P_{Bi} for the enclosure calibration.

(5) Inject into the enclosure a known quantity of pure propane. (4 g is a convenient quantity.) The propane may be measured by volume flow or by mass measurement. The method used to measure the propane shall have an accuracy and precision of ±0.5% of the measured value.

(6) After a minimum of five minutes of mixing, analyze the enclosure atmosphere for hydrocarbon content, also record temperature and pressure. These measurements are the final readings for the enclosure calibration as well as the initial readings for the retention check.

(7) To verify the enclosure calibration calculate the mass of propane using the measurements taken in steps (4) and (6). See paragraph (d) of this section. This quantity must be within ±2% of that measured in step 5 above.

(8) Allow the enclosure to remain sealed for a minimum of four hours without sampling and with the mixing blower operating. After four hours analyze the enclosure atmosphere for hydrocarbon content; record temperature and barometric pressure. These are the final readings for the hydrocarbon retention check.

(9) Calculate, using the equations in paragraph (d) and the readings taken in (8), the hydrocarbon mass. It may not differ by more than 4 percent of the value in step (6).

(d) *Calculations.* The calculation of net hydrocarbon mass change is used to determine enclosure background and leak rate. It is also used to check the enclosure volume measurements. The mass change is calculated from the initial and final readings of hydrocarbon concentration, temperature and pressure according to the following equation:

$$M_{HC} = kV \times 10^{-4}\left[\frac{C_{HCf}P_{Bf}}{T_f} - \frac{C_{HCi}P_{Bi}}{T_i}\right]$$

Where:

M_{HC} = Hydrocarbon mass change, g.
C_{HC} = Hydrocarbon concentration as ppm carbon.
V = Enclosure volume, ft^3 (m^3), as measured in paragraph (b)(1) of this section.
P_B = Barometric pressure, in. Hg (kPa).
T = Enclosure ambient temperature, °R(K).
k = 3.05.

for SI units,

k = 17.60.
i = Indicates initial reading.
f = Indicates final reading.

NOTE: Hydrocarbon concentration is stated in ppm carbon, that is, ppm propane x3. Expressions in parenthesis are for SI units.

§ 86.118–78 Dynamometer calibration.

(a) The dynamometer shall be calibrated at least one each month or performance verified at least one each week and then calibrated as required. The calibration shall consist of the manufacturer's recommended calibration procedure plus a determination of the dynamometer frictional power absorption at 50.0 mph (80.5 km/h). One method for determining dynamometer frictional power absorption at 50.0 mph (80.5 km/h) is described below, other methods may be used if shown to yield equivalent results. The measured absorbed road power includes the dynamometer friction as well as the power absorbed by the power absorption unit. The dynamometer is driven above the test speed range. The device used to drive the dynamometer is then disengaged from the dynamometer and the roll(s) is (are) allowed to coast down. The kinetic energy of the system is dissipated by the dynamometer. This method neglects the variations in roll bearing friction due to the drive axle weight of the vehicle. The inertia of the free (rear) roll may be neglected in the case of dynamometers with paired rolls.

(1) Devise a method to determine the speed of the drive roll if it is not already measured. A fifth wheel, revolution pickup, or other suitable means may be used.

(2) Place a vehicle on the dynamometer or devise another method of driving the dynamometer.

(3) Engage the inertial flywheel or other inertial simulation system for the most common vehicle mass category for which the dynamometer is used. In addition other vehicle mass categories may be calibrated, if desired.

(4) Drive the dynamometer up to 50.0 mph (80.5 km/h).

(5) Record indicated road power.

(6) Drive the dynamometer up to 60.0 mph (96.9 km/h).

(7) Disengage the device used to drive the dynamometer.

(8) Record the time for the dynamometer drive roll to coastdown from 55.0 mph (88.5 km/h) to 45 mph (72.4 km/h).

(9) Adjust the power absorption unit to a different level.

(10) Repeat steps 4 to 9 above sufficient times to cover the range of road power used.

(11) Calculate absorbed road power (HP_d). See paragraph (c) of this section.

(12) Plot indicated road load power at 50 mph (80.5 km/h) versus road load power at 50 mph (80.5 km/h) as shown in Figure B78–5.

(b) The performance check consists of conducting a dynamometer coastdown at one or more inertia-horsepower settings and comparing the coastdown time to that recorded during the last calibration. If the coastdown times differ by more than 1 s, a new calibration is required.

(c) *Calculations.* The road load power actually absorbed by the dynamometer is calculated from the following equation:

$$HP_d = (1/2)\ (W/32.2)\ (V_1^2 - V_2^2)/550t$$

Where:

HP_d = Power, horsepower (kilowatts)
W = Equivalent inertia, lb (Kg)
V_1 = Initial Velocity, ft/s (m/s)
(55 mph = 88.5 km/h = 80.67 ft/s = 24.58 m/s)
V_2 = Final Velocity, ft/s (m/s)
(45 mph = 72.4 km/h = 66 ft/s = 20.11 m/s)

V 41 164 AUG 23 76 UM

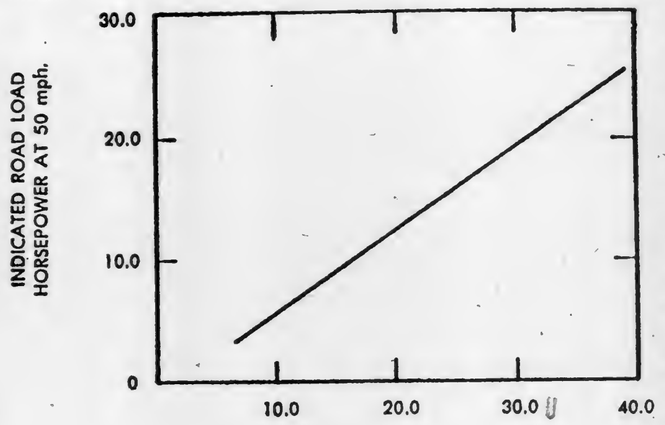

FIGURE B78-5—ROAD LOAD HORSEPOWER, ACTUAL VS. INDICATED

t=elapsed time for rolls to coast from 55 mph to 45 mph (88.5 to 72.4 km/h)

(Expressions in parenthesis are for SI units.) When the coastdown is from 55 to 45 mph (88.5 to 72.4 km/h) the above equation reduces to:

$HP_d = 0.06073\ (W/t)$
for SI units,
$HP_d = 0.09984\ (W/t)$

§ 86.119–78 CVS calibration.

The CVS (Constant Volume Sampler) is calibrated using an accurate flowmeter and restrictor valve. Measurements of various parameters are made and related to flow through the unit. Procedures used by EPA for both PDP (Positive Displacement Pump) and CFV (Critical Flow Venturi) are outlined below. Other procedures yielding equivalent results may be used if approved in advance by the Administrator. After the calibration curve has been obtained, verification of the entire system can be performed by injecting a known mass of gas into the system and comparing the mass indicated by the system to the true mass injected. An indicated error does not necessarily mean that the calibration is wrong, since other factors can influence the accuracy of the system, e.g. analyzer calibration. A verification procedure is found in paragraph (c) of this section.

(a) *PDP calibration.* (1) The following calibration procedure outlines the equipment, the test configuration, and the various parameters which must be measured to establish the flow rate of the constant volume sampler pump. All the parameters related to the pump are simultaneously measured with the parameters related to a flowmeter which is connected in series with the pump. The calculated flow rate ft³/min. (at pump inlet absolute pressure and temperature) can then be plotted versus a correlation function which is the value on a specific combination of pump parameters. The linear equation which relates the pump flow and the correlation function is then determined. In the event that a CVS has a multiple speed drive, a calibration for each range used must be performed.

(2) This calibration procedure is based on the measurement of the absolute values of the pump and flowmeter parameters that relate the flow rate at each point. Three conditions must be maintained to assure the accuracy and integrity of the calibration curve. First, the pump pressures should be measured at taps on the pump rather than at the external piping on the pump inlet and outlet. Pressure taps that are mounted at the top center and bottom center of the pump drive headplate are exposed to the actual pump cavity pressures, and therefore reflect the absolute pressure differentials. Secondly, temperature stability must be maintained during the calibration. The laminar flowmeter is sensitive to inlet temperature oscillations which cause the data points to be scattered. Gradual changes (±2° F (1.1° C)) in temperature are acceptable as long as they occur over a period of several minutes. Finally, all connections between the flowmeter and the CVS pump must be absolutely void of any leakage.

(3) During an exhaust emission test the measurement of these same pump parameters enables the user to calculate the flow rate from the calibration equation.

(4) Connect a system as shown in Figure B78–6. Although particular types of equipment are shown, other configurations that yield equivalent results may be used if approved in advance by the Administrator. For the system indicated, the following data with given accuracy are required:

CALIBRATION DATA MEASUREMENTS

Parameter	Symbol	Units	Tolerances
Barometric pressure (corrected)	P_B	Inches Hg (kPa).	±.01 in Hg (±.034 kPa).
Ambient temperature	T_A	°F (°C).	±.5°F (±.28°C).
Air temperature into LFE	ETI	°F (°C).	±.25°F (±.14°C).
Pressure depression upstream of LFE	EPI	Inches H_2O (kPa).	±.05 in H_2O (±.012 kPa).
Pressure drop across the LFE matrix	EDP	Inches H_2O (kPa).	±.005 in H_2O (±.001 kPa).
Air temperature at CVS pump inlet	PTI	°F (°C).	±.5°F (±.28°C).
Pressure depression at CVS pump inlet	PPI	Inches fluid (kPa).	±.05 in fluid (±.022 kPa).
Specific gravity of manometer fluid (1.75 oil).	Sp. Gr		
Pressure head at CVS pump outlet	PPO	Inches fluid (kPa).	±.05 in fluid (±.022 kPa).
Air temperature at CVS pump outlet (optional).	PTO	°F (°C).	±.5°F (±.28°C).
Pump revolutions during test period	N	Revs.	±1 Rev.
Elapsed time for test period	t	s.	±.05 s.

(5) After the system has been connected as shown in Figure B78–6, set the variable restrictor in the wide open position and run the CVS pump for twenty minutes. Record the calibration data.

(6) Reset the restrictor valve to a more restricted condition in an increment of pump inlet depression (about 4" H_2O (1.0 kPa) that will yield a minimum of six data points for the total calibration. Allow the system to stabilize for 3 minutes and repeat the data acquisition.

(7) Data analysis:

(i) The air flow rate, Qs, at each test point is calculated in standard cubic feet per minute from the flowmeter data using the manufacturer's prescribed method.

(ii) The air flow rate is then converted to pump flow, V_o, in cubic feet per revolution at absolute pump inlet temperature and pressure.

$$V_o = \frac{Q_s}{n} \times \frac{T_p}{528} \times \frac{29.92}{P_p}$$

Where:

V_o=Pump flow, ft³/revolution (m³/revolution) at T_p, P_p

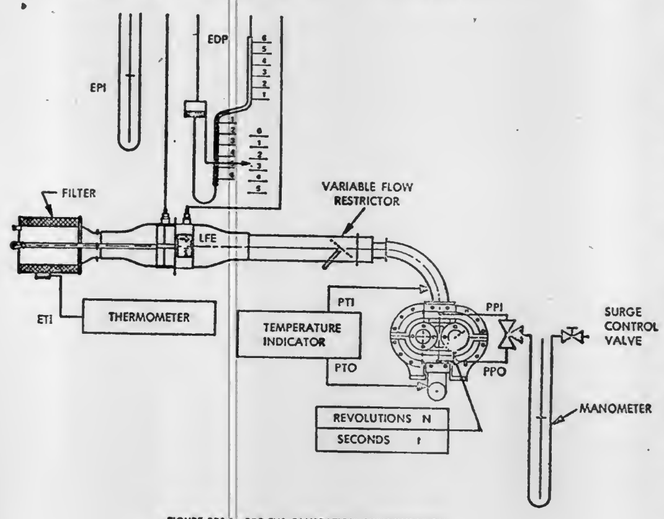

FIGURE B78-6—PDP-CVS CALIBRATION CONFIGURATION

Q_s=Meter air flow rate in standard cubic feet per minute, standard conditions are 68° F, 29.92 in. Hg (20° C, 101.3 kPa).

n=Pump speed in revolutions per minute.

T_p=Pump inlet temperature, R(K)=PTI+460

for SI units, T_p=PTI+273

P_p=Absolute pump inlet pressure, in. Hg (kPa)=P_B−PPI (SP. GR./13.57)

for SI units, P_p=P_B−PPI

Where:

P_B=barometric pressure, in. Hg (kPa)
PPI=Pump inlet depression, in. fluid (kPa)
SP. GR.=Specific gravity of manometer fluid relative to water.

(iii) The correlation function at each test point is then calculated from the calibration data:

$$X_o = \frac{1}{n}\sqrt{\frac{\Delta P_p}{P_e}}$$

Where:

X_o=correlation function.

ΔP_p=The pressure differential from pump inlet to pump outlet, in. Hg (kPa)=$P_e - P_p$

P_e=Absolute pump outlet pressure, in. Hg (kPa)=P_B+PPO (SP. GR./13.57)

for SI units, P_e=P_B+PPO

Where:

PPO=Pressure head at pump outlet, in. fluid (kPa)

(iv) A linear least squares fit is performed to generate the calibration equations which have the forms:

$V_o = D_o - M(X_o)$
$n = A - B(\Delta P_p)$

D_o, M, A, and B are the slope-intercept constants describing the lines.

(8) A CVS system that has multiple speeds should be calibrated on each speed used. The calibration curves generated for the ranges will be approximately parallel and the intercept values, D_o, will increase as the pump flow range decreases.

(9) If the calibration has been performed carefully, the calculated values from the equation will be within ±0.50% of the measured value of V_o. Values of M will vary from one pump to another, but values of D_o for pumps of the same make, model, and range should agree within ±3% of each other. Particulate influx from use will cause the pump slip to decrease as reflected by lower values for M. Calibrations should be performed at pump start-up and after major maintenance to assure the stability of the pump slip rate. Analysis of mass injection data will also reflect pump slip stability.

(b) *CFV calibration.* (1) Calibration of the Critical Flow Venturi (CFV) is based upon the flow equation for a crit-

V 41164
AUG 23 76
UMI

ical venturi. Gas flow is a function of inlet pressure and temperature:

$$Q_s = \frac{K_v P}{\sqrt{T}}$$

Where:

Q_s=Flow
K_v=Calibration coefficient
P=Absolute pressure
T=Absolute temperature

The calibration procedure described below establishes the value of the calibration coefficient at measured values of pressure, temperature and air flow.

(2) The manufacturer's recommended procedure shall be followed by calibrating electronic portions of the CFV.

(3) Measurements necessary for flow calibration are as follows:

CALIBRATION DATA MEASUREMENTS

Parameter	Symbol	Units	Tolerances
Barometric pressure (corrected)	P_B	Inches Hg (kPa)	±.01 in Hg (±.034 kPa).
Air temperature, flowmeter	ETI	°F (°C).	±.25°F (±.14°C).
Pressure depression upstream of LFE	EPI	Inches H_2O (kPa).	±.05 in H_2O (±.012 kPa).
Pressure drop across LFE matrix	EDP	Inches H_2O (kPa).	±.005 in H_2O (±.001 kPa).
Air flow	Q_s	Ft^3/min. (m^3/min.)	±.5 pct.
CFV inlet depression	PPI	Inches fluid (kPa).	±.05 in fluid (±.022 kPa).
Temperature at venturi inlet	T_v	°F (°C).	±.5°F (±.28°C).
Specific gravity of manometer fluid (1.75 oil).	Sp. Gr.		

(4) Set up equipment as shown in Figure B78–7 and check for leaks. Any leaks between the flow measuring device and the critical flow venturi will seriously affect the accuracy of the calibration.

(5) Set the variable flow restrictor to the open position, start the blower and allow the system to stabilize. Record data from all instruments.

(6) Vary the flow restrictor and make at least 8 readings across the critical flow range of the venturi.

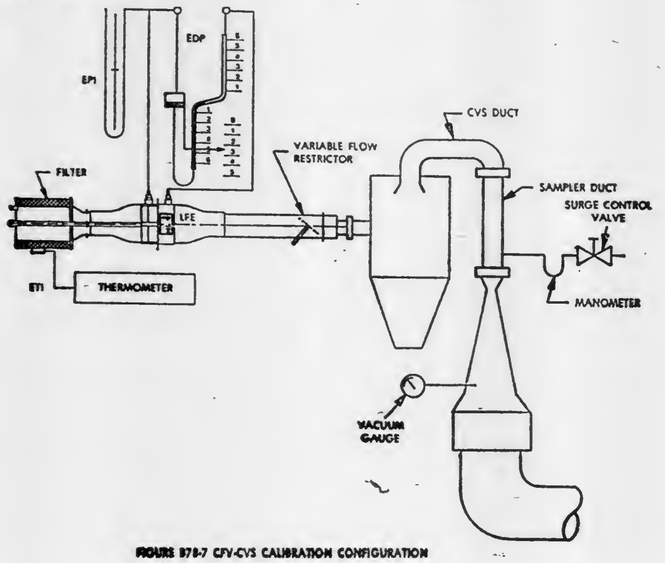

FIGURE B78-7 CFV-CVS CALIBRATION CONFIGURATION

(7) Data analysis: The data recorded during the calibration are to be used in the following calculations:

(i) The air flow rate, Qs, at each test point is calculated in standard cubic feet per minute from the flow meter data using the manufacturer's prescribed method.

(ii) Calculate values of the calibration coefficient for each test point:

$$K_v = \frac{Q_s \sqrt{T_v}}{P_v}$$

Where:

Q_s=Flow rate in standard cubic feet per minute, standard conditions are 68° F, 29.92 in. Hg (20° C, 101.3 kPa).
T_v=Temperature at venturi inlet, R(K).
P_v=Pressure at venturi inlet, mm Hg (kPa) =P_B—PPI (SP. GR./13.57).

for SI units $P_v = P_B$—PPI.

Where:

PPI=Venturi inlet pressure depression, in. fluid (kPa).

SP. GR.=Specific gravity of manometer fluid, relative to water.

(iii) Plot K_v as a function of venturi inlet pressure. For sonic flow K_v will have a relatively constant value. As pressure decreases (vacuum increases) the venturi becomes unchocked and K_v decreases. See Figure B78–8.

(iv) For a minimum of 8 points in the critical region calculate an average K_v and the standard deviation.

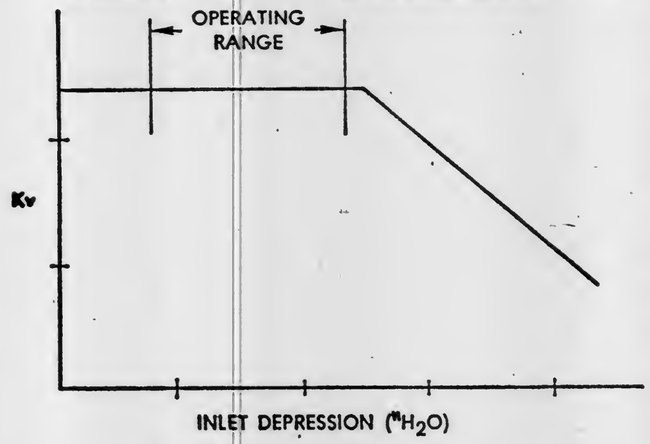

FIGURE B78-8—SONIC FLOW CHOKING

(v) If the standard deviation exceeds 0.3 percent of the average Kv take corrective action.

(c) *CVS System Verification.* The following "gravimetric" technique can be used to verify that the CVS and analytical instruments can accurately measure a mass of gas that has been injected into the system. (Verification can also be accomplished by constant flow metering using critical flow orifice devices.)

(1) Obtain a small cylinder that has been charged with pure propane or carbon monoxide gas (caution—carbon monoxide is poisonous).

(2) Determine a reference cylinder weight to the nearest 0.01 grams.

(3) Operate the CVS in the normal manner and release a quantity of pure propane or carbon monoxide into the system during the sampling period (approximately 5 minutes).

(4) The calculations of § 86.144 are performed in the normal way except, in the case of propane. The density of propane (17.30 g/ft^3/carbon atom (0.6109 kg/m^3/carbon atom)) is used in place of the density of exhaust hydrocarbons. In the case of carbon monoxide, the density of 32.97 g/ft^3 (1.164 kg/m^3) is used.

(5) The gravimetric mass is subtracted from the CVS measured mass and then divided by the gravimetric mass to determine the percent accuracy of the system.

(6) The cause for any discrepancy greater than ±2% percent must be found and corrected.

§ 86.120–78 [Reserved]

§ 86.121–78 Hydrocarbon analyzer calibration.

The FID hydrocarbon analyzer shall receive the following initial and periodic calibration. The HFID shall be operated to a set point ±10° F (±5.5° C) between 300 and 390° F (149 and 199° C).

(a) Initial and periodic optimization of detector response. Prior to its introduction into service and at least annually thereafter the FID hydrocarbon analyzer shall be adjusted for optimum hydrocarbon response. Alternate methods yielding equivalent results may be used, if approved in advance by the Administrator.

(1) Follow the manufacturer's instructions for instrument startup and basic operating adjustment using the appropriate fuel and zero grade air.

(2) Optimize on the most common operating range. Introduce into the analyzer, a propane in air mixture with a propane concentration equal to approximately 90 percent of the most common operating range.

(3) Select an operating fuel flow rate that will give near maximum response and least variation in response with minor fuel flow variations.

(4) To determine the optimum air flow, use the fuel flow setting determined above and vary air flow.

(5) After the optimum flow rates have been determined, they are recorded for future reference.

(b) Initial and periodic calibration. Prior to its introduction into service and monthly thereafter the FID hydrocarbon analyzer shall be calibrated on all normally used instrument ranges. Use the same flow rate as when analyzing samples.

(1) Adjust analyzer to optimize performance.

(2) Zero the hydrocarbon analyzer with zero grade air.

(3) Calibrate on each normally used operating range with propane in air calibration gases having nominal concentrations of 50 and 100 percent of that range. Additional calibration points may be generated.

§ 86.122–78 Carbon monoxide analyzer calibration.

The NDIR carbon monoxide analyzer shall receive the following initial and periodic calibrations:

(a) *Initial and periodic interference check.* Prior to its introduction into service and annually thereafter the NDIR carbon monoxide analyzer shall be checked for response to water vapor and CO_2:

(1) Follow the manufacturer's instructions for instrument startup and operation. Adjust the analyzer to optimize performance on the most sensitive range to be used.

(2) Zero the carbon monoxide analyzer with either zero grade air or zero grade nitrogen.

(3) Bubble a mixture of 3 percent CO_2 in N_2 through water at room temperature and record analyzer response.

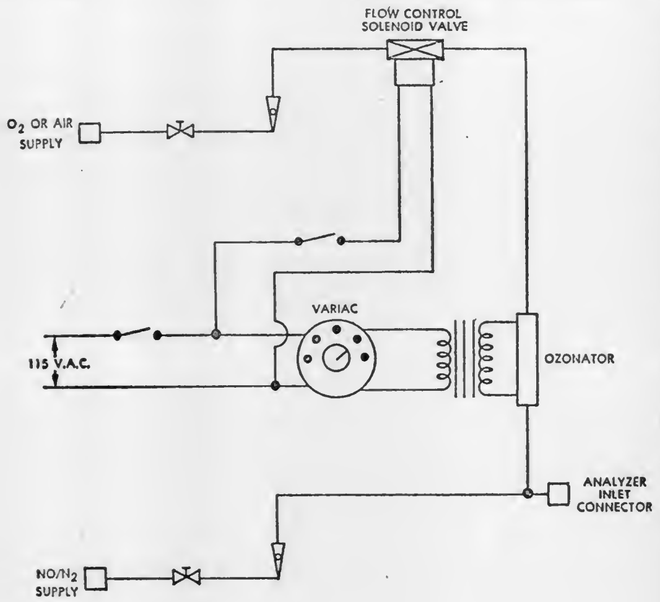
(4) An analyzer response of more than 1 percent of full scale for ranges above 300 ppm full scale or of more than 3 ppm on ranges below 300 ppm full scale will require corrective action. (Use of conditioning columns is one form of corrective action which may be taken.)

(b) *Initial and periodic calibration.* Prior to its introduction into service and monthly thereafter the NDIR carbon monoxide analyzer shall be calibrated.

(1) Adjust the analyzer to optimize performance.

(2) Zero the carbon monoxide analyzer with either zero grade air or zero grade nitrogen.

(3) Calibrate on each normally used operating range with carbon monoxide in N_2 calibration gases having nominal concentrations of 15, 30, 45, 60, 75 and 90 percent of that range. Additional calibration points may be generated. For each range calibrated, if the deviation from a least-squares best-fit straight line is 2 percent or less of the value at each data point, concentration values may be calculated by use of a single calibration factor for that range. If the deviation exceeds 2 percent at any point, the best-fit non-linear equation which represents the data to within 2 percent of each test point shall be used to determine concentration.



V 41 164 AUG 23 76 A UMI

§ 86.123–78 Oxides of nitrogen analyzer calibration.

The chemiluminescent oxides of nitrogen analyzer shall receive the following initial and periodic calibration.

(a) Prior to its introduction into service and weekly thereafter the chemiluminescent oxides of nitrogen analyzer shall be checked for NO_2 to NO converter efficiency. Figure B78–9 is a reference for the following steps:

(1) Follow the manufacturer's instructions for instrument startup and operation. Adjust the analyzer to optimize performance.

(SEE FIG B78-3 FOR SYMBOL LEGEND)
FIGURE B78-9—NOx CONVERTER EFFICIENCY DETECTOR

(2) Zero the oxides of nitrogen analyzer with zero grade air or zero grade nitrogen.

(3) Connect the outlet of the NOx generator to the sample inlet of the oxides of nitrogen analyzer which has been set to the most common operating range.

(4) Introduce into the NOx generator analyzer-system an NO in nitrogen (N_2) mixture with a NO concentration equal to approximately 80 percent of the most common operating range. The NO_2 content of the gas mixture shall be less than 5 percent of the NO concentration.

(5) With the oxides of nitrogen analyzer in the NO mode, record the concentration of NO indicated by the analyzer.

(6) Turn on the NOx generator O_2 (or air) supply and adjust the O_2 (or air) flow rate so that the NO indicated by the analyzer is about 10 percent less than indicated in step 5. Record the concentration of NO in this $NO+O_2$ mixture.

(7) Switch the NOx generator to the generation mode and adjust the generation rate so that the NO measured on the analyzer is 20 percent of that measured in step 5. There must be at least 10 percent unreacted NO at this point. Record the concentration of residual NO.

(8) Switch the oxides of nitrogen analyzer to the NOx mode and measure total NOx. Record this value.

(9) Switch off the NOx generation but maintain gas flow through the system. The oxides of nitrogen analyzer will indicate the NOx in the $NO+O_2$ mixture. Record this value.

(10) Turn off the NOx generator O_2 (or air) supply. The analyzer will now indicate the NOx in the original NO in N_2 mixture. This value should be no more than 5 percent above the value indicated in step 4.

(11) Calculate the efficiency of the NOx converted by substituting the concentrations obtained into the following equation:

$$\text{Percent Eff.} = \left(1+\frac{a-b}{c-d}\right)\times 100$$

where a=concentration obtained in step 8.
b=concentration obtained in step 9.
c=concentration obtained in step 6.
d=concentration obtained in step 7.

If converter efficiency is not greater than 90 percent corrective action will be required.

(b) Initial and periodic calibration. Prior to its introduction into service and monthly thereafter the chemiluminescent oxides of nitrogen analyzer shall be calibrated on all normally used instrument ranges. Use the same flow rate as when analyzing samples. Proceed as follows:

(1) Adjust analyzer to optimize performance.

(2) Zero the oxides of nitrogen analyzer with zero grade air or zero grade nitrogen.

(3) Calibrate on each normally used operating range with NO in N_2 calibration gases with nominal concentrations of 50 and 100 percent of that range. Additional calibration points may be generated.

§ 86.124–78 Carbon dioxide analyzer calibration.

Prior to its introduction into service and monthly thereafter the NDIR carbon dioxide analyzer shall be calibrated:

(a) Follow the manufacturer's instructions for instrument startup and operation. Adjust the analyzer to optimize performance.

(b) Zero the carbon dioxide analyzer with either zero grade air or zero grade nitrogen.

(c) Calibrate on each normally used operating range with carbon dioxide in N_2 calibration gases with nominal concentrations of 15, 30, 45, 60, 75 and 90 percent of that range. Additional calibration points may be generated. For each range calibrated, if the deviation from a least-squares best-fit straight line is 2 percent or less of the value at each data point, concentration values may be calculated by use of a single calibration factor for that range. If the deviation exceeds 2 percent at any point, the best-fit non-linear equation which represents the data to within 2 percent of each test point shall be used to determine concentration.

§ 86.125–78 [Reserved]

§ 86.126–78 Calibration of other equipment.

Other test equipment used for testing shall be calibrated as often as required by the manufacturer or as necessary according to good practice.

§ 86.127–78 Test procedures, overview.

The procedures described in this and subsequent sections are used to determine

the conformity of vehicles with the standards set forth in Subpart A for light duty vehicles and light duty trucks.

(a) The overall test consists of prescribed sequences of fueling, parking and operating conditions. Vehicles are either tested for only exhaust emissions or are tested for exhaust and evaporative emissions. The evaporative portion of the test procedure occurs before and after the exhaust emission test, and, in some cases, during the exhaust emission test.

(b) The exhaust emission test is designed to determine hydrocarbon, carbon monoxide, and oxides of nitrogen mass emissions while simulating an average trip in an urban area of 7.5 miles (12.1 km). The test consists of engine startups and vehicle operation on a chassis dynamometer, through a specified driving schedule. A proportional part of the diluted exhaust emissions is collected continuously for subsequent analysis, using a constant volume (variable dilution) sampler (Diesel dilute exhaust is continuously analyzed for hydrocarbons using a heated sample line and analyzer).

(c) The evaporative emission test (gasoline fueled vehicles only) is designed to determine hydrocarbon evaporative emissions as a consequence of diurnal temperature fluctuation, urban driving, and hot soaks during parking. It is associated with a series of events representative of a motor vehicle's operation, which result in hydrocarbon vapor losses. The test procedure is designed to measure:

(1) Diurnal breathing losses resulting from daily temperature changes, measured by the enclosure technique;

(2) Running losses from suspected sources (if indicated by engineering analysis or vehicle inspection) resulting from a simulated trip on a chassis dynamometer, measured by carbon traps; and

(3) Hot soak losses which result when the vehicle is parked and the hot engine is turned off, measured by the enclosure technique.

(d) Except in cases of component malfunction or failure, all emission control systems installed on or incorporated in a new motor vehicle shall be functioning during all procedures in this subpart. Maintenance to correct component malfunction or failure shall be authorized in accordance with § 86.077.

§ 86.128–78 Transmissions.

(a) All test conditions shall be run with automatic and automatic stick shift transmissions in "Drive" (highest gear); manual transmissions shall be run in highest gear, except as noted. Automatic stick-shift transmissions may be shifted as manual transmissions if requested by the manufacturer.

(b) Cars equipped with free-wheeling or overdrive units shall be tested with these units locked out of operation.

(c) Idle modes shall be run with automatic transmissions in "Drive" and the wheels braked, manual transmissions shall be in gear with the clutch disengaged; except first idle, see §§ 86.136 and 86.137.

(d) The vehicle shall be driven with minimum accelerator pedal movement to maintain the desired speed.

(e) Acceleration modes shall be driven smoothly. Automatic transmissions shall shift automatically through the normal sequence of gears; manual transmissions shall be shifted as recommended by the manufacturer with the operator releasing the accelerator pedal during each shift and accomplishing the shift with minimum time. If the vehicle cannot accelerate at the specified rate, the vehicle shall be operated with the accelerator pedal fully depressed until the vehicle speed reaches the value prescribed for that time in the driving schedule.

(f) The deceleration modes shall be run in gear using brakes or accelerator pedal as necessary to maintain the desired speed. Manual transmission vehicles shall have the clutch engaged and shall not change gears from the previous mode. For those modes which decelerate to zero, manual transmission clutches shall be depressed when the speed drops below 15 mph (24.14 km/h), when engine roughness is evident, or when engine stalling is imminent.

(g) Manual transmissions will be down shifted at the beginning of or during a power mode if recommended by the manufacturer or if the engine obviously is lugging.

(h) If shift speeds are not recommended by the manufacturer, manual transmission vehicles shall be shifted from first to second gear at 15 mph (24.14 km/h), from second to third gear at 25 mph (40.23 km/h), and, if so equipped, from third to fourth gear at 40 mph (64.37 km/h). Fifth gear, if so equipped, may be used at the manufacturer's option.

(i) If a four- or five-speed manual transmission has a first gear ratio in excess of 5:1, follow the procedure for three- or four-speed vehicles as if the first gear did not exist.

§ 86.129–78 Road load power and inertia weight determination.

(a) Flywheels, electrical or other means of simulating inertia as shown in the following table shall be used. If the equivalent inertia specified is not available on the dynamometer being used, the next higher equivalent inertia (not to exceed 250 lbs) available shall be used.

Loaded vehicle weight (pounds)	Equivalent inertia weight (pounds)	Road load power at 50 mph (horsepower)
Up to 1,125	1,000	5.9
1,126 to 1,375	1,250	6.5
1,376 to 1,625	1,500	7.1
1,626 to 1,875	1,750	7.7
1,876 to 2,125	2,000	8.3
2,126 to 2,375	2,250	8.8
2,376 to 2,625	2,500	9.4
2,626 to 2,875	2,750	9.9
2,876 to 3,250	3,000	10.3
3,251 to 3,750	3,500	11.2
3,751 to 4,250	4,000	12.0
4,251 to 4,750	4,500	12.7
4,751 to 5,250	5,000	13.4
5,251 to 5,750	5,500	13.9
5,751 to above	5,500	14.4

(b) *Power absorption unit adjustment.* (1) The power absorption unit shall be adjusted to reproduce road load power at 50 mph true speed. The indicated road load power setting shall take into account the dynamometer friction. The relationship between road load (absorbed) power and indicated road load power for a particular dynamometer shall be determined by the procedure outlined in § 86.118 or other suitable means.

(2) The road load power listed in the table above shall be used or the vehicle manufacturer may determine the road load power by an alternate procedure requested by the manufacturer and approved in advance by the Administrator, or the vehicle manufacturer may determine the road load power by the following procedure and request its use:

(i) *Gasoline fueled vehicles.* (A) Measuring the absolute manifold pressure of a representative vehicle, of the same equivalent inertia weight class, when operated on a level road under balanced wind conditions at a true speed of 50 mph (80 km/h), and

(B) Noting the dynamometer indicated road load horsepower setting required to reproduce that manifold pressure when the same vehicle is operated on the dynamometer at a true speed of 50 mph. The tests on the road and on the dynamometer shall be performed with the same vehicle ambient absolute pressure (usually barometric), i.e., within ±5 mm Hg (±0.7 kPa).

(C) The road load power shall be determined according to the procedure outlined in § 86.118 and adjusted according to the following if applicable.

(ii) *Diesel vehicles.* (A) Measuring the fuel flow rate of a representative vehicle of the same equivalent inertia weight class, when operated on a level road under balanced wind conditions at a true speed of 50 mph, and

(B) Noting the dynamometer indicated road load horsepower setting required to reproduce that fuel flow rate when the same vehicle is operated on the dynamometer at a true speed of 50 mph (80 km/h). The tests on the road and on the dynamometer shall be performed with the same vehicle ambient absolute pressure (usually barometric), i.e. within ±5 mm Hg (±0.7 kPa).

(C) The road load power shall be determined according to the procedure outlined in § 86.118 and adjusted according to the following if applicable.

(3) Where it is expected that more than 33 percent of the vehicles in an engine family will be equipped with air conditioning, the road load power listed above or as determined in paragraph (b)(2) of this section shall be increased by 10 percent for testing all test vehicles representing such an engine family if those vehicles are intended to be offered with air conditioning in production.

§ 86.130–78 Test sequence, general requirements.

The test sequence shown in Figure B78–10 shows the steps encountered as the test vehicle undergoes the procedures subsequently described to determine conformity with the standards set forth. Ambient temperature levels encountered by the test vehicle throughout the test sequence shall not be less than 68° F (20° C) nor more than 86° F (30° C). The vehicle shall be approximately level during all phases of the test sequence to prevent abnormal fuel distribution.

V 41 164 AUG 23 76 UM

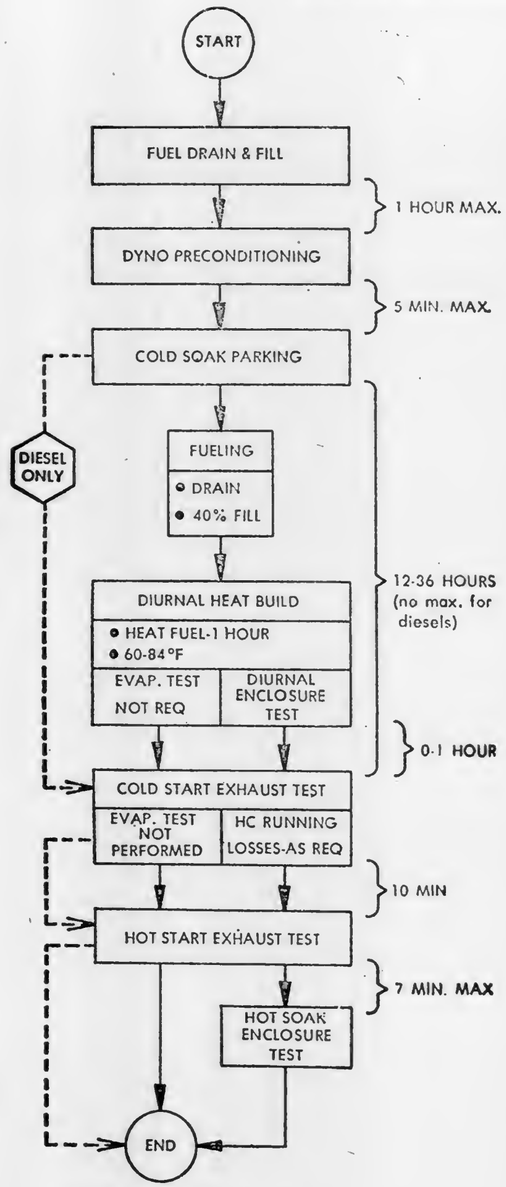


FIGURE B78-10 TEST SEQUENCE

§ 86.131–78 Vehicle preparation.

(a) For gasoline fueled vehicles prepare the fuel tank(s) for recording the temperature of the prescribed test fuel at the approximate mid-volume of the fuel.

(b) Provide additional fittings and adapters, as required, to accommodate a fuel drain at the lowest point possible in the tank(s) as installed on the vehicle.

§ 86.132–78 Vehicle preconditioning.

(a) The vehicle shall be moved to the test area and the following operations performed:

(1) The fuel tank(s) shall be drained through the provided fuel tank(s) drain(s) and filled to the prescribed "tank fuel volume" with the specified test fuel, § 86.113. For the above operations the evaporative emission control system shall neither be abnormally purged nor abnormally loaded.

(2) Within one hour of being fueled the vehicle shall be placed, either by being driven or pushed, on a dynamometer and operated through one Urban Dynamometer Driving Schedule test procedure, see § 86.115 and Appendix I. A gasoline fueled test vehicle may not be used to set dynamometer horsepower.

(3) For those unusual circumstances where additional preconditioning is desired by the manufacturer, such preconditioning may be allowed with the advance approval of the Administrator. The Administrator may also choose to conduct or require the conduct of additional preconditioning to insure that the evaporative emission control system is stabilized. The additional preconditioning shall consist of an initial one hour minimum soak and, one, two or three driving cycles of the UDDS, as described in paragraph (a) (2) of this section, each followed by a soak of at least one hour with engine off, engine compartment cover closed and cooling fan off. The vehicle may be driven off the dynamometer following each UDDS for the soak period.

(b) Within five minutes of completion of preconditioning the vehicle shall be driven off the dynamometer and parked. The vehicle shall be stored for not less than 12 hours nor for more than 36 hours (except diesel fueled vehicles which have no maximum time limitation) prior to the cold start exhaust test. (Gasoline fueled vehicles undergo a one hour diurnal heat build prior to the cold start exhaust test. A wait of up to one hour is permitted between the end of the diurnal heat build and the beginning of the cold start exhaust test. See § 86.130 and Figure B78–10.)

(c) Vehicles to be tested for evaporative emissions shall be processed in accordance with procedures in §§ 86.133 through 86.138. Vehicles to be tested for exhaust emissions only shall be processed according to §§ 86.133 through 86.137.

§ 86.133–78 Diurnal breathing loss test.

(a) (1) Following vehicle preparation and vehicle preconditioning procedures described in §§ 86.131 and 86.132 the test vehicle shall be allowed to soak for a period of not less than 12 or more than 36 hours prior to the exhaust emission test. The diurnal test shall start not less than 10 or more than 35 hours after the end of the preconditioning procedure. The start of the exhaust test shall follow the end of the diurnal test within one hour.

(2) Gasoline fueled vehicles to be tested for exhaust emissions only, shall undergo the diurnal heat build. Since no evaporative measurements are necessary, an evaporative enclosure is not required.

(b) The evaporative emission enclosure shall be purged for several minutes immediately prior to the test.

NOTE.—If at anytime the hydrocarbon concentration exceeds 15,000 ppm C the enclosure should be immediately purged. This concentration provides a 4:1 safety factor against the lean flammability limit.

(c) The FID hydrocarbon analyzer shall be zeroed and spanned immediately prior to the test.

(d) If not already on, the evaporative enclosure mixing fan shall be turned on at this time.

(e) Immediately prior to the diurnal breathing loss test, the fuel tank(s) of the prepared vehicle shall be drained and recharged with the specified test fuel, § 86.113, to the prescribed "tank fuel volume," defined in § 86.078–2. The temperature of the fuel prior to its delivery to the fuel tank shall be between 50 and 60° F (10 and 16° C). The fuel tank cap(s) is not installed until the diurnal heat build begins.

(f) The test vehicle, with the engine shut off, shall be moved into the evaporative emission enclosure, the test vehicle windows and luggage compartments shall be opened, the fuel tank temperature sensor shall be connected to the temperature recording system, and, if required, the heat source shall be properly positioned with respect to the fuel tank(s) and/or connected to the temperature controller.

(g) The temperature recording system shall be started.

(h) The fuel may be artificially heated to the starting diurnal temperature.

(i) When the fuel temperature recording system reaches at least 58° F (14° C), immediately:

(1) Install fuel tank cap(s).

(2) Turn off purge blowers, if not already off at this time.

(3) Close and seal enclosure doors.

(j) When the fuel temperature recording system reaches 60±2° F (16±1.1° C), immediately:

(1) Analyze enclosure atmosphere for hydrocarbons and record. This is the initial (time=0 minutes) hydrocarbon concentration, C_{HCi}, § 86.143.

(2) Start diurnal heat build and record time. This commences the 60±2 minute test period.

(k) The fuel shall be heated in such a way that its temperature change conforms to the following function to within ±3° F (±1.6° C):

$F = T_o + 0.4t$

for SI units, $C = T_o + (2/9)t$

Where:

F=fuel temperature, ° F
C=fuel temperature, ° C
t=time since beginning of test, minutes.
T_o=initial temperature.

After 60±2 minutes of heating, the fuel temperature rise shall be 24±1° F (±0.5° C).

(l) The FID hydrocarbon analyzer shall be zeroed and spanned immediately prior to the end of the diurnal test.

(m) The end of the diurnal breathing loss test occurs 60±2 minutes after the heat build begins, paragraph (j) (2). Analyze the enclosure atmosphere for hydrocarbons and record. This is the final (time=60 minutes) hydrocarbon concentration, ^{c}HCf, § 86.143. The time (or elapsed time) of this analysis shall be recorded.

(n) The heat source shall be turned off and the enclosure doors unsealed and opened.

(o) The heat source shall be moved away from the vehicle, if required, and/or disconnected from the temperature controller, the fuel tank temperature sensor shall be disconnected from the temperature recording system, the test vehicle windows and luggage compartments may be closed and the test vehicle, with the engine shut off, shall be removed from the evaporative emission enclosure.

(p) For vehicles with multiple tanks, the largest tank shall be designated as the primary tank and shall be heated in accordance with the procedures described in paragraph (k) of this section. All other tanks shall be designated as auxiliary tanks and shall undergo a similar heat build such that the fuel temperature shall be within 3°F (1.6°C) of the primary tank.

§ 86.134–78 Running loss test.

(a) If an engineering analysis or vehicle inspection indicates the possibility of evaporative emissions during vehicle operation, evaporative emission running loss measurements shall be made during the cold transient and stabilized portion of the exhaust emission test. Since running loss measurements cannot be made in the enclosure, the equipment described in § 86.177–17 shall be used to collect these emissions.

(1) The procedure in § 86.135 shall be followed.

(2) Prior to the initiation of the cold start exhaust emission test, the vapor loss measurement system shall be connected to all suspected sources of running loss evaporative emissions.

(3) The cold start transient and stabilized exhaust emission test portions shall be conducted according to the procedures of § 86.135 through § 86.137.

(4) Within one minute after the end of the stabilized exhaust emission test, the vapor loss measurement system shall be disconnected from the vehicle and the inlets and outlets sealed.

(5) Within one hour from the end of the running loss measurement, weigh the vapor collection traps.

§ 86.135–78 Dynamometer procedure.

(a) The dynamometer run consists of two tests, a "cold" start test after a minimum 12-hour and a maximum 36-hour soak according to the provisions of §§ 86.132 and 86.133 and a "hot" start test following the "cold" start test by 10 minutes. Engine startup (with all accessories turned off), operation over the driving schedule, and engine shutdown make a complete cold start test. Engine startup and operation over the first 505 seconds of the driving schedule complete the hot start test. The exhaust emissions are diluted with ambient air and a continuously proportional sample is collected for analysis during each phase. The composite samples collected in bags are analyzed for hydrocarbons (except diesel hydrocarbons which are analyzed continuously), carbon monoxide, carbon dioxide, and oxides of nitrogen. A parallel sample of the dilution air is similarly analyzed for hydrocarbon, carbon monoxide, carbon dioxide, and oxides of nitrogen.

(b) During dynamometer operation, a fixed speed cooling fan shall be positioned so as to direct cooling air to the vehicle in an appropriate manner with the engine compartment cover open. In the case of vehicles with front engine compartments, the fan shall be squarely positioned within 12 inches of the vehicle. In the case of vehicles with rear engine compartments (or if special designs make the above impractical), the cooling fan shall be placed in a position to provide sufficient air to maintain vehicle cooling. The fan capacity shall normally not exceed 5,300 cfm (2.50 m^3/s). If, however, the manufacturer can show that during field operation the vehicle receives additional cooling, and that such additional cooling is needed to provide a

V 41 164 AUG 23 76 UMI

representative test, the fan capacity may be increased or additional fans used if approved in advance by the Administrator.

(c) The vehicle speed as measured from the dynamometer rolls shall be used. A speed vs. time recording, as evidence of dynamometer test validity, shall be supplied on request of the Administrator.

(d) Practice runs over the prescribed driving schedule may be performed at test points, provided an emission sample is not taken, for the purpose of finding the minimum throttle action to maintain the proper speed-time relationship, or to permit sampling system adjustments.

NOTE.—When using two-roll dynamometers a truer speed-time trace may be obtained by minimizing the rocking of the vehicle in the rolls. The rocking of the vehicle changes the tire rolling radius on each roll. This rocking may be minimized by restraining the vehicle horizontally (or nearly so) by using a cable and winch.

(e) The drive wheel tires may be inflated up to a gauge pressure of 45 psi (310 kPa) in order to prevent tire damage. The drive wheel tire pressure shall be reported with the test results.

(f) If the dynamometer has not been operated during the 2-hour period immediately preceding the test it shall be warmed up for 15 minutes by operating at 30 mph (48 km/h) using a non-test vehicle or as recommended by the dynamometer manufacturer.

(g) If the dynamometer horsepower must be adjusted manually, it shall be set within 1 hour prior to the exhaust emissions test phase. The test vehicle shall not be used to make the adjustment. Dynamometers using automatic control of preselectable power settings may be set anythime prior to the beginning of the emissions test.

§ 86.136–78 Engine starting and restarting.

(a) *Gasoline fueled vehicles.* This paragraph (a) applies to gasoline fueled vehicles.

(1) The engine shall be started according to the manufacturer's recommended starting procedures. The initial 20 second idle period shall begin when the engine starts.

(2) *Choke operation:* (i) Vehicles equipped with automatic chokes shall be operated according to the manufacturer's operating instructions or owner's manual, including choke setting and "kick-down" from cold fast idle.

(ii) Vehicles equipped with manual chokes shall be operated according to the manufacturer's operating instructions or owner's manual.

(3) The transmission shall be placed in gear 15 seconds after the engine is started. If necessary, braking may be employed to keep the drive wheels from turning.

(4) The operator may use the choke, accelerator pedal, etc. where necessary to keep the engine running.

(5) If the manufacturer's operating instructions or owner's manual does not specify a warm engine starting procedure, the engine (automatic and manual choke engines) shall be starated by depressing the accelerator pedal about half way and cranking the engine until it starts.

(b) *Diesel fueled vehicles.* The engine shall be started according to the manufacturer's recommended starting procedures. The initial 20-second-idle period shall begin when the engine starts. The transmission shall be placed in gear 15 seconds after the engine is started. If necessary, braking may be employed to keep the drive wheels from turning.

(c) If the vehicle does not start after 10 seconds of cranking; cranking shall cease and the reason for failure to start shall be determined. The gas flow measuring device (or revolution counter) on the constant volume sampler (and the hydrocarbon integrater when testing diesel vehicles, see § 86.137, Dynamometer test runs) shall be turned off and the sample selector valves placed in the "standby" position during this diagnostic period. In addition, either the CVS should be turned off or the exhaust tube disconnected from the tailpipe during the diagnostic period.

(1) If failure to start is an operational error, the vehicle shall be rescheduled for testing from a cold start. If failure to start is caused by vehicle malfunction, corrective action of less than 30 minutes duration may be taken and the test continued. The sampling system shall be reactivated at the same time cranking is started. When the engine starts, the driving schedule timing sequence shall begin. If failure to start is caused by vehicle malfunction and the vehicle cannot be started, the test shall be voided, the vehicle removed from the dynamometer, corrective action taken, and the vehicle rescheduled for test. The reason for the malfunction (if determined) and the corrective action taken shall be reported.

(d) If the engine "false starts," the operator shall repeat the recommended starting procedure (such as resetting the choke, etc.).

(e) *Stalling:* (1) If the engine stalls during an idle period, the engine shall be restarted immediately and the test continued. If the engine cannot be started soon enough to allow the vehicle to follow the next acceleration as prescribed, the driving schedule indicator shall be stopped. When the vehicle restarts, the driving schedule indicator shall be reactivated.

(2) If the engine stalls during some operating mode other than idle, the driving schedule indicator shall be stopped, the vehicle shall then be restarted and accelerated to the speed required at that point in the driving schedule and the test continued. During acceleration to this point, shifting shall be performed in accordance with § 86.128.

(3) If the vehicle will not restart within 1 minute, the test shall be voided, the vehicle removed from the dynamometer, corrective action taken, and the vehicle rescheduled for test. The reason for the malfunction (if determined) and the corrective action taken shall be reported.

§ 86.137–78 Dynamometer test runs.

(a) The vehicle shall be allowed to stand with the engine turned off for a period of not less than 12 hours or more than 36 hours before the cold start exhaust emission test. The cold start exhaust test shall follow the diurnal breathing loss test by not more than 1 hour. The vehicle shall be stored prior to the emission test in such a manner that precipitation (e.g. rain or dew) does not occur on the vehicle. The complete dynamometer test consists of a cold start drive of 7.5 miles (12.1 km) and simulates a hot start drive of 7.5 miles (12.1 km). The vehicle is allowed to stand on the dynamometer during the 10 minute time period between the cold and hot start tests. The cold start test is divided into two periods. The first period, representing the cold start "transient" phase, terminates at the end of the deceleration which is scheduled to occur at 505 seconds of the driving schedule. The second period, representing the "stabilized" phase, consists of the remainder of the driving schedule including engine shutdown. The hot start test similarly consists of two periods. The period, representing the hot start "transient" phase, terminates at the same point in the driving schedule as the first period of the cold start test. The second period of the hot start test, "stabilized" phase, is assumed to be identical to the second period of the cold start test. Therefore, the hot start test terminates after the first period (505 seconds) is run.

(b) The following steps shall be taken for each test:

(1) Place drive wheels of vehicle on dynamometer without starting engine.

(2) Open the vehicle engine compartment cover and position the cooling fan.

(3) With the sample selector valves in the "standby" position connect evacuated sample collection bags to the dilute exhaust and dilution air sample collection systems.

(4) Start the Constant Volume Sampler (if not already on), the sample pumps, the temperature recorder, the vehicle cooling fan and the heated hydrocarbon analysis recorder (diesel only). (The heat exchanger of the constant volume sampler, if used, diesel hydrocarbon analyzer continuous sample line and filter (if applicable) should be preheated to their respective operating temperatures before the test begins.)

(5) Adjust the sample flow rates to the desired flow rate (minimum of 10 cfh, 0.28 m^3/hr) and set the gas flow measuring devices to zero.

NOTE.—CFV–CVS sample flowrate is fixed by the venturi design.

(6) Attach the flexible exhaust tube to the vehicle tailpipe(s).

(7) Start the gas flow measuring device, position the sample selector valves to direct the sample flow into the "transient" exhaust sample bag and the transient" dilution air sample bag (turn on the diesel hydrocarbon analyzer system integrator and mark the recorder chart, if applicable) and start cranking the engine.

(8) Fifteen seconds after the engine starts, place the transmission in gear.

(9) Twenty seconds after the engine starts, begin the initial vehicle acceleration of the driving schedule.

(10) Operate the vehicle according to the dynamometer driving schedule (§ 86.115).

(11) At the end of the deceleration which is scheduled to occur at 505 seconds, simultaneously switch the sample flows from the "transient" bags to the "stabilized" bags, switch off gas flow measuring device No. 1 (and the diesel hydrocarbon integrator No. 1, mark the diesel hydrocarbon recorder chart) and start gas flow measuring device No. 2 (and diesel hydrocarbon integrator No. 2). As soon as possible transfer the "transient" exhaust and dilution air samples to the analytical system and process the samples according to § 86.140 obtaining a stabilized reading of the exhaust sample on all analyzers within 20 minutes of the end of the sample collection phase of the test.

(12) Turn the engine off 2 seconds after the end of the last declaration (at 1,369 seconds).

(13) Five seconds after the engine stops running, simultaneously turn off gas flow measuring device No. 2 (and the diesel hydrocarbon integrator No. 2, mark the hydrocarbon recorder chart, if applicable) and position the sample selector valves to the "standby" position. As soon as possible transfer the "stabilized" exhaust and dilution air samples to the analytical system and process the samples according to § 86.140 obtaining a stabilized reading of the exhaust sample on all analyzers within 20 minutes of the end of the sample collection phase of the test.

(14) Immediately after the end of the sample period turn off the cooling fan and close the engine compartment cover.

(15) Turn off the CVS or disconnect the exhaust tube from the tailpipe of the vehicle.

(16) Repeat the steps in paragraph (b) (2) through (10) of this section for the hot start test, except only one evacuated sample bag is required for sampling exhaust gas and one for dilution air. The step in paragraph (b) (7) of this section shall begin between 9 and 11 minutes after the end of the sample period for the cold start test.

(17) At the end of the deceleration which is scheduled to occur at 505 seconds, simultaneously turn off gas flow measuring device No. 1 (and diesel hydrocarbon integrator No. 1, mark the diesel hydrocarbon recorder chart, if applicable) and position the sample selector valve to the "standby" position. (Engine shutdown is not part of the hot start test sample period.)

(18) As soon as possible transfer the hot start "transient" exhaust and dilution air samples to the analytical system and process the samples according to § 86.140 obtaining a stabilized reading of the exhaust sample on all analyzers within 20 minutes of the end of the sample collection phase of the test.

(19) Disconnect the exhaust tube from the vehicle tailpipe(s) and drive vehicle from dynamometer.

(20) The constant volume sampler may be turned off, if desired.

(21) Vehicles to be tested for evaporative emissions will proceed according to § 86.138. For all others this completes the test sequence.

§ 86.138–78 Hot soak test.

The hot soak evaporative emission test shall be conducted immediately following the hot transient exhaust emission test.

(a) Prior to the completion of the hot start transient exhaust emission sampling period, the evaporative emission enclosure shall be purged for several minutes.

(b) The FID hydrocarbon analyzer shall be zeroed and spanned immediately prior to the test.

(c) If not already on, the evaporative enclosure mixing fan shall be turned on at this time.

(d) Upon completion of the hot transient exhaust emission sampling period, the vehicle engine compartment cover shall be closed, the cooling fan shall be moved, the vehicle shall be disconnected from the dynamometer and exhaust sampling system, and then driven at minimum throttle to the vehicle entrance of the enclosure.

(e) The vehicle's engine must be stopped before any part of the vehicle enters the enclosure. The vehicle may be pushed or coasted into the enclosure.

(f) The test vehicle windows and luggage compartments shall be opened, if not already open.

(g) The temperature recording system shall be started and the time of engine shut off shall be noted on the evaporative emission hydrocarbon data recording system.

(h) The enclosure doors shall be closed and sealed within two minutes of engine shutdown and within seven minutes after the end of the exhaust test.

(i) The 60±0.5 minute hot soak begins when the enclosure doors are sealed. The enclosure atmosphere shall be analyzed and recorded. This is the initial (time=0 minutes) hydrocarbon concentration, C_{HCi}, for use in calculating evaporative losses, see § 86.143.

(j) The test vehicle shall be permitted to soak for a period of one hour in the enclosure.

(k) The FID hydrocarbon analyzer shall be zeroed and spanned immediately prior to the end of the test.

(l) At the end of the 60±0.5 minute test period, again analyze the enclosure atmosphere and record time. This is the final (time=60 minutes) hydrocarbon concentration, C_{HCf}, for use in calculating evaporative losses, see § 86.143. This operation completes the evaporative emission measurement procedure.

§ 86.139–78 [Reserved]

§ 86.140–78 Exhaust sample analysis.

The following sequence of operations shall be performed in conjunction with each series of measurements:

(a) Zero the analyzers and obtain a stable zero reading. Recheck after tests.

(b) Introduce span gases and set instrument gains. In order to avoid corrections, span and calibrate at the same flow rates used to analyze the test sample. Span gases should have concentrations equal to 75 to 100 percent of full scale. If gain has shifted significantly on the analyzers, check the calibrations. Show actual concentrations on chart.

(c) Check zeros; repeat the procedure in paragraphs (a) and (b) of this section if required.

(d) Check flowrates and pressures.

(e) Measure HC, CO, CO_2 and NO_x concentrations of samples.

(f) For diesel vehicles, continuously record (integrate electronically if desired) dilute hydrocarbon emission levels during test. Background samples are collected in sample bags and analyzed as above.

(g) Check zero and span points. If difference is greater than 2 percent of full scale, repeat the procedure in paragraphs (a) through (f) of this section.

§ 86.141–78 [Reserved]

§ 86.142–78 Records required.

The following information shall be recorded with respect to each test:

(a) Test number.

(b) System or device tested (brief description).

(c) Date and time of day for each part of the test schedule.

(d) Instrument operator.

(e) Driver or operator.

(f) Vehicle: Make—Vehicle identification number—Model year—Transmission type—Odometer reading—Engine displacement — Engine family — Evap. family—Idle rpm—Fuel system (fuel injection, nominal fuel tank(s) capacity, fuel tank(s) location, number of carburetors, number of carburetor barrels)—Inertia loading—Actual curb weight recorded at 0 miles—Actual road load at 50 mph (80 km/h) and drive wheel tire pressure, as applicable.

(g) Indicated road load power absorption at 50 mph (80 km/h) and dynamometer serial number. As an alternative to recording the dynamometer serial number, a reference to a vehicle test cell number may be used, with the advance approval of the Administrator, provided the test cell records show the pertinent information.

(h) All pertinent instrument information such as tuning—gain—serial number—detector number—range. As an alternative, a reference to a vehicle test cell number may be used, with the advance approval of the Administrator, provided test cell calibration records show the pertinent instrument information.

V 41 164
AUG 23 76
UMI

(i) Recorder charts: Identify zero, span, exhaust gas, and dilution air sample traces.

(j) Test cell barometric pressure, ambient temperature and humidity.

NOTE.—A central laboratory barometer may be used: *Provided*, That individual test cell barometric pressures are shown to be within ±0.1 percent of the barometric pressure at the central barometer location.

(k) Fuel temperatures, as prescribed.

(l) Pressure of the mixture of exhaust and dilution air entering the CVS metering device, the pressure increase across the device, and the temperature at the inlet. The temperature may be recorded continuously or digitally to determine temperature variations.

(m) The number of revolutions of the positive displacement pump accumulated during each test phase while exhaust samples are being collected. The number of standard cubic feet metered by a critical flow venturi during each test phase would be the equivalent record for a CFV–CVS.

(n) The humidity of the dilution air.

NOTE.—If conditioning columns are not used (see § 86.122 and § 86.144) this measurement can be deleted. If the conditioning columns are used and the dilution air is taken from the test cell, the ambient humidity can be used for this measurement.

(o) Temperature set point of the heated sample line and heated hydrocarbon detector temperature control system (for diesel vehicles only).

§ 86.143–78 Calculations; evaporative emissions.

The calculation of the net hydrocarbon mass change in the enclosure is used to determine the diurnal and hot soak mass emissions. The mass is calculated from initial and final hydrocarbon concentrations in ppm carbon, initial and final enclosure ambient temperatures, initial and final barometric pressures, and net enclosure volume using the following equation:

$$M_{HC} = kV_n \times 10^{-4}\left[\frac{C_{HCf}P_{Bf}}{T_f} - \frac{C_{HCi}P_{Bi}}{T_i}\right]$$

Where:

M_{HC} = hydrocarbon mass, g.

C_{HC} = hydrocarbon concentration as ppm carbon.

V_n = net enclosure volume, ft³ (m³) as determined by subtracting 50 ft³ (1.42 m³) (volume of vehicle with trunk and windows open) from the enclosure volume. A manufacturer may use the measured volume of the vehicle (instead of the nominal 50 ft³) with advance approval by the Administrator: *Provided*, The measured volume is determined and used for all vehicles tested by that manufacturer.

P_B = barometric pressure, in. Hg (kPa).

T = enclosure ambient temperature, R (K).

k = .208 (12+H/C)

for SI units, k = 1.2 (12+H/C).

Where:

H/C = Hydrogen-carbon ratio.

H/C = 2.33 for diurnal emissions.

H/C = 2.2 for hot soak emissions.

i = indicates initial reading.

f = indicates final reading.

§ 86.144–78 Calculations; exhaust emissions.

The final reported test results shall be computed by use of the following formula:

(a) For light duty vehicles and light duty trucks:

$$Y_{wm} = (0.43\ Y_{ct} + 0.57\ Y_{ht} + Y_s)/7.5$$

Where:

Y_{wm} = Weighted mass emissions of each pollutant, i.e., HC, CO, or NOx, in grams per vehicle mile.

Y_{ct} = Mass emissions as calculated from the "transient" phase of the cold start test, in grams per test phase.

Y_{ht} = Mass emissions as calculated from the "transient" phase of the hot start test, in grams per test phase.

Y_s = Mass emissions as calculated from the "stabilized" phase of the cold start test, in grams per test phase.

(b) The mass of each pollutant for each phase of both the cold start test and the hot start test is determined from the following:

(1) Hydrocarbon mass:

$$HC_{mass} = V_{mix} \times Density_{HC} \times (HC_{conc}/1{,}000{,}000)$$

(2) Oxides of nitrogen mass:

$$NOx_{mass} = V_{mix} \times Density_{NO_2} \times K_H \times (NOx_{conc}/1{,}000{,}000)$$

(3) Carbon monoxide mass:

$$CO_{mass} = V_{mix} \times Density_{CO} \times (CO_{conc}/1{,}000{,}000)$$

(4) Carbon dioxide mass:

$$CO_{2mass} = V_{mix} \times Density_{CO_2} \times (CO_{2conc}/100)$$

(c) Meaning of symbols:

(1) HC_{mass} = Hydrocarbon emissions, in grams per test phase.

$Density_{HC}$ = Density of hydrocarbons is 16.33 g/ft³ (.5767 kg/m³), assuming an average carbon to hydrogen ratio of 1:1.85, at 68° F (20° C) and 760 mm Hg (101.3 kPa) pressure.

HC_{conc} = Hydrocarbon concentration of the dilute exhaust sample corrected for background, in ppm carbon equivalent, i.e., equivalent propane × 3.

$HC_{conc} = HC_e - HC_d(1-1/DF)$

Where:

HC_e = Hydrocarbon concentration of the dilute exhaust sample or, for diesel, average hydrocarbon concentration of the dilute exhaust sample as calculated from the integrated HC traces, in ppm carbon equivalent.

HC_d = Hydrocarbon concentration of the dilution air as measured, in ppm carbon equivalent.

(2) NOx_{mass} = Oxides of nitrogen emissions, in grams per test phase.

$Density_{NO_2}$ = Density of oxides of nitrogen is 54.16 g/ft³ (1.913 kg/m³), assuming they are in the form of nitrogen dioxide, at 68° F (20° C) and 760 mm Hg (101.3 kPa) pressure.

NOx_{conc} = Oxides of nitrogen concentration of the dilute exhaust sample corrected for background, in ppm.

$NOx_{conc} = NOx_e - NOx_d\ (1-1/DF)$

Where:

NOx_e = Oxides of nitrogen concentration of the dilute exhaust sample as measured, in ppm.

NOx_d = Oxides of nitrogen concentration of the dilute air as measured, in ppm.

(3) CO_{mass} = Carbon monoxide emissions, in grams per test phase.

$Density_{CO}$ = Density of carbon monoxide is 32.97 g/ft³ (1.164 kg/m³), at 68° F (20°C) and 760 mm Hg (101.3 kPa) pressure.

CO_{conc} = —Carbon monoxide concentration of the dilute exhaust sample corrected for background, water vapor, and CO_2 extraction, in ppm.

$CO_{conc} = CO_e - CO_d\ (1-1/DF)$

Where:

CO_e = Carbon monoxide concentration of the dilute exhaust sample volume corrected for water vapor and carbon dioxide extraction, in ppm. The calculation assumes the carbon to hydrogen ratio of the fuel is 1:1.85.

$CO_e = (1-0.01925\ CO_{2e} - 0.000323\ R)\ CO_{em}$

Where:

CO_{em} = Carbon monoxide concentration of the dilute exhaust sample as measured, in ppm.

CO_{2e} = Carbon dioxide concentration of the dilute exhaust sample, in percent.

R = Relative humidity of the dilution air, in per cent (see § 86.142(n)).

CO_d = Carbon monoxide concentration of the dilution air corrected for water vapor extraction, in ppm.

$CO_d = (1-0.000323\ R)\ CO_{dm}$

Where:

CO_{dm} = Carbon monoxide concentration of the dilution air sample as measured, in ppm.

NOTE.—If a CO instrument which meets the criteria specified in § 86.111 is used and the conditioning column has been deleted, CO_{em} can be substituted directly for CO_e and CO_{dm} can be substituted directly for CO_d.

(4) CO_{2mass} = Carbon dioxide emissions, in grams per test phase.

$Density_{CO_2}$ = Density of carbon dioxide is 51.85 g/ft³ (1.843 kg/m³), at 68° F (20° C) and 760 mm Hg (101.3 kPa) pressure.

CO_{2conc} = Carbon dioxide concentration of the dilute exhaust sample corrected for background, in percent.

$CO_{2conc} = CO_{2e} - CO_{2d}\ (1-1/DF)$

Where:

CO_{2d} = Carbon dioxide concentration of the dilution air as measured, in percent.

(5) $DF = 13.4/[CO_{2e} + (HC_e + CO_e)\ 10^{-4}]$

K_H = Humidity correction factor.

$K_H = 1/[1-0.0047(H-75)]$

for SI units $= 1/[1-0.0329(H-10.71)]$

Where:

H = Absolute humidity in grains (grams) of water per pound (kilogram) of dry air.

$H = [(43.478)R_a \times P_d]/[P_B - (P_d \times R_a/100)]$

for SI units, $H = [(6.211)R_a \times P_d]/[P_B - (P_d \times R_a/100)]$

R_a = Relative humidity of the ambient air, in percent.

P_d = Saturated vapor pressure, in mm Hg (kPa) at the ambient dry bulb temperature.

P_B = Barometric pressure, in mm Hg (kPa).

V_{mix} = Total dilute exhaust volume in cubic feet per test phase corrected to standard conditions (528 R) (293 K) and 760 mm Hg (101.3 kPa)).

For PDP–CVS, V_{mix} is:

$$V_{mix} = V_o \times \frac{N(P_B - P_1)\ (528\ R)}{(760\ mm\ Hg)\ (T_p)}$$

for SI units,

$$V_{mix} = V_o \times \frac{N(P_B - P_1)\ (293.15\ K)}{(101.325\ kPa)\ (T_p)}$$

Where:

V_o = Volume of gas pumped by the positive displacement pump, in cubic feet (m³) per revolution. This volume is dependent on the pressure differential across the positive displacement pump.

N = Number of revolutions of the positive displacement pump during the test phase while samples are being collected.

P_B = Barometric pressure, in mm Hg (kPa).

P_1 = Pressure depression below atmospheric measured at the inlet to the positive displacement pump, in mm Hg (kPa) (during an idle mode).

T_p = Average temperature of dilute exhaust entering positive displacement pump during test, R(K).

(d) Example calculation of mass values of exhaust emissions using positive displacement pump:

(1) For the "transient" phase of the cold start test assume the following: $V_o = 0.29344$ ft³/revolution; N = 10,485; R = 48.0%; $R_a = 48.2\%$; $P_B = 762$ mm Hg; $P_d = 22.225$ mm Hg; $P_1 = 70$ mm Hg; $T_p = 570$ R; $HC_e = 105.8$ ppm, carbon equivalent; $NOx_e = 11.2$ ppm; $CO_{em} = 306.6$ ppm; $CO_{2e} = 1.43\%$; $HC_d = 12.1$ ppm; $NOx_d = 0.8$ ppm; $CO_{dm} = 15.3$ ppm.

Then:

$V_{mix} = (0.29344)\ (10{,}485)\ (762-70)\ (528)/(760)\ (570) = 2595.0$ ft³ per test phase.

$H = (43.478)\ (48.2)\ (22.225)/[762 - (22.225 \times 48.2/100)]$

$K_H = 1/[1-0.0047(62-75)] = 0.9424$

$CO_e = [1-0.01925\ (1.43) - 0.000323\ (48)]\ 306.0 = 293.4$ ppm

$CO_d = [1-0.000323\ (48)]\ 15.3 = 15.1$ ppm

$DF = 13.4/[1.43 + (105.8+293.4) \times 10^{-4}] = 9.116$

$HC_{conc} = 105.8 - 12.1(1-1/9.116) = 95.03$ ppm.

$HC_{mass} = (2595)\ (16.33)\ (95.03/1{,}000{,}000) = 4.027$ grams per test phase.

$NOx_{conc} = 11.2 - 0.8\ (1-1/9.116) = 10.49$ ppm

$NOx_{mass} = (2595)\ (54.16)\ (10.49/1{,}000{,}000)\ (0.9424) = 1.389$ grams per test phase.

$CO_{conc} = 293.4 - 15.1\ (1-1/9.116) = 280.0$ ppm

$CO_{mass} = (2595)\ (32.97)\ (280/1{,}000{,}000) = 23.96$ grams per test phase.

(2) For the stabilized portion of the cold start test assume that similar calculations resulted in the following:

$HC_{mass} = 0.62$ grams per test phase

$NOx_{mass} = 1.27$ grams per test phase

$CO_{mass} = 5.98$ grams per test phase

(3) For the "transient" portion of the hot start test assume that similar calculations resulted in the following:

$HC_{mass} = 0.51$ grams per test phase

$NOx_{mass} = 1.38$ grams per test phase

$CO_{mass} = 5.01$ grams per test phase

(4) Weighted mass emission results:

$HC_{wm} = [(0.43)\ (4.027) + (0.57)\ (0.51+0.62)]/7.5 = 0.352$ grams per vehicle mile.

$NOx_{wm} = [(0.43)\ (1.389) + (0.57)\ (1.38+1.27)]/7.5 = 0.354$ grams per vehicle mile.

$CO_{wm} = [(0.43)\ (23.96) + (0.57)\ (5.01+5.98)]/7.5 = 2.55$ grams per vehicle mile.

§ 86.145–78 [Reserved]

§§ 86.177–1 through 86.177–4 [Deleted]

13. Sections 86.177–1, 86.177–2, 86.177–3 and 86.177–4 are deleted.

COMMITTEE MANAGEMENT

Interim Regulations

V41/164 AUG 23 76 UMI

Title 45—Public Welfare

SUBTITLE A—DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE, GENERAL ADMINISTRATION

PART 11—COMMITTEE MANAGEMENT

Interim Regulations

On January 23, 1975 a document was published in the FEDERAL REGISTER (40 FR 3712) proposing regulations implementing the Federal Advisory Committee Act, Pub. L. 92–463, 86 Stat. 770, 5 U.S.C. App. I et seq. and Office of Management and Budget Circular A–63, 39 FR 12389, April 5, 1974. Comments were received from thirty persons or organizations.

One commentator criticized the exclusion of certain groups from the provisions of the regulation such as committees composed wholly of full time officers or employees of the Federal government, operational groups, local civic groups, and state and local committees. See § 11.2(b)(3). This provision reflects section 4(c) of the Federal Advisory Committee Act (Pub. L. 92–463) which provides the Act shall not apply to such groups and has not been changed.

The language in § 11.2(b)(1)(i)–(v) listing several factors to be utilized in determining when a group is an advisory committee has been modified in response to a suggestion that the proposed wording ought to be clarified to indicate that the absence of one, or even several of the factors did not foreclose existence of a committee.

In response to one commentator's suggestion that the provisions of § 11.4(g) and (i) relating to the balancing of membership and assuring the selection of individuals representing diverse points of view were confusing and ought to be combined and clarified, and that subsection (h) should be stricken as unnecessarily redundant, we have combined § 11.4(g) and (i) and modified subsection (h) to clearly underscore the intent behind the latter section.

Several persons commented on the requirement established for a quorum. One commentator suggested that the quorum requirement of § 11.5(a)(1)(ii) was too harsh, and that a fairer rule would provide that a quorum consist of a majority of appointed, rather than the authorized membership. Another writer suggested that two-thirds of a committee membership ought to constitute a quorum. We agree with neither in light of the fact that a committee's charter can be written to provide a standard different from the general rule. One minor amendment has been made in this provision to clarify the fact ex-officio members are to be included in determining the number of members required for a quorum, and that such members shall have full voting rights.

Several commentators suggested that the notice requirements contained in § 11.5(a)(2) which provides for at least fifteen days advance notice in the FEDERAL REGISTER was insufficient. We disagree, however, we will continue to endeavor to give the maximum possible notice of all meetings. Department employees are encouraged to give as much advance notice of meetings as possible.

One commentator suggested that the words "to the extent practicable" be stricken from § 11.5(a)(2)(ii)(c) and that certain other mandatory forms of notice be added as requirements. We decline to strike the aforementioned phrase, but have added an additional notice requirement. Executive secretaries will be responsible for maintaining lists of persons and organizations requesting notices of meetings, and notifying them by mail in advance of any meeting.

Section 11.5(a)(2)(iii) has been amended in response to a comment that indicated that the regulation should clearly state that meetings should be held only in emergencies unless at least fifteen day notice was given.

Many commentators expressed concern with the provisions relating to the openness of committee meetings and records. Several commentators were particularly concerned that the regulations will inhibit free exchange of ideas and information among committee members by placing members in a position to be unduly influenced by observers reactions. Several members of the research community indicated a concern that the best ideas will not be submitted to the Department because potential submitters of ideas will be left without any protection or privacy. The closing of committee meetings requires a careful balancing of interests, the need for the greatest possible public disclosure of the advisory process, the encouragement of the free exchange of ideas, and the right of privacy of individuals submitting their ideas. One writer likened the committee process to that of the jury in the American judicial system and suggested that an individual's ideas are entitled to protection. The availability of an exemption does not require the closing of meetings, and the Department has exercised restraint in closing meetings. It will continue to do so.

One writer argued that exemption 5 of the Freedom of Information Act, 5 U.S.C. 552(b)(5) was inapplicable to advisory committee records and discussions. We disagree. In the case of Washington Research Project, Inc., v. Department of Health, Education, and Welfare, 504 F. 2d 238 (D.C. Cir. 1974) the Court concluded that records of advisory committee meetings were exempt from mandatory disclosure under the Freedom of Information Act at least insofar as they reflected the views of advisory committee members. In the case of Aviation Consumer Action Project, et al v. Washburn, et al, ---- F. 2d ----, C.A.D.C. 1976, the Court also held that exemption five was available for use in the closing of committee meetings. Thus, § 11.5(a)(6)(ii) remains as proposed.

Section 11.5(a)(6)(f) has been amended to provide that requests for closing a meeting (or portion) shall be submitted sixty, rather than thirty days, in advance of any meeting. This requirement will provide additional time for consideration of closing requests by officials responsible for making such determinations.

In response to one commentator's suggestion, § 11.5(b)(3) has been modified to specify the procedures adhered to by the Department in maintaining advisory committee records.

Several commentators have suggested that a verbatim transcript be kept of all closed sessions. The Act does not require the keeping of such a transcript, and to do so by regulation would result in the Department incurring unwarranted and great expense. In any event, detailed minutes of all meetings provide a meaningful record for later use and review.

Several persons indicated the Department should be able to decide for itself whether a committee ought to be established or renewed without OMB consultation and concurrence. The Federal Advisory Committee Act, however, requires consultation with the OMB before a committee is established, and OMB Circular A–63, Transmittal Memorandum No. 1 requires that the Department obtain OMB concurrence prior to renewing a committee. Likewise, one commentator's conclusions that annual review, two year renewals, and retention of authority to adjourn committee meetings in stated circumstances will cause an upheaval of the committee mechanism ignore the fact that these matters are statutory requirements.

One commentator suggested that the Department maintain and disclose to the public even more complete committee records than those specified in these rules, such as a list of all persons who declined an invitation to serve on a committee and more data on members' personal and financial affairs. Responsibility for avoiding conflict of interest lies with the Department and we find that no useful purpose would be served by such disclosures. The Department will continue to provide maximum feasible disclosure of such matters within the constraints of the Privacy Act.

Another person suggested that the Department should publish the vote of members on a decision to close a meeting. We disagree. Any decision as to whether to close a meeting is not made by a committee's membership, but by a Department official.

Sections 11.7, 11.8, 11.9 as published have been deleted. These sections related to internal administrative matters which are a subject for inclusion in the Department's General Administration Manual.

Various editorial changes have also been made in the interest of clarity. 45 CFR Part 11 is revised as set forth below.

Interested persons are invited to submit written comments, suggestions, or objections concerning the new Part 11 on or before September 22, 1976.

Comments should be addressed to: Department Committee Management Officer, Department of Health, Education, and Welfare, Room 4036 North Building, 330 Independence Avenue, SW., Washington, D.C. 20201.

All comments received in timely response will be considered, and will be available for public inspection at the above address during regular business hours. Following the close of the comment period, the regulations will be revised as warranted by the public comments received. It is intended that any revision of the regulations will be published within 90 days following the close of the comment period. The regulations, as set forth below, will be applicable and effective on August 23, 1976.

Effective date: This regulation shall become effective August 23, 1976, as an interim final rule.

Approved: August 13, 1976.

MARJORIE LYNCH,
Acting Secretary.

Sec.

11.1 Scope.
11.2 Definitions.
11.3 General policies.
11.4 Guidelines for the creation and renewal of advisory committees.
11.5 Operation of advisory committees.
11.6 Administrative remedies.
11.7 Department committee management officer.

AUTHORITY: 86 Stat. 770, 5 U.S.C. App. I et seq. and Office of Management and Budget Circular A–63, 39 FR 12389, April 5, 1974.

§ 11.1 Scope.

(a) This part contains the Department's regulations implementing the Federal Advisory Committee Act.

(b) The regulations provided under this part apply to all advisory committees providing advice to the Department or any of its officials except to the extent that statutory provisions governing an advisory committee may specifically provide otherwise.

§ 11.2 Definitions.

(a) "Act" means the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770, 5 U.S.C. App. I et seq).

(b) "Advisory committee," subject to exclusions described in paragraph (b)(3) of this section means any committee, board, commission, council, conference, panel, task force, or other similar group or any subcommittee or other subgroup thereof which is established by statute or reorganization plan; or established or utilized by the Department in the interest of obtaining advice or recommendations for the President or one or more agencies or officers of the Federal Government.

(1) Although no single factor is determinative in deciding whether a group is an advisory committee, the following factors will be considered:

(i) Fixed membership including at least one person who is not a full-time Federal employee;

(ii) Establishment by a Federal official or law; or if not Federally established, the initiative for its use as an advisory body for the Federal Government comes from a Federal official rather than from a private group;

(iii) A purpose of providing advice regarding a particular subject or particular subjects;

(iv) An organizational structure (e.g., officers and a staff;

(v) Regular or periodic meetings.

(2) The functions of an advisory committee are to be solely advisory. Where a group provides some advice to the Department, but the group's advisory function is incidental and inseparable from other (e.g., operational) functions, the provisions of this part do not apply. However, if the advisory function is separable, the group is subject to this part to the extent that the group operates as an advisory committee.

(3) Groups excluded from the effect of the provisions of this part include:

(i) Any committee which is composed wholly of full-time officers or employees of the Federal Government;

(ii) Any committee which is exclusively operational in nature (e.g., has functions which include making or implementing decisions, as opposed to the offerings of advice or recommendations);

(iii) Any local civic group whose primary function is that of rendering a public service with respect to a Federal program;

(iv) Any state or local committee or similar group established to advise State or local officials or agencies;

(v) The term "advisory committee" is not intended to include persons or organizations which have contractual relationships with the Department except in those cases where the criteria described in paragraph (b)(1) of this section are present:

(c) "Department" means the Department of Health, Education, and Welfare.

(d) "Secretary" means the Secretary of Health, Education, and Welfare, or his designee.

(e) "OMB Secretariat" is the office within the Office of Management and Budget to administer the provisions of OMB Circular A–63.

(f) "Presidential advisory committee" means an advisory committee which advises the President.

(g) "Statutory advisory committee" is one established by the Congress or required to be established by the Congress.

(h) "Non-statutory advisory committee" is one established by the President or other Federal officer, including a committee which was authorized by, but not established by or required to be established by statute.

§ 11.3 General policies.

(a) In interpreting this part, Department officials shall be guided by the Act and the intent of Congress in enacting the Act. These considerations include:

(1) Limiting the number of advisory committees to those that are essential and terminating any committee not fulfilling its purpose;

(2) Insuring effective use of advisory committees and their recommendations, while assuring that decisionmaking authority is retained by the responsible Department officers;

(3) Providing clear goals, standards and uniform procedures with respect to creation, operation, and duration of committees;

(4) Insuring that adequate information is provided to the President, the Congress and the public regarding advisory committees;

(5) Insuring adequate opportunities for access by the public to advisory committee meetings, and

(6) Providing uniform requirements for advisory committee reports and their availability to the public.

(b) Department officials shall be guided by the HEW Standards of Conduct (45 CFR 73.735), the Federal Personnel Manual, and the Federal Conflict of Interest statutes (18 U.S.C. 201 et seq.), in preventing conflicts of interest or appearance of conflicts of interest on the part of Department employees concerned with advisory committees, advisory committee members and staff, and consultants and experts concerned with advisory committees.

§ 11.4 Guidelines for the creation and renewal of advisory committees.

(a) Advisory committees shall be established by the Department only when they are determined to be essential. Their number shall be kept to the minimum necessary. They shall be terminated when they are no longer carrying out the purposes for which they were established or such purposes are no longer regarded as necessary to the operation of the department.

(b) No advisory committee shall be established or renewed unless such establishment or renewal is specifically authorized by statute, or established by statute or the President, or determined as a matter of formal record by the Secretary (after consultation with the OMB Secretariat) to be in the public interest in connection with the performance of duties imposed on the Department by law. In seeking such determination by the Secretary, the responsible official requesting establishment or continuance of an advisory committee shall make a request in writing to the Secretary. The request shall describe the nature or purpose of the proposed committee; the reasons why it is needed, including an explanation of why the functions of the proposed committee cannot be performed by Department employees, by an existing committee, or by some other means; and a description of the plan to attain balanced membership on the proposed committee in terms of the points of view to be represented, functions to be performed, and expected participation by women and minorities.

(c) No advisory committee shall meet or take any action until:

(1) In the case of establishment or renewal, in appropriate instances, the OMB Secretariat has been consulted.

(2) A formal charter has been approved by the Secretary;

(3) Public announcement of its establishment or renewal has been made in the FEDERAL REGISTER, at least fifteen days prior to the filing of the committee's charter.

(d) Copies of the charter shall be provided by the Department to the appro-

V 41 164 AUG 23 76 UMI

priate standing committees of the Senate and House of Representatives and to the Library of Congress. In the case of Presidential Committees a copy of the charter shall also be provided to the Office of Management and Budget. The charter shall be in a form prescribed by the Department Committee Management Officer and shall contain the following information:

(1) The committee's official designation;

(2) The committee's objectives and the scope of its activity;

(3) The period of time necessary for the committee to carry out its purpose;

(4) The official to whom the committee reports;

(5) The person responsible for providing the necessary support for the committee;

(6) A description of the duties for which the committee is responsible, and, if such duties are not solely advisory, a specification of the authority for such functions;

(7) The estimated annual operating costs in dollars and man-years for such committee;

(8) The estimated number and frequency of committee meetings;

(9) The committee's termination date, if less than two years from the date of the committee's establishment; and

(10) The date the charter is approved by the Secretary.

(e) With regard to subgroups, if all of its members are members of the parent committee, requisite information may be set forth in the charter of the parent committee. In the event a subgroup includes members who are not all drawn from the parent committee, it shall be separately chartered. In addition, if not incorporated in the charter of the parent committee, subgroups shall be separately chartered.

(f) No advisory committee shall be created if its functions could otherwise be performed effectively within the Department or by an existing committee.

(g) The membership of an advisory committee shall be fairly balanced in terms of the points of view represented and the committee's functions. Appropriate safeguards shall be taken to assure that an advisory committee's advice and recommendations will not be inappropriately influenced by any special interest, but shall instead be the result of the advisory committee's independent judgment.

(h) In the selection of committee members, there shall be no discrimination on the basis of race, color, national origin, religion, age, sex, or handicap.

(i) Each advisory committee shall prepare an annual report describing its membership, functions, recommendations and other actions. A copy of the report shall be submitted to the Department Committee Management Officer who shall make copies of them available to the public, upon request. In addition, a copy of the report shall be filed with the Department's Library and made available to the public. Notice of the availability of the Annual Report shall be published in the FEDERAL REGISTER no later than sixty days after its completion. Such notice shall indicate its availability to the public.

(j) Unless specifically provided otherwise by statute or Presidential directive, advisory committees shall be utilized solely for advisory functions. For purposes of this provision, "Presidential directive" refers to an executive order, executive memorandum or an OMB directive.

(k) Decisions regarding actions or policies relating to matters dealt with by a Department advisory committee shall be made solely by Department officials.

(l) Except for committees created by Congress with a duration in excess of two years, no Department advisory committee shall continue in existence for a period of more than two years from its establishment unless renewed prior to the date of its scheduled termination by action of the Congress, the President, or the Secretary as appropriate. In the case of a committee continued by the Congress or the President beyond its scheduled termination date, a charter shall be approved by the Secretary and the requirements set forth in paragraph (c) of this section complied with before any meeting is held. To renew a committee the Secretary shall determine that such renewal is necessary and inform the OMB Secretariat of his determination and the reasons for it. Renewal determinations shall be made not more than sixty days before the scheduled date of termination. If the OMB Secretariat concurs, the Department Committee Management Officer shall notify the responsible Department officials who shall publish notice of the renewal in the FEDERAL REGISTER. A new charter shall also be approved by the Secretary.

(m) Any advisory committee which is renewed may continue for no more than a two-year period unless prior to the expiration of that period it is renewed for another two-year period in accord with the above provisions.

§ 11.5 Operation of advisory committees.

(a) *Meetings.* The provisions of this section shall apply to meetings of all Department advisory committees and all subgroups.

(1) *Calling of meetings and agenda.* (i) No advisory committee shall hold any meetings except at the call of or with the advance approval of the designated Department official.

(ii) No meeting shall be held in the absence of a quorum. Unless otherwise established in the charter of the committee, a quorum shall consist of a majority of the committee's authorized membership, including ex officio members. In addition, such members shall have full voting rights.

(iii) Each meeting of an advisory committee shall be conducted in accordance with an agenda approved by the designated Department official. Ordinarily, copies of the agenda shall be distributed to the members of the committee prior to the date of the meeting. The agenda shall list the matters to be considered at the meeting and shall indicate whether any part of the meeting is concerned with matters which are within the exemptions of the Freedom of Information Act, 5 U.S.C. 552(b).

(2) *Notice of meeting.* (i) Except when the Director of the Office of Management and Budget determines otherwise for reasons of national security, or except as otherwise provided herein, notice of each advisory committee meeting shall be published in the FEDERAL REGISTER at least fifteen days prior to the meeting. The fact that a meeting is closed to the public pursuant to paragraph 10(d) of Pub. L. 92–463 shall not affect the foregoing requirement.

(a) The notice shall state the name of the advisory committee, the time and place of the meeting, and the purposes of the meeting and shall include a summary of the agenda.

(b) The notice shall state the extent to which the public will be permitted to attend or participate in the meeting. If the meeting will be closed to the public, the notice shall also state the reasons for closing, including appropriate citation to the Freedom of Information Act.

(ii) In addition to notice in the FEDERAL REGISTER, the Executive Secretary of each advisory committee shall maintain a list of persons and organizations who have requested to be notified of all meetings and notify them by mail in advance of any meeting. Other forms of notice, such as press releases and notices in professional journals shall be used to the extent practicable.

(iii) Meetings may be held only in emergency situations unless notice of the meeting has been published in the FEDERAL REGISTER at least fifteen days prior to the meeting. Such meetings shall be kept to a minimum, and whenever feasible, rescheduled for a later date. When a meeting must be called without fifteen days notice being given, the following steps shall be taken, to the extent possible:

(a) Advance notice shall be published in the FEDERAL REGISTER.

(b) Other forms of notice shall be utilized whenever practicable.

(c) In the case of meeting notices published in accordance with paragraphs (a)(2)(iii) and (a) and (b) of this section, the notice shall contain an explanation for the failure to give fifteen days notice.

(3) *Public participation at meetings.* (i) Subject to the exceptions described in paragraph (a)(6) of this section each advisory committee meeting shall be open to the public, and interested persons shall be permitted to attend, appear before, or file statements with any advisory committee.

(ii) The Executive Secretary of each committee shall, with respect to any advisory committee meeting, all or part of which is open to the public, assure compliance with the following rules:

(a) Meetings shall be held at reasonable times and places that are reasonably accessible to members of the public. Whenever feasible, Government facilities shall be used and meetings held in places involving the least expense to the Department.

(b) The size of the meeting room shall be reasonable, considering such factors as the size of the advisory committee, the number of members of the public expected to seek to attend, and the resources and facilities available to the Department.

(c) Any member of the public who wishes to do so shall be permitted to file a written statement with the committee, before or after a meeting.

(d) To the extent that the time available for a meeting permits, interested persons may be permitted to present oral statements. Any person seeking to present an oral statement to a committee may be required to obtain advance approval for such participation from the committee chairman or the committee's Executive Secretary.

(e) Participation by members of the public at committee meetings or questioning of committee members or other participants shall only be permitted with the authorization of the committee chairman.

(4) *Minutes and transcripts of meetings.* (i) Detailed minutes shall be kept of each meeting of each advisory committee, including meetings of formal and informal subgroups. The Executive Secretary of each advisory committee shall keep the minutes or designate some person to keep the minutes. Minutes need not be kept if a verbatim transcript is made.

(ii) The minutes shall include at least the following: The time and place of the meeting; a list of advisory committee members and staff and full-time Federal employees present at the meeting; a detailed summary of matters discussed, including different positions advanced by members and conclusions reached by the committee; copies of all reports received, issued, or approved by the advisory committee; an explanation of the extent to which the meeting was open to the public; and explanation of the extent of public participation, including a list of members of the public who presented oral or written statements; and an estimate of the number of members of the public who attended the meeting.

(iii) Within a reasonable time after the meeting the minutes shall be completed and submitted to the chairman of the advisory committee.

(iv) Within a reasonable time after receipt of the minutes the chairman of the advisory committee shall certify to the accuracy of the minutes and submit them to the Executive Secretary for submission to the official advised by the committee.

(5) *Designated Department employee.* (i) Each advisory committee meeting shall be attended by a Department employee designated by the Department official responsible for the Committee. Ordinarily, the employee so designated shall serve the advisory committee on a continuing basis.

(ii) No advisory committee shall conduct a meeting in the absence of the designated Department employee. If simultaneous subgroup meetings are to be held, each subgroup shall have a designated Department employee in attendance.

(iii) The designated Department employee is authorized to adjourn any advisory committee meeting, whenever he determines adjournment to be in the public interest. Inter alia, the designated Department employee shall adjourn the meeting in the event of unwarranted departure from a meeting's agenda.

(6) *Closing advisory committee meetings.* (i) Subsection 10(d) of the Act provides that the provisions concerning open meetings and public participation shall not apply to any advisory committee which the President, or the head of the department to which the advisory committee reports, determines is concerned with matters listed in 5 U.S.C. 552(b). The Department's regulation implementing that Act is found at 45 CFR Part 5. Department officials shall be guided by the policies set forth in that regulation in making determinations to close meetings. In applying the provisions of 5 U.S.C. 552(b) to advisory committee meetings, liberal interpretations shall be assumed with respect to the openness of such meetings. Any determination to close a meeting (or portion) shall restrict such closing to the shortest reasonable time.

(ii) In applying the Freedom of Information Act exemptions to advisory committee meetings, the following rules shall be followed:

(a) If a meeting (or portion) will have the express purposes of discussing an existing document which is within one of the exemptions set forth in 5 U.S.C. 552(b), the meeting (or portion) may be closed to the public.

(b) Meetings closed solely on the basis that a document exempt from mandatory disclosure under exemption (5) (concerning intra-agency and inter-agency memoranda and letters) is to be discussed, may only be closed if the Secretary determines that it is essential to close such meeting (or portion) to protect the free exchange of internal views of committee members and avoid undue interference with Department or committee operation.

(c) A meeting (or portion) involving solely the internal expression of views and judgments of committee members, and not the discussion of an exempt document may be closed if a finding is made that is essential to close the meeting (or portion) to protect the free exchange of members views and avoid undue interference with Department or committee operations, and such views if reduced to writing would be protected from mandatory disclosure under section 552(b)(5) of Title 5 U.S.C. When feasible, the public shall be given an opportunity to present relevant information and views to the committee. Concurrence for closing such a meeting shall be obtained from the Office of the General Counsel and the Office of Public Affairs.

(d) If a meeting (or portion) will have the express purpose of discussing a matter which is within one of the exemptions set forth in 5 U.S.C. 552(b), other than exemption (5), the meeting (or portion) may be closed to the public even though no specific exempt document is to be discussed.

(e) If the subject of a meeting will be such that paragraphs (a)(6)(ii)(a) through (d) inclusive above do not furnish a basis for closing it, the meeting shall be open to the public.

(f) When a advisory committee seeks to have a meeting (or portion) closed, the Executive Secretary shall make a request in writing for a determination by the Secretary. Such a request shall set forth the reasons why the meeting (or portion) should be closed. Whenever practical, the request shall be submitted at least sixty days before the scheduled date of the meeting.

(g) If the Secretary finds the request to be warranted and in accord with the policy of the Act and the Freedom of Information Act, the request shall be granted. The determination made by the Secretary shall be in writing and contain specific reasons for closing the meeting (or portion). Determinations made by authorized designees must be reviewed and approved by the Office of the General Counsel and the Office of Public Affairs.

(h) If a meeting is to be held for the consideration of several separable matters, not all of which are within the exemptions of 5 U.S.C. 552(b), only the portion of the meeting dealing with exempt matters may be closed.

(i) When part of a meeting is to be closed, the agenda shall be arranged to facilitate attendance by the public at the open portion of the meeting.

(j) When a meeting (or portion) is closed, only members of the committee, its staff, and Federal employees shall be permitted to attend.

(k) When a meeting (or portion) is closed, members of the advisory committee shall not disclose the matters discussed except to other members of the advisory committee, the staff of the advisory committee or Department employees.

(l) The Department Committee Management Officer may review, after the meeting, the appropriateness of any determination to close a meeting (or portion) and require that corrective action be taken with respect to the particular advisory committee or general procedures concerning the closing of meetings.

(m) When a meeting (or portion) is closed, and detailed minutes are not to be made available in their entirety to the public, the advisory committee shall prepare and make available to the public within fourteen days of the close of the meeting a summary of its activities and related matters which are informative to the public consistent with the policy of 5 U.S.C. 552(b). Notice of the availability of such a summary shall be incorporated in the notice of the meeting published in the FEDERAL REGISTER.

(b) *Access to records.* (1) All records, reports, and other documents of each advisory committee shall be available for public inspection and copying pursuant to the Department's public information

V 41 164 AUG 23 76 UM

regulation. Documents referred to herein include the records, reports, transcripts, minutes, appendices, working papers, drafts, studies, agenda or other documents which were made available to or prepared for or by each advisory committee.

(2) Advisory committee records determined to be available for public inspection are to be made available for inspection and copying at a single location in the offices of the advisory committee or the Department organizational component to which the advisory committee reports. The advisory committee or appropriate Department organizational component shall make available to any person copies of transcripts of committee proceedings or meetings at cost determined in accordance with the appropriate fee schedule.

(3) Advisory committee records are maintained and disposed of according to procedures prescribed in the Department's Records Management Manual.

§ 11.6 Administrative remedies.

(a) Any person whose request for access to an advisory committee document is denied may seek administrative review in accord with the Department's Freedom of Information Act regulation.

(b) Any person whose request for access to an advisory committee meeting is denied after publication of the notice of the meeting in the FEDERAL REGISTER may appeal to the appropriate official designated at 45 CFR 5.82. If the decision on appeal is adverse to the request or concurrence of the Assistant Secretary for Public Affairs or his designee, shall be obtained.

§ 11.7 Department committee management officer.

The Secretary shall designate a Department employee to implement this part and consult with the Office of Management and Budget on his behalf.

PART IV:

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Assistant Secretary for Housing
FHA Commissioner

■

REVIEW OF APPLICATIONS FOR HOUSING ASSISTANCE; ALLOCATION OF HOUSING ASSISTANCE FUNDS

V 41 164
AUG 23 76
UM

Title 24—Housing and Urban Development

CHAPTER VIII—LOW INCOME HOUSING, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R-76-388]

PART 891—REVIEW OF APPLICATIONS FOR HOUSING ASSISTANCE; ALLOCATION OF HOUSING ASSISTANCE FUNDS

On May 5, 1976, the Department of Housing and Urban Development (HUD) published, for comment, in the FEDERAL REGISTER at page 18626 a proposed amendment to Chapter VIII of Title 24 of the Code of Federal Regulations by adding a new Part 891, "Review of Applications for Housing Assistance; Allocation of Housing Assistance Funds."

Part 891 sets forth the regulations which apply to the review and approval of applications for housing assistance and to the allocation of housing assistance funds pursuant to Section 213 of the Housing and Community Development Act of 1974 (42 U.S.C. 5301). The provisions of this Part apply to applications for housing assistance under the United States Housing Act of 1937 (42 U.S.C. 1437), Sections 235 and 236 of the National Housing Act (12 U.S.C. 1715z, 1715z-1), Section 101 of the Housing and Urban Development Act of 1965 (12 U.S.C. 1701s), and Section 202 of the Housing Act of 1959 (12 U.S.C. 1701q), these provisions do not apply to applications for assistance with respect to low income housing modernization under the United States Housing Act of 1937 (42 U.S.C. 1437) which will be covered in a notice of proposed rulemaking under 24 CFR, Part 863, nor to operating subsidy assistance (42 U.S.C. 1437g), which are not subject to the requirements of Section 213 of the Housing and Community Development Act of 1974 (42 U.S.C. 1437).

Subpart A identifies the housing assistance programs subject to these regulations and defines the terms used. Subpart B describes the policies and procedures governing reviews and determinations with respect to applications for housing assistance to be located in areas with approved housing assistance plans (HAPs) and Subpart C describes such policies and procedures for areas without HAPs. Subpart D provides the policies and procedures governing the allocation of housing assistance funds. Subpart E contains the policies and procedures governing supplemental allocations of housing assistance funds for use in jurisdictions covered by a HAP and participating in an approved Areawide Housing Opportunity Plan. Subpart E was published separately for final effect on June 23, 1976, but has been incorporated with this publication to provide the necessary convenience and continuity for these regulations.

HUD received over 20 responses to the May 5, 1976, publication. All of these comments have been carefully considered, and certain changes have been made in the regulations as a result of these comments and other pertinent considerations. The following is a discussion of the principal comments and changes.

1. The definitions contained in § 891.102 have been expanded to include those terms applicable to the policies and procedures for supplemental allocations based upon Areawide Housing Opportunity Plans pursuant to Subpart E of this Part 891, and the definitions are now presented in alphabetical order.

2. The definition of the term Chief Executive Officer in § 891.102(e) has been modified to conform with the definition contained in the regulations governing the Community Development Block Grant program (24 CFR, Part 570). The reference in the proposed regulations to the delegation of responsibility for review of applications, by the Chief Executive Officer, has been deleted because Section 213(a) of the Housing and Community Development Act of 1974 (Act) merely requires notification of the Chief Executive Officer who must serve, therefore, as the point of contact on behalf of the local government having the review responsibility.

3. It was suggested that the Field Officer Director notify local governments pursuant to § 891.202 within ten days from "actual" receipt of an application for housing assistance, rather than after HUD's initial screening or preliminary evaluation. The concern was that initial screening could cause delays. Although this comment was seriously considered, it was not accepted. However, the language in § 891.102(1) has been revised to clarify that the purpose of initial screening or preliminary evaluation of an application is to determine its acceptability for processing. Notifications prior to this initial step would result in local governments being asked to comment on applications for housing assistance which were incomplete or were otherwise unacceptable and could not, therefore, be considered for approval by the Field Office Director.

4. Several comments suggested changes in § 891.202(a) to clarify which units of local government should be notified by the Field Office Director. The suggestion that special provisions be incorporated for Section 8 Existing Housing was adopted, and are included in § 891.202(a)(3). A related comment with respect to the Section 8 Existing Housing program suggested that language be included which would exempt a statewide Public Housing Agency (PHA) from having to notify all local governments within the State. While an exemption cannot be provided, the language in this subsection has been changed to provide for notification of those local governments identified as primary areas from which families to be assisted will be drawn. This provision will ensure that those local governments in which housing assistance will be provided in a concentrated manner will be notified.

5. One comment suggested that the Field Office Director notify the Public Housing Agency, in addition to the local government, that an application for the Section 8 Existing Housing Program or an application for the Section 8 Housing Assistance Payments Program-Special Allocations is under consideration. Since Section 213(a) of the Act specifically provides that the local government be notified, and makes no reference to a Public Housing Agency, this comment was not accepted.

6. It was suggested that a provision requiring review of all housing assistance applications by Areawide Planning Organizations be added to this regulation. This comment was not accepted, since provisions with respect to reviews by Areawide Planning Organizations are contained in the regulations for each housing assistance program, as well as in OMB Circular A-95.

7. Minor changes have been made in § 891.202(b) to clarify that the Chief Executive Officer is invited to provide relevant comments on behalf of the local government, and to provide examples of the type of comments which might be provided.

8. Several comments suggested that Field Office Directors encourage recommendations by local governments, as well as written objections. Section 891.204(a) provides for the submission of other comments with respect to an application when there is no objection to the approval of such application. However, since approval of a specific application, by the Field Office Director must be based upon several criteria, such as project feasibility, compliance with Departmental standards, comments by Areawide Planning Organizations pursuant to OMB Circular A-95, in addition to local government comments, the Field Office Director will not be able, in all cases, to accept a local government's positive recommendation that an application be approved.

9. Section 891.204(a)(2) contains the language formerly in § 891.205(c)(2), with respect to a major variation (i.e. where the units in the application exceed the annual goal by more than twenty percent or twenty units, whichever is greater), and the statement to be submitted by the Chief Executive Officer on behalf of the local government in such cases. Several comments recommended changes to provide additional flexibility, since the variations as previously defined in § 891.205(c)(2), were viewed as too restrictive. Accordingly, in order to provide the added flexibility, the content of the statement required, when there is no objection to a major variation, has been modified to include only information with respect to need and availability of public services and facilities in addition to a statement that there is no objection to approval of the application.

10. Several comments suggested changes with respect to the reasons set forth in § 891.204(b), which may serve as a basis for local government objection to approval of an application for housing assistance. One comment requested that the prior reference to housing assistance goals specify that objections may be based on the three-year housing assistance goals. Because local governments may, for valid reasons, intend to limit the total amount of housing assistance to be provided in any one year, this comment was not accepted with respect to the total number of dwelling units or households

to be assisted. However, the language with respect to a minor variation, previously in § 891.205(c)(2), has been changed and now is incorporated in § 891.204(b)(1), which states that a minor variation (i.e. one which exceeds the total number of units in the annual goal by no more than twenty percent or twenty units, whichever is greater), by itself, shall not be a basis for an objection.

In addition, a new § 891.204(b)(5) has been added which provides that an objection to an application for assistance under certain programs not specifically referred to in a HAP may be made on the basis that the application is inconsistent with the housing needs and housing assistance strategy of the locality.

11. Section 891.204(b)(2) now provides that an objection based upon the number of dwelling units or households to be assisted, by household type (elderly and/or handicapped, family, large family), must be based on the three-year housing assistance goal. The three-year time frame with respect to assistance by household type relates to the requirement in the HAP regulations, at § 570.303(c)(3)(iv), that the three-year total housing assistance goals must address the needs of the three household types generally in proportion to housing assistance needs.

12. One comment suggested that, if a local government objects on the ground that the proposed assistance is in different locations from those specified in the HAP, it should be required to demonstrate that the proposed units would be detrimental. In response to this comment § 891.204(b)(4) has been revised to require that local government objections, on the basis that the proposed location is inconsistent with the general locations specified in the applicable HAP, must be accompanied by a statement of the specific reasons why the location is objectionable.

13. One comment suggested that the inclusion in § 891.204(b)(4) of language permitting objections based on any other reasons that the local government deems appropriate without further definition, would defeat the purpose of Section 213 of the Act. Therefore, the language which now appears at § 891.204(b)(6) has been changed to permit objections only on the ground that it is inconsistent with "other limiting factors set forth in the HAP, in addition to information in the HUD-prescribed tables."

14. One comment noted that § 891.205(c) did not provide the Field Office Director any guidelines or review factors to measure an objection. This comment was accepted, and this subsection now makes it clear that the Field Office Director's finding of consistency or inconsistency must be based on the same factors as those applicable to the local government's objection, i.e. the factors set forth in § 891.204(b)(1) through (6).

15. As suggested by comments with respect to § 891.205(c), a follow-up process has been added for the Field Office Director to contact the local government when there is a major variation and no response is received during the thirty day comment period. If no subsequent response is received from the local government, an application which constitutes a major variation may not be approved by the Field Office Director.

16. The three levels of variation set forth in § 891.205(c)(2) of the proposed Regulation have been changed to eliminate the middle level of substantial variation, in response to comments stating that the variations were overly restrictive. A minor variation is now defined to include applications for assistance which exceed the annual goal by no more than twenty percent or twenty units, whichever is greater.

17. The language in § 891.205(c)(4) with respect to applications for Section 8 assistance pursuant to 24 CFR, Part 886, or an application for Section 202 or Section 235 assistance has been changed to clarify that the absence of specific reference to such assistance in the HAP shall not be a basis, "by itself and in the absence of a local government objection," for an independent finding of inconsistency by the Field Office Director.

18. A new § 891.205(c)(5) has been added to clarify that, even though a specific application may be determined consistent, it is not to be approved by the Field Office Director unless the written statement with respect to a major variation is received, if the particular application, taken into consideration with other applications previously approved, would constitute a major variation.

19. It was suggested that § 891.302 should, more appropriately, state that the Field Office Director is to determine the need for housing assistance and the availability of public facilities prior to issuing a Section 8 Invitation for Applications or Notification of Fund Availability. In response to this suggestion § 891.302 was modified to require the Field Office Director to make a determination of need for housing assistance prior to receiving applications. However, since the Field Office Director cannot make a determination of the adequacy of public facilities and services until the proposed location is known, this determination will be made prior to approval of the application for housing assistance.

20. One comment recommended the addition of language which would require that approved areawide housing plans reflecting a coordinated regional housing needs assessment be used as the only basis for determination of housing need and adequate public facilities and services. While the Department encourages the preparation and use of such plans as a basis for providing housing assistance, Section 213(c) of the Act specifically provides for local government comments which are relevant to the Field Office Director's determination. An areawide plan cannot be used as the only basis for the Field Office Director's determination, and this comment, therefore, was rejected.

21. In reference to § 891.303(a), one comment suggested that the notification procedure be the same for areas with HAPs and those without. Because Section 213 affords only local governments having HAPs the opportunity to object on the basis of such HAPs, and affords other communities an opportunity only to provide information or comments on the proposed applications, the notification procedures cannot be the same in both cases.

22. The reference to comments by the Chief Executive Officer in § 891.303(b)(2) and § 891.304(a) have been changed to clarify that such comments are submitted on behalf of the local government.

23. One comment suggested that the modifications to the statistical data elements used in determining housing needs on a program-by-program basis be clarified. Section 891.402(a) has been revised to indicate that the age and income as well as other relevant characteristics of the prospective program participants will be considered in making these modifications.

24. Several comments suggested that the "carry-over" contract authority referred to in Section 891.403(a) should be reallocated to the same Field Office Director without being subject to the national allocation formula. This comment was not accepted because Section 213(d) of the Act specifies that assistance be allocated on the basis of relative housing needs. Accordingly, since the needs factors used in allocating such assistance are adjusted annually to reflect changes in housing needs, the reallocation of "carryover" funds to the same Field Office Director might result in an allocation that is unrelated to need.

25. A suggestion that the Regional Administrator be permitted to retain a reserve of contract authority for unforeseen demands was not accepted. In the interest of flexibility, the reserve will be maintained at the national level or portions may be transferred to the Regional Administrators, as determined by the Secretary. To establish Regional Office reserves in addition to the reserve held by the Secretary, would be duplicative and would reduce the amount of contract authority initially allocated to areas and localities.

26. It was suggested that the Regional Administrator and Field Office Director be required to allocate all contract authority within fifteen working days, rather than the thirty days stated in the proposed regulations, so that more time would be available to sponsors, developers, and Public Housing Agencies. Although it is desirable to minimize the time for making allocations, a fifteen-day limitation may force the Regional Administrator and Field Office Director to compromise their determination of an equitable allocation in order to meet their short deadline and, therefore, this suggestion was not accepted. The Department intends to allocate contract authority as soon as possible with thirty days considered the maximum time allowable for Regional Administrators to suballocate such authority and for the Field Office Directors to determine the amount of contract authority to be allo-

V 41 164 AUG 23 76 UM

cated to specific geographic areas within their jurisdiction.

27. It was suggested that the contract authority, retained by the Secretary for special purposes, that is not used within ninety days prior to the end of the fiscal year be allocated to Regional Administrators in accordance with the formula used in the initial allocation. This suggestion was not accepted on the basis that allocation of the contract authority retained must be left to the discretion of the Secretary or the very purpose of the set-asides for special housing needs would be defeated. It is the Department's intent to allocate unused contract authority as soon as possible. However, these funds will be allocated in increments so that some portion of the reserve is retained to meet unforeseeable demands such as natural disaster housing requirements.

28. One comment suggested that a reserve be established for large metropolitan areas (over 500,000 population) which contain substantial proportions of lower and very low-income households and substandard housing. The comment indicates a misunderstanding of the purpose of the reserve which is to maintain a small amount of contract authority to satisfy special or unforeseen needs that were not reflected in the statistical factors used in making the initial allocation to the Field Office Directors.

29. It was suggested that allocations should be consistent with the policies for promoting Areawide Housing Opportunity Plans through the use of supplemental allocations and with the policies regarding the housing elements for the 701 planning program. The allocation procedures in these regulations are, in fact, consistent with these policies and are based on housing needs identified in HAPs which take into consideration housing needs according to type of family and location.

30. It was suggested that the Field Office Director be required to use available areawide or State housing plans in determining the relative housing needs. The suggestion was not accepted in its entirety but Section 891.404 was modified to provide greater use of areawide or State housing plans in determining relative housing needs.

31. Another comment suggested that the Field Office Director allocate contract authority to metropolitan areas and geographic regions, rather than to individual counties. This comment indicates a misunderstanding of Section 891.404(a). Although the housing assistance needs percentage factors for allocating contract authority is determined from census data on a county-by-county basis, the Field Office Director may subsequently group counties and/or cities to establish regional allocation areas as indicated in Section 891.404(a)(3).

32. Numerous objections were received to the provision that the amount of HFDA set-aside contract authority shall be established by the Field Office Director. Among the objections were (a) the Secretary could better appraise the needs and examine performance of all HFDAs, (b) set-asides established by the Field Office Director might result in inequities and low level of housing production due to differences in local policy, and (c) the procedure is inconsistent with the Department's past policy of making HFDA set-aside determinations at Headquarters level.

Section 891.404(b) has also been revised to indicate that the Field Office Director and the HFDA shall coordinate their respective efforts to assure an equitable distribution among allocation areas and, if an agreement cannot be reached, the Regional Administrator shall resolve any differences.

33. It was suggested that the regulations clearly indicate that priority for future approvals shall be given to those localities that did not receive housing assistance, provided that acceptable applications are received. This suggestion was accepted and Section 891.404(d) has been modified to reflect the recommendation.

A Finding of Inapplicability respecting the National Environmental Policy Act of 1969 has been made in accordance with HUD procedures. A finding that this regulation is not subject to inflation impact statement requirements has also been made in accordance with HUD procedures. A copy of these findings will be available for public inspection during regular business hours in the Office of the Rules Docket Clerk, Room 10245, Department of Housing and Urban Development, 451 Seventh Street, SW, Washington, D.C.

Accordingly, Title 24 is amended as follows: A new Part 891, is added to Chapter VIII to read as set forth hereinafter.

Subpart A—General Provisions

891.101 Applicability and Scope
891.102 Definitions

Subpart B—Applications for Housing Assistance in Areas With Housing Assistance Plans

891.201 General
891.202 Notification of Local Government
891.203 Review and Comment Period
891.204 Local Government Response
891.205 HUD Review of Applications for Housing Assistance
891.206 Notification of HUD Determinations

Subpart C—Applications for Housing Assistance in Areas Without Housing Assistance Plans

891.301 General
891.302 Finding of Need for Housing Assistance
891.303 Notification of Local Government
891.304 Review and Comment Period
891.305 HUD Review of Applications for Housing Assistance

Subpart D—Allocation of Housing Assistance Funds

891.401 General
891.402 Determinations of Lower Income Housing Needs
891.403 Initial Allocation to HUD Offices
891.404 Initial Allocation to Areas and Localities
891.405 Reallocation of Uncommitted Contract Authority

Subpart E—Supplemental Allocations Based Upon Areawide Housing Opportunity Plans

891.501 Applicability and Scope
891.502 General Criteria for Acceptable Plans
891.503 Criteria for Priority Plans
891.504 Contents of Requests for Supplemental Allocations
891.505 Review and Selection of Plans

AUTHORITY: Sec. 7(d), Department of HUD Act (42 U.S.C. 3535(d)) unless otherwise noted.

Subpart A—General Provisions

§ 891.101 Applicability and scope.

(a) The policies and procedures contained herein apply to the allocation of contract authority and the review and approval of applications for housing assistance under the United States Housing Act of 1937 (42 U.S.C. 1437), sections 235 and 236 of the National Housing Act (12 U.S.C. 1715z, 1715z–1), section 101 of the Housing and Urban Development Act of 1965 (12 U.S.C. 1701s), and section 202 of the Housing Act of 1959 (12 U.S.C. 1701q). These provisions do not apply to applications for low income housing modernization or operating subsidy assistance.

(b) This part covers the policies and procedures relating to the role and responsibilities of HUD and local governments, under section 213 of the Housing and Community Development Act of 1974 (42 U.S.C. 5301), in reviewing and making determinations with respect to applications for housing assistance made available under the programs specified in § 891.101(a), determinations of lower-income housing needs, allocation of contract authority for metropolitan and nonmetropolitan areas, retention of a reserve of contract authority funds for special lower-income housing needs or programs, and supplemental allocations based upon areawide housing opportunity plans.

§ 891.102 Definitions.

(a) *Act.* The Housing and Community Development Act of 1974.

(b) *Application for housing assistance.* For the purpose of this part, the following definitions establish the documentation which constitutes an application for housing assistance within the meaning of section 213 of the Act.

(1) *Section 8 new construction and substantial rehabilitation.* A preliminary proposal containing the elements listed in § 880.205 of the regulations governing the section 8 Housing Assistance Payments Program—New Construction (24 CFR, Part 880) or the elements listed in § 881.205 of the regulations governing the section 8 Housing Assistance Payments Program—Substantial Rehabilitation (24 CFR, Part 881).

(2) *Section 8 existing housing.* An application containing the elements listed in § 882.204 of the regulations governing the section 8 Housing Assistance Payments Program—Existing Housing (24 CFR, Part 882) submitted by a Public Housing Agency (PHA), including a State Housing Finance and Development Agency (HFDA). In cases where no PHA has been organized or where the PHA is unable or unwilling to implement the program, and where HUD determines to perform such function itself, its determination to that effect shall be considered an application for the purposes of this part.

(3) *Section 8 housing finance and development agencies—new construction and substantial rehabilitation.* A housing finance and development agency's application for assignment of portion of set-aside to specific project, if a specific site is designated. If the site is not designated, the first new construction or substantial rehabilitation proposal submitted by the HFDA pursuant to the regulations governing the section 8 Housing Assistance Payments Program—State Housing Finance and Development Agencies (24 CFR, Part 883).

(4) *Section 8 housing assistance payments program—special allocations.* (i) An application containing the elements listed in § 886.105 of the regulations governing the section 8 Housing Assistance Payments Program—Additional Assistance Program for Projects with HUD-Insured and HUD-Held Mortgages (24 CFR Part 886, Subpart A).

(ii) A preliminary proposal containing the elements listed in § 886.207 of the regulations governing the section 8 Housing Assistance Payments Program—Additional Assistance Program for the Disposition of HUD-Owned Projects (24 CFR Part 886, Subpart B).

(5) *Low-Income housing (including Indian Housing) by public housing agencies under the Housing Act of 1937 (other than under section 8).* If a specific site is designated, an Application for a Low-Income Housing Program, for the construction or acquisition of housing, submitted by a PHA or Indian Housing Authority; or, if the site is not designated, the preliminary site report submitted by the PHA.

(6) *Section 235 mortgage insurance and assistance payments for homeownership and project rehabilitation.* A request for preliminary reservation of contract authority submitted by a builder or seller.

(7) *Section 236 mortgage insurance and interest reduction payments for rental projects.* The first application for Project Mortgage Insurance, either for Site Appraisal and Market Analysis (SAMA), Conditional Commitment, or Firm Commitment.

(8) *Section 101 rent supplement payments.* The first Application for Project Mortgage Insurance, either for SAMA, Conditional Commitment, or Firm Commitment.

(9) *Section 202 housing for the elderly or handicapped.* A preliminary proposal containing the elements listed in § 885.310 of the regulations governing the Construction Loans for Housing for the Elderly and Handicapped (24 CFR, Part 885).

(c) *Areawide Housing Opportunity Plan (Plan).* A plan, developed by an Areawide Planning Organization, which addresses areawide housing assistance needs and goals and provides for the promotion of a greater choice of housing opportunities for lower income households outside of areas containing an undue concentration of low income households.

(d) *Areawide Planning Organization (APO).* An organization authorized by law or local agreement to undertake planning for a multi-county area (including county-municipality combinations) under section 701 of the Housing Act of 1954 (40 U.S.C. 461) and/or OMB Circular A–95.

(e) *Chief executive officer of a unit of general local government (Chief Executive Officer).* The elected official, or the legally designated official, who has the primary responsibility for the conduct of that unit's governmental affairs. Examples of the "Chief Executive Officer" of a unit of local government may be: The elected mayor of a municipality; the elected county executive of a county; the chairman of a county commission or board in a county that has no elected county executive; the official designated pursuant to law by the governing body of the unit of local government; or the chairman, governor, chief, or president (as the case may be) of an Indian tribe or Alaskan native village.

(f) *Field office director.* The HUD official responsible for the execution of programs and activities assigned to the field office. This term is applicable to (i) Area Office Directors, who are responsible for approving Housing Assistance Plans, as defined in § 891.102(g)(1), and applications for housing assistance; (ii) Insuring Office Directors, who are responsible for approving Housing Assistance Plans, as defined in § 891.102(g)(2), and applications for housing assistance; and (iii) Insuring Office Directors, who are responsible only for approving applications for housing assistance.

(g) *Housing Assistance Plan (HAP).* (1) A HAP meeting the requirements of § 570.303(c) of the Community Development Block Grant (CDBG) regulations (24 CFR, Part 570), which is submitted by a local government as part of the block grant application, and is approved by the Field Office Director.

(2) A HAP, meeting the requirements of § 570.303(c), submitted by a local government not participating in the CDBG Program and approved by the Field Office Director.

(h) *HUD.* The Department of Housing and Urban Development.

(i) *Metropolitan area.* A standard metropolitan statistical area (SMSA) as established by the Office of Management and Budget.

(j) *New communities.* HUD approved New Community developments under Title IV of the Housing and Urban Development Act of 1968 (42 U.S.C. 3901) or Title VII of the Housing and Urban Development Act of 1970 (42 U.S.C. 4501).

(k) *Participating jurisdiction.* A jurisdiction, whether or not it is covered by a HAP (including counties and other local governments), with which an APO has reached agreement on numerical goals for the distribution of lower-income housing assistance as well as the implementation of the Plan.

(l) *Receipt of an application for housing assistance.* An application for housing assistance shall be deemed to have been received after the Field Office Director completes the screening or preliminary evaluation to determine acceptability of the application for processing.

(m) *Regional administrator.* The HUD official responsible for the execution of programs and activities assigned to the Regional Office and field offices within the jurisdiction of the Regional Office.

(n) *Secretary.* The Secretary of the Department of Housing and Urban Development.

(o) *Unit of general local government (Local Government).* Any city, county, town, township, parish, village, or other general purpose political subdivision of a State, Guam, the Virgin Islands, and American Samoa or a general purpose political subdivision thereof; a combination of such political subdivisions recognized by the Secretary; the District of Columbia; the Trust Territory of the Pacific Islands; and Indian Tribes, bands, groups, and nations, including Alaska Indians, Aleuts, and Eskimos of the United States. Such terms also include a State or local public body or agency (as defined in section 711 of the Housing and Urban Development Act of 1970), a community association or other entity, which is approved by the Secretary for the purpose of providing public facilities or services to a new community as part of a program meeting the eligibility standards of section 712 of the Housing and Urban Development Act of 1970 (42 U.S.C. 4501) or Title IV of the Housing and Urban Development Act of 1968 (42 U.S.C. 3901).

Subpart B—Applications for Housing Assistance in Areas With Housing Assistance Plans

§ 891.201 General.

This subpart describes the policies and procedures governing reviews and determinations pursuant to sections 213 (a) and (b) of the Act with respect to applications for housing assistance, under the programs identified in § 891.101(a), to be provided in areas for which a HAP is applicable. This Subpart does not apply to the following applications for housing assistance and the Field Office Director is not required to submit such applications for local government review and comment:

(a) Applications for assistance involving twelve or fewer units in a single project or development.

(b) Applications for assistance with respect to housing in New Communities where the Secretary determines are necessary to meet the housing requirements in such developments.

(c) Applications for assistance with respect to housing financed by loans or loan guarantees from a State or agency thereof (including loans which also have Federal mortgage insurance or co-insurance), unless the local government in which the assistance is to be provided objects in its HAP to the exemption provided in this subparagraph.

V 41 164 AUG 23 76 UM

§ 891.202 Notification of local government.

(a) The Field Office Director shall notify the Chief Executive Officer of the local government having a HAP, no later than ten working days after receipt of an application, that an application for housing assistance to be provided in that jurisdiction has been received and is under consideration.

(1) When the application is for housing assistance in an area which is covered by more than one HAP (e.g., a municipality which has a HAP and is located in a county which also has a HAP covering such municipality), the Field Office Director shall notify each Chief Executive Officer.

(2) When the application is for housing assistance in several non-overlapping different political jurisdictions (e.g., a scattered site project), the Field Office Director shall notify the Chief Executive Officer of each local government having a HAP.

(3) For section 8 Existing Housing applications pursuant to 24 CFR, Part 882, the Field Office Director shall notify the Chief Executive Officers of the localities identified in the Application for Existing Housing as primary areas from which families to be assisted will be drawn.

(b) The notification to the Chief Executive Officer shall:

(1) Advise him that the Field Office Director has received and is considering an application for housing assistance, identify the housing program (e.g., section 8, section 235), the type of housing (e.g., new construction, substantial rehabilitation, or existing housing), the number of units by bedroom size, the number of units by household type (elderly and/or handicapped, family, large family), and the proposed location.

(2) Advise him that the local government, for a period of thirty calendar days, has the opportunity to object to the approval of the application on the ground that it is inconsistent with the applicable HAP.

(3) Invite him to submit any other comments on behalf of the local government which are relevant to a determination by the Field Office Director concering approval of the proposed housing assistance (e.g., site-related comments; whether the project is approvable under local codes and zoning ordinances).

§ 891.203 Review and comment period.

(a) The Chief Executive Officer shall have a thirty-day comment period, beginning on the date of the notification letter described in § 891.202, to submit, on behalf of the local government, a written objection to the Field Office Director's approval on the ground that the application is inconsistent with its HAP, and the reasons therefor. The Field Office Director shall consider the comment period closed when such written objection or other comments are received. In no case shall the Field Office Director be obligated to consider subsequent objections unless the initial response indicated that additional comments would be provided prior to the expiration of the thirty-day comment period.

(b) The Chief Executive Officer, on behalf of the local government, may submit comments to the Field Office Director simultaneously with the application for housing assistance. In such cases the Field Office Director shall consider that the provisions of § 891.202 have been met.

(c) Any amendment to a HAP shall not be applicable to section 202 or section 8 proposals submitted in response to a previously issued invitation for preliminary proposals or notification of fund availability unless the local government makes a determination that, because of special circumstances, the public interest requires that the amendment be applicable to such proposals. These special circumstances shall be specified in the local government determination and such determination shall be approved by the Field Office Director.

§ 891.204 Local government response.

(a) *No objection.* If the local government determines that it does not want to object to the application on the ground that the application is inconsistent with the applicable HAP, the Field Office Director may be notified of this determination at any time within the thirty-day comment period.

(1) In addition, the Chief Executive Officer may submit, on behalf of the local government, in writing and within the thirty-day period, other comments with respect to the application which are relevant to a determination by the Field Office Director concerning the proposed housing assistance.

(2) When the application for housing assistance exceeds the total number of units in the annual goal by more than twenty percent or twenty units, whichever is greater, such application represents a major variation from the statement of the annual goal, as defined further in § 891.205(c)(2). If there is no objection to such application, the Chief Executive Officer shall provide a written statement, on behalf of the local government, that (i) there is a need for the assistance proposed, (ii) there are or will be available in the area sufficient public facilities and services to serve the excess units (except with respect to an application for Section 8 Existing Housing pursuant to 24 CFR, Part 882), and (iii) there is no objection to the approval of such application for housing assistance.

(b) *Objection.* The Chief Executive Officer, on behalf of the local government, may submit within the thirty-day comment period, a written objection to the approval of an application for housing assistance on the ground that the application is inconsistent with the applicable HAP, and the reasons therefor. Objections by the local government may be based on the following:

(1) The number of dwelling units or households to be assisted under a specific housing program is inconsistent with the information in the applicable HAP with respect to the housing assistance needs and housing assistance goals. A minor variation, defined as an application which exceeds the total number of units in the annual goal by no more than twenty percent or twenty units, whichever is greater, by itself, shall not be a basis for an objection.

(2) The number of dwelling units or households to be assisted, by household type (elderly and/or handicapped, family, large family), is inconsistent with the information in the applicable HAP with respect to the three-year housing assistance goals.

(3) The type of housing proposed (new construction, substantial rehabilitation, or existing housing) is not included in the types of housing assistance identified in the annual housing assistance goals.

(4) The proposed location of newly constructed or substantially rehabilitated units is inconsistent with the general locations specified in the applicable HAP, and is objectionable to the local government for reasons which are specified.

(5) The application is for section 8 assistance pursuant to 24 CFR Part 886, for section 202 or section 235 assistance or for assistance for low income housing by PHAs other than under section 8, there is not a specific reference to such assistance in the housing assistance goals of the applicable HAP, and the application is inconsistent with the housing needs and housing assistance strategy which are the basis of the HAP of the locality.

(6) The proposed housing assistance is inconsistent with other limiting factors set forth in the HAP, in addition to information in the HUD-prescribed tables.

(c) *No response.* The local government may choose not to comment with respect to an application for housing assistance. In such instances, if no response is received within the thirty-day comment period, the Field Office Director shall make an independent determination as to whether the application is inconsistent with the applicable HAP.

§ 891.205 HUD review of applications for housing assistance.

(a) *Review period.* The Field Office Director shall review each application for housing assistance to determine if it is consistent or inconsistent with the applicable HAP for the area in which the proposed housing is to be located. The Field Office Director's determination shall be completed within thirty calendar days after the close of the comment period specified in § 891.203(a) or within thirty calendar days after the receipt of the comments of the local government, whichever is earlier.

(b) *Review process.* The Field Office Director's finding of consistency or inconsistency shall be based on the information provided in the HAP, the application for housing assistance, and an analysis of the comments of the local government.

(1) *HUD review when response indicates no objection.* The Field Office Director may approve the application unless he makes an independent determination that it is inconsistent with the applicable HAP. The Field Office Director shall give consideration to other comments provided by the local government, if any, which are relevant to a determination concerning approval of the application for housing assistance.

(2) *HUD review when objection is received.* The Field Office Director shall concur in an objection by the local government unless he makes an independent determination of consistency, based on substantial evidence, that the application is consistent with the applicable HAP.

(3) *HUD review when no response is received.* The Field Office Director may approve the application unless he makes an independent determination that it is inconsistent with the applicable HAP.

(c) *Review factors.* The Field Office Director's determination shall be based on the following factors:

(1) The factors set forth in § 891.204(b)(1) through (6).

(2) In the case of an application which exceeds the total number of units in the annual goal by more than twenty percent or twenty units, whichever is greater, such an application represents a major variation from the annual goal in the HAP. The Field Office Director shall not approve the application unless the local government provides a written statement that (i) there is a need for the assistance proposed, (ii) there are or will be available in the area sufficient public facilities and services to serve the excess units (except with respect to an application for Section 8 Existing Housing pursuant to 24 CFR, Part 882), and (iii) there is no objection to the approval of such application for housing assistance. Accordingly, if no response has been received during the thirty-day comment period and the Field Office Director has determined that the application is otherwise approvable, he shall inform the Chief Executive Officer of this determination and will also advise him that, unless the above-cited written statement is received within ten days, the application will not be approved.

(3) A minor variation, defined as an application which exceeds the total number of units in the annual goal by no more than twenty percent or twenty units, whichever is greater, shall not be a basis for an independent finding of inconsistency by the Field Office Director.

(4) With respect to an application for section 8 assistance pursuant to 24 CFR, Part 886, an application for section 202 or section 235 assistance, an application for assistance for low income housing by PHAs other than under Section 8, the absence of specific reference to such assistance in housing assistance goals shall not be a basis, by itself and in the absence of a local objection, for a finding of inconsistency by the Field Office Director.

(5) Although a specific application may be determined consistent on the basis of the review factors set forth in § 891.204(b)(1) through (5), the Field Office Director shall not approve the application if such application, taken into consideration with other applications previously approved, exceeds the total number of units in the annual goal by more than twenty percent or twenty units, whichever is greater, unless the local government has submitted the written statement required by § 891.205(c)(2).

§ 891.206 Notification of HUD determinations.

The Field Office Director shall notify the Chief Executive Officer and the applicant, in writing, of the finding made with respect to the consistency or inconsistency of the application with the HAP. This notification shall be made within thirty calendar days after the close of the comment period indicating the reasons for the determination and, as appropriate, state that the Field Office Director will, or will not, continue to process the application for housing assistance.

Subpart C—Applications for Housing Assistance in Areas Without Housing Assistance Plans

§ 891.301 General.

This subpart describes the policies and procedures governing reviews and determinations, pursuant to Section 213(c) of the Act, with respect to applications for housing assistance, under the programs identified in § 891.101(a), to be provided in areas for which a HAP is not applicable.

§ 891.302 Finding of need for housing assistance.

With respect to each application for housing assistance to be provided in an area which does not have a HAP, the Field Office Director is required to make a determination as to whether there is a need for such housing and whether there is or will be available in the area public facilities and services adequate to serve the proposed housing.

(a) The determination of need for housing assistance within a geographic area is made prior to receipt of an application as part of the allocation process pursuant to § 891.404. In making such a determination, the Field Office Director shall give consideration to the contents of any applicable state or areawide housing plans proposing housing assistance in the area as well as generally available data with respect to population, poverty, housing overcrowding, housing vacancies, amount of substandard housing, other objectively measurable tions pertaining to lower income housing needs.

(b) The determination of the adequacy of public facilities and services shall be made as part of the application review process and after considering any comments received from the local government.

(c) The Field Office Director shall afford the local government in which the proposed assistance is to be provided the opportunity, during a thirty-day period, to provide comments relevant to the required determinations by the Field Office Director with respect to the need for housing assistance and the adequacy of public facilities and services.

§ 891.303 Notification of local government.

(a) The Field Office Director shall notify the Chief Executive Officer no later than ten working days after receipt of an application, that an application for housing assistance to be provided in that jurisdiction has been received and is under consideration.

(1) When the application is for housing assistance within the overlapping jurisdictions of more than one local government (e.g., a municipality which is also within a county), the Field Office Director shall notify the Chief Executive Officer of the local government having the smallest geographic area of coverage.

(2) When the application is for housing assistance in several non-overlapping different political jurisdictions (e.g., a scattered site project), the Field Office Director shall notify the Chief Executive Officer of each local government, having the smallest geographic area of coverage, where housing assistance is proposed.

(3) For section 8 Existing Housing applications pursuant to 24 CFR, Part 882, the Field Office Director shall notify the Chief Executive Officers of the localities identified in the Application for Existing Housing as primary areas from which families to be assisted will be drawn.

(b) The notification to the Chief Executive Officer shall:

(1) Advise him that the Field Office Director has received and is considering an application for housing assistance, identify the housing program (e.g., section 8, section 235), the type of housing (e.g., new construction, substantial rehabilitation, or existing housing), the number of units by bedroom size, the number of units by household type (elderly and/or handicapped, family, large family), and the proposed location.

(2) Invite him, on behalf of the local government to provide comments with respect to the application within a period of thirty calendar days, which are relevant to a determination by the Field Office Director concerning the proposed housing assistance.

§ 891.304 Review and comment period.

(a) The Chief Executive Officer shall have a thirty-day comment period, beginning on the date of the notification letter described in § 891.303, to submit, on behalf of the local government, written comments relevant to a determination by the Field Office Director concerning the proposed application for housing assistance. The Field Office Director shall consider the comment period closed when such written comments are received. In no case shall the Field Office Director be obligated to consider subsequent comments unless the initial response indicated that additional comments would be provided prior to the expiration of the thirty-day comment period.

(b) The Chief Executive Officer, on behalf of the local government, may submit comments to the Field Office Director simultaneously with the application

V 41 164 AUG 23 76 UMI

for housing assistance. In such cases the Field Office Director shall consider that the provisions of § 891.303 have been met.

§ 891.305 HUD review of applications for housing assistance.

(a) The Field Office Director shall not approve an application for housing assistance prior to either (1) receipt of comments, or (2) expiration of the thirty-day comment period, whichever occurs earlier.

(b) In determining whether an application will be approved, the Field Office Director shall consider the comments provided by the local government.

(c) The Field Office Director shall promptly notify the Chief Executive Officer and the applicant of his determination with respect to the approval or disapproval of the application for housing assistance.

Subpart D—Allocation of Housing Assistance Funds

§ 891.401 General.

This Subpart describes the policies and procedures governing the allocation of contract authority, pursuant to section 213(d) of the Act, for housing assistance under the programs identified in § 891.101(a). It describes, in sequence, the actions to be taken by the Secretary in allocating contract authority to regional administrators, the actions to be taken by regional administrators in suballocating contract authority to Field Office Directors, and the actions to be taken by Field Office Directors in allocating contract authority to geographic areas within their jurisdictions.

§ 891.402 Determinations of lower income housing needs.

(a) Prior to allocating contract authority for the housing assistance programs identified in § 891.101(a), the Secretary shall determine on a program-by-program basis, the relative need for lower income housing assistance in each HUD field office jurisdiction. The determination of housing needs shall be based, so far as practicable, on the most recent U.S. Census data available relating to population, poverty, housing overcrowding, or other objectively measurable conditions pertaining to lower income housing needs. The actual statistical data elements used in determining housing needs for a specific housing program may be modified to meet the objectives of that program by taking into consideration the ages, incomes, or other relevant characteristics of the prospective program participants.

(b) On the basis of the factors specified in § 891.402(a), the Secretary shall develop a separate housing needs percentage, for each field office jurisdiction, on a program-by-program basis. This housing needs percentage shall be adjusted to reflect the relative cost of providing housing among field office jurisdictions so that the amount of contract authority allocated conforms to the number of housing units available for each field office jurisdiction.

§ 891.403 Initial allocation to HUD offices.

(a) The Secretary shall determine the amount of contract authority to be allocated by considering as available any uncommitted "carry-over" contract authority from the prior fiscal year as well as any newly authorized contract authority for each program. The Secretary shall consider contract authority to be "committed" for the purpose of this paragraph when the Field Office Director has signed the notification letter approving the application defined in § 891.102 (b), or in the case of the Low-Income Housing Program, when the Field Office Director has signed the Annual Contributions Contract List.

(b) A portion of the contract authority available during any fiscal year for the housing programs listed in § 891.101(a) may be retained by the Secretary for subsequent allocations to specific areas and communities. This contract authority, not to exceed twenty percent, may be used for:

(1) Housing needs which were unforeseeable, or for other reasons that could not practicably be measured by the formula described in § 891.402, such as natural disaster housing requirements or unanticipated relocation needs.

(2) Activities designed to meet lower-income housing needs as described in HAPs submitted by local governments or combinations of such local governmental units, including but not limited to, activities carried out under areawide plans pursuant to Subpart E.

(3) Applications for assistance with respect to housing in New Communities.

(c) Contract authority, except that set-aside pursuant to § 891.403(b), shall be allocated, so far as practicable, on a program-by-program basis to each Regional Administrator in accordance with § 891.402. Of these amounts, at least twenty percent, but not more than twenty-five percent, shall be allocated on a nationwide basis for use in nonmetropolitan areas. However, each Regional Administrator's allocation will be based upon the proportion of nonmetropolitan housing need within his jurisdiction, which need not be in the same proportion as the nationwide ratio.

(d) The Regional Administrator shall suballocate all the contract authority to each Field Office Director within thirty days from receipt of such allocations from the Secretary.

In making these suballocations, the Regional Administrator shall consider the demand for housing assistance as reflected in HAPs, the characteristics of particular housing programs, and, as far as practicable, relevant housing needs data based on the factors specified in § 891.402.

§ 891.404 Initial allocation to areas and localities.

(a) In determining the amount of contract authority to be allocated to geographic areas within their jurisdiction, Field Office Directors shall use the following procedures as far as practicable:

(1) Determine the relative housing assistance needs on a county-by-county basis based on the most recent U.S. Census data available and relevant HAPs. In making this determination, consideration shall also be given to areawide or State housing plans that reflect a coordinated regional housing assessment of local housing needs.

(2) Develop for each county, on a program-by-program basis, a separate housing assistance needs percentage factor. The factor developed for each county in a SMSA should represent that county's proportion of the total needs within all metropolitan counties in the field office's jurisdiction; similarly, the factor developed for each county not in a SMSA should represent the county's proportion of the total needs within all nonmetropolitan counties. In the case of a county in a SMSA, the factor shall be applied to the total contract authority allocated for metropolitan areas. In the case of a county not in a SMSA, the factor shall be applied to the total contract authority allocated for nonmetropolitan areas.

(NOTE.—In the New England States, SMSA boundaries are drawn along town and city lines instead of counties.) In both cases, the resulting contract authority shall be converted to estimates of the number of units which can be assisted.

(3) Establish regional or other allocation areas, such as SMSAs or groups of rural counties, broad enough to support economically feasible housing programs. In establishing such allocation areas, consideration should be given to state, county and other planning district boundaries, topographical barriers, or established commuting patterns. In addition, consideration should be given to housing plans developed by an HFDA or APO.

(b) The Secretary may direct that contract authority be set aside for use by an HFDA, or authorize Regional Administrators or Field Office Directors to do so. In any case in which there is such a set aside, the Field Office Director and the HFDA shall coordinate their respective efforts to assure an equitable distribution among allocation areas. Accordingly, the Field Office Director shall schedule a meeting with the HFDA for the purpose of reaching an agreement on an allocation plan for the HFDA which complements the allocation program of the field office. If agreement cannot be reached at this meeting, the Field Office Director shall notify the Regional Administrator, who shall resolve the differences. Appropriate adjustments in the allocation plan developed by the Field Office Director pursuant to § 891.404(a) may be made if the needs of an allocation area will be met by the HFDA.

(c) Field Office Directors shall complete the actions set forth in subsections (a) and (b) above within thirty days from receipt of their suballocations from the Regional Administrator.

(d) In developing its HAP goals, each local government may consider as being available to it the entire amount allocated for the allocation area in which it is located. It should be understood that this is not a commitment to provide such amounts to the locality, since Field Office Directors may approve the best applications for housing assistance within the allocation area. However, priority for future approvals shall be given to acceptable applications for assistance in localities which did not previously receive housing assistance.

§ 891.405 Reallocation of uncommitted contract authority.

(a) If the Field Office Director determines that the contract authority for a particular allocation area is not likely to be utilized during the fiscal year, he may reallocate some or all of the contract authority to another area where it is likely to be utilized.

(b) If the Regional Administrator determines that the contract authority suballocated to a Field Office Director, or allocated for a particular allocation area, is not likely to be utilized during the fiscal year, the Regional Administrator may reallocate some or all of the contract authority to another Field Office Director or allocation area where it is likely to be utilized.

(c) Any reallocations must satisfy the requirements of § 891.403(c) with respect to nonmetropolitan allocations and the program-by-program allocations of contract authority, but should take into account the demands for housing assistance contained in the goals of approved HAPs and any additional HUD requirements.

(d) Only the Secretary may reallocate contract authority among Regional Administrators.

Subpart E—Supplemental Allocations Based Upon Areawide Housing Opportunity Plans

§ 891.501 Applicability and scope.

(a) This Subpart describes the policies and procedures governing supplemental allocations of contract authority for the housing assistance programs identified in § 891.101(a) for use in jurisdictions covered by a HAP and participating in an approved Plan. The Plan, developed by an APO, shall provide for the promotion of a greater choice of housing opportunities for lower income households outside of areas containing undue concentration of low income households. The role of the APO under the provisions of this Subpart includes, but need not be limited to, (i) development of the Plan and the allocation procedure as described in § 891.502, and (ii) submission of requests to the Secretary for supplemental allocations in accordance with Sec. 891.504. The participation of the APO will provide a determination of the housing assistance needs on an areawide basis as well as the development of numerical goals for housing assistance in participating jurisdictions.

(b) The Secretary, after considering all the pertinent factors under section 213(d) of the Act, will determine the amount of contract authority to be used as the housing assistance program(s) available in any fiscal year for which such allocations will be made.

(c) The amount of the supplemental allocation provided on the basis of any approved Plan shall not be less than twenty percent nor more than fifty percent of the contract authority for the applicable housing assistance program otherwise made during the same fiscal year to Participating Jurisdictions in accordance with Subpart D.

(d) The Secretary shall announce, through a Notice in the FEDERAL REGISTER, the amount of contract authority to be made available for supplemental allocations during any fiscal year; the housing assistance program(s) under which these allocations shall be made; any additional or special criteria which may be established for specific housing assistance programs; and the closing date and address for submission of requests for the supplemental allocations.

(e) In order to be approved as a basis for a supplemental allocation under this subpart, a Plan must meet the criteria for acceptability set forth in § 891.502. If, however, the number of Plans meeting the acceptability criteria would require supplemental allocations in excess of the amount made available by the Secretary, priority shall be given to those Plans which also meet the criteria set forth in § 891.503.

§ 891.502 General criteria for acceptable plans.

(a) In addition to any special criteria in the Notice published pursuant to § 891.501(d), a Plan, to be acceptable, shall be a system for allocating contract authority which provides for greater housing opportunities for lower income households outside areas of undue concentrations of low income households. The Plan shall contain, but need not be limited to, the following elements:

(1) An assessment of the housing assistance needs of lower income households on an areawide basis and for each jurisdiction within the area served by the APO (whether or not it is a Participating Jurisdiction), including households displaced or to be displaced by governmental action and an estimate of households expected to reside in each jurisdiction as a result of existing or planned employment facilities pursuant to § 570.303(c)(2) of the CDBG regulations. This assessment shall indicate housing assistance needs by (i) household type (elderly and/or handicapped, family, large family), (ii) present form of housing tenure (owner and renter), (iii) female heads-of-households and (iv) minority households. If the Plan does not include such assessment for households expected to reside or for any of the elements specified under (i), (ii), (iii), or (iv) of this subparagraph, it shall include a work plan acceptable to the Secretary for the preparation of that portion of the assessment, with a specific timetable for its completion.

(2) Numerical goals, on an annual basis, for the distribution of lower income housing assistance to each Participating Jurisdiction which reflect the needs identified in § 891.502(a)(1). These numerical goals and the needs identified in any HAPs applicable to Participating Jurisdictions must be generally consistent.

(3) Evidence of agreement between the APO and each Participating Jurisdiction on numerical goals for the distribution of lower income housing assistance and on the implementation of the Plan. This agreement shall be evidenced by (i) individual written agreements or other confirmation from the Chief Executive Officer or local government of the Participating Jurisdiction, (ii) support of the Plan in the HAPs of Participating Jurisdictions covered by HAPs; or (iii) an equivalent provision acceptable to the Secretary.

(4) A procedure for allocating contract authority in a reasonable manner which is in accordance with the objectives of the Plan and this Subpart.

(5) Provision for the Plan to be used in A-95 review of applications for community development and housing assistance programs.

(b) The Plan shall also meet the following conditions:

(1) The Plan shall apply to and include as Participating Jurisdictions at least fifty percent of the jurisdictions in the area served by the APO, wherein Participating Jurisdictions represent at least seventy five percent of the population of the area.

(2) The Plan shall have been approved by the executive board of the APO.

(3) The APO shall demonstrate that the Plan can be implemented and that an additional allocation of contract authority can be committed within a reasonable time within the Participating Jurisdictions consistent with the Plan. Satisfactory assurances of implementation include, but are not limited to, (i) the availability of sites which meet all applicable program standards and criteria (including adequate zoning and water and sewer capacity) in those Participating Jurisdictions in which the Plan proposes the use of newly-constructed or rehabilitated housing under the programs specified in Sec. 891.101(a), and developer/sponsor-owner interest (e.g. as evidenced by responses to recent invitations for housing applications under these programs); (ii) the willingness and ability of established PHAs to administer or otherwise participate in the program in those Participating Jurisdictions in which the Plan proposes the use of a program specified in Sec. 891.101(a) which requires the participation of a PHA, or actions taken by such Participating Jurisdictions to establish PHAs or to negotiate agreements with existing PHAs to perform this function; and (iii) contract authority currently allocated to Participating Jurisdictions has been committed or satisfactory progress has been made in committing such contract authority.

(4) The data used in making the assessment of housing assistance needs in § 891.502(a)(1) is available for use by Participating Jurisdictions in preparing their HAPs.

V 41 164 AUG 23 76 UM

§ 891.503 Criteria for priority plans.

(a) In order for an Acceptable Plan to qualify for priority consideration, it must meet one or more of the following criteria:

(1) The APO has completed all elements of the assessment required in § 891.502(a)(1).

(2) The APO presently administers or takes part in a program which provides housing information and referrals or related counseling and assistance to lower income and minority households desiring housing assistance outside areas which contain undue concentrations of low income or minority households.

(3) To the extent that the Section 8 Existing Housing Program is used by Participating Jurisdictions, eligible families currently are permitted to use their Section 8 certificates of family participation in all participating jurisdictions (e.g., through use of an areawide, regional, or state public housing agency, or through cooperation or other local agreements).

(4) The APO has endorsed and/or has become involved in the development of a voluntary areawide affirmative fair housing marketing plan which is currently operative.

(b) If the number of Plans meeting the priority criteria will require supplemental allocations in excess of the amount available, preference shall be given to those Plans which apply to and include as Participating Jurisdictions the greatest percent of the jurisdictions in the area served by the APO.

§ 891.504 Contents of Requests for Supplemental Allocations.

Each request for supplemental allocation shall consist of (a) a letter of transmittal; (b) an index of all materials submitted with the request, including graphs, maps, or other illustrative material; (c) a list of all jurisdictions within the area served by the APO, identification of Participating Jurisdictions and identification of Participating Jurisdictions covered by HAPs; (d) a copy of the Plan; (e) a statement with specific references to the Plan, where appropriate, which responds to each of the acceptability criteria contained in § 891.502 and the priority criteria contained in § 891.503, and discusses how the Plan conforms to these criteria; (f) a discussion of the methodology used in assessing areawide housing assistance needs under Sec. 891.502(a)(1); (g) a description of the housing allocation procedure required under § 891.502(a)(4) and the extent to which this procedure promotes greater housing opportunities for lower income households outside areas containing undue concentration of low income households; and (h) a tentative plan, showing type of households to be assisted and type of housing proposed for the Participating Jurisdiction covered by a HAP, for using supplemental allocations of twenty, thirty, forty and fifty percent of the contract authority for the applicable program(s) otherwise allocated to Participating Jurisdictions for the current fiscal year in accordance with subpart D.

§ 891.505 Review and selection of plans.

(a) The Secretary shall review all Plans submitted to identify (1) Acceptable Plans under § 891.502 and (2) Priority Plans under § 891.503. Field Office Directors and Regional Administrators shall be consulted in this evaluation.

(b) On the basis of the evaluation conducted in accordance with paragraph (a) of this section, and in accordance with § 891.501, the Secretary shall select, from among all acceptable plans, those plans on the basis of which supplemental allocations shall be awarded.

(c) The amount of the supplemental allocation for each of the selected plans shall be determined by the Secretary after considering the following factors:

(1) The overall quality of the plan with respect to each of the criteria in §§ 891.502 and 891.503.

(2) The type of households (elderly and/or handicapped, family, large family) and type of housing (new construction, substantial rehabilitation, or existing housing) proposed to be assisted with the supplemental allocation.

(3) The amount of housing assistance available for supplemental allocations and the number of Plans selected.

(4) The amount of housing assistance currently allocated to Participating Jurisdictions that is committed.

(d) After the total amount of the supplemental allocations for all the selected Plans is determined, the allocation will be distributed to the appropriate Field Office Directors for reallocation among Participating Jurisdictions covered by a HAP. The Field Office Directors will consult with APOs to determine the actual distribution and program mix of units on the basis of the Plan and other applicable administrative or statutory requirements.

(It is hereby certified that the economic and inflationary impacts of this regulation have been carefully evaluated in accordance with OMB Circular A-107.)

Effective date: This regulation shall be effective October 1, 1976.

Issued at Washington, D.C., August 15, 1976.

JAMES YOUNG,
Assistant Secretary for Housing—Federal Housing Commissioner.

[FR Doc.76-24582 Filed 8-20-76;8:45 am]

MONDAY, AUGUST 23, 1976

PART V:

DEPARTMENT OF COMMERCE

Economic Development Administration

LOCAL PUBLIC WORKS CAPITAL DEVELOPMENT AND INVESTMENT PROGRAM

Final Rulemaking

VOL 41 NO 164 AUG 23 76 UM

Title 13—Business Credit and Assistance

CHAPTER III—ECONOMIC DEVELOPMENT ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 316—LOCAL PUBLIC WORKS CAPITAL DEVELOPMENT AND INVESTMENT PROGRAM

The Economic Development Administration, pursuant to Title I of the Public Works Employment Act of 1976, hereby publishes these regulations to amend Title 13 of the Code of Federal Regulations by adding a new Part 316. These regulations describe procedures by which eligible applicants may receive financial assistance for the construction (including demolition and other site preparation activities), renovation, repair, or other improvement of local public works projects and for the completion of plans, specifications, and estimates for local public works projects.

STATEMENT OF OBJECTIVES

LEGISLATIVE OBJECTIVES

On the basis of an in-depth study of the Local Public Works Capitol Development and Investment Act of 1976 and its legislative history, it has been determined that the purpose of this legislation is to provide:

a. Employment opportunities in areas of high unemployment through the expeditious construction or renovation of useful public facilities; and

b. A countercyclical stimulus to the national economy.

EDA PROGRAM OBJECTIVES

Analyses of past public works programs and the Economic Development Administration's (EDA) experience in operating such programs have revealed certain characteristics about the extent and nature of employment generated by public works construction. Of these, the most relevant to the objectives of the Local Public Works Capital Development and Investment Act are the preponderance of skilled construction jobs and the relatively high cost of creating a job through such an approach. Between 68 and 81 percent of the costs of a public works project are for materials, equipment, overhead, and contractor profits, leaving between 19 and 32 percent for on-site wages. Consequently, even the most labor intensive public works projects generate a limited amount of direct employment per dollar of project cost. Public works projects do, however, result in useful end products and are commonly believed to provide general economic stimulation, particularly to the construction and construction-related industries.

In recognition of these characteristics of public works construction projects, as well as other considerations deriving from the legislation and EDA's experience, the following objectives for implementing the Local Public Works Act have been established:

a. To insure that consideration is given to the relative needs of the various sections of the country;

b. Within those sections, to fund projects that maximize immediate employment opportunities and, wherever possible, that maximize employment opportunities for unemployed residents of the project area;

c. To fund locally oriented projects that provide useful public facilities in areas of high unemployment and low income;

d. To fund projects that advance local plans and contribute to long-term development;

e. To fund facilities that could not have been constructed in the absence of the Local Public Works grant (i.e., facilities for which Federal funds are not merely replacing or reducing local, State or other Federal monies that have been specifically provided or set aside); and

f. To carry out a comprehensive evaluation of both the direct employment impact and the indirect or stimulative impact of the projects funded.

Because these regulations pertain to a grant program administered by the Economic Development Administration, the relevant provisions of the Administrative Procedure Act (5 U.S.C. 553) requiring notice of proposed rulemaking, opportunity for public participation and delay in effective date are inapplicable. In addition, Section 107 of the Public Works Employment Act of 1976 requires implementing regulations to be prescribed within thirty days after date of enactment.

However, in accordance with the spirit of the public policy set forth in 5 U.S.C. 553, interested persons may submit written comments or suggestions to the Assistant Secretary for Economic Development, U.S. Department of Commerce, Room 7800B, Washington, D.C. 20230 by September 24, 1976. This is a new and widespread program, and all suggestions received will be carefully considered. If a sufficient number of valid comments raising significant issues are received, these regulations may be amended and republished. Until such time as further changes are made, however, 13 CFR Part 316 shall remain in effect, thus permitting the public business to proceed more expeditiously.

The application form, necessary to carry out the Public Works Employment Act of 1976, as provided in Section 107 therein, has been prescribed and submitted to the Office of Management and Budget for clearance as required by OMB Circular No. A-40, as revised on February 10, 1976. When clearance has been received, EDA will publish the application form, which will then be available through EDA and its Regional Offices.

Interested persons should take notice that it is the policy of the Economic Development Administration that no applications for financial assistance pursuant to Title I of the Public Works Employment Act of 1976 will be accepted until the funds to implement the program have actually been appropriated and apportioned to and made available for use by the agency.

Consideration has been given as to whether matters set forth in these regulations constitute a major proposal with an inflationary impact within the meaning of OMB Circular A-107 and interpretative guidelines as issued by the Department of Commerce. A determination has been made that these regulations do not extend or go beyond the statute, and therefore, there is no inflationary impact of these regulations beyond the statute.

Accordingly, the regulations shall read as follows:

Sec.
316.1 Purpose.
316.2 Definitions.
316.3 Applicants.
316.4 Direct grants.
316.5 Supplemental grants.
316.6 Limitations on grants.
316.7 Priority of projects.
316.8 Allocation of program resource levels to regional offices.
316.9 Determination of unemployment rates.
316.10 General considerations and requirements for financial assistance.
316.11 Compliance with other Federal requirements.
316.12 Acceptance of applications.
316.13 Environmental considerations.
316.14 Final determination.
316.15 Termination.

AUTHORITY: Title I, Pub. L. 94-369 (July 22, 1976); 42 U.S.C. 6701 *et seq.*; 90 Stat. 999; and Department of Commerce Organization Order 10-4 (September 30, 1975), as amended (40 FR 56702, as amended at 40 FR 58878).

§ 316.1 Purpose.

The purpose of this part is to set forth the requirements and procedures pursuant to which eligible applicants may receive grants under Title I of the Public Works Employment Act of 1976, which is entitled the "Local Public Works Capital Development and Investment Act of 1976."

§ 316.2 Definitions.

"Assistant Secretary" means the Assistant Secretary of Commerce for Economic Development or his delegate.

"Indian tribe" means the governing body of a tribe, nonprofit Indian corporation (restricted to Indians), Indian authority or other tribal organization or entity or Alaskan native village.

"Initiation of construction" means that a contract has been awarded for construction of the project or notice to proceed or its equivalent has been issued or on-site labor has begun, whichever is earlier.

"Local Public Works Act" means the "Local Public Works Capital Development and Investment Act of 1976," which is Title I of the Public Works Employment Act of 1976.

"Local government" means any city, county, town, parish, or other political subdivision of a State (including local school districts), and any Indian tribe.

"Maintenance costs" means costs that are incurred for any necessary repairs or upkeep of property which neither adds to the permanent value of the property or appreciably prolongs its intended life, but rather keeps it in an efficient operating condition.

"Political subdivision of a State" means the agencies, instrumentalities and authorities established or authorized by State law including, but not limited to, special districts and regional authorities formed by local governments.

"Public works" means public facilities including, but not limited to, municipal offices, courthouses, libraries, schools, police and fire stations, detention facilities, water and sewer lines, streets and roads (including curbs), sidewalks, lighting, recreational facilities, convention centers, civic centers, museums, and health, education and social service facilities.

"State" includes the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam and American Samoa.

§ 316.3 Applicants.

A State or a local government, as defined in § 316.2 of this part, is eligible for assistance under the Local Public Works Act.

§ 316.4 Direct grants.

(a) The Assistant Secretary may make direct grants to any State or local government for construction (including demolition and other site preparation activities), renovation, repair, or other improvement of local public works projects, including those for which Federal financial assistance is authorized under provisions of law other than the Local Public Works Act. Such grants may include funds for the completion of plans, specifications and estimates where additional architectural and engineering work or related planning is required to permit construction of the project under this section.

(b) Applications under this section will be approved only if the applicant submits with its application, if applicable, a written certification from the other Federal agency/agencies that the project meets all applicable Federal statutory and regulatory requirements.

(c) The Federal share of any project for which a grant is made under this section shall be 100 per centum of the cost of the project.

§ 316.5 Supplemental grants.

(a) The Assistant Secretary may make supplemental grants for the purpose of increasing the Federal contribution to 100 percent of the project cost for any Federally-assisted public works project authorized by any Federal law other than the Local Public Works Act if the applicant submits with its application:

(1) A written certification from the other Federal agency/agencies that:

(i) Federal financial assistance for the project has been approved and the funds are immediately available for the project;

(ii) The project meets all applicable Federal statutory and relevant related requirements; and

(2) Its written certification that actual construction of the project has not yet been initiated because of lack of funding for the non-Federal share.

(b) The Assistant Secretary also may make grants in an amount necessary to provide all or part of the required State or local share (but not both shares) of the cost of any public works project for which financial assistance is authorized by State or local law requiring such contribution if the applicant submits with its application a written certification from the appropriate authority that:

(1) The share of financial assistance not applied for has been properly approved and is immediately available for the project;

(2) The project meets all applicable statutory and other relevant requirements of law; and

(3) Construction of the project has not yet been initiated.

(c) Grants under this section may include funds for the completion of plans, specifications, and estimates where additional architectural and engineering work or related planning is required to permit construction of the project under this section.

§ 316.6 Limitations on grants.

(a) *Canals and watercourses.* No grant shall be made under this part for any project having as its principal purpose and permanent effect:

(1) The channelization, damming, diversion, or dredging of any natural watercourse, or

(2) The construction or enlargement of any canal except a canal or raceway designated for maintenance as an historic site.

(b) *Real property.* No part of any grant made under this part shall be used for the acquisition of any interest in real property.

(c) *Maintenance.* No part of any grant made under this part shall be used for the payment of maintenance costs in connection with a project constructed (in whole or in part) with Federal financial assistance under the Local Public Works Act.

§ 316.7 Priority of projects.

(a) *Allocation of funds.* (1) In making grants under this part, when the average national unemployment rate for the three most recent consecutive months for which data is available from the United States Department of Labor, has been at least 6½ percent:

(i) Seventy percent of all amounts appropriated to carry out the Local Public Works Act shall be allocated for project applications submitted by State or local governments whose average unemployment rate for the three most recent consecutive months for which information is available exceeds the average national unemployment rate for the same period of time. The Assistant Secretary shall expedite and give priority to applications in this category.

(ii) The remaining thirty percent of all amounts appropriated to carry out the Local Public Works Act shall be available for distribution according to priority as listed below:

(A) Project applications submitted by State or local governments whose average unemployment rate for the three most recent consecutive months for which information is available is more than 6½ percent but not more than the average national unemployment rate for the same period of time, and

(B) Project applications submitted by State or local governments whose average unemployment rate for the three most recent consecutive months for which information is available is 6½ percent or less. These project applications will be considered only when funding of such projects is necessary to fulfill the minimum funding level required for each State or if funds are available in the 30 percent category.

(b) *State limitations:* Not less than one-half of one percent or more than twelve and one-half percent of all amounts appropriated to carry out the Local Public Works Act shall be granted for local public works projects within any one State, except that not less than one-half of one percent of the total of all funds appropriated for this part shall be granted for public works projects in Guam, the Virgin Islands, and American Samoa, in the aggregate.

§ 316.8 Allocation of program resource levels to regional offices.

(a) *Regional allocations.* To assist in the orderly utilization of program resources, the Assistant Secretary will assign to each regional office a target level of anticipated project assistance for the total of all areas served by that regional office. Such regional allocations of program resources shall be based on appropriation apportionments available to EDA and shall be calculated on a formula basis reflecting the relative numbers of unemployed persons in the States served by the regional office and the level of unemployment rates in those States.

(b) *State planning ceilings.* Regional offices shall observe with respect to each State served by it a ceiling on project approval recommendations. The allocation of funds to regions and States will be made after the funds have been apportioned to EDA and will be based on unemployment data available at that time. EDA will announce the date on which the funds are apportioned and the allocation is made. The formula by which the planning ceiling for each State will be established is as follows:

Subject to program administrative costs and statutory minimum and maximum amounts allocated to individual States by the legislation, 65 percent of the funds will be set aside as planning ceilings for individual States based on the share of unemployed workers residing in a State of the total national unemployed; 35 percent of the funds will be set aside as planning ceilings to individual States based on the relative severity of unemployment for each State above the national unemployment rate.

(c) It is to be understood that the planning ceiling assigned to each State is not to establish an entitlement to any minimum level of project assistance within that State (unless such is the statutory maximum or minimum) but is adopted only for the purpose of furthering the objective of assuring that ade-

V 41 164 AUG 23 76 UM

quate consideration is given to the relative needs of various sections of the country. Where the planning ceiling calculated on the formula basis is less than the statutory minimum assured for each State the statutory minimum shall be the planning ceiling, and where the planning ceiling calculated on the formula basis is greater than the statutory maximum for any State the statutory maximum shall be the planning ceiling.

(d) 120 days after the date on which funds are first apportioned for program assistance under the Act and at any time thereafter the Assistant Secretary may reconsider the regional allocations and State ceilings previously established and make such adjustments as are determined to be reasonable in achieving the purposes of the Act.

§ 316.9 Determination of unemployment rates.

(a) The average unemployment rate for the three most recent consecutive months for which data is available for a State or local government applicant under this part may be determined from information obtained in the following order:

(1) *The United States Department of Labor.* (i) EDA's Qualification Division has provided to EDA's Regional Offices and Economic Development Representatives a list, prepared by the United States Department of Labor, which shows the average unemployment rate for the three most recent consecutive months for:

(A) the entire nation;

(B) each State; and

(C) where available, "identifiable" local governments.

(ii) On or before September 15, 1976, EDA's Qualification Division will provide to EDA's Regional Offices and Economic Development Representatives a list, prepared by the United States Department of Labor, which will show the average unemployment rate for the three most recent consecutive months for approximately 1,000 counties throughout the nation.

(iii) The above lists will be updated and expanded if and when more information is obtained from the United States Department of Labor.

(2) If not available from the United States Department of Labor the average unemployment rate for the three most recent consecutive months for which information is available shall be obtained from the State employment security agency.

(3) Indian tribes shall submit information from the Bureau of Indian Affairs of the United States Department of Interior or other appropriate sources acceptable to the Assistant Secretary.

(b) If requested by an applicant, the unemployment rate of a local government shall be based upon the unemployment rate of any community or neighborhood (defined without regard to political or other subdivisions or boundaries) within the jurisdiction of such local government, except that any grant made to a local government based upon the unemployment rate of a community or neighborhood within its jurisdiction must be for a project of direct benefit to, or provide employment for, unemployed persons who are residents of that community or neighborhood. The applicant shall apply to the State employment security agency for the average unemployment rate for the three most recent consecutive months for which data is available. The data obtained from the State employment security agency will be accepted by the Assistant Secretary.

(c) If requested by an applicant, in determining the unemployment rate of a local government, unemployment in those adjoining areas from which the labor force for a project may be drawn shall be taken into consideration.

(d) The Assistant Secretary has obtained from all State employment security agencies their cooperation to provide all applicants, other than Indian tribes, with unemployment data.

(e) EDA will not accept an unemployment rate determination that is based on data obtained for a time period which is longer than twelve months prior to the date of the application as stated therein.

(f) The unemployment rate established by one of the procedures above, will determine whether the area qualifies for the 70 percent or 30 percent category as described in § 316.7 above.

(g) No data regarding unemployment rates for time periods after the date of the application as stated therein, may be changed.

§ 316.10 General considerations and requirements for financial assistance.

(a) *Project selection procedure*—(1) *Considerations.* In line with the purposes and objectives of the Act, EDA's goal of choosing projects having the greatest potential for furthering these purposes and objectives, the relative importance of various factors in determining this potential, and the availability and consistency of data specified in the Act, the following project selection procedures have been adopted.

(2) *Project selection formula.* The ranking procedure developed for selecting projects within each State's planning allocation uses those project and area factors that will contribute most to achieving substate equity in the distribution of planning funds and insures that the relatively more economically efficient projects are selected. All factors will be standardized for comparability purposes and assigned policy weights to reflect their importance in the ranking procedure.

(i) *Basic rank.* The basic rank of a project will be determined by the following factors:

(A) The number of unemployed workers in the project area averaged over the three most recent months for which data is available. An area characterized as having a high unemployment rate overall is generally characterized as having a high unemployment rate in the construction industry. Similarly, an area characterized as having a large number of unemployed overall is generally characterized as having a relatively large number of unemployed construction workers as a share of the overall unemployed. Therefore, this factor gives consideration to construction unemployment. This factor will constitute 30 percent of a project's basic rank.

(B) Severity and duration of unemployment, as measured by the unemployment rate prevailing in the project area averaged over the last three months for which data is available. This factor will constitute 25 percent of a project's basic rank.

(C) The cost per person-month of employment, defined as the ratio of the total cost of the project to the total number of person-months of employment to be generated. In formulating project proposals, applicants should bear in mind the intent of the Act to reduce unemployment generally, and to give due consideration to the amount of unemployment and underemployment in the construction and construction-related industries. As previously indicated, projects eligible for funding would include, but are not limited to, such local public works projects as municipal offices, courthouses, libraries, schools, police and fire stations, detention facilities, water and sewer lines, streets and roads, civic centers, museums, health, education and social service facilities, convention centers, and the upgrading of existing facilities through renovation, repair, and other related improvements. Finally, it should be emphasized that supplemental assistance provided for under the Act will be considered as part of total project costs; the latter is defined as funds from all sources, whether Federal, State, or local. The cost per person-month of employment factor will constitute 30 percent of a project's basic rank.

(ii) *Additional considerations.* A project's basic rank will be increased if the project meets one or more of the following criteria:

(A) Exhibits potential for providing long-term benefits. The basic rank of a project will be increased up to a maximum of 10 percent if it meets this criterion. The amount of increase will be determined by the nature and extent of the long-term benefit(s) to be provided by the project.

(B) Is sponsored by a general purpose unit of local government, as defined in § 316.2 above. Projects meeting this criterion will have their basic ranks increased by five percent.

(C) Relates to existing approved plans and programs of a local community development or regional development nature or promotes or advances longer range plans and programs. The basic rank of a project meeting this criterion will be increased by five percent.

(iii) *Final rank.* The final rank of a project is to be determined by summing the basic rank and increases attributable to the additional considerations defined above.

(3) *Application of project selection formula*—(i) *Geographic considerations.* Projects will be ranked and assessed relative to other projects submitted from the *same* State until such time as the Assistant Secretary determines, pursuant to paragraph (a)(2) above, that comparison of projects submitted from different States is required to either further the purposes and objectives of the Act or to comply with statutory requirements.

(ii) *Priority considerations.* Within each State, projects submitted from areas with an unemployment rate exceeding the national average for the most recent consecutive three months will be ranked and compared only with projects submitted from other areas in this priority category. Similiarly, projects submitted by areas with an unemployment rate below the national average for the most recent consecutive three months will be ranked and compared only with projects submitted from other areas in the same priority category. Applicants who anticipate the project labor requirements will draw upon the unemployed and underemployed labor resources of other jurisdictions outside the immediate project area (such as a multi-county area) will be given priority consideration on the basis of the unemployment rate prevailing in the extended geographical (labor market) area. Similarly, the basic rank computations discussed above will be computed in aggregate on data provided for the extended geographical area.

(iii) *Project selection.* Within each State and priority category, projects will be selected on the basis of their final ranks until the State planning allocation for each priority category has been exhausted or until such time as the Assistant Secretary determines that the remaining funds made available under the Act must be reallocated among the States.

(b) An application shall be rejected unless:

(1) It is properly prepared on appropriate forms prescribed by the Assistant Secretary.

(2) It contains one of the following:

(i) Information showing that the area conforms to an area for which United States Department of Labor unemployment statistics are available; or

(ii) Unemployment information from the appropriate State unemployment security agency.

(3) It contains a certification by the applicant that construction on the project has not yet been initiated;

(4) It contains assurances, satisfactory to the Assistant Secretary, that onsite labor can begin within ninety days of project approval;

(5) Where applicable, it relates the proposed project to existing approved plans and programs of a local community development or regional development nature so as to avoid harmful or costly inconsistencies or contradictions;

(6) It contains evidence, where feasible, that the proposed project will promote or advance longer range plans and programs;

(7) It contains adequate assurances that all laborers and mechanics employed by contractors or subcontractors on the proposed project will be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended (40 U.S.C. 276a—276a-5).

(8) It contains adequate assurance by the applicant and by any "other parties" as defined in 15 CFR Subtitle A, Part 8, that no person shall, on the grounds of race, color, sex, or national origin, be excluded from participation in, be denied the benefit of, or be subjected to discrimination under the proposed project; and an assurance that it is not involved in any civil rights litigation or if it is involved in a lawsuit or Federal administrative action alleging discrimination it shall state the name of the case, the court where filed, or the name of the agency involved in the administrative action.

(9) It contains certification, by the properly authorized official of the Federal agency or State or local government, that no funds budgeted and available or otherwise specifically committed for the project applied for in its application shall be reduced, diminished, or replaced by funds requested under this part.

(c) Applicants should be advised that false representations and/or certifications in connection with applications for assistance under this part may be the basis for criminal liability under title 18 of the United States Code.

(d) No cost overruns for public works projects previously funded under this part will be approved.

(e) Project costs for administration, plans, specifications, estimates and other A/E costs, which have been incurred prior to the date of application, will not be funded.

(f) Applications will not normally be approved where any of the following conditions exist:

(1) The project site, including easements and rights-of-way, has not been obtained, clear of any encumbrances; or

(2) The project request is for a supplemental to another Federal, State or local grant which has not been approved by the applicable grant agency.

(g) The maximum amount of financial assistance made available under this part should not exceed $5 million for each project; however, the Assistant Secretary may, in his discretion, waive this policy for good cause.

(h) Projects which cannot be completed within two years after date of approval will not be considered; however, the Assistant Secretary may, in his discretion, waive this policy for good cause.

§ 316.11 Compliance with other Federal requirements.

Each applicant shall, as a condition to its receipt of a grant under this part, comply with the following relevant Federal requirements:

(a) All labor standards including those relating to the payment of wages, working conditions, anti-kickback prohibitions and equal employment as provided 13 CFR 309.6;

(b) Those concerning relocation and related payments to all persons displaced as a result of the development of a public works project with funds received under this part, as provided for in the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, 42 U.S.C. 4601 *et seq.*, and 13 CFR Part 310;

(c) If the project involves a detention facility, those sections of Part E of the Omnibus Crime Control and Safe Streets Act of 1968, as amended, found at 42 U.S.C. 3750 b(1) and (4)–(9);

(d) The provisions of OMB Circular A–95, except during the first ninety days after EDA begins receiving applications when the following procedures shall apply:

(1) Applicants must submit their full applications or notifications of intent to apply to the appropriate clearinghouse as early as possible.

(2) Upon submission of an application to EDA, the applicant must certify that he has submitted the full application to the appropriate clearinghouse.

(3) EDA may begin processing the application upon its receipt but will make no final approval of an application until 30 days after its receipt unless clearinghouse response is received before 30 days have elapsed.

(4) Clearinghouse comments will be submitted directly to EDA; EDA will consider such comments until it has finished processing the application.

(e) All environmental requirements, to the maximum extent possible, as determined by the Assistant Secretary, including, but not limited to:

(1) The National Environment Policy Act of 1969, as amended (42 U.S.C. § 4321 *et seq.*); and EDA's requirements found in § 316.13 below;

(2) The Clean Air Act, as amended (42 U.S.C. 1857–1858a);

(3) The Federal Water Pollution Control Act, as amended (33 U.S.C. 1251–1376);

(4) The National Historic Preservation Act of 1966 (16 U.S.C. 470 *et seq.*) and EDA's requirements found in § 316.13 below;

(5) The Wild and Scenic Rivers Act, as amended (16 U.S.C. 1271–1287) and EDA's requirements found in § 316.13 below;

(6) The Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*);

(7) The Historical and Archeological Data Preservation Act, as amended (16 U.S.C. 469 *et seq.*); and

(8) The Fish and Wildlife Coordination Act of March 10, 1934, as amended (16 U.S.C. 661–666c).

(f) 13 CFR 309.9, entitled "Records and Audit;"

(g) 13 CFR 309.27, entitled "Land use near Federal airfields;"

(h) 13 CFR 309.14, entitled "Design, construction, and alteration of buildings to accommodate the physically handicapped;"

(i) 13 CFR 309.26, entitled "Project modification;"

(j) 13 CFR Part 314, entitled, "Property management standards;"

(k) The National Flood Insurance Program and EDA's requirements re-

V 41 164 AUG 23 76 UMI

garding flood hazards found at 13 CFR 309.15; and

(l) Other laws affecting this program.

§ 316.12 Acceptance of applications.

(a) Applications for assistance under this part shall only be submitted to the appropriate EDA Regional Office, as provided in 13 CFR 301.31.

(b) Applications shall be recorded and deemed received upon their arrival at the appropriate EDA Regional Office.

(c) EDA shall endeavor, within five working days from the date the application is actually received by the appropriate Regional Office, to determine whether the application has been completely and properly prepared, and contains accurate unemployment rates. An application may be rejected (denied) unless it contains full and accurate information including the requirements of Section 316.10 above. By the end of the fifth working day after the date the application was received, the Regional Director should notify the applicant if the application has been rejected, and state what is needed to properly complete the application. However, EDA reserves the right during the 60 day period after receipt of an application to reject an application for substantially being incomplete, improperly prepared, or otherwise failing to meet the requirements of this part.

§ 316.13 Environmental considerations.

(a) *The National Environmental Policy Act.* (1) Since the Local Public Works Act requires applications to be processed within 60 days of their acceptance, EDA will not be able to prepare environmental impact statements for those projects which may significantly affect the quality of the human environment. However, to the fullest extent possible within this time period, EDA will analyze a project's potential environmental impacts and give appropriate consideration to environmental impacts in making its final decision.

(2) In order that EDA may conduct its environmental analysis of proposed projects, applicants shall include the following materials with their application, except with respect to subsections C and D if such materials are not available in which case the applicant must so certify:

(i) a description of those elements of the proposed project which will have an impact on the environment, the nature of the environment which will be affected; and data on the expected environmental impact;

(ii) alternatives to the proposed project;

(iii) any environmental analysis previously conducted by local, State, federal agencies; and

(iv) evidence of public reaction to the project, such as transcripts of local public hearings held on the proposal.

(3) EDA will independently review and analyze environmental information submitted by applicants.

(i) Where appropriate, EDA, within the 60 day limit, may seek the views of other government agencies which have jurisdiction by law or special expertise with respect to any environmental impact involved.

(ii) If a project appears to be highly controversial for environmental reasons and there is a need to further understand the basis of the controversy, EDA may, within the 60 day limit, request the views of concerned residents through a newspaper notification or a public information meeting held near the project site.

(4) EDA shall deny an application if, after consideration of the benefits of a project against any environmental costs, it concludes that the environmenal costs exceed the benefits. EDA may deny any application solely on the basis that its environmental impact analysis discloses that unacceptable adverse impacts will or are likely to result. EDA, where necessary, may condition approval of a project upon the adoption of specified measures designed to mitigate any adverse environmental impacts.

(b) *The National Historic Preservation Act.* (1) Applicants shall include with their applications either a statement of their State Historic Preservation Officer's views of the proposed project or shall certify that their State Historic Preservation Officer was provided with a detailed project description and request for comments prior to application's submission to EDA.

(2) If necessary, EDA will attempt to complete the coordination of proposed projects with the Advisory Council on Historic Preservation. EDA will use the results of this coordination process, even though completion of this process may not be possible, as a factor in making a final decision on the project.

(c) *The Wild and Scenic Rivers Act.* (1) If required, EDA will coordinate its processing of a proposed project with either the Department of Interior or the Department of Agriculture.

(2) EDA will use the results of this coordination process, even though completion of the process may not be possible, as a factor in making a final decision on the project.

§ 316.14 Final determination.

(a) All applications for assistance under this part shall be processed by the appropriate EDA Regional Office.

(b) The Regional Director shall notify the applicant, in writing, when its application has been rejected and state the reasons therefor.

(c) The Regional Director shall forward to the Assistant Secretary in Washington, D.C., all applications which he deems are properly completed and eligible for assistance under this part.

(d) The Assistant Secretary shall review all applications received from the Regional Directors and make the final determination.

(e) If no determination has been made by the end of the sixtieth day after the application was received as determined in § 316.12 above, the application will be deemed to be approved.

§ 316.15 Termination.

(a) An appropriate official of the grantee may request EDA to cancel or terminate a public works project approved under this part. This request must be accompanied by a certified resolution or ordinance authorizing the requesting party to make such request. Before agreeing to such request, EDA will determine the legal sufficiency of such request.

(b) EDA may initiate a cancellation or termination of a project approved under this part for failure by the grantee to adhere to the requirements of the grant.

(c) EDA may initiate a cancellation or termination of a project approved under this part whenever it determines that such cancellation or termination is in the best interest of the government. Cancellation or termination shall be effected by delivering a notice to the grantee specifying the extent of the cancellation or termination and the date upon which it becomes effective.

Effective date: These regulations become effective on August 23, 1976.

JOHN W. EDEN,
Assistant Secretary
for Economic Development.

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: Questions, corrections, or requests for information regarding the contents of this issue only may be made by dialing 202–523–5284. For information on obtaining extra copies, please call 202–523–5240. To obtain advance information from recorded highlights of selected documents to appear in the next issue, dial 202–523–5022.

federal register

Area Code 202 Phone 523–5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER C—INTERSTATE TRANSPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS

PART 76—HOG CHOLERA AND OTHER COMMUNICABLE SWINE DISEASES

Release of Areas Quarantined

This amendment excludes Franklin, Hampden, Hampshire, and Berkshire Counties in Massachusetts; Rockingham, Cheshire, and Hillsborough Counties in New Hampshire and the entire State of Rhode Island from the areas quarantined by the regulations in 9 CFR Part 76, as amended, because of hog cholera. Therefore, the restrictions pertaining to the interstate movement of swine and swine products from or through quarantined areas contained in 9 CFR Part 76, as amended, do not apply to the excluded areas, but the restrictions pertaining to the interstate movement of swine and swine products from nonquarantined areas contained in said Part 76 apply to the excluded areas. No areas in New Hampshire and Rhode Island remain under quarantine.

Accordingly, Part 76, Title 9, Code of Federal Regulations, as amended restricting the interstate movement of swine and certain products because of hog cholera and other communicable swine diseases is hereby amended in the following respects:

In § 76.2, paragraph (e) is amended to read:

§ 76.2 Notice relating to existence of the contagion or vectors of hog cholera and other swine diseases; prohibition of movement of any hog cholera, virus, exceptions; spread of disease through raw garbage; regulations; quarantines.

(e) * * *

(1) *Massachusetts.* All of Barnstable, Bristol, Dukes, Essex, Middlesex, Nantucket, Norfolk, Plymouth, Suffolk, and Worcester Counties.

(2) *New Jersey.* All of Mercer, Ocean, Burlington, Atlantic, Camden, Gloucester, Salem, Cumberland, and Cape May Counties.

(Secs. 4–7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791–792, as amended; secs. 1–4, 33 Stat. 1264, 1265, as amended; sec. 1, 75 Stat. 481; secs. 3 and 11, 76 Stat. 130, 132; (21 U.S.C. 111–113, 114g, 115, 117, 120, 121, 123–126, 134b, 134f); 37 FR 28464, 28477; 38 FR 19141.)

Effective date. The foregoing amendment shall become effective August 17, 1976.

The amendment relieves restrictions no longer deemed necessary to prevent the spread of hog cholera and must be made effective promptly in order to be of maximum benefit to affected persons. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendment are impracticable and unnecessary, and good cause is found for making it effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 17th day of August 1976.

J. M. HEJL,
Deputy Administrator,
Veterinary Services.

[FR Doc.76-24603 Filed 8-23-76;8:45 am]

Title 13—Business Credit and Assistance

CHAPTER I—SMALL BUSINESS ADMINISTRATION

[Rev. 2, Amdt. 4]

PART 102—DISCLOSURE OF INFORMATION AND PRIVACY ACT OF 1974

Change in Provisions Designating Official Deciding Appeals and Authorizing Testimony by SBA Personnel

Sections 102.5 and 102.7 of SBA's Rules and Regulations implementing the Freedom of Information Act now designate the Assistant Administrator for Congressional and Public Affairs as the official to whom administrative appeals of refusals to disclose information shall be addressed; who makes final Agency decisions on such appeals; and who authorizes appearances and testimony by SBA officers and employees.

Because of an internal Agency reorganization, the title of the official with the foregoing responsibilities is now the Assistant Administrator for Advocacy and Public Communications.

Since this change involves a matter of internal Agency management, the Agency finds it unnecessary to issue this change as a notice of proposed rulemaking with opportunity for public comment, or to delay its effective date, as provided for in 5 U.S.C. 553.

Accordingly, pursuant to the authority in section 5 of the Small Business Act (72 Stat. 385, 15 U.S.C. 634), §§ 102.5(c), 102.5(e), and 102.7 of Part 102 of Title 13 of the Code of Federal Regulations are amended, effective on August 24, 1976, by substituting "Assistant Administrator for Advocacy and Public Communications" for "Assistant Administrator for Congressional and Public Affairs", wherever it appears.

Dated: August 17, 1976.

MITCHELL P. KOBELINSKI,
Administrator.

[FR Doc.76-24739 Filed 8-23-76;8:45 am]

[Rev. 9, Amdt. 7]

PART 123—DISASTER LOANS

Miscellaneous Amendments

Pursuant to authority cited below, Part 123 of Chapter I, Title 13 of the Code of Federal Regulations is amended as hereinafter set forth.

Information and effective date. Public Law 94–305, approved on June 4, 1976, 90 Stat. 663, et seq., amended various provisions of the Small Business Act, which compel textual changes, hereinafter set forth, in addition to conforming amendments published effective June 25, 1976 (41 FR 26203). Since the regulatory amendments in question do not come within the public rulemaking requirements of the Administrative Procedure Act (5 U.S.C. 553), and comments thereon are not required, such comments are therefore not being solicited. Interested persons, however, are invited to send comments, in triplicate, to the Associate Administrator for Finance and Investment, Small Business Administration, 1441 "L" Street, N.W., Washington, D.C. 20416.

SBA has under consideration at the present time further proposed implementing amendments, necessary to carry into effect the statutory changes made by Pub. L. 94–305. They will be the subject of one or more Notices of Proposed Rulemaking to be published in the FEDERAL REGISTER, under the public rulemaking procedures prescribed by Section 4 of the Administrative Procedure Act, and the public will be invited to submit written comments prior to promulgation.

In view of the fact that these amendments carry out the statutory mandate of Pub. L. 94–305, and pursuant to the authority granted by section 5(b)(6) of the Small Business Act, 15 U.S.C. § 634 the amendments hereinafter set forth are effective June 4, 1976.

Part 123 is amended as follows:

§ 123.1 General. [Amended]

(1) Section 123.1 is amended by substituting in paragraph (b)(3) a period for the comma after the word "causes" and deleting the rest of the sentence.

(2) Section 123.1 is further amended by deleting paragraphs (c)(3) and (4) thereof.

V 41 165 AUG 24 76 UMI

§ 123.2 Eligibility. [Amended]

(3) Section 123.2 is amended by deleting subsection (a) (2) (i) therein. It will hereafter be identified as [Reserved].

(4) Section 123.2 is further amended by amending subsections (a) (5) (ii) to read as follows:

* * * * *

(ii) An otherwise eligible small business concern is eligible for product disaster assistance to continue or reestablish its business if SBA determines that the concern has suffered substantial economic injury as a result of the inability of such concern to process or market a product for human consumption because of disease or toxicity occurring in such product through natural or undetermined causes.

(5) Section 123.2 is further amended by deleting subsection (b) (1) (ii) therein. It will hereafter be identified as [Reserved].

§ 123.3 Purpose of loans. [Amended]

(6) Section 123.3 is amended by substituting a period for the comma after the word "causes" in the first sentence of paragraph (d) therein, and deleting the rest of the sentence.

(Catalog of Federal Domestic Assistance Programs Nos. 59.001, 59.002, 59.008, 59.010, 59.014, 59.017, 59.018, 59.020, 59.021, 59.022, 59.023, 59.024 and 59.025.)

Dated: August 12, 1976.

MITCHELL P. KOBELINSKI,
Administrator.

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER C—AIR PROGRAMS

[FRL 604-8]

PART 51—REQUIREMENTS FOR PREPARATION, ADOPTION, AND SUBMITTAL OF IMPLEMENTATION PLANS

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Correction

1. In 40 CFR Part 51.7 (b) (1) the reference to "paragraph (4) (i) and (ii)" should be changed to "paragraph (b) (4) (i) and (ii)."

2. In 40 CFR Part 51.7 (b) (5) the reference to "section 51.6 (g)" should be changed to "section 51.6 (d)."

3. In 40 CFR Part 51, Appendix L, Table II, Part B.2. the phrase under the heading "Sources of Air Pollution" should be changed to "Coal and oil-fired process steam generating facilities."

4. FEDERAL REGISTER Document 73-25119, published at page 33702 in the issue dated Thursday, December 6, 1973, granted a two-year extension for carbon monoxide and photochemical oxidants in Virginia's portion of the National Capital interstate region. This extension had been previously denied in the June 22, 1973, FEDERAL REGISTER. The December 6th FEDERAL REGISTER failed to revoke the original denial in 40 CFR Part 52.2428(c). This notice corrects that oversight by revoking 40 CFR Part 52.2428(c).

Dated: August 19, 1976.

ERIC O. STORK,
Acting Assistant Administrator for OAWM.

[FRL 602-3]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Indiana—Approval/Disapproval of Plan Revisions

Pursuant to Section 110 of the Clean Air Act, the State of Indiana submitted to the Administrator of the United States Environmental Protection Agency a State Implementation Plan (SIP) on January 31, 1972 to achieve the National Ambient Air Quality Standards (NAAQS). The plan was approved by the Administrator on May 31, 1972 (37 FR 10842) with several exceptions, including a partial disapproval of the sulfur dioxide regulation. Subsequent to the May 31, 1972 action, the State submitted an amended sulfur dioxide regulation for stationary sources which the Administrator approved on May 14, 1973 (38 FR 12698).

In 1974, the Indiana Air Pollution Control Board, after public notice and hearing, adopted revisions to APC-13 and adopted a new regulation APC-22. On October 3, 1974 the Technical Secretary of the Air Pollution Control Board (APCB), acting for the Governor of Indiana, submitted to the Regional Administrator a new regulation APC-22, and on December 5, 1974 submitted Revised APC-13. With the revised regulations, the State submitted a technical support document describing the rationale for the changes to the regulations. Other regulatory changes were also submitted as revisions to the Indiana SIP, and on May 2, 1975 (40 FR 19210) the Regional Administrator of the USEPA, Region V published for public comment these proposed revisions to the regulations contained in the SIP. Final rulemaking action on Revised APC-3, APC-16, APC-17, APC-18, APC-20, and APC-22 (in part) appeared in the October 28, 1975 FEDERAL REGISTER (40 FR 50032). Disapproval of Revised APC-15 occurred on May 6, 1976 (41 FR 18654).

The remaining regulatory changes affect the control of sulfur dioxide. APC-13 sets emission limitations based on formulae, and APC-22 classifies counties within Indiana according to the need for control of emissions from sources located in each county. Thus, the submission is a complete revision of the applicable control strategy for sulfur dioxide.

In the May 2, 1975 FEDERAL REGISTER Notice, EPA proposed approval of APC-13, with certain exceptions, and APC-22 as it applies to APC-13 for all counties in Indiana except Dearborn, Floyd, Jefferson, LaPorte, Marion, Pike, Porter, Sullivan, Vermillion, Vigo, and Warrick.

On July 18, 1975 the State submitted additional data containing a reanalysis of the eleven counties questioned by EPA, otherwise described as the Revised Indiana Technical Support Document. This document describes in detail the methodology utilized by the State in deriving County Basin Classifications. Basically, the methodology utilizes computer dispersion models.

EPA reviewed this document (see detailed comments in EPA Technical Review Document) and has determined it to be deficient in the following respects:

(1) Maintenance of sulfur dioxide NAAQS was not addressed;

(2) Actual (1974) versus design or maximum operating conditions were used as input to the model;

(3) Meteorology of selected days from 1974 versus a representative year of meteorology was used as input to the model;

(4) Factors such as growth, representative load, and variability of sulfur content in coal were not considered;

(5) APC-13 and APC-22 failed to insure that emissions from a source would not increase from one year to the next.

In response to the May 2, 1975 proposal, a total of twenty-two comments were submitted on APC-13 and APC-22. Several requests for an extension of the comment period were received. Although these requests were not officially granted, EPA informally accepted comments through September 15, 1975. Many comments concerned the potential economic impact on public and industrial consumers and the Indiana coal industry if current SO_2 control requirements were retained in the counties whose redesignations were identified as unacceptable in the May 2, 1975 proposal. However, the comments provided only a superficial quantification of the economic impact of retaining the old control strategy. While the EPA is concerned about the costs of emission reduction, the recent decision in *Union Electric* v. *EPA*, No. 74-1542, decided June 25, 1976, confirmed the Agency's position that approval/disapproval must be based solely on compliance/non-compliance with the provisions of § 110(a) (2) (A-H) and that said provisions do not include a consideration of technological and economic feasibility. Therefore, cost can have no bearing on the Agency's final action on this plan revision. Three comments questioned the need for monitors in counties classified "C" and the use of dispersion modeling for classification. The requirement for installation of air quality monitors only affects major sources and will provide source specific air quality data which is needed to assure maintenance of the NAAQS in the vicinity of these sources. The EPA must rely on dispersion modeling for predicting air quality, especially when adequate valid air quality data is not available. Even where air quality data is available, modeling is useful as a complement to the ambient data.

The remaining comments discussed at length monitoring and modeling studies in support of the contention that "A"

classifications were unnecessary for specific counties. These remarks were evaluated, together with the State Division of Air Pollution Control's (DAPC's) Technical Support Documents.

This notice finalizes action on APC-13 and APC-22 insofar as it classifies countries for purposes of controlling sulfur dioxide. These regulations are approved as Indiana SIP revisions with the following exceptions:

(1) APC-13, Section 1(b) (2) insofar as the phrase "equivalent full load" would exempt from control boilers used moderately at less than rated capacity because the State failed to demonstrate that such exemptions would not interfere with attainment/maintenance of NAAQS throughout Indiana.

(2) APC-13, Section 2(a):

(a) the formula "$E_p=17.0\ Q_m^{0.67}$ where $E_p=E_m\times Q_m$" is disapproved because it permits the maximum allowable emissions (E_m) to increase if combustion sources are operating at less than rated capacity (Q_m). The State failed to demonstrate that such an allowance would not interfere with attainment/maintenance of standards.

(b) The modification of Q_m where non-Indiana coal is burned because "effluent gas volume" has not been defined and the State has not demonstrated that the less stringent emission limitation which could result from application of the modification will not interfere with attainment/maintenance of standards.

(3) APC-13, Sections 2(a), 3(c), 4(b), and 4(c) as they refer to "direct-fired process operations" because the State failed to demonstrate that the controls required by Section 2(a) as applied to these sources would result in attainment/maintenance of standards throughout Indiana.

(4) APC-13, Section 3(c) formulae insofar as they could be interpreted to permit reassignment of a county to a "B" or "C" Basin designation because of increased stack heights. Such interpretation is inconsistent with Environmental Protection Agency policy (see statement in February 18, 1976 FEDERAL REGISTER, 41 FR 7450) and the constant emission limitations requirement of Section 110(a) of the Clean Air Act [See *Big Rivers Electric Co. et. al.* v. *EPA*, 523 F. 2d 16 (6th Cir. 1975.)]

(5) APC-22, Section 4 priority classifications for sulfur dioxide control in Jefferson, LaPorte, Porter, Vigo and Warrick Counties because the Technical Support Documents provided by the State failed to demonstrate that primary and secondary standards for sulfur dioxide will be attained and maintained in these counties. Adequacy of emission and/or air quality data and adequacy of background values used in determining whether the 24-hour standard could be met without immediate control were questionable items in the State's support document.

All sources in the above-mentioned counties will be required to comply with the emission limitations specified in "old" APC-13, as finally approved on May 14, 1973 (38 FR 12698). Sources having greater than 3,000 million BTU per hour heat input are subject to an emission limitation of 1.2 lbs. of sulfur dioxide per million BTU heat input while smaller sources are subject to a sliding scale.

Finally, it should be noted that any reclassification of a county by the Board pursuant to Section 5 of APC-22 is considered a revision to the applicable SIP and must be formally submitted to the Administrator for approval.

With the exceptions noted above, all other portions of revised APC-13 and APC-22 insofar as it classifies counties for purposes of sulfur dioxide control are approved as meeting the requirements of Section 110 of the Clean Air Act and 40 CFR Part 51. Although the Circuit Court of Marion County declared these rules invalid in Indiana-Kentucky Electric, et al. v. Indiana Environmental Management Board, Case No. C73-675, and enjoined defendants from enforcing same on November 11, 1975, these rules meet the requirement of 40 CFR 51.22 that they be enforceable because the State is appealing the Circuit Court's decision and the court stayed its injunction pending the appeal on March 24, 1976.

This rulemaking will be effective immediately. The Agency finds good cause exists for not deferring the effective date of this rulemaking because the regulatory requirements are already in effect under State law and Federal approval imposes no new burden.

On May 6, 1976 (41 FR 18654), when EPA disapproved revised APC-15 (Hydrocarbons) and APC-22 as it reclassified areas for control of Hydrocarbons, the FEDERAL REGISTER notice did not contain the Part 52 amendments to the CFR. This inadvertent omission is being corrected today and does not affect in any way the finality of the May 6 disapproval action.

A technical review document discussing the background for the decision on APC-13 and APC-22 is available for inspection in the Region V Office of the U.S. Environmental Protection Agency, 230 South Dearborn, Chicago, Illinois 60604; the Public Information Reference Unit, U.S. Environmental Protection Agency, Waterside Mall, Washington, D.C.; and the Indiana Air Pollution Control Board, 1330 W. Michigan Street, Indianapolis, Indiana.

AUTHORITY: 42 USC 1857c-5(a)

Dated: August 18, 1976.

JOHN QUARLES,
Acting Administrator.

Part 52 of Chapter I, Title 40, of the Code of Federal Regulations is amended as follows:

Subpart P—Indiana

1. In § 52.770, paragraph (c), subparagraphs (13) and (14) are revised and subparagraph (15) is added as follows:

§ 52.770 Identification of plan.

* * * * *

(c) * * *

(13) On October 3, 1974, the Technical Secretary submitted revised regulations APC-16 covering CO, APC-17 covering NO_2 and a new regulation APC-22 covering classification of counties for SO_2, oxidants, particulates, NO_2 and CO.

(14) On November 8, 1974, the Technical Secretary submitted revised regulation APC-3 covering visible emissions and revised regulation APC-15 covering hydrocarbons.

(15) On December 5, 1974, the Technical Secretary submitted revised regulation APC-13 covering SO_2. On July 18, 1975, an updated Technical Support Document on APC-13 was submitted by the Technical Secretary.

2. In § 52.771, paragraphs (c) and (d) are added as follows:

§ 52.771 Classification of regions.

* * * * *

(c) The requirements of § 51.3(a) of this chapter are not met by the classification of counties in APC-22 for the purposes of attainment and maintenance of the photochemical oxidant (hydrocarbon) standard.

(d) The requirements of 51.3(a) of this chapter are not met by the classification of Jefferson, LaPorte, Porter, Vigo and Warrick Counties in Indiana in Regulation APC-22 for the purposes of attainment and maintenance of the sulfur dioxide ambient air quality standards.

3. In § 52.777, paragraph (b) is added as follows:

§ 52.777 Control strategy: Photochemical oxidants (hydrocarbons).

* * * * *

(b) The requirements of § 51.14 are not met by Revised APC-15 (November 8, 1974 submission) because it does not provide for attainment and maintenance of the photochemical oxidant (hydrocarbon) standards throughout Indiana.

3. Section 52.795 is added as follows:

§ 52.795 Control strategy: Sulfur dioxide.

(a) Revised APC-13 (December 5, 1974 submission) of Indiana's Air Pollution Control regulations (sulfur dioxide emission limitation) is disapproved insofar as the provisions identified below will interfere with the attainment and maintenance of the sulfur dioxide ambient air quality standards:

(1) The phrase "equivalent full load" in Section 1(b) (2).

(2) The formula "$E_p=17.0\ Q_m^{0.67}$ where $E_p=E_m\times Q_m$" in Section 2(a).

(3) The phrase "Direct fired process operations" in Sections 2(a), 3(c), 4(b), and 4(c).

(4) The modification of Q_m for non-Indiana coal as expressed in Section 2(a).

[FR Doc.76-24795 Filed 8-23-76;8:45 am]

SUBCHAPTER E—PESTICIDE PROGRAMS

[PP6E1775/R108; FRL 603-8]

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Captafol

On June 29, 1976, the Environmental Protection Agency (EPA) published in

V 41 165 AUG 24 76 UMI

the FEDERAL REGISTER (41 FR 26707) a notice of proposed rulemaking, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, which proposed that 40 CFR 180.267 be amended by the establishment of a tolerance for residues of the fungicide captafol (*cis-N*-[(11,2,2-tetrachloroethyl) thio] - 4-cyclohexene-2, 3-dicarboximide) in or on the raw agricultural commodity blueberries at 35 parts per million.

This notice of proposed rulemaking was issued in response to a pesticide petition (PP 6E1775) submitted to the Agency by Dr. C. C. Compton, Coordinator, Interregional Research Project No. 4, New Jersey State Agricultural Experiment Station, PO Box 231, Rutgers University, New Brunswick NJ 08903 on behalf of the IR–4 Technical Committee and the Agricultural Experiment Stations of Arkansas, Georgia, Michigan, New Jersey, North Carolina, and Pennsylvania. No comments or requests for referral to an advisory committee were received by EPA in response to this notice of proposed rulemaking.

It has been concluded, therefore, that the proposed amendment to the regulations be adopted without change. This amendment to the regulations will protect the public health.

Any person adversely affected by this regulation may, on or before September 23, 1976, file written objections with the Hearing Clerk, Environmental Protection Agency, Room 1019, East Tower, 401 M St. SW, Washington, DC 20460. Such objections should be submitted in quintuplicate and should specify both the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Effective August 24, 1976, 40 CFR 180.267 is amended as set forth below.

Dated: August 17, 1976.

JAMES M. CONLON,
Acting Deputy Assistant Administrator for Pesticide Programs.

Part 180, Subpart C, § 180.267 is amended by alphabetically inserting a tolerance of 35 ppm for the raw agricultural commodity blueberries, to read as follows:

§ 180.267 Captafol; tolerances for residues.

* * * * *

Commodity:	*Parts per million*
Blueberries	35

* * * * *

[FR Doc.76-24702 Filed 8-23-76;8:45 am]

Title 45—Public Welfare

CHAPTER I—OFFICE OF EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

STATE ADMINISTERED PROGRAMS

Correction

In FR Doc. 76–226, on page 1395 in the issue of Wednesday, January 7, 1976, certain citations to regulations were incorrect. Paragraphs one through six of that document are corrected to read as follows:

Title 45 of the Code of Federal Regulations is amended as follows:

PART 117—FINANCIAL ASSISTANCE FOR SCHOOL LIBRARY RESOURCES, TEXTBOOKS AND OTHER INSTRUCTIONAL MATERIALS

§ 117.2 [Amended]

1. In Part 117, § 117.2 is amended by deleting the last sentence in paragraph (d), and by deleting paragraph (i).

PART 121a—ASSISTANCE TO STATES FOR THE EDUCATION OF HANDICAPPED CHILDREN

§ 121a.5 [Amended]

2. In Part 121a, § 121a.5 is amended by deleting paragraph (b).

3. In Part 130, § 130.22 is amended by deleting and reserving paragraph (a) and by revising the remainder of the section to read as follows:

PART 130—LIBRARY SERVICES, PUBLIC LIBRARY CONSTRUCTION, AND INTERLIBRARY COOPERATION

§ 130.22 Amendment of State plan.

(a) [Reserved].

(b) Long-range program. The long-range program shall be amended to reflect changes in:

(1) Estimates of present and projected program needs;

(2) The plan of action for meeting these needs; and

(3) Policies, criteria, priorities, and procedures.

(c) Amendments of the basic State plan and the long-range program shall be submitted each year as part of the annual extension of the long-range program submitted pursuant to § 130.20(b).

(20 U.S.C. 351d, 354, 355c, 355e–2)

PART 141—FINANCIAL ASSISTANCE FOR STRENGTHENING INSTRUCTION IN ACADEMIC SUBJECTS IN PUBLIC SCHOOLS

§ 141.6 [Amended]

4. In Part 141, § 141.6 is amended by deleting paragraph (c).

PART 166—STATE ADULT EDUCATION PROGRAMS

§ 166.15 [Removed]

5. In Part 166, § 166.15 is deleted.

PART 173—FINANCIAL ASSISTANCE FOR COMMUNITY SERVICE AND CONTINUING EDUCATION PROGRAMS

§ 173.13 [Removed]

6. In Part 173, § 173.13 is amended by deleting paragraph (b).

(Catalog of Federal Domestic Assistance Nos. 13.400–13.571, Office of Education.)

Dated: August 17, 1976.

BRYAN B. MITCHELL,
Acting Deputy Assistant Secretary for Management Planning and Technology.

[FR Doc.76–24769 Filed 8–23–76;8:45 am]

CHAPTER II—SOCIAL AND REHABILITATION SERVICE (ASSISTANCE PROGRAMS), DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 233—COVERAGE AND CONDITIONS OF ELIGIBILITY IN FINANCIAL ASSISTANCE PROGRAMS

Disregard of Benefits Received Under Other Laws; Correction

In FR Doc. 76–8777 appearing at page 13357 in the FEDERAL REGISTER of Tuesday, March 30, 1976, paragraph 1.c. of the preamble is corrected by adding a period following the words "Pub. L. 93–113" and deleting the phrase "who were receiving assistance prior to becoming VISTA volunteers." The correction is necessary to make the summarization of regulation changes in the preamble consistent with the regulation language. The disregard of VISTA payments applies to both applicants and recipients of public assistance.

Approved: August 17, 1976.

BRYAN B. MITCHELL,
Acting Deputy Assistant Secretary for Management Planning and Technology.

[FR Doc.76–24770 Filed 8–23–76;8:45 am]

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Rev. S. O. No. 1236]

PART 1033—CAR SERVICE

Chesapeake and Ohio Railway Company

At a Session of the INTERSTATE COMMERCE COMMISSION, Railroad Service Board, held in Washington, D.C., on the 18th day of August, 1976.

It appearing, That a portion of the line of the Erie-Lackawanna Railway Company, Thomas F. Patton and Ralph S. Tyler, Jr., Trustees, (EL), located between State Line Tower and Hy Tower, in the vicinity of Hammond, Indiana, was removed from service on April 1, 1976; that these tracks of the EL were used by The Chesapeake and Ohio Railway Company (C&O), as a portion of its main line between Cincinnati, Ohio, and Chicago, Illinois; that there is no other practical route for the operation through Hammond of the C&O trains; that an alternate route for the aforementioned trains of the C&O is available via certain tracks of The Baltimore and Ohio Railroad Company (B&O), between Wellsboro, Indiana, and Pine Junction, Indiana; that the B&O has consented to use of these tracks by the C&O; that operation by the C&O of its trains over the aforementioned tracks of the B&O is necessary in the interest of the public and the commerce of the people; that notice and public procedure herein are impracticable and contrary to the public interest; and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, That:

§ 1033.1236 The Chesapeake and Ohio Railway Company authorized to operate over tracks of the Baltimore and Ohio Railroad Company.

(a) The Chesapeake and Ohio Railway Company (C&O) be, and it is hereby authorized to operate over tracks of The Baltimore and Ohio Railroad Company (B&O), between Wellsboro and Pine Junction, Indiana, a distance of 35.06 miles, pending disposition of the application of the C&O in Finance Docket No. 28188, seeking permanent authority to operate over these tracks.

(b) *Application.* The provisions of this order shall apply to intrastate, interstate, and foreign traffic.

(c) *Rates applicable.* Inasmuch as this operation by the C&O over tracks of the B&O is deemed to be due to carrier's disability, the rates applicable to traffic moved by the C&O over these tracks of the B&O shall be the rates which were applicable on the shipments at the time of shipment as originally routed.

(d) Nothing in this order shall be deemed to relieve the C&O of its obligations to operate as a common carrier over its line between La Crosse, Indiana, and its connection with the EL at Hy Tower in Hammond, Indiana, to the extent required to provide rail transportation to shippers dependent on the C&O for railroad service.

(e) *Effective date:* This order shall become effective at 11:59 p.m., August 31, 1976.

(f) *Expiration date:* The provisions of this order shall expire at 11:59 p.m., January 31, 1977, unless otherwise modified, changed, or suspended by order of this Commission.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies Secs. 1(10–17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10–17), 15(4), and 17(2).)

It is further ordered, That copies of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members, Lewis R. Teeple, Thomas J. Byrne, and William J. Love.

ROBERT L. OSWALD,
Secretary.

[FR Doc.76–24803 Filed 8–23–76;8:45 am]

[Docket No. 35867]

PART 1307—FREIGHT RATE TARIFFS, SCHEDULES AND CLASSIFICATIONS OF MOTOR CARRIERS

PART 1310—FREIGHT RATE TARIFFS AND CLASSIFICATIONS OF MOTOR COMMON CARRIERS

Revision of Regulations for the Construction, Filing, and Posting of Tariffs of Common Carriers of Property by Motor Vehicle and Tariffs of Certain Common Carriers by Water

Correction

In FR Doc. 76–21147 appearing on page 30590 in the issue for Monday, July 26, 1976, the following changes should be made:

(1) On page 30600, in § 1310.6 (n) (6), the symbols at the top of the third column should have read as follows:

♦ or (R) to denote reductions
♦ or (A) denote increases
▲ or (C) denote changes which result in neither increases nor reductions in charges
● to denote no change in rate (see § 1310.10 (f) (rule 10))
+ to denote intrastate application only
□ to denote reissued matter (see § 1310.10 (g) (rule 10)) 352 I.C.C.

(2) On page 30624, in the third column, after the 4th line of § 1310.25(o), the following line was omitted: "old carrier has on file, and the authority".

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 26—PUBLIC ENTRY AND USE

PART 32—HUNTING

Individual Wildlife Refuge Areas

The following special regulation is issued and is effective on September 1, 1976.

§ 26.34 Special regulations; public access, use, and recreation; for individual wildlife refuge areas.

ARIZONA

KOFA GAME RANGE

For purposes of protecting wildlife habitat and the fragile environment of the 660,000-acre Kofa Game Range, Arizona, camping is limited for each person to 14 days during any 12-month period. Recreational (non-commercial) rockhounding, including digging with simple hand tools, is permitted only in the designated area known as Crystal Hill, described as follows:

GILA AND SALT RIVER MERIDIAN

T. 2 N., R. 18 W.,
Sec. 2, lots 3 and 4, S½NW¼ and SW¼;
Sec. 3, lots 1 to 4, inclusive, S½N½ and S½;
Sec. 4, lots 1 to 4, inclusive, S½N½ and S½;
Secs. 9 and 10;
Sec. 11, W½;
Sec. 14, NW¼;
Sec. 15, N½.

The areas described aggregate 3,684.39 acres.

On the remainder of the Kofa Game Range outside the designated Crystal Hill area, collecting of rocks or minerals, or both, is restricted to materials that are exposed and collectible without the use of tools. Digging, including the use of simple hand tools, is prohibited except in the designated area known as Crystal Hill.

The provisions of this special regulation supplement the regulations which govern public access, use and recreation on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 26, and are effective through December 31, 1976.

The following special regulations are issued and are effective on date of publication in the Federal Register. The limited time ensuing from the date of the adoption of the Federal migratory game bird regulations to and including the establishment of State hunting seasons makes it impracticable to give public notice of proposed rule making.

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

ARIZONA AND CALIFORNIA

CIBOLA NATIONAL WILDLIFE REFUGE

The public hunting of doves on the Cibola National Wildlife Refuge, Arizona and California, is permitted as follows: Arizona—mourning and white-winged doves, from September 1 through September 20, 1976, inclusive; mourning doves only, from December 11 through January 9, 1977, inclusive. California—mourning and white-winged doves, from September 1 through September 30, 1976, inclusive; and from November 20 through December 5, 1976, inclusive. Hunting is permitted only on the areas designated by signs as open to hunting. These open areas, comprising 7,500 acres, are delineated on maps available at refuge headquarters, Blythe, California, and from the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, New Mexico 87103. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of doves subject to the following special conditions:

(1) Up to 2 dogs per hunter may be used for the purpose of hunting and retrieving.

(2) Pits or permanent blinds are prohibited.

V 41 165 AUG 24 76 UMI

(3) Hunting is prohibited within one-fourth mile of any occupied dwelling or 250 yards of any farm field worker.

(4) Campfires will be permitted only in designated areas. All other open fires are prohibited.

(5) Cibola Lake, located in Zone I, is closed to fishing from October 1 through March 1 during the waterfowl use period.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through January 9, 1977.

HAVASU NATIONAL WILDLIFE REFUGE

The public hunting of doves on the Havasu National Wildlife Refuge, Arizona and California, is permitted only on the area designated by signs as open to hunting. This open area, comprising 24,200 acres, is delineated on maps available at refuge headquarters, Needles, California, and from the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, New Mexico 87103. Hunting seasons are as follows: Arizona—mourning and white-winged doves, from September 1 through September 20, 1976, inclusive; mourning doves only, from December 11, 1976 through January 9, 1977, inclusive. California—mourning and white-winged doves, from September 1 through September 30, 1976, inclusive; and from November 20 through December 5, 1976, inclusive. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of doves subject to the following special conditions:

(1) Hunting is prohibited within one-fourth mile of any occupied dwelling or concession operation.

(2) Up to 2 dogs per hunter may be used for the purpose of hunting and retrieving.

(3) Hunters may enter the Topock Marsh and Pintail Slough hunt areas by way of the parking lot only.

(4) Shooting hours are from one-half hour before sunrise to sunset.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through January 9, 1977.

IMPERIAL NATIONAL WILDLIFE REFUGE

The public hunting of doves on the Imperial National Wildlife Refuge, Arizona and California, is permitted only on the area designated by signs as open to hunting. This open area, comprising 10,500 acres, is delineated on maps available at refuge headquarters, Martinez Lake, Arizona, and from the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, New Mexico 87103. Hunting seasons are as follows: Arizona—mourning doves only, from December 11, 1976 to January 9, 1977, inclusive; California—mourning and white-winged doves, from November 20 through December 5, 1976, inclusive. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of doves subject to the following special condition:

(1) Steel (iron) shot shotgun ammunition only may be used for the taking of doves on the South Refuge Unit (Area C) during the special teal hunting season (September 18 through September 26, 1976, inclusive) and during the regular waterfowl hunting season when both seasons run concurrently. Steel (iron) shot shotgun ammunition is available from at least 2 commercial outlets in Roswell, New Mexico.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through January 9, 1977.

NEW MEXICO

BITTER LAKE NATIONAL WILDLIFE REFUGE

The public hunting of mourning and white-winged doves on the Bitter Lake National Wildlife Refuge, New Mexico, is permitted from September 1 through October 30, 1976, inclusive, but only on the areas designated by signs as open to hunting. These areas consist of 1,600 acres on the North Refuge Unit (Area B) and 1,800 acres on the South Refuge Unit (Area C). Hunting areas are delineated on maps available at refuge headquarters, 13 miles northeast of Roswell, New Mexico, and from the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, New Mexico 87103. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of doves subject to the following special conditions:

(1) Steel (iron) shot shotgun ammunition only may be used for the taking of doves on the South Refuge Unit (Area C) during the special teal hunting season (September 18 through September 26, 1976, inclusive) and during the regular waterfowl hunting season when both seasons run concurrently. Steel (iron) shot shotgun ammunition is available from at least 2 commercial outlets in Roswell, New Mexico.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through September 26, 1976.

BOSQUE DEL APACHE NATIONAL WILDLIFE REFUGE

The public hunting of mourning and white-winged doves on the Bosque del Apache National Wildlife Refuge, New Mexico, is permitted from September 1 through October 30, 1976, inclusive, but only on the area designated by signs as open to hunting. This open area, comprising 9,775 acres, is delineated on maps available at refuge headquarters, 7 miles south of San Antonio, New Mexico, and from the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, New Mexico 87103. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of doves subject to the following special conditions:

(1) Vehicles are permitted only on established roads.

(2) The refuge is open to public use only from one-hour before sunrise to one-half hour after sunset.

(3) Up to 2 dogs per hunter may be used for the purpose of hunting and retrieving.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through October 30, 1976.

OKLAHOMA

SEQUOYAH NATIONAL WILDLIFE REFUGE

The public hunting of doves and teal on the Sequoyah National Wildlife Refuge, Oklahoma, is permitted on three areas designated by signs as open to hunting. These open areas, comprising 10,500 acres, are delineated on maps available at refuge headquarters, Sallisaw, Oklahoma, and from the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, New Mexico 87103. Hunting seasons are as follows: doves, from September 1 through October 30, 1976, inclusive; teal, from September 11 through September 19, 1976, inclusive. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of doves and teal subject to the following special conditions:

(1) Hunting weapons of any kind are prohibited in areas not posted as open to public hunting, except the Kerr-McClellan Navigation Channel where weapons must be cased or broken down.

(2) Only longbow and arrow or shotguns without slug ammunition are permitted.

(3) Camping or possession of firearms on the refuge at night is prohibited.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50,

Code of Federal Regulations, Part 32, and are effective through the last day of the regular 1976–77 duck season.

TISHOMINGO NATIONAL WILDLIFE REFUGE

The public hunting of mourning doves on the Tishomingo National Wildlife Refuge, Oklahoma, is permitted only on the area designated by signs as open to hunting. This open area, comprising 3,170 acres, is delineated on maps available at refuge headquarters, Tishomingo, Oklahoma, and from the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, New Mexico 87103. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of mourning doves subject to the following special conditions:

(1) The open season for hunting mourning doves on the refuge extends from September 1 through September 30, 1976, inclusive.

(2) Up to 2 dogs per hunter may be used for the purpose of hunting and retrieving.

(3) A Federal permit is not required to enter the public hunting area, but hunters, upon entering and leaving, shall report at designated checking stations as may be established for the regulation of the hunting activity and shall furnish information pertaining to their hunting, as requested.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through September 30, 1976.

The public hunting of teal ducks on the Tishomingo National Wildlife Refuge, Oklahoma, is permitted from September 11 through September 19, 1976, inclusive, but only on the area designated by signs as open to hunting. This open area, comprising 3,170 acres, is delineated on maps available at refuge headquarters, Tishomingo, Oklahoma, and from the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, New Mexico 87103. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of teal ducks subject to the following special conditions:

(1) Up to 2 dogs per hunter may be used for the purpose of hunting and retrieving.

(2) A Federal permit is not required to enter the public hunting area, but hunters, upon entering and leaving, shall report at designated checking stations as may be established for the regulation of the hunting activity and shall furnish information pertaining to their hunting, as requested.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through September 19, 1976.

TEXAS

BRAZORIA NATIONAL WILDLIFE REFUGE

The public hunting of teal ducks on the Brazoria National Wildlife Refuge, Texas, is permitted only on the area designated by signs as open to hunting. This open area, comprising 2,300 acres of Rattlesnake Island on the southeast side of the Intracoastal Waterway and adjacent to Bastrop, Christmas and Drum Bays, is delineated on maps available at refuge headquarters, Angleton, Texas, and from the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, New Mexico 87103. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of teal ducks subject to the following special conditions:

(1) The open season for hunting of teal ducks on the refuge extends from September 18 through September 26, 1976, inclusive.

(2) Access to the hunting area is entirely over public water routes. Travel across the refuge mainland to and from the area open to hunting is not permitted.

(3) Only temporary blinds may be constructed or used on the hunting area. Natural materials may be used for blind construction.

(4) Up to 2 dogs per hunter may be used for the purpose of hunting and retrieving.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through September 26, 1976.

HAGERMAN NATIONAL WILDLIFE REFUGE

The public hunting of mourning doves on the Hagerman National Wildlife Refuge, Texas, is permitted only on the area designated by signs as open to hunting. This open area, comprising 1,754 acres, is delineated on maps available at refuge headquarters, 15 miles northwest of Sherman, Texas, and from the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, New Mexico 87103. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of mourning doves subject to the following special condition:

(1) The open season for hunting mourning doves on the refuge extends from September 1 through September 30, 1976, inclusive.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through September 30, 1976.

W. O. NELSON, JR.,
Regional Director,
Albuquerque, New Mexico.

AUGUST 16, 1976.

PART 32—HUNTING

Necedah National Wildlife Refuge

The following special regulation is issued and is effective on August 24, 1976.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas

WISCONSIN

NECEDAH NATIONAL WILDLIFE REFUGE

Public hunting of deer and unprotected mammal species as listed in the 1976 Wisconsin Big Game hunting regulations on the Necedah National Wildlife Refuge, Wisconsin is permitted with bow and arrow from September 18 through November 14, 1976 and December 4 through December 31, 1976 and with firearms from November 20 through November 28, 1976, but only on those areas designated by signs as open to hunting. These open areas comprising approximately 39,000 acres are delineated on a map available at the refuge headquarters, Necedah, Wisconsin and from the Regional Director, U.S. Fish and Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111. Hunting shall be in accordance with all applicable State and Federal regulations.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 31, 1976.

JAMES M. CARROLL, JR.,
Refuge Manager,
Necedah National Wildlife Refuge.

AUGUST 16, 1976.

PART 32—HUNTING

Sherburne National Wildlife Refuge

The following special regulation is issued and is effective on August 24, 1976.

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

MINNESOTA

SHERBURNE NATIONAL WILDLIFE REFUGE

The public hunting of ruffed grouse, pheasant, grey and fox squirrels, rabbits and hares, raccoon, fox and skunk on the Sherburne National Wildlife Refuge is permitted only on the area designated by signs as open to hunting. This open area, comprising approximately 18,360 acres, is delineated on a map available at refuge headquarters, Route 2, Zimmerman, Minnesota 55398, and from the Regional Director, U.S. Fish and Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111.

Hunting shall be in accordance with all applicable State regulations covering the hunting of upland game subject to the following special conditions:

(1) No night hunting for raccoon.

(2) All motorized conveyances are prohibited from traveling off of established

V41165 AUG 24 76 UMI

roads and parking areas open to such travel.

(3) Parking of vehicles is restricted to designated parking areas.

(4) Practice and target shooting, overnight camping and open fires are prohibited.

(5) Construction or use of any permanent artificial scaffold, platform, blind or other construction is prohibited.

(6) Boats, without motors, may be used on the St. Francis River only from designated river access sites.

(7) Snowmobile operations are prohibited on the refuge except within the rights-of-way of County Roads 4, 5, 9, 11 and 48.

The provisions of these special regulations supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32 and are effective through February 28, 1977.

JOHN E. WILBRECHT,
Refuge Manager,
Sherburne National Wildlife Refuge.

AUGUST 16, 1976

CHAPTER II—NATIONAL MARINE FISHERIES SERVICE, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 222—ENDANGERED FISH OR WILDLIFE

Contracts with GSA; Correction

In the FR Doc. number 76-24204, appearing at page 34970 in the issue of August 18, 1976, on page 34973, 50 CFR, Chapter II, Part 222, § 222.13-4, of Subpart B, is corrected to read as follows:

§ 222.13-4 Contracts with the General Services Administrator.

Any person who has entered into a valid contract with the Administrator of the United States General Services Administration, prior to July 12, 1976 and pursuant to the notice published in the FEDERAL REGISTER on January 9, 1973, for the sale of government-owned pre-Act endangered species parts shall not be required to obtain a certificate of exemption prescribed by this subpart: *Provided,* That the purchaser is able to claim a right under a certificate of exemption issued to the Administrator of the General Services Administration: *Provided further,* That if such pre-Act endangered species parts are commingled, amalgamated, or otherwise combined with such person's current inventory or stockpile, so as to preclude a reasonable determination of one stock from the other, it may not be further sold or transferred without a certificate of exemption first having been granted therefor.

Dated: August 19, 1976.

JACK W. GEHRINGER,
Deputy Director.

Title 39—Postal Service

CHAPTER I—UNITED STATES POSTAL SERVICE

SUBCHAPTER B—INTERNATIONAL MAIL

PART 10—INTERNATIONAL POSTAL SERVICE

SUBCHAPTER C—POST OFFICE SERVICES [DOMESTIC MAIL]

PART 111—GENERAL INFORMATION ON POSTAL SERVICE

Incorporation by Reference

Purpose. The purpose of this document is to incorporate by reference Publication 42, International Mail, of the U.S. Postal Service. The regulations accomplishing this are set forth as Part 10 of Title 39 of the Code of Federal Regulations. The provision that incorporates the domestic mail regulations (39 CFR Part 111) is also being amended.

Pursuant to the policy and provisions of 5 U.S.C. 552(a) relating to material deemed published in the FEDERAL REGISTER when readily available to the public, Postal Service Publication 42, International Mail, is incorporated by reference. Publication 42 is and will remain readily available to all users of the U.S. Postal Service and may be examined at National Headquarters and all regional offices of the Postal Service, at any of the more than 31,000 United States Post Offices, and at all classified stations and branches during normal business hours. Publication 42 is sold in looseleaf subscription form by the Superintendent of Documents, Washington, D.C. 20402, for $9.00.[1]

Publication 42 has undergone a major change in its organization, format, and numbering system in the last year. However, except for revisions implementing changes in international mail regulations adopted by the 1974 Congress of the Universal Postal Union, notice of which was published in the FEDERAL REGISTER of January 28, 1976 (41 FR 4078), Publication 42 is not a substantive revision of the regulations on international mail. It is, therefore, substantially identical in content, although not in arrangement or style, to present Subchapter B of Chapter I, 39 CFR, concerning international mail.

In order to assure ready access for scholars and researchers and to provide historical continuity, all future amendments to Publication 42 will be published in full in the FEDERAL REGISTER. In addition, Publication 42 has a subject matter index which will also be published in the FEDERAL REGISTER and periodically updated.

This change in the manner of publication of Postal Service regulations governing international mail service establishes a more efficient and economical means of making the material available to the public. It will greatly reduce the amount of duplication of published material appearing in Publication 42, the FEDERAL REGISTER and the Code of Federal Regulations.

To govern this new format the regulations contained in 39 CFR Chapter I, Subchapter B (Parts 11-74) are revoked and Part 10 is established to take their place.

Under existing provisions incorporating domestic mail regulations in the FEDERAL REGISTER (39 CFR Part 111) the Postal Service is required to file amendments to the Postal Service Manual with the Director, Office of the Federal Register and to publish in the FEDERAL REGISTER an explanation of the changes. Consistent with the procedure announced above for Publication 42, § 111.3 is revised to require that future amendments to the Postal Service Manual will be published in full text in the FEDERAL REGISTER.

The Postal Service is exempt from the provisions of 5 U.S.C. 553 by reason of 39 U.S.C. 410(a). However, in the spirit of those provisions and notwithstanding the immediate effectiveness of this document, the Postal Service invites comments on the effects of this approach to Postal Service regulations and of their availability to the mailing public. Comments should identify this document as a basis for communication and be directed to: W. Allen Sanders, Assistant General Counsel, Legislative Division, Law Department, Room 9101, 475 L'Enfant Plaza West, S.W., Washington, D.C. 20260.

(5 U.S.C. 552(a), 39 U.S.C. 401, 404, 407, 408)

W. ALLEN SANDERS,
Assistant General Counsel,
Legislative Division.

Accordingly, effective September 1, 1976, Parts 11-74, of Subchapter B of Title 39 are revoked and Part 10 is established, and § 111.3 of Subchapter C is revised to read as follows:

Sec.
10.1 Postal Service Publication 42, International Mail, incorporation by reference of international mail regulations.
10.2 Availability of Postal Service Publication 42, International Mail.
10.3 Amendments to Postal Service Publication 42, International Mail.
10.4 Approval of the Director of the Federal Register.
10.5 Contents of Postal Service Publication 42, International Mail.

AUTHORITY: 5 U.S.C. 552(a), 39 U.S.C. 401, 404, 407, 408.

§ 10.1 Postal Service Publication 42, International Mail; incorporation by reference of international mail regulations.

Section 552(a) of title 5, United States Code, relating to the public information requirements of the Administrative Procedure Act, provides in pertinent part that "• • • matter reasonably available to the class of persons affected thereby is deemed published in the FEDERAL REGISTER when incorporated by reference therein with the approval of the Director of the FEDERAL REGISTER. In conformity with that provision, and with 39 U.S.C. 410(b)(1), and as provided in this part, the United States Postal Service hereby incorporates by reference in this part, Postal Service Publication 42, International Mail, a looseleaf publication published and maintained by the U.S. Postal Service, Washington, D.C. 20260.

§ 10.2 Availability of Postal Service Publication 42, International Mail.

(a) Copies of Postal Service Publication 42, International Mail, are available for reference and inspection upon request at the National Headquarters and regional offices of the U.S. Postal Service and at all United States Post Offices and classified stations and branches during normal business hours. Regional offices are located in New York, Philadelphia, Memphis, Chicago, and San Francisco.

(b) A copy of Postal Service Publication 42, International Mail, together with each amendment of it, is on file with the Director, Office of the Federal Register, National Archives and Records Service, General Services Administration, at 1100 "L" Street, NW, Room 8401, Washington, D.C.

(c) Copies of Postal Service Publication 42, International Mail, may be purchased from the Superintendent of Documents, Washington, D.C. 20402 for $9.00. This price includes entitlement to receive, for an indefinite period, changes in Publication 42 which may be published from time to time. Information about international mail also appears in condensed form in Publication 51, which the Postal Service publishes and distributes to all post offices and area supply centers. This publication is available to the public free of charge at all post offices and classified stations and branches.

§ 10.3 Amendments to Postal Service Publication 42, International Mail.

Changes in Postal Service Publication 42 will periodically be published in the FEDERAL REGISTER. Subscribers to Publication 42 will automatically receive the amendments from the Government Printing Office.

§ 10.4 Approval of the Director of the Federal Register.

(a) Incorporation by reference of Postal Service Publication 42, International Mail, was approved by the Director of the Federal Register under 5 U.S.C. 552a and 1 CFR Part 51.

(b) This approval was granted on August 18, 1976, effective until July 1, 1977 when it will expire without further action unless renewed and extended by the Director upon application by the U.S. Postal Service.

§ 10.5 Contents of Postal Service Publication 42, International Mail.

Postal Service Publication 42, International Mail, contains the following parts:

(a) CHAPTER 1—INFORMATION FOR USE OF THIS PUBLICATION

(1) SUBCHAPTER 110—WHAT THIS CHAPTER COVERS

(2) SUBCHAPTER 120—PURPOSE OF THE PUBLICATION

(3) SUBCHAPTER 130—CATEGORIES OF INTERNATIONAL MAIL

(i) Part 131—General.
(ii) Part 132—Differences Between Postal Union Mail and Parcel Post Mail.
(iii) Part 133—Differences Among Countries.

(4) SUBCHAPTER 140—USE OF THE PUBLICATION

(i) Part 141—Organization and Format.
(ii) Part 142—Location of Information.

(5) SUBCHAPTER 150—OFFICIAL CORRESPONDENCE

(i) Part 151—Correspondence with Headquarters.
(ii) Part 152—Correspondence with Foreign Postal Authorities.
(iii) Part 153—Correspondence with Individuals in Other Countries.

(b) CHAPTER 2—OUTGOING POSTAL UNION MAIL.

(1) SUBCHAPTER 210—WHAT THIS CHAPTER COVERS

(2) SUBCHAPTER 220—CONDITIONS FOR MAILING

(i) Part 221—Conditions for All Articles.
(ii) Part 222—Conditions for Letters and Letter Packages.
(iii) Part 223—Conditions for Post Cards.
(iv) Part 224—Conditions for Printed Matter.
(v) Part 225—Conditions for Matter for the Blind.
(vi) Part 226—Conditions for Small Packets.

(3) SUBCHAPTER 230—TREATMENT OF OUTGOING MAIL

(i) Part 231—Postmarking.
(ii) Part 232—Postage.
(iii) Part 233—Improperly Prepared Mail.
(iv) Part 234—Forwarding Mail of Domestic Origin.
(v) Part 235—Undeliverable Mail Returned to United States.
(vi) Part 236—Articles Mailed Aboard Ships (Paquebot).

(c) CHAPTER 3—OUTGOING PARCEL POST

(1) SUBCHAPTER 310—WHAT THIS CHAPTER COVERS

(2) SUBCHAPTER 320—CONDITIONS FOR MAILING

(i) Part 321—Parcel Post Defined.
(ii) Part 322—Availability of Service.
(iii) Part 323—Prohibitions and Restrictions.
(iv) Part 324—Postage.
(v) Part 325—Weight and Size Limits.
(vi) Part 326—Preparation for Mailing.
(vii) Part 327—Forms Required.
(viii) Part 328—Marking and Endorsing.
(ix) Part 329—Mailing Location.

(3) SUBCHAPTER 330—TREATMENT OF OUTGOING PARCELS

(i) Part 331—Postmarking.
(ii) Part 332—Shortpaid Parcels.
(iii) Part 333—Forwarding Parcels of Domestic Origin.

(d) CHAPTER 4—SPECIAL SERVICES

(1) SUBCHAPTER 410—WHAT THIS CHAPTER COVERS

(2) SUBCHAPTER 420—AIR SERVICE

(i) Part 421—Air Service Defined.
(ii) Part 422—Availability of Air Service.
(iii) Part 423—Postage.
(iv) Part 424—Marking and Endorsing for Air Service.
(v) Part 425—Aerogrammes.

(3) SUBCHAPTER 430—INSURANCE

(i) Part 431—Insurance Defined.
(ii) Part 432—Availability and Limits of Insurance.
(iii) Part 433—Insurance Fees.
(iv) Part 434—Preparation for Mailing Insured Parcels.
(v) Part 435—Processing Requests for Insurance.
(vi) Part 436—Treatment of Incoming Insured Parcels.
(vii) Part 437—Indemnity Claims and Payments.

(4) SUBCHAPTER 440—REGISTRY SERVICE

(i) Part 441—Registry Service Defined.
(ii) Part 442—Availability of Registry Service and Indemnity Limits.
(iii) Part 443—Registry Fees.
(iv) Part 444—Preparation of Registered Mail by Sender.
(v) Part 445—Processing Requests for Registry at Office of Mailing.

PART 10—INTERNATIONAL POSTAL SERVICE

PART 111—GENERAL INFORMATION ON POSTAL SERVICE

Postal Service Manual; Incorporation by Reference

EDITORIAL NOTE.—The Director of the Federal Register has approved an extension of the incorporation by reference of the Postal Service Manual from September 1, 1976, until July 1, 1977, as provided in 39 CFR 111.4(a).

In addition, the Director of the Federal Register has agreed to incorporate by reference until July 1, 1977, the Postal Service Publication 42, International Mail, as provided in 39 CFR 10.4 (b). (See FR Doc. 76-24697 on page 35682 of this FEDERAL REGISTER.)

However, the Director of the Federal Register is considering publishing both the Postal Service Manual and the Postal Service Publication 42, International Mail, under separate cover as an Appendix to Title 39. This appendix would be considered a supplement to the Code of Federal Regulations (CFR), and would not be handled as a regular CFR volume. It would not conform to the uniform CFR codification system, but rather it would maintain the Postal Service Manual and Publication 42 organization and style. This appendix would not be revised annually, but would be supplemented periodically. This approach would provide historical continuity and ready access to bound volumes for scholars and researchers since both of the Postal Service publications are now in looseleaf form.

It should be pointed out that the original incorporation by reference of the domestic mail regulations (39 FR 20595, June 12, 1974) was adopted provisionally to allow for annual review. As part of the review process, we are issuing this document to determine how the public's need could best be served in light of its experience.

Comments on the need for and desirability of issuing an appendix volume to Title 39 are invited on or before October 7, 1976, to the Director of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

Dated: August 18, 1976.

FRED J. EMERY,
Director of the Federal Register.

Title 7—Agriculture

CHAPTER II—FOOD AND NUTRITION SERVICE, DEPARTMENT OF AGRICULTURE

PART 225—SUMMER FOOD SERVICE PROGRAM FOR CHILDREN

Summary of Comments on Proposed Regulations

Final regulations governing the Summer Food Service Program for Children were published March 5, 1976 (41 FR 9533) following the publication of proposed rulemaking (41 FR 1078). This statement summarizes the comments, suggestions, and objections received on the proposed regulations from interested persons and describes the principal changes which were made in the final regulations.

Responses to the proposed regulations were received from a total of 94 organizations and individuals, 34 of whom wrote simply endorsing the comments received from other organizations. Only substantive comments will be noted in this summary.

(1) *Definitions:* The principal comments and suggestions received on the definitions may be summarized as follows:

(a) Many respondents suggested raising the age of eligible children to 21. However, the age of eligible children was maintained at 18 because it was felt that most of the participants would be within that age group and that it was consistent with Federal and State changes in legal age. We recognize that there are young people in the 18–20 category who are employed under Federal programs which provide assistance to program sponsors. However, nothing in the regulations would prohibit a service institution from claiming meals served to such workers under administrative costs. In fact, the instructions on allowable program costs will specifically refer to this possibility.

(b) It was suggested that the definition of service institution be reworded to allow residential camps operating in other than summer months to participate. Under the authorizing legislation, only those service institutions which operate a program during May through September are eligible to operate under the continuous school calendar provision. Final regulations have expanded the definition of service institution to make clear that any service institution, including a residential camp, which operates during May through September may also participate under the continuous school calendar provision provided that it serves children who are on school vacation.

(2) *Eligibility Standards:* Several respondents suggested allowing residential summer camps to use area data instead of enrollment data if they so chose. Therefore, final regulations were changed accordingly.

(3) *Time Limitation on Meals:* Many respondents suggested that the time limits between meals were too long. In order to avoid excessive waste of food and in view of the fact that the law allows for service institutions to serve all meals (breakfast, lunch, supper, supplements), it was the rationale of the Department that a time frame of four hours between meals and three hours between meals and supplements was realistic. However, due to the large number of comments on this matter the hours between meal service were changed to three hours between all meals except that four hours must elapse between lunch and supper if no supplements are served.

(4) *Commodity Information:* Many respondents suggested that commodity lists be made available to service institutions early enough so the food can be more effectively utilized in the Program. Final regulations require State agencies to announce the availability of commodities at an early date prior to the development of menu cycles.

(5) *Advance Funding:* It was suggested that wording be included in the regulations to make advance funding mandatory in May and September as well as in June, July, and August. However, our experience has shown that very few service institutions participate in May and September. Therefore, this suggestion was not incorporated in the final regulations.

(6) *30 Days Submission Deadline:* Several respondents expressed concern about the 30 day deadline for submission of applications. The 30 day provision was added to the regulations to ensure that service institutions did not delay submitting applications, thus causing undue hardship on State agencies in their review of all necessary data in order to determine the ability of the service institutions to effectively administer the Program. Final regulations include the provision that applications must be submitted 30 days prior to the anticipated opening of the food service. However, we added a provision that applications received less than 30 days prior to the anticipated opening of the food service may be approved at the option of the State agency, or FNSRO where applicable.

(7) *Start-Up Costs:* Many respondents recommended raising the start-up costs to 4 percent, some even to 10 percent. However, it was felt that one percent was adequate. Should this amount prove to be inadequate, consideration will be given to raising it in the future.

(8) *Service Institution's Audit Requirement:* It was suggested that an audit be required annually of every service institution which participates in the Program, to be paid out of administrative costs. It is felt that to require every service institution regardless of size to be audited annually would be excessive. Small operations would not earn enough reimbursement to support the cost of an audit. Therefore, final regulations require only service institutions which anticipate reimbursement of over $30,000 during the period of their Agreement to be audited.

(9) *Minimizing the Number of Service Institutions in the Same Area:* The proposed regulations contained a requirement that the administering office review available data on the areas to be served, including the number of needy children in relation to the capacity of the service institutions, so as to minimize the number of service institutions approved in the same area. One respondent objected to the wording and felt the requirement should be more carefully spelled out or eliminated from the final regulations. Because of past problems of overlapping food service sites, the Department felt it was reasonable and in the interest of good management to retain the wording. The intention is not to deny food service to children from needy areas but to en-

V 41 165 AUG 24 76 UMI

sure that more than one service institution is not serving the same children.

Dated: August 19, 1976.

RICHARD L. FELTNER,
Assistant Secretary.

SUBCHAPTER A—CHILD NUTRITION PROGRAMS

PART 230—NONFOOD ASSISTANCE PROGRAM

On February 10, 1976, there was published in the FEDERAL REGISTER (41 FR 5826) a proposed rulemaking redesignating and amending the regulations governing the Nonfood Assistance Program. The major reason for the proposed rulemaking was the implementation of Public Law 94-105.

Interested persons were given 30 days in which to submit comments, suggestions, or objections regarding the proposed regulations. Comments were received from two educational State agencies, five Regional Offices, and seven other State or Federal agencies. Changes were made in the proposed regulations as a result of the comments received, except where the Department has no discretion under the law or where the replies were speculative or too general.

(1) General—Two respondents believe that the proposed regulations are wordy, cumbersome, and restrictive. While the scope of the regulations has increased substantially, most of the increase has resulted from the requirements of Pub. L. 94-105, and Federal Management Circular 74-7 (34 CFR Part 256). The Department does not believe the regulations as written are restrictive and a primary consideration in their development was to place greater dependence on the States for program administration.

(2) 230.2(aa) (proposed 230.2(x))—Definitions—One respondent believes that in the definition for "Reimbursement" eligible School Food Authorities should be referenced because in the programs administered by the respondent, reimbursement is paid to the School Food Authority, not the school. The Department agrees and we reference School Food Authorities in the definition.

(3) 230.2(bb) (proposed(y))—Definitions—One respondent suggests that the definition for school be expanded to list a Job Corps center as an example of an institution eligible to participate in the Program. The definition for school is a uniform definition used in all child nutrition programs and does not purport to list all child care institutions which may be eligible.

(4) 230.5—Multiyear Funding—One respondent believes that the multi-year funding provision permits a State, or FNSRO where applicable, to obligate in advance all or part of the funds for an approved project, with the funds to be disbursed when the project is completed.

The thrust of this provision is to permit the State agency, or FNSRO where applicable, when current fiscal year funds are insufficient, to approve the entire amount justified on the condition that such funds will be paid in increments to the School Food Authority, to the extent that sufficient funds are available, over a period not to exceed three consecutive fiscal years. However, nothing in these regulations prohibits the obligation of funds in a single year and the disbursement of funds, if available, on project completion.

(5) Another respondent interprets this provision to mean that multiyear funding is permissible only if the total number of applications exceed the amount of money available to the State agency or FNSRO for a fiscal year. The intent of the multiyear funding provision is to give the State agency, or FNSRO where applicable, the option to assist School Food Authorities over a period not to exceed three consecutive fiscal years when the amount of funds requested and justified in the application of any School Food Authority exceeds the amount of funds available under § 230.4 of this part.

(6) 230.7(a)—Matching of Funds—One respondent believes that this section as proposed might be interpreted to mean that all payments made by FNS must be matched, including payments to School Food Authorities for schools designated as "especially needy." The legislation does not require any matching from School Food Authorities for schools designated as "especially needy." The Department has changed the language to more clearly reflect the legislation.

(7) 230.9(b)(2)—Requirements for Participation—One respondent suggests that the wording of this section did not clearly demonstrate the need to get the State agency or FNSRO involved in the planning stage of equipment acquisition and systems development. The Department agrees and has changed the language to emphasize the desirability of State agency or FNSRO involvement early in the planning process in order to stress systems compatability over individual equipment and, if nonfood assistance funds are not available, help School Food Authorities consider and make the best use of other alternatives.

Accordingly, the Nonfood Assistance Program regulations are revised and reissued. This regulation supersedes the provisions 7 CFR Part 220 insofar as they pertain to the Nonfood Assistance Program.

AUTHORITY: Secs. 5, 10, Public Law 89-642, 80 Stat. 887, 889 (42 U.S.C. 1774, 1779).

§ 230.1 General purpose and scope.

Section 5 of the Child Nutrition Act of 1966, as amended, authorizes the payment of funds to States to assist them to supply schools drawing attendance from areas in which poor economic conditions exist with equipment, other than real property, for the storage, preparation, transportation, and serving of food, to enable them to establish, maintain, and expand school food service programs. This part announces the policies and prescribes the regulations necessary to carry out this purpose.

§ 230.2 Definitions.

For the purpose of this part, the term:

(a) "Acquisition cost" means the net invoice price of nonexpendable and expendable personal property acquired by purchase. This property may include attachments, accessories, or auxiliary apparatus necessary to make it usable for the purpose for which it is acquired. Ancillary charges such as taxes, duty, protective intransit insurance, freight, or installation may also be included.

(b) "Act" means the Child Nutrition Act of 1966, as amended.

(c) "Breakfast" means a meal served to a school child at the beginning of the child's day at the school, which meets the requirements of the School Breakfast Program (7 CFR Part 220).

(d) "Child" means a person under 21 chronological years of age in schools as defined in § 230.2(bb) (2) and (3) or a student of high school grade or under as determined by the State educational agency in schools as defined in § 230.2 (bb)(1).

(e) "CND" means the Child Nutrition Division of the Food and Nutrition Service of the U.S. Department of Agriculture.

(f) "Delivery costs" means the cost incurred in transporting allowable equipment from point of shipment to the destination specified in the procurement document. It includes all usual costs associated with delivery, but does not include the alteration of buildings to accommodate equipment during the delivery process.

(g) "Department" means the U.S. Department of Agriculture.

(h) "Equipment" means articles and facilities, other than land or buildings, used for the receiving, storage, preparation, transportation, or serving of food.

(i) "Especially needy school" means a school whose School Food Authority does not have access to sufficient resources to meet the matching requirement of this part, and in which at least the majority of students enrolled are eligible for free or reduced price meals.

(j) "Expendable personal property" means all tangible personal property other than nonexpendable personal property.

(k) "Fiscal year" means the period of 12 calendar months beginning July 1, 1975, and ending June 30, 1976; the period of 15 calendar months beginning July 1, 1976, and ending September 30, 1977; and the period of 12 calendar months beginning October 1, 1977, and each October 1 of any calendar year thereafter and ending September 30 of the following calendar year.

(l) "FMC-74-7" means Federal Management Circular 74-7, the Circular which establishes uniform standards for the administration of grants-in-aid to State and local governments, including school districts (34 CFR Part 256).

(m) "FNS" means the Food and Nutrition Service of the U.S. Department of Agriculture.

(n) "FNSRO" means the appropriate Food and Nutrition Service Regional Office of the Food and Nutrition Service of the U.S. Department of Agriculture.

(o) "Installation costs" mean the usual costs incurred in uncrating, setting up, and making final connection of equipment to existing utilities in the room in which the equipment is to operate, except those costs that constitute a capital or leasehold improvement of the buildings.

(p) "Lunch" means a meal which meets the lunch pattern for specified age groups of children set forth in § 210.10 of Part 210 of this chapter.

(q) "National School Lunch Program" means the program authorized by the National School Lunch Act, as amended (7 CFR Part 210).

(r) "Needy children" mean children from families meeting the family size income standards for free or reduced price meals established by a State or FNSRO pursuant to Part 245 of this chapter.

(s) "Nonexpendable personal property" means tangible personal property having a useful life of more than one year and an acquisition cost of $300 or more per unit. The State agency may use its own definition of nonexpendable personal property provided that such definition would at least include all tangible personal property as defined above.

(t) "Nonprofit" means exempt from income tax under section 501(c)(3) of the Internal Revenue Code of 1954, as amended; or in the Commonwealth of Puerto Rico, certified as nonprofit by its Governor.

(u) "OA" means the Office of Audit of the Department.

(v) "OI" means the Office of Investigation of the Department.

(w) "Personal property" means property of any kind except real property. It may be tangible—having physical existence—or intangible, having no physical existence, such as patents, inventions, and copyrights.

(x) "Program" means the Nonfood Assistance Program authorized by section 5 of the Child Nutrition Act of 1966, as amended.

(y) "Real property" means land, land improvements, structures thereon and appurtenances thereto.

(z) "Reimbursement" means financial assistance paid or payable to eligible School Food Authorities for food service equipment. The term "reimbursement" also includes financial assistance made available through advances of Program funds to eligible School Food Authorities.

(aa) "School" means (1) An educational unit of high school grade or under operating under public or nonprofit private ownership in a single building or complex of buildings. The term "high school grade or under" includes classes of preprimary grade when they are conducted in a school having classes of primary or higher grade, or when they are recognized as a part of the educational system in the State, regardless of whether such preprimary grade classes are conducted in a school having classes of primary or higher grade. (2) With the exception of residential summer camps which participate in the Summer Food Service Program for Children and private foster homes, any distinct part of a public or nonprofit private institution or any public or nonprofit private child care institution, which (i) maintains children in residence, (ii) operates principally for the care of children, and (iii) if private, is licensed to provide residential child care services under the appropriate licensing code by the State or a subordinate level of government. The term "child care institution" includes, but is not limited to: Homes for the mentally retarded, the emotionally disturbed, the physically handicapped, unmarried mothers and their infants, group homes, halfway houses, orphanages, temporary shelters for abused children and for runaway children, long-term care facilities for chronically ill children, and juvenile detention centers. (3) With respect to the Commonwealth of Puerto Rico, nonprofit child care centers certified as such by the Governor of Puerto Rico.

(bb) "School Breakfast Program" means the program authorized by section 4 of the Child Nutrition Act of 1966, as amended (7CFR Part 220).

(cc) "School Food Authority" means the governing body which is responsible for the administration of one or more schools and which has the legal authority to operate a lunch or breakfast program therein. The term "School Food Authority" also includes a nonprofit agency or organization to which such governing body has delegated authority to operate the lunch or breakfast program in schools under its jurisdiction, provided the governing body retains the responsibility to comply with Program regulations.

(dd) "School without a food service" means a school in which children do not presently have reasonable access, as determined by the State agency, or FNSRO where applicable, to a meal meeting requirements of the National School Lunch Program or the School Breakfast Program.

(ee) "School without facilities to prepare or receive hot meals" means a school that lacks facilities, or does not have reasonable access, as determined by the State agency, or FNSRO where applicable, to facilities capable of preparing or receiving hot meals meeting requirements of the National School Lunch Program or the School Breakfast Program.

(ff) "Secretary" means the Secretary of Agriculture.

(gg) "State" means any of the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Trust Territory of the Pacific Islands.

(hh) "State agency" means (1) the State educational agency or (2) such other agency of the State as has been designated by the Governor or other appropriate executive or legislative authority of the State and approved by the Department to administer the Program in schools as defined in § 230.2(bb).

(ii) "State educational agency" means, as the State Legislature may determine, (1) the chief State school officer (such as the State Superintendent of Public Instruction, Commissioner of Education, or similar officer), or (2) a board of education controlling the State department of education.

§ 230.3 Administration of the program.

(a) Within the Department, FNS shall act on behalf of the Department in the administration of the Program. Within FNS, CND shall be responsible for administration of the Program.

(b) Within the States, responsibility for the administration of the Program shall be in the State agency, except that FNSRO shall administer the Program in schools of any State to which the State agency is not permitted by law to disburse Federal funds paid to it under the Act. References in this part to "FNSRO where applicable" are to FNSRO as the agency administering the Program in such schools.

(c) Each State agency desiring to take part in the Program shall enter into a written agreement with the Department for the administration of the Program in the State in accordance with the provisions of this part. The agreement shall cover the operation of the Program during the period specified therein and may be extended at the option of the Department.

§ 230.4 Apportionment of funds to States.

(a) Of the Federal funds appropriated for nonfood assistance under the Act, 66⅔ percent shall be apportioned among the States during each fiscal year on the basis of the ratio that the number of lunches, meeting the meal requirements set forth in § 210.10 of this chapter and served in each State in the latest preceding fiscal year for which the Secretary determines data are available at the time such funds are apportioned, bears to the total number of such lunches served in all States in such preceding fiscal year.

(b) For the fiscal year ending June 30, 1976, 33⅓ percent of the funds appropriated for nonfood assistance under the Act shall be apportioned among the States on the basis of the ratio of the number of children in each State, enrolled in schools without a food service to the number of children in all States enrolled in schools without a food service.

(c) For each fiscal year after the fiscal year ending June 30, 1976, 33⅓ percent of the funds appropriated for nonfood assistance under the Act shall be apportioned among the States on the basis of the ratio of the number of children in each State, enrolled in schools without the

V 41 165 AUG 24 76 UMI

facilities to prepare or receive hot meals, to the number of children in all States enrolled in schools without a food service and in schools without the facilities to prepare or receive hot meals.

(d) If any State agency, or FNSRO where applicable, cannot use all the funds apportioned to it under paragraph (a), (b) or (c) of this section, it shall release such funds to the Department for further apportionment among the remaining States, in the manner and for the purpose of the respective initial apportionment: *Provided, however,* That no further apportionment shall be made if the Department determines that the amount of such funds is too small to make a further apportionment. If funds apportioned under paragraph (b) or (c) of this section remain unused after such further apportionment, they shall immediately be reapportioned under the provisions of paragraph (a) of this section to assist schools with a food service program and with the facilities to prepare or receive hot meals.

(e) A share of the Program funds apportioned to any State in accordance with paragraph (a), (b) or (c) of this section shall be withheld by FMS for schools of that State if the State agency is prohibited by law from administering the Program with respect to such schools. The amount withheld from the funds apportioned under paragraph (a), of this section shall bear the same ratio to such apportioned funds as the number of lunches, meeting the requirements of § 210.10 of Part 210 of this chapter and served in such schools in such State in the latest preceding fiscal year for which the Secretary determines data are available at the time such funds are withheld, bears to the total number of such lunches served in all schools within such State in such preceding fiscal year. The amount withheld under paragraph (b) of this section for fiscal year 1976 shall bear the same ratio to such funds as the number of children, enrolled in such State in such schools without a food service, bears to the total number of children enrolled in all schools without a food service in such State in such fiscal year. For each fiscal year, after the fiscal year ending June 30, 1976, the amount withheld under paragraph (c) of this section shall bear the same ratio to such funds as the number of children, enrolled in such State in such schools without a food service and without the facilities to prepare or receive hot meals, bears to the total number of children enrolled in such State in such fiscal year, in all schools without a food service and without the facilities to prepare or receive hot meals.

§ 230.5 Multiyear funding.

If, in any fiscal year, the amount of funds made available under § 230.4 of this part to any State agency, or FNSRO where applicable, is insufficient to pay the entire amount of funds requested and justified in the application of any School Food Authority, the State agency, or FNSRO where applicable, may approve the entire amount justified on condition that such amount will be paid to the School Food Authority, to the extent that sufficient funds are available therefor, over a period not to exceed three consecutive fiscal years beginning with the fiscal year in which the application was approved.

§ 230.6 Method of payment to States.

Funds to be paid to any State shall be made available by means of Letters of Credit issued by FNS in favor of the State agency. The State agency shall: (a) Obtain funds needed for reimbursement to institutions through presentation by designated State officials of a Payment Voucher on Letter of Credit (Treasury Form GFO 7578) in accordance with procedures prescribed by FNS and approved by the U.S. Treasury Department; (b) submit requests for funds only at such times and in such amounts as will permit prompt payment of claims; (c) use the funds received from such requests without delay for the purpose for which drawn. Notwithstanding the foregoing provisions, if funds are made available by Congress for the operation of the Program under a continuing resolution, Letters of Credit shall reflect only the amount available for the effective period of the resolution.

§ 230.7 Matching of funds.

(a) During any fiscal year, payments made by FNS to each State agency and payments made by FNSRO to School Food Authorities shall be upon the condition that at least one fourth of the costs of the equipment acquired shall be borne from sources within the State: *Provided, however,* That payments used to assist especially needy schools as determined by the State agency, or FNSRO where applicable, shall not be so matched. Payments made by FNS to a State agency may be matched, where matching is required, either by the respective recipient School Food Authorities or from other State or local sources and payments made by FNSRO to a School Food Authority may be matched either by the recipient School Food Authority or from other funds available to such School Food Authorities within the State in which the Program is administered by FNS.

(b) Funds from sources within the State shall include any source of State or local funds other than grants of the Department or any other Federal agency except when enabling legislation otherwise provides for such matching.

(c) It shall be the responsibility of the State agency, or FNSRO were applicable, to determine whether the requirements for financing from sources within the State are being met. In the event it appears that such requirements will not be met, the State agency, or FNSRO where applicable, shall take corrective action to assure compliance.

§ 230.8 Use of funds.

Federal funds made available for the Program shall be used in accordance with the provisions of this part to reimburse the School Food Authorities of schools which draw attendance from areas in which poor economic conditions exist, and which have no equipment or grossly inadequate equipment to conduct a school food service, in connection with the cost of purchase or rental of equipment to establish, maintain, and expand school food service: *Provided, however,* That with the approval of FNS, any State agency, or FNSRO where applicable, may reserve for use in carrying out special developmental projects an amount equal to not more than one percent of the sum of the Federal funds initially apportioned to it for any fiscal year for the Program. Funds apportioned under paragraph (a) of § 230.4 may be used to reimburse School Food Authorities of all eligible schools, funds apportioned under paragraphs (b) and (c) of § 230.4 may be used to reimburse School Food Auhorities of schools without a food service and School Food Authorities of schools without the facilities to prepare or receive hot meals.

§ 230.9 Requirements for participation.

(a) Each State agency, or FNSRO where applicable, shall require the School Food Authority to make written application to the State agency, or FNSRO where applicable, for any school which it desires to participate in the Program. Applications shall include information in sufficient detail to ensure that the school is eligible for assistance under paragraph (b) of this section and to ascertain the amount of financial assistance required.

(b) A school which draws attendance from areas in which poor economic conditions exist and which has no equipment or grossly inadequate equipment to operate a school food service under the National School Lunch Program or the School Breakfast Program shall be selected for participation in the Program on the basis of: (1) The financial ability and the relative need of the School Food Authority for assistance in acquiring adequate equipment, determined on the basis of the information supplied by the School Food Authority and by other School Food Authorities in the applications submitted; and (2) the amount of funds available to the State agency, or FNSRO where applicable. State Agencies, or FNSRO where applicable, have a positive obligation to inform eligible School Food Authorities and to work with them in planning for the acquisition of any equipment needed to operate their school food service effectively and, to the extent that funds are available, to aid the School Food Authorities in procuring such equipment.

(c) The State agency, or FNSRO where applicable, shall require the School Food Authority of each school selected for participation to enter into a written agreement with the State agency, or FNSRO where applicable. The School Food Authority shall agree to participate in the School Breakfast Program or the National School Lunch Program, or both.

§ 230.10 Reimbursement payments.

The amount of the reimbursement payment to any School Food Authority shall not exceed the acquisition cost of the equipment, including delivery and installation costs. The total amount of the reimbursement payments made to School Food Authorities in each State for food service equipment acquired for schools which are not especially needy shall not exceed three-fourths of the total cost of the equipment, including delivery and installation costs. The total amount of the reimbursement payments made to School Food Authorities in each State for equipment acquired for schools which are especially needy shall not exceed the cost of the equipment including delivery and installation costs.

§ 230.11 Claims for reimbursement.

Each State agency, or FNSRO where applicable, shall require School Food Authorities to submit claims for reimbursement which shall include data in sufficient detail to justify the amounts claimed and to enable the State to provide the information needed for reports and records required under § 230.12.

§ 230.12 Special responsibilities.

(a) Each State agency shall submit information on Program operations on a form provided by FNS and shall maintain current accounting records of Program operations which will adequately identify fund authorizations, obligations, unobligated balances, assets, liabilities, outlays, and income. The records may be kept in their original form or on microfilm, and shall be retained for a period of three years after the date of the submission of the final Financial Status Report, except that (1) if audit findings have not been resolved, the records shall be retained beyond the three year period as long as required for the resolution of the issues raised by the audit; and (2) records for nonexpendable property acquired with Program funds shall be retained for three years after the final disposition of such property.

(b) Each State agency shall report information on the use of Program funds to FNS on a Financial Status Report form provided by FNS. Reports shall continue to be submitted on a regular basis after the end of the fiscal year to which they pertain until all unpaid obligations have been liquidated, at which time the report reflecting the liquidation of all such unpaid obligations should be marked "Final" and submission discontinued for that fiscal year.

(c) Each State agency shall promptly investigate complaints received or irregularities noted in connection with the operation of the Program, and shall take appropriate action to correct any irregularities. State Agencies shall maintain on file evidence on such investigations and actions. FNS or OI shall make investigations at the request of the State agency or where FNS or OI determines investigations are appropriate.

(d) Each State agency shall release to FNS any Federal funds made available to it under the Act which are unobligated at the end of each fiscal year. Release of funds by the State agency shall be made as soon as practicable, but in no event later than 30 days following demand by FNSRO and shall be reflected by a related adjustment in the State agency's Letter of Credit.

(e) Each State agency, or FNSRO where applicable, shall:

(1) Provide consultive, technical, and managerial personnel to administer the Program, monitor performance, and measure progress toward achieving Program goals, as specified in the State Plan of Child Nutrition Operations submitted in accordance with section 11(e)(1) of the National School Lunch Act and § 210.4a of the regulations governing the National School Lunch Program (7 CFR Part 210). In order to meet the minimum criteria for approval, the portion of the State Plan which deals with Program assistance shall include: (i) Objectives, (ii) reasons for the establishment of the objectives, (iii) methods to be used to accomplish the objectives, and (iv) evaluation methods to be used in determining if the objectives are being met.

(2) Visit the participating schools to ensure compliance with this Part and with the Department's nondiscrimination regulations (Part 15 of this title) issued under title VI of the Civil Rights Act of 1964.

(3) Maintain documentation of such assistance on file.

(f) Each State agency shall adequately safeguard all Program assets and assure that they are used for authorized purposes.

(g) Each State agency shall establish a system of accounting under which School Food Authorities shall report the information required in this part to enable the State agency, or FNSRO where applicable, to administer the Program, monitor performance, and measure progress toward Program goals.

(h) Each State agency shall require compliance by School Food Authorities with applicable provisions of this part.

§ 230.13 Claims against School Fund Authorities.

(a) State agencies shall disallow any portion of a claim and recover any payment from Program funds made to a School Food Authority that is not properly payable under this part. State agencies may use their own procedures to disallow claims and recover overpayments already made.

(b) State agencies may refer any action they propose to take under this section to CND, through FNSRO, for determination.

(c) If CND does not concur with a State agency's action in paying a claim, or in failing to collect an overpayment, CND shall assert a claim against the State agency for the amount of such claim or overpayment. In all such cases, the State agency shall have full opportunity to submit to CND evidence or information concerning the action taken. If, in the determination of CND, the State agency's action was unwarranted, the State agency shall promptly pay, from sources other than Program funds, to FNS the amount of the claim or overpayment.

(d) Amounts recovered by State agencies from School Food Authorities may be utilized, first, to make payments to School Food Authorities for the purpose of the Program during the fiscal year for which the funds were initially available, and, second, to repay any State funds in excess of the matching requirements of 230.7 of this part expended in the reimbursement of claims under the Program and not otherwise repaid. Any amounts recovered which are not so utilized shall be returned to FNS in accordance with the requirements of § 230.12(d).

(e) With respect to School Food Authorities of schools in which the Program is administered by FNSRO, when FNSRO disallows a claim or a portion of a claim, or makes a demand for refund of an alleged overpayment, it shall notify the School Food Authority of the reasons for such disallowance or demand and the School Food Authority shall have full opportunity to submit evidence or to file reclaims for any amounts disallowed or demanded in the same manner as that afforded to School Food Authorities of schools in which the Program is administered by State agencies.

§ 230.14 Management evaluations and audits.

(a) Each State agency, or FNSRO where applicable, shall provide for audits of the funds and operations of the Program at the State and School Food Authority levels to be made with reasonable frequency, but, beginning in fiscal year 1978, not less frequently than once every two years. The audits shall determine the fiscal integrity of financial transactions and reports, and the compliance with applicable laws and regulations and with the administrative requirements set forth in Attachment G of Federal Management Circular 74-7 (34 CFR Part 256). Audits may be made by State agency internal auditors, by State Auditors General, by State Controllers, or by other comparable State audit groups, or by Certified Public Accounts or State licensed public accountants.

(b) Each State agency shall develop a plan for the conduct of audits which shall be incorporated into the State Plan of Child Nutrition Operations provided for under § 210.4a of the National School Lunch Program regulations. The plan shall: (1) State the frequency of audits of State agencies and School Food Authorities and delineate the positive action to be taken during fiscal year 1977 to achieve audit frequency of not less than once every two years by the beginning of fiscal year 1978; (2) provide a description of the State organization in adequate detail to demonstrate the independence of the audit organization; and (3) provide a systematic method to assure timely and appropriate resolution of audit findings and recommendations.

(c) While OA shall rely to the fullest extent feasible upon State sponsored audits, it shall, whenever considered necessary, (1) make audits on a statewide basis, (2) perform on-site test audits, and (3) review audit reports and related

V 41 165
AUG 24 76
UMI

working papers of audits performed by or for State agencies.

(d) Use of audit guides available from OA is encouraged. When these guides are utilized, OA will coordinate its audits with State sponsored audits to form a network of intergovernmental audit systems.

(e) Each State agency shall provide FNS with full opportunity to conduct management evaluations (including visits to schools) of all operations of the State agency under the Program and shall provide OA with full opportunity to conduct audits (including visits to schools) of all operations of the State agency under the Program. Each State agency shall make available its records, including records of the receipt and expenditure of funds under the Program, upon a reasonable request by FNS or OA. OA shall also have the right to make audits of the records and operations of any School Food Authority.

§ 230.15 Procurement standards.

(a) This section provides standards for use by State agencies in establishing procedures for the procurement of supplies, equipment, and services with Program funds for use in the Program. These standards will be applicable at the School Food Authority level effective October 1, 1977. These standards are furnished to ensure that such materials and services are obtained in an effective manner and in compliance with the provisions of applicable Federal law and Executive Orders. State agencies or School Food Authorities may use their own procurement regulations which reflect applicable State and local laws, rules, and regulations, provided that procurement adheres to the standards set forth in this section.

(b) The standards contained in this section do not relieve the State agency or School Food Authority of the responsibilities arising under its contracts. The State agency or School Food Authority is the responsible authority regarding the settlement and satisfaction of all contractual and administrative issues arising out of procurements entered into under the Program. This includes, but is not limited to: disputes, claims, protests of award, source evaluation, or other matters of a contractual nature. Matters concerning violation of law are to be referred to the State or Federal authority that has proper jurisdiction.

(c) The State agency or School Food Authority shall maintain a code or standard of conduct which shall govern the performance of its officers, employees, or agents in contracting with and expending Program funds. The State agency's or School Food Authority's officers, employees, or agents shall neither solicit nor accept gratuities, favors, or anything of monetary value from contractors or potential contractors. To the extent permissible under State laws, rules, or regulations, such standards shall provide for appropriate penalties, sanctions, or other disciplinary actions to be applied for violations of such standards either by the State agency's or School Food Authority's officers, employees, or agents, or by contractors or their agents.

(d) All procurement transactions of the State agency or School Food Authority, regardless of whether negotiated or advertised and without regard to dollar value, shall be conducted in a manner so as to provide maximum open and free competition. The State agency or School Food Authority should be alert to organizational conflicts of interest or noncompetitive practices among contractors which may restrict or eliminate competition or otherwise restrain trade.

(e) The State agency or School Food Authority shall establish procurement procedures which comply with the provisions of this section.

(f) Proposed procurement actions shall be reviewed by appropriate officials of the State agency or School Food Authority to avoid purchasing unnecessary or duplicative items. Where appropriate, an analysis shall be made of lease and purchase alternatives to determine which would be the most economical, practical procurement.

(g) Invitations for bids or requests for proposals shall be based upon a clear and accurate description of the technical requirements for the material, product, or service to be procured, such description shall not, in competitive procurements, contain features which unduly restrict competition. "Brand name or equal" description may be used as a means to define the performance or other salient requirements of a procurement and, when so used, the specific features of the named brand which must be met by offerors should be clearly specified.

(h) Positive efforts shall be made by the State agency or School Food Authority to utilize small business and minority-owned business sources of supplies and services. Such efforts should allow these sources the maximum feasible opportunity to compete for procurements to be made with Program funds.

(i) The type of procuring instruments used (e.g., fixed-price contracts, cost reimbursable contracts, purchase orders, incentive contracts, etc.) shall be appropriate for the particular procurement and for promoting the best interest of the Program. The "cost-plus-a-percentage-of-cost" method of contracting shall not be used.

(j) Formal advertising, with adequate purchase description, sealed bids, and public openings shall be the required method of procurement unless negotiation pursuant to subparagraph (4) of this paragraph is necessary to accomplish sound procurement. However, procurements of $10,000 or less need not be so advertised unless otherwise required by State law or regulations. When formal advertising is employed:

(1) The awards shall be made to the responsible bidder whose bid is responsive to the invitation and is most advantageous to the State agency or School Food Authority, price and other factors considered. Factors such as discounts, transportation costs, and taxes may be considered in determining the lowest bid.

(2) Invitations for bids shall clearly set forth all requirements which the bidder must fulfill in order for his bid to be evaluated by the State agency or School Food Authority.

(3) Any or all bids may be rejected when it is in the State agency's or School Food Authority's interest to do so, and such rejections are in accordance with applicable State and local law, rules, and regulations.

(4) Procurements may be negotiated by the State agency or School Food Authority if it is not practicable or feasible to use formal advertising. Notwithstanding the existence of circumstances justifying negotiations, competition shall be obtained to the maximum extent practicable. Generally, procurements may be negotiated if one or more of the following conditions prevail:

(i) The public exigency will not permit the delay incident to advertising;

(ii) The material or service to be procured is available from only one person or firm; all contemplated sole source procurements where the aggregate expenditure is expected to exceed $5,000 shall be referred to the State agency, or FNSRO where applicable, for prior approval;

(iii) The aggregate amount involved does not exceed $10,000;

(iv) The contract is for personal or professional services, or for any service to be rendered by a university, college, or other educational institution;

(v) No acceptable bids have been received after formal advertising;

(vi) The purchases are for materials or services where the prices are established by law, for technical items or equipment requiring standardization and interchangeability of parts with existing equipment, for experimental, developmental or research work, for supplies purchased for authorized resale, and for technical or specialized supplies requiring substantial initial investment for manufacture; or

(vii) Negotiation is otherwise authorized by law, rules, or regulations.

(k) Contracts shall be made by State agencies or School Food Authorities only with responsible contractors who possess the potential ability to perform successfully under the terms and conditions of a proposed procurement. Consideration shall be given to such matters as contractor integrity, record of past performance, financial and technical resources, and accessibility to other necessary resources.

(l) The procurement records or files of State agencies or School Food Authorities for negotiated purchases in amounts in excess of $10,000 shall provide at least the following pertinent information: (1) Justification for the use of negotiation in lieu of advertising, (2) contractor selection, (3) the basis for the cost or price negotiated.

(m) A system for contract administration shall be maintained by the State agency or School Food Authority to assure contractor compliance with terms, conditions, and specifications of the contract or order, and to assure adequate and timely follow-up of all purchases.

(n) The State agency or School Food Authority shall include provisions to define a sound and complete agreement in all contracts which it awards when the contract costs are to be borne by Program funds.

(o) In awarding contracts the State agency or School Food Authority must comply with the following requirements:

(1) The State agency's or School Food Authority's contract shall contain contractual provisions or conditions which will allow for administrative, contractual, or legal remedies in instances where contractors violate or breach contract terms, and shall provide for such sanctions and penalties as may be appropriate.

(2) All contracts awarded by State agencies or School Food Authorities in excess of $10,000 shall contain suitable provisions for termination by the State agency or School Food Authority including the manner by which it will be effected and the basis for settlement. In addition, such contracts shall set forth the conditions under which the contract may be terminated for default as well as conditions where the contract may be terminated because of circumstances beyond the control of the contractor.

(3) Where applicable, all contracts awarded by State agencies or School Food Authorities in excess of $2,500 which involve the employment of mechanics of laborers shall include a provision for compliance with section 103 of the Contract Work Hours and Safety Standards Act (40 U.S.C. 327–330) as supplemented by Department of Labor regulations (29 CFR Part 5). Under section 103 of the Contract Work Hours and Safety Standards Act, each contractor shall be required to compute the wages of every mechanic and laborer on the basis of a standard workday of 8 hours and a standard workweek of 40 hours. Work in excess of the standard workday or workweek is permissible provided that the worker is compensated at a rate of not less than 1½ times the basic rate of pay for all hours worked in excess of 8 hours in any calendar day or 40 hours in the workweek. These requirements do not apply to the purchase of supplies or materials or articles ordinarily available on the open market or contracts for transportation.

(4) Contracts awarded by State agencies or School Food Authorities, the principal purpose of which is to create, develop, or improve products, processes, or methods, or for exploration into fields which directly concern public health, safety, or welfare, or contracts in the field of science or technology in which there has been little significant experience outside of work funded by Federal assistance, shall contain a notice to the effect that matters regarding rights to inventions, and materials generated under the contract or agreement are subject to the regulations issued by the Department. The contractor shall be advised as to the source of additional information regarding these matters.

(5) All negotiated contracts (except those of $10,000 or less) awarded by State agencies or School Food Authorities shall include a provision to the effect that the State agency or School Food Authority, the Department, the Comptroller General of the United States, or any of their duly authorized representatives, shall have access to any books, documents, papers, and records of the contractor which are directly pertinent to the Program for the purpose of making audit, examination, excerpts, and transcriptions.

(6) Contracts in excess of $100,000 shall contain a provision which requires compliance with all applicable standards, orders, or regulations issued pursuant to the Clean Air Act of 1970, as amended (42 U.S.C. 1857b et seq.). Suspected violations shall be reported by the State agency or School Food Authority in writing to the Regional Office of the United States Environmental Protection Agency, with a copy to the Department.

(p) State agencies or School Food Authorities shall observe their regular requirements and practices with respect to bonding and insurance.

§ 230.16 Property management requirements.

(a) *General purpose and scope.* This section prescribes policies and procedures governing title, use, and disposition of personal property obtained by a State agency for eligible schools, whose cost was borne in whole or in part with Program funds. This section applies when the State agency is acting in the capacity of a School Food Authority, and when the property is obtained for use in the food service operation in schools participating in any Program authorized under the National School Lunch Act or Child Nutrition Act. The School Food Authorities of schools which are private and nonprofit shall follow the requirements of paragraph (b)(4) of this section. Other School Food Authorities shall follow applicable procedures contained herein beginning October 1, 1977. State agencies and School Food Authorities may follow their own property management policies and procedures provided they observe the requirements of this section.

(b) *Nonexpendable personal property.* The following requirements shall be observed in the acquisition, use, and disposition of nonexpendable personal property:

(1) *Title.* When nonexpendable personal property is acquired by a State agency or by a School Food Authority, in whole or in part with Program funds, title shall be vested in the State agency or School Food Authority, as applicable.

(2) *Use.* The State agency or School Food Authority shall retain such property in the Program as long as there is a need for such property to accomplish the purpose of the Program.

(3) *Disposition—Public school property.* When there is no longer a need for such property to accomplish the purpose of the program for which it was acquired, the State agency or School Food Authority shall use the property in connection with any Federal program it administers. Priority shall be given to Federal programs administered by the Department over the programs administered by other Federal agencies. Approval from the Department or State agency, as applicable, must be obtained by the State agency or the School Food Authority prior to using equipment acquired with Program funds for programs of other Federal agencies. When the State agency or School Food Authority no longer has need for such property in any of its federally assisted programs, the property may be used for the State agency's or School Food Authority's own official activities. In such situations, the State agency or School Food Authority may use the property without reimbursement to the Department or State agency, as applicable, or sell the property and retain the proceeds if the property had an acquisition cost of less than $500 per unit and has been used 4 years or more. In the case of other property, the State agency or School Food Authority may retain the property for its own use, *Provided*, That a fair compensation is made to the Department or State agency, as applicable, for the Federal share of the property. The amount of compensation shall be computed by applying the percentage of Federal participation in the cost of the property to the current fair market value of the property. If the State agency or School Food Authority has no need for the property, disposition shall be made as follows:

(i) Except for property having an acquisition cost of less than $500 per unit which has been used for 4 years or more, the State agency or School Food Authority shall sell property having an acquisition cost of $1,000 or less per unit and reimburse the Department or State agency, as applicable, in accordance with subdivision (ii) of this paragraph.

(ii) If the property had an acquisition cost of over $1,000 per unit, the State agency or School Food Authority shall request disposition instructions from the Department or State agency, as applicable. If the Department or State agency, as applicable, has no need for the property, the availability of the property shall be reported to the General Services Administration by the Department to determine whether a requirement for the proprety exists in other Federal programs. The Department or State agency, as applicable, will issue instructions to the State agency or School Food Authority within 120 days following the receipt of the request. If the State agency or School Food Authority is instructed to ship the property elsewhere, the State agency or School Food Authority shall be reimbursed by the Department or State agency, as applicable, with an amount which is computed by applying the percentage of the State agency's or School Food Authority's participation in the cost of the property to the current fair market value of the property, plus any shipping or interim storage costs incurred. If the State agency or School Food Authority is instructed to otherwise dispose of the property, the State agency or School Food Authority will be reim-

V 41 165 AUG 24 76 UMI

bursed by the Department or State agency, as applicable, for the costs incurred in the disposition. If disposition instructions are not issued within 120 days after reporting, the State agency or School Food Authority shall sell the property and reimburse the Department or State agency, as applicable, an amount which is computed by applying the percentage of Federal participation in the cost of the property to the sales proceeds. Further, the State agency or School Food Authority may be permitted to retain $100 or 10 percent of the proceeds, whichever is greater, for the State agency's or School Food Authority's selling and handling expenses.

(iii) When the Department or State agency, as applicable, determines that nonexpendable personal property with an acquisition cost of $1,000 or more and financed solely with Program funds is unique, or difficult or costly to replace, the Department or State agency, as applicable, may reserve the right to require the State agency or School Food Authority to transfer title to the property to the Department or State agency, as applicable, or to a third party subject to the following provisions:

(A) The right to require the transfer of title may be reserved only by means of an express special condition in the grant or contract, or, if approval for the acquisition of the property is given after the grant is awarded, by means of a written stipulation at the time the approval is given.

(B) The property shall be appropriately identified in the award document or otherwise made known to the State agency, or FNSRO where applicable.

(C) The Department or State agency, as applicable, shall not exercise this right until the State agency or School Food Authority no longer needs the property in the program for which it was acquired. That need will be deemed to end on the date of completion or termination of such program unless the State agency or School Food Authority continues to conduct a school food service after that date and demonstrates to the Department or State agency, as applicable, a continued need for the property in its school food service.

(D) The Department or State agency, as applicable, shall issue disposition instructions within 120 days after the completion of the need for the property. If instructions are not issued within such 120-day period, the Department's or State agency's right shall lapse, and the State agency or School Food Authority shall apply the applicable standards contained in paragraphs (b)(3)(i) and (b)(3)(ii) of this section.

(E) The State agency or School Food Authority shall be entitled to reimbursement for any shipping and interim storage costs it incurs pursuant to the Department's or State agency's disposition instructions.

(4) *Disposition—Private school property.* When there is no longer a need for personal property to accomplish the purpose of the program for which it was acquired, a School Food Authority of a private and nonprofit school shall transfer it with the approval of the State agency or FNSRO, where applicable, to another School Food Authority of a private and nonprofit school participating in any program authorized by the Child Nutrition Act of 1966, as amended, or the National School Lunch Act, or to any other school participating in any of the programs authorized by such Acts. Failing either of these dispositions, that part of such equipment financed with Federal funds, or the residual value thereof, shall revert to the United States. Such reversion shall be effected in accordance with instructions from the State agency, or FNSRO where applicable.

(5) *Property management standards.* State agency or School Food Authority property management standards for nonexpendable personal property shall also include the following procedural requirements:

(i) Property records shall be maintained accurately and shall provide for: (A) A description of the property; (B) manufacturer's serial number or other identification number; (C) acquisition date and cost; (D) source of the property; (E) percentage of Program funds used in the purchase of the property; (F) location, use, and condition of the property; and (G) ultimate disposition data including sales price or the method used to determine current fair market value if the State agency or School Food Authority reimburses the Department or State agency, as applicable, for its share.

(ii) A physical inventory of property shall be taken and the results reconciled with the property records at least once every 2 years to verify the existence, current utilization, and continued need for the property.

(iii) A control system shall be in effect to ensure adequate safeguards to prevent loss, damage, or the theft of the property. Any loss, damage, or the theft of nonexpendable property shall be investigated and fully documented. The State agency or School Food Authority shall be responsible for replacing or repairing (with funds of such State agency or School Food Authority) property which is lost, damaged, or stolen due to the negligence of the State agency or School Food Authority.

(iv) Adequate maintenance procedures, recommended by the manufacturer, shall be implemented to keep the property in good condition.

(v) Proper sales procedures shall be established for unneeded property which would provide for competition to the extent practicable and result in the highest possible return.

(c) *Expendable personal property.* The State agency or School Food Authority may at its option either retain or sell items of expendable personal property, not acquired for private and nonprofit school use, when no longer needed for any federally sponsored activity (including activities sponsored by other Federal agencies). Expendable personal property acquired for private and nonprofit schools shall be disposed of in accordance with the provisions of paragraph (b)(4) of this section. For expendable personal property acquired for public schools, compensation to the Department or State agency, as applicable, is required if the aggregate fair market value of all of those items acquired under the grant or contract exceeds $500 when no longer needed for any federally sponsored activity. The amount of compensation shall be computed by applying the percentage of Federal participation in the cost of the original property to the current fair market value of items retained and to the sales proceeds of items sold.

(d) *Intangible personal property*—(1) *Patents and inventions.* If any Program activity produces patents, patent rights, processes or inventions in the course of work aided by the Department, such fact shall be promptly and fully reported to the Department or State agency, as applicable. Unless there is prior agreement between the State agency and the Department on disposition of such items, the Department shall determine whether protection of such invention or discovery will be sought and how the rights in the invention or discovery—including rights under any patent issued thereon—shall be disposed of and administered in order to protect the public interest consistent with "Government Patent Policy" (President's Memorandum for Heads of Executive Departments and Agencies, August 23, 1971), and "Statement of Government Patent Policy" (36 FR 16889).

(2) *Copyrights.* When a Program activity results in a book or other copyrightable material, the author or State agency or School Food Authority is free to copyright the work, but the Department reserves a royalty-free, nonexclusive and irrevocable license to reproduce, publish, or otherwise use and to authorize others to use the work for government purposes.

(e) *Publications.* Any publication or presentation resulting from or primarily related to Federal financial assistance shall contain the following acknowledgement: The activity which is the subject of this report was supported in whole or in part by the U.S. Department of Agriculture, Food and Nutrition Service. However, the opinions expressed herein do not necessarily reflect the position or policy of the U.S. Department of Agriculture, and no official endorsement by the U.S. Department of Agriculture should be inferred.

§ 230.17 Prohibitions.

(a) In carrying out the provisions of this part, neither the Department nor the State shall impose any requirements with respect to teaching personnel, curriculum, instructions, methods of instruction, and materials of instruction in any school as a condition for participation in the Program.

(b) The value of assistance to children under the Program shall not be considered to be income or resources for any purposes under any Federal or State laws, including, but not limited to, laws relating to taxation, welfare, and public assistance programs.

§ 230.18 Other provisions.

(a) *General.* Grant closeout procedures for the Program shall be in accordance with Attachment L of Federal Management Circular 74-7 of (34 CFR Part 256).

(b) *Termination for cause.* FNS may terminate a State agency's or School Food Authority's participation in the Program, in whole or in part, whenever it is determined that the State agency or School Food Authority has failed to comply with the conditions of the Program. FNS shall promptly notify the State agency or School Food Authority in writing of the termination and the reasons for the termination, together with the effective date. When the Program has been terminated for cause, any payments made to the State agency or School Food Authority or any recoveries by FNS from the State agency shall be in accordance with the legal rights and liabilities of the parties.

(c) *Termination for convenience.* FNS or the State agency may terminate a State agency's or School Food Authority's participation in the Program, in whole or in part, when both parties agree that the continuation of the Program would not produce beneficial results commensurate with the further expenditure of funds. The two parties shall agree upon the termination conditions, including the effective date and, in the case of partial termination, the portion to be terminated. The State agency or School Food Authority shall not incur new obligations for the terminated portion after the effective date, and shall cancel as many outstanding obligations as possible. FNS shall allow full credit to the State agency or School Food Authority for the Federal share of noncancellable obligations properly incurred by the State agency or School Food Authority prior to termination.

(d) *State requirements.* Nothing contained in this part shall prevent the State agency from imposing additional requirements for participation in the Program which are not inconsistent with the provisions of this part.

§ 230.19 Program information.

School Food Authorities desiring information concerning the Program should write to their State agency or to the appropriate Food and Nutrition Service Regional Office, as indicated below:

(a) In the States of Delaware, District of Columbia, Maryland, New Jersey, New York, Pennsylvania, Puerto Rico, Virginia, Virgin Islands, and West Virginia: Mid-Atlantic Regional Office, FNS, U.S. Department of Agriculture, 729 Alexander Road, Princeton, New Jersey 08540.

(b) In the States of Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont: New England Regional Office, FNS, U.S. Department of Agriculture, 34 Third Avenue, Burlington, Massachusetts 01803.

(c) In the States of Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee: Southeast Regional Office, FNS, U.S. Department of Agriculture, 1100 Spring Street, NW., Atlanta, Georgia 30309.

(d) In the States of Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, Ohio, and Wisconsin: Midwest Regional Office, FNS, U.S. Department of Agriculture, 536 South Clark Street, Chicago, Illinois 60605.

(e) In the States of Arkansas, Colorado, Louisiana, Montana, New Mexico, North Dakota, Oklahoma, South Dakota, Texas, Utah, and Wyoming: West-Central Regional Office, FNS, U.S. Department of Agriculture, 1100 Commerce Street, Room 5-C-30, Dallas, Texas 75242.

(f) In the States of Alaska, American Samoa, Arizona, California, Guam, Hawaii, Idaho, Nevada, Oregon, Trust Territory of the Pacific Islands, and Washington: Western Regional Office, FNS, U.S. Department of Agriculture, 550 Kearny Street, Room 400, San Francisco, California 94108.

(Catalog of Federal Domestic Assistance Program No. 10.554 National Archives Reference Services.)

NOTE.—The reporting and/or recordkeeping requirements contained herein have been approved by the Office of Management and Budget in accordance with the Federal Reports Act of 1942.

Effective date: This part shall become effective on August 24, 1976.

Dated: August 20, 1976.

RICHARD L. FELTNER,
Assistant Secretary.

CHAPTER III—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

PART 354—OVERTIME SERVICES RELATING TO IMPORTS AND EXPORTS

Commuted Traveltime Allowances

• Purpose. The purpose of this document is to publish commuted traveltime established for agricultural inspection service. •

This amendment establishes commuted traveltime periods as nearly as may be practicable to cover the time necessarily spent in reporting to and returning from the place at which an employee of the Plant Protection and Quarantine Programs performs overtime or holiday duty when such travel is performed solely on account of such overtime or holiday duty. Such establishment depends upon facts within the knowledge of the Animal and Plant Health Inspection Service.

Therefore, pursuant to the authority conferred upon the Deputy Administrator, Plant Protection and Quarantine Programs, by 7 CFR 354.1 of the regulations concerning overtime services relating to imports and exports, the administrative instructions appearing at 7 CFR 354.2, as amended, February 10, 1976 (41 FR 5804), and May 18, 1976 (41 FR 20389), prescribing the commuted traveltime that shall be included in each period of overtime or holiday duty are further amended by adding (in appropriate alphabetical sequence) or deleting the information as shown below:

The table in § 354.2 is amended as follows:

§ 354.2 [Amended]

(64 Stat. 561; (7 U.S.C. 2260).)

It is to the benefit of the public that this instruction be made effective at the earliest practicable date. Accordingly, it is found upon good cause, under the administrative procedure provisions of 5 U.S.C. 553, that notice and other public procedure with respect to the foregoing amendment are impracticable and

V 41 165 AUG 24 76 UMI

unnecessary and good cause is found for making it effective less than 30 days after publication in the FEDERAL REGISTER.

Effective date: The foregoing amendment shall become effective August 24, 1976.

Done at Washington, D.C., this 17th day of August, 1976.

T. G. DARLING,
Acting Deputy Administrator, Plant Protection and Quarantine Programs, Animal and Plant Health Inspection Service.

CHAPTER VII—AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE (AGRICULTURAL ADJUSTMENT), DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—FARM MARKETING QUOTAS AND ACREAGE ALLOTMENT

[Amendment 3]

PART 728—WHEAT

Wheat Program for Crop Years 1975–1977

The following changes, effective for 1976–1977, are being made in the regulations governing the Wheat Program for Crop Years 1975–1977.

1. The wheat marketing year is changed to June 1–May 31.

2. Form 580 is obsolete for 1976 and subsequent years. When necessary, acreage will be reported on Form 578 and reports of production and disposition will be obtained on Form 575–1 and on Form 658. Prevented planting will be reported on Form 574–1 instead of on Form 574.

3. Established yields may be adjusted to reflect a temporary change in the current year yield when there is a change in the number of acres irrigated within the disaster allotment.

4. Wheat acreage designated for nongrain use in accordance with instructions issued by the Deputy Administrator will be disregarded for low yield payment purposes.

5. The production charged to wheat acreage for which production cannot be determined may be equal to or less than the established yield.

6. Disaster payments shall not duplicate returns guaranteed by an agreement with a seed company for the production of seed.

Pursuant to section 107 of the Agriculture Act of 1949, as amended by the Agriculture and Consumer Protection Act of 1973, and section 301(b)(7) of the Agricultural Adjustment Act of 1938, as amended, 7 CFR Part 728 is amended as follows:

1. Section 728.2 is amended by adding paragraph (j) as follows:

§ 728.2 Definitions.

* * * * *

(j) "Wheat Marketing Year" means the period beginning June 1 and ending May 31.

2. Section 728.9 is amended by revising the last sentence of paragraph (b) and paragraph (c) to read as follows:

§ 728.9 Farm yields.

* * * * *

(b) * * * The operator or other affected producer shall report current year wheat acreage by filing a Report of Acreage and Field Determination (herein called "Form 578") if the foregoing provisions are to apply to any program year for which the five-year period includes the current year.

(c) *Yield adjustment.* For the purpose of determining eligibility for and amount of low yield payment as provided in § 728.17(b), the yield established under paragraphs (a) and (b) of this section for the farm shall be adjusted in accordance with instructions issued by the Deputy Administrator to reflect (1) any reduction in the current year yield which is due to causes other than a natural disaster or condition beyond the control of the producer, such as a change in farming practices, or (2) the extent of irrigation within the disaster allotment.

§ 728.10 [Amended]

3. Section 728.10 is amended by changing "July 1" to read "June 1" in paragraph (a)(1).

4. Section 728.13 is amended by revising paragraph (b)(1) to read as follows:

§ 728.13 Requirements for program participation.

* * * * *

(b) *Farm requirements.* (1) For disaster payments, a Form 578 and an Application for Disaster Credit (herein called "Form 574") or a Claim for Prevented Planting (herein called "Form 574–1") shall be filed by the operator of an eligible farm with the office of the county committee having jurisdiction over the county where the farm is located. He shall also file (i) a Record of Acreages, Production and Disposition (herein called "Form 658") and (ii) a Summary of Production (herein called "Form 575–1") when the information thereon is needed for program administration. These forms shall be filed within the period authorized and according to instructions issued by the Deputy Administrator.

§ 728.16 [Amended]

5. Section 728.16 is corrected by changing "terminated" to read "determined" in paragraph (a).

6. Section 728.17 is amended by changing "nonfeed" to "nongrain" in paragraph (b)(1)(i) and by amending paragraphs (b)(4) and (b)(5) and adding paragraph (b)(7) to read as follows:

§ 728.17 Disaster payments.

* * * * *

(b) * * *

(4) The wheat production from acreage not harvested for grain shall be appraised and added to the actual grain production for the purpose of determining eligibility for and amount of low yield payments, in accordance with instructions issued by the Deputy Administrator.

(5) Any wheat acreage for which the production cannot be determined and which is not excluded in paragraph (b)(2) of this section shall be charged with the established yield: *Provided,* That if the county committee determines the acreage was affected by a disaster and the production was destroyed or used for other than grain before Form 574 was filed, the production charged shall be based on the larger of (i) the established yield multiplied by the factor determined according to paragraph (b)(3) of this section to determine eligibility for payment or (ii) the actual average yield from harvested acreage if requested by the producer in accordance with instructions issued by the Deputy Administrator.

(6) * * *

(7) Notwithstanding any other provisions of this section, disaster payments shall not duplicate returns guaranteed by contract, agreement, or understanding with a seed company for the production of seed.

(Sec. 107, 87 Stat. 224 (7 U.S.C. 1445a(c)); Sec. 301, 89 Stat. 302 (7 U.S.C. 1301(b)).)

Since these regulations apply to 1976 and planting has occurred, it is hereby found and determined that compliance with the notice and public procedure provisions of 5 U.S.C. 553 is impracticable and contrary to the public interest.

Effective date: These regulations shall become effective August 23, 1976.

Signed at Washington, D.C., on August 17, 1976.

SEELEY G. LODWICK,
Acting Administrator, Agricultural Stabilization and Conservation Service.

[FR Doc.76-24779;Filed 8-23-76;8:45 am]

SUBCHAPTER C—SPECIAL PROGRAMS

[Amendment 2]

PART 775—FEED GRAIN

Feed Grain Program for Crop Years 1975–1977

The following changes, effective for 1976–1977, are being made in the regulations governing the Feed Grain Program for Crop Years 1975–1977.

1. The barley marketing year is changed to June 1–May 31.

2. Established yields may be adjusted to reflect a temporary change in the current year yield when there is a change in the number of acres irrigated within the disaster allotment.

3. Form 580 is obsolete for 1976 and subsequent years. When necessary, acreage will be reported on Form 578 and production and disposition will be reported on Form 575–1 and on Form 658. Prevented planting will be reported on Form 574–1 intead of on Form 574.

4. Barley acreage designated for nongrain use in accordance with instructions issued by the Deputy Administrator will be disregarded for low yield payment purposes.

5. The production charged to feed grain acreage for which the production cannot be determined may be equal to or less than the established yield.

6. Disaster payments shall not duplicate returns guaranteed by an agreement with a seed company for the production of seed.

Pursuant to section 105 of the Agriculture Act of 1949, as amended by the Agriculture and Consumer Protection Act of 1973, as amended, 7 C.F.R. Part 775 is amended as follows:

1. Section 775.2 is amended by adding paragraph (p) to read as follows:

§ 775.2 Definitions.

* * * * *

(p) "Marketing Year" means:

(1) For barley, the period beginning June 1 and ending May 31.

(2) For corn and grain sorghum, the period beginning October 1 and ending September 30.

2. Section 775.9 is amended by revising paragraph (b) to read as follows:

§ 775.9 Farm yields.

* * * * *

(b) *Yield adjustment.* For the purpose of determining eligibility for and amount of low yield payment as provided in § 775.17(b), the yield established under paragraph (a) of this section for the farm shall be adjusted in accordance with instructions issued by the Deputy Administrator to reflect (1) any reduction in the current year yield which is due to causes other than a natural disaster or condition beyond the control of the producer, such as a change in farming practices, or (2) the extent of irrigation within the disaster allotment.

§ 775.10 [Amended]

3. Section 775.10 is amended by changing the July 1 date for barley to June 1 in the second sentence of paragraph (a)(2).

4. Section 775.13 is amended by revising paragraph (b)(1) to read as follows:

§ 775.13 Requirements for program participation.

* * * * *

(b) *Farm requirements.* (1) For disaster payments, a Report of Acreage and Field Determinations (herein called "Form 578") and an application for Disaster Credit (herein called "Form 574") or a Claim for Prevented Planting (herein called "Form 574–1") shall be filed by the operator of an eligible farm with the office of the county committee having jurisdiction over the county where the farm is located. He shall also file (i) a Record of Acreages, Production and Disposition (herein called "Form 658") and (ii) a Summary of Production (herein called "Form 575–1") when the information thereon is needed for program administration. These forms shall be filed within the period authorized and according to instructions issued by the Deputy Administrator.

5. Section 775.17 is amended by changing "nonfeed" to "nongrain" in paragraph (b)(1)(i) and by amending paragraphs (b)(4) and (b)(5) and adding paragraph (b)(7) to read as follows:

§ 775.17 Disaster payments.

* * * * *

(b) * * *

(4) The feed grain production from acreage not harvested for grain shall be appraised and added to the actual grain production for the purpose of determining eligibility for and amount of low yield payments, in accordance with instructions issued by the Deputy Administrator.

(5) Any feed grain acreage for which the production cannot be determined and which is not excluded in subparagraph (b)(2) of this section shall be charged with the established yield: *Provided,* That if the county committee determines the acreage was affected by a disaster and the production was destroyed or used for other than grain before Form 574 was filed, the production charged shall be based on the larger of (i) the established yield multiplied by the factor determined according to subparagraph (b)(3) of this section to determine eligibility for payment or (ii) the actual average yield from harvested acreage if requested by the producer in accordance with instructions issued by the Deputy Administrator.

(6) * * *

(7) Notwithstanding any other provisions of this section, disaster payments shall not duplicate returns guaranteed by contract, agreement, or understanding with a seed company for the production of seed.

(Sec. 105, 87 Stat. 230 (7 U.S.C. 1441 note).)

Since these regulations apply to 1976 and planting has occurred, it is hereby found and determined that compliance with the notice and public procedure provisions of 5 U.S.C. 553 is impracticable and contrary to the public interest.

Effective Date: These regulations shall become effective August 23, 1976.

Signed at Washington, D.C. on August 17, 1976.

SEELEY G. LODWICK,
Acting Administrator, Agricultural Stabilization and Conservation Service.

[FR Doc.76-24778 Filed 8-23-76;8:45 am]

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

PART 919—PEACHES GROWN IN MESA COUNTY, COLORADO

Expenses and Rate of Assessment

This document authorizes expenses of $1,000 of the Administrative Committee, under Marketing Order No. 919, for the 1975–76 fiscal period and fixes the rate of assessment of $0.01332 per cwt. of peaches handled in such period to be paid to the committee by each first handler as his pro rata share of such expenses.

On July 28, 1976, notice of rulemaking was published in the FEDERAL REGISTER (41 FR 31390) regarding proposed expenses and the related rate of assessment for the period December 1, 1975, through November 30, 1976, pursuant to the marketing agreement, as amended, and Order No. 919, as amended (7 CFR Part 919), regulating the handling of peaches grown in Mesa County, Colorado. This notice allowed interested persons 19 days during which they could submit written data, views, or arguments pertaining to these proposals. None were submitted. This regulatory program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). After consideration of all relevant matters presented, including the proposals set forth in such notice which were submitted by the Administrative Committee (established pursuant to said marketing agreement and order), it is hereby found and determined that:

§ 919.215 Expenses and rate of assessment.

(a) *Expenses.* Expenses that are reasonable and likely to be incurred by the Administrative Committee during the period December 1, 1975, through November 30, 1976, will amount to $1,000.

(b) *Rate of assessment.* The rate of assessment for said period, payable by each handler in accordance with § 919.41, is fixed at $0.01332 per cwt. of peaches.

It is hereby further found that good cause exists for not postponing the effective date hereof until 30 days after publication in the FEDERAL REGISTER (7 U.S.C. 553) in that (1) shipments of peaches have already begun, (2) the relevant provisions of said marketing agreement and this part require that the rate of assessment herein fixed shall be applicable to all assessable peaches handled during the aforesaid period; and (3) such period began on December 1, 1975, and the rate of assessment herein fixed will automatically apply to all assessable peaches beginning with such date.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.)

Dated: August 18, 1976.

FLOYD F. HEDLUND,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.76-24729 Filed 8-23-76;8:45 am]

CHAPTER XIV—COMMODITY CREDIT CORPORATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—LOANS, PURCHASES, AND OTHER OPERATIONS

[CCC Grain Price Support Regs., 1976 Crop Barley Supplement]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

1976 Crop Barley Loan and Purchase Program

On July 3, 1975, notice of proposed rulemaking regarding loan and purchase rates for 1976 crop barley and operating provisions to carry out the 1976 crop barley loan and purchase program was pub-

V 41 165 AUG 24 76 UMI

lished in the Federal Register (40 FR 28094).

Several responses were received from interested individuals. These responses ranged from requests suggesting an increase in the price support level to extending the maturity date for three years.

After consideration of all responses, and other factors, it has been determined that loan and purchase rates for 1976 crop barley on a national average will be increased to $1.02 per bushel. Support rates at the county level reflect adjustments necessary to reflect changes in rail freight rate structure and historical prices received by farmers by State and district. Loans as in 1975 will not have identical maturity dates but will mature in the case of farm stored loans on demand but not later than the last day of the eleventh calendar month following the month the loan is disbursed, and in the case of warehouse stored loans, on demand but not later than the last day of the eleventh calendar month following the month the warehouse receipt was issued. Other operating provisions for the 1976 crop remain the same as those for the 1975 crop.

The General Regulations Governing Price Support for the 1976 and Subsequent Crops, published at 41 FR 22334, and any amendments thereto, and the 1970 and Subsequent Crops Barley Loan and Purchase Program Regulations, published at 35 FR 11166 and 11902, and any amendments to such regulations are further supplemented for the 1976 crop barley. CFR § 1421.72 through § 1421.75 and the title of the subpart are revised to read as provided below, effective as to the 1976 crop of barley. The material previously appearing in these sections shall remain in full force and effect as to the crops to which it is applicable.

Subpart—1976 Crop Barley Loan and Purchase Program

Sec.
1421.72 Purpose.
1421.73 Availability.
1421.74 Maturity of loans.
1421.75 Loan and purchase rates.

AUTHORITY: Secs. 4 and 5, 62 Stat. 1970, as amended (15 U.S.C. 714b and c); Secs. 105, 401, 63 Stat. 1051, as amended (7 U.S.C. 1441 note, 1421).

§ 1421.72 Purpose.

This supplement contains additional program provisions which, together with the provisions of the General Regulations Governing Price Support for the 1976 and Subsequent Crops, the 1970 and Subsequent Crops Barley Loan and Purchase Program Regulations, and any amendments thereto, apply to loans on and purchases of the 1976 crop of barley.

§ 1421.73 Availability.

(a) Loans. A producer desiring to participate in the program through loans must request a loan on his 1976 crop of eligible barley on or before March 31, 1977.

(b) *Purchases.* Producers desiring to offer eligible 1976 crop barley not under loan for purchase must execute and deliver to the county ASCS office on or before February 28, 1978, a purchase agreement (Form CCC–614) indicating the approximate quantity of 1976 crop barley they will sell to CCC.

§ 1421.74 Maturity of loans.

Loans mature in the case of farm stored loans on demand but not later than the last day of the eleventh calendar month following the month the loan is disbursed, and in the case of warehouse stored loans, on demand but not later than the last day of the eleventh calendar month following the month the warehouse receipt was issued.

§ 1421.75 Loan and purchase rates.

(a) *Basic loan and purchase rates (counties).* Basic county rates (marketing area in the case of Alaska) for loan and settlement purposes for barley (except mixed barley) grading U.S. No. 2 or better are established as follows:

ALABAMA

County	Rate per bushel
All counties	$0.99

ALASKA[1]

Delta	$1.54	Kenai-Sold	1.66
Fairbanks	1.53	Palmer	1.72

(b) *Premiums and discounts.* The basic rates shall be adjusted by premiums or discounts as follows (all footnotes at end of paragraph):

	Discount (cents per bushel)
Class—Mixed Barley	2
Grade:	
U.S. No. 3	3
U.S. No. 4	6
U.S. No. 5	15
Garlicky	10
Weed Control Law (where required by § 1421.25)	10

V 41 165
AUG 24 76
UMI

Other factors. Amounts determined by CCC to represent market discounts for quality factors not specified above which affect the value of the barley, such as (but not limited to) thin barley, moisture, foreign material, test weight, heat damage, musty, sour, smutty, stained, weevily, ergoty, and bleached. Such discounts will be established not later than the time delivery of barley to CCC begins and will thereafter be adjusted from time to time as CCC determines appropriate to reflect changes in market conditions. Producers may obtain schedules of such factors and discounts at county ASCS offices approximately one month prior to the loan maturity date.

NOTE.—Discounts are cumulative except only one grade discount shall be applied. For the purpose of applying discounts, factors which cause barley of the subclass Malting Barley or Blue Malting Barley to have a lower numerical grade than if the barley were graded under a different subclass shall be disregarded.

Effective date: August 24, 1976.

Signed at Washington, D.C., on August 17, 1976.

SEELEY G. LODWICK,
Acting Executive Vice President,
Commodity Credit Corporation.

[CCC Grain Price Support Regs., 1976 Crop Oats Supplement]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

1976 Crop Oats Loan and Purchase Program

On July 3, 1975, notice of proposed rulemaking regarding loan and purchase rates for 1976 crop oats and operating provisions to carry out the 1976 crop oats loan and purchase program was published in the FEDERAL REGISTER (40 FR 28094).

Several responses were received from interested individuals. These responses ranged from requests suggesting an increase in the price support level to extending the maturity date for three years.

After consideration of all responses, and other factors, it has been determined that loan and purchase rates for 1976 crop oats on a national average will be increased to $0.60 per bushel. Support rates at the county level reflect adjustments necessary to reflect changes in rail freight rate structure and historical prices received by farmers by State and district. Loans as in 1975 will not have identical maturity dates but will mature in the case of farm stored loans on demand but not later than the last day of the eleventh calendar month following the month the loan is disbursed, and in the case of warehouse stored loans, on demand but not later than the last day of the eleventh calendar month following the month the warehouse receipt was issued. Other operating provisions for the 1976 crop remain the same as those for the 1975 crop.

The General Regulations Governing Price Support for the 1976 and Subsequent Crops, published at 41 FR 22334, and any amendments hereto, and the 1970 and Subsequent Crops Oats Loan and Purchase Program Regulations, published at 35 FR 8340 and any amendments to such regulations are further supplemented for the 1976 crop oats. CFR § 1421.270 through § 1421.273 and the title of the subpart are revised to read as provided below, effective as to the 1976 crop of oats. The material previously appearing in these sections shall remain in full force and effect as to the crops to which it is applicable.

Subpart—1976 Crop Oats Loan and Purchase Program

Sec.
1421.270 Purpose.
1421.271 Availability.
1421.272 Maturity of loans.
1421.273 Loan and purchase rates.

AUTHORITY: Secs. 4 and 5, 62 Stat. 1070, as amended (15 U.S.C. 714 b and c); Secs. 105, 401, 63 Stat. 1051, as amended (7 U.S.C. 1441 note, 1421).

§ 1421.270 Purpose.

This supplement contains additional program provisions which together with the provisions of the General Regulations Governing Price Support for the 1976 and Subsequent Crops, the 1970 and Subsequent Crops Oats Loan and Purchase Program Regulations, and any amendments thereto, apply to loans on and purchases of the 1976 crop of oats.

§ 1421.271 Availability.

(a) *Loans.* A producer desiring to participate in the program through loans must request a loan on his 1976 crop of eligible oats on or before March 31, 1977.

(b) *Purchases.* Producers desiring to offer eligible 1976 crop oats not under loan for purchase must execute and deliver to the county ASCS office on or before February 28, 1978, a purchase agreement (Form CCC-614) indicating the approximate quantity of 1976 crop oats they will sell to CCC.

§ 1421.272 Maturity of loans.

Loans mature in the case of farm stored loans on demand but not later than the last day of the eleventh calendar month following the month the loan is disbursed, and in the case of warehouse stored loans, on demand but not later than the last day of the eleventh calendar month following the month the warehouse receipt was issued.

§ 1421.273 Loan and purchase rates.

(a) *Basic loan and purchase rates.* County loan and purchase rates for oats and the schedule of premiums and discounts are shown below. The term "county" as used in this subpart with reference to the State of Alaska shall mean "marketing area." Marketing areas in Alaska shall be the areas established under the State small grain incentive program. Farm-stored loans will be made at the basic rate for the county where the grain is stored, adjusted only for the weed control discounts where applicable. The loan and purchase rate for warehouse-stored oats loans shall be the basic rate for the county where the oats are stored, adjusted by the premiums and discounts shown in this section. Notwithstanding § 1421.22(c), settlement for oats delivered from other than approved warehouse storage shall be based (1) on the basic rate for the county in which the producer's customary delivery point is located, and (2) on the quality and quantity delivered as shown on the warehouse receipts and accompanying documents issued by an approved warehouse to which delivery is made, or if applicable, the quality and quantity delivered as shown on a form prescribed by CCC for this purpose. The basic rate applies to oats grading U.S. No. 3, having moisture not in excess of 14 percent.

(b) *Premiums and discounts.* The basic loan and purchase rates shall be adjusted as applicable by premiums and discounts as follows (all footnotes at end of paragraph):

	Cents per bushel
Premiums:[1]	
Grade U.S. No. 1	2
Grade U.S. No. 2	1
Test weight:	
Heavy	1
Extra heavy	2
Discounts:	
Grade U.S. No. 4 on the factor of test weight only but otherwise U.S. No. 3 or better	3
Grade U.S. No. 4 because of being "badly stained or materially weathered"	7
Garlicky	3
Weed control discount (where required by § 1421.25)	10

[1] Premiums shall not be applicable to "badly stained or materially weathered" oats.

(c) *Other factors.* Amounts determined by CCC to represent discounts for quality factors not specified above which affect the value of the oats, such as (but not limited to) low test weight, foreign material, heat damage, percent of sound cultivated oats, wild oats, moisture, sour, stones, musty, ergoty, weevily, smutty, and bleached. Such discounts will be established not later than the time delivery of oats to CCC begins and will thereafter be adjusted from time to time as CCC determines appropriate to reflect changes in market conditions. Producers may obtain schedules of such factors and discounts at county ASCS offices approximately one month prior to the loan maturity date.

Effective date: August 24, 1976.

Signed at Washington, D.C., on: August 17, 1976.

SEELEY G. LODWICK,
Acting Executive Vice President, Commodity Credit Corporation.

[CCC Grain Price Support Reg., 1976 Crop Rye Supplement]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

1976 Crop Rye Loan and Purchase Program

On July 3, 1975, notice of proposed rulemaking regarding loan and purchase rates for 1976 crop rye and operating provisions to carry out the 1976 crop rye loan and purchase program was published in the FEDERAL REGISTER (40 FR 28094).

Several responses were received from interested individuals. These responses ranged from requests suggesting an increase in the price support level to extending the maturity date for three years.

After consideration of all responses, and other factors, it has been determined that loan and purchase rates for 1976 crop rye on a national average will be increased to $1 per bushel. Support rates at the county level reflect adjustments necessary to reflect changes in rail freight rate structure and historical prices received by farmers by State and district. Loans as in 1975 will not have identical maturity dates but will mature in the case of farm stored loans on demand but not later than the last day of the eleventh calendar month following the month the loan is disbursed, and in the case of warehouse stored loans, on demand but not later than the last day of the eleventh calendar month following the month the warehouse receipt was issued. Other operating provisions for the 1976 crop remain the same as those for the 1975 crop.

The General Regulations Governing Price Support for the 1976 and Subsequent Crops, published at 41 FR 22334, and any amendments thereto, and the 1970 and Subsequent Crops Rye Loan and Purchase Program Regulations, published at 35 FR 10355 and any amendments to such regulations are further supplemented for the 1976 crop rye. CFR § 1421.350 through § 1421.353 and the title of the subpart are revised to read as provided below, effective as to the 1976 crop of rye. The material previously appearing in these sections shall remain in full force and effect as to the crops to which it is applicable.

Subpart—1976 Crop Rye Loan and Purchase Program

Sec.
1421.350 Purpose.
1421.351 Availability.
1421.352 Maturity of loans.
1421.353 Loan and purchase rates.

AUTHORITY: Secs. 4 and 5, 62 Stat. 1070, as amended (15 U.S.C. 714b and c) Secs. 105, 401, 63, Stat. 1051, as amended (7 U.S.C. 1441 note and 1421).

§ 1421.350 Purpose.

This supplement contains program provisions which, together with the provisions of the general regulations governing price support for the 1976 and subsequent crops, the 1970 and Subsequent Crops Rye Loan and Purchase Program regulations, and any amendments thereto, apply to loans and purchases with respect to the 1976 crop of rye.

§ 1421.351 Availability.

(a) Loans. A producer desiring to participate in the program through loans must request a loan on his 1976 crop of eligible rye on or before March 31, 1977.

(b) *Purchase.* Producers desiring to offer eligible 1976 crop rye not under loan for purchase must execute and deliver to the county ASCS office on or before February 28, 1978, a purchase agreement (Form CCC-614) indicating the approximate quantity of 1976 crop rye they will sell to CCC.

§ 1421.352 Maturity of loans.

Loans mature in the case of farm stored loans on demand but not later than the last day of the eleventh calendar month following the month the loan is disbursed, and in the case of warehouse stored loans, on demand but not later than the last day of the eleventh calendar month following the month the warehouse receipt was issued.

§ 1421.353 Loan and purchase rates.

(a) *Basic loan and purchase rates (counties).* Basic county rates per bushel for loan and settlement purposes for rye are established for rye grading U.S. No. 2 or better, or U.S. No. 3 on the factor of test weight only and are as follows:

[CCC Grain Price Support Regs., 1976 Crop Wheat Supplement]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Subpart—1976 Crop Wheat Loan and Purchase Program

On July 3, 1975, notice of proposed rulemaking regarding loan and purchase rates for 1976 crop wheat and operating provisions to carry out the 1976 crop wheat loan and purchase program was published in the FEDERAL REGISTER (40 FR 28094).

Several responses were received from interested individuals. These responses ranged from requests suggesting an increase in the price support level to extending the maturity date for three years.

After consideration of all responses, and other factors, it has been determined that loan and purchase rates for 1976 crop wheat on a national average will be increased to $1.50 per bushel. Support rates at the county level reflect adjustments necessary to reflect changes in rail freight rate structure and historical prices received by farmers by State and district. Loans as in 1975 will not have identical maturity dates but will mature in the case of farm stored loans on demand but not later than the last day of the eleventh calendar month following the month the loan is disbursed, and in the case of warehouse stored loans, on demand but not later than the last day of the eleventh calendar month following the month the warehouse receipt was issued. Other operating provisions for the 1976 crop remain the same as those for the 1975 crop.

The General Regulations Governing Price Support for the 1976 and Subsequent Crops, published at 41 FR 22334, and any amendments thereto, and the 1970 and Subsequent Crops Wheat Loan and Purchase Program Regulations, published at 35 FR 8204 and 9106, and any amendments to such regulations are further supplemented for the 1976 crop wheat. CFR § 1421.485 through § 1421.488 and the title of the subpart are revised to read as provided below, effective as to the 1976 crop of wheat. The material previously appearing in these sections shall remain in full force and effect as to the crops to which it is applicable.

Subpart—1976 Crop Wheat Loan and Purchase Program

Sec.
1421.485 Availability.
1421.486 Maturity of loans.
1421.487 Ineligible classes.
1421.488 Loan and purchase rates.

AUTHORITY: Secs. 4 and 5, 62 Stat. 1070, as amended (15 U.S.C. 714b and c); Secs. 107, 401, 63 Stat. 1051, as amended (7 U.S.C. 1445a, 1421).

§ 1421.485 Availability.

(a) *Loans.* A producer desiring to participate in the program through loans must request a loan on his 1976 crop of eligible wheat on or before March 31, 1977.

(b) *Purchases.* Producers desiring to offer eligible 1976 crop wheat not under loan for purchase must execute and deliver to the county ASCS office on or before February 28, 1978, a purchase agreement (Form CCC-614) indicating the approximate quantity of 1976 crop wheat they will sell to CCC.

§ 1421.486 Maturity of loans.

Loans mature in the case of farm stored loans on demand but not later than the last day of the eleventh calendar month following the month the loan is disbursed, and in the case of warehouse stored loans, on demand but not later than the last day of the eleventh calendar month following the month the warehouse receipt was issued.

§ 1421.487 Ineligible classes.

The class, Red Durum Wheat, shall not be eligible for loan or purchase.

§ 1421.488 Loan and purchase rates.

(a) *Basic loan and purchase rates (counties).* Basic rates per bushel for loan and settlement purposes for wheat

are established for wheat grading U.S. No. 1 and are as follows:

14.5 to 14.9	+9
15.0 to 15.4	+10½
15.5 to 15.9	+12
16.0 to 16.4	+13½
16.5 to 16.9	+15
17.0 to 17.4	+16½
17.5 and above	+18
(4) *Weed control discount (where required by § 1421.26)*	10

(5) *Other factors.* Amounts determined by CCC to represent market discounts for quality factors not specified above which affect the value of wheat, such as (but not limited to) moisture, weevily, ergoty, stones, musty, sour, and heating. Such discounts will be established not later than the time delivery of wheat to CCC begins and will thereafter be adjusted from time to time as CCC determines appropriate to reflect changes in market conditions. Producers may obtain schedules of such factors and discounts at county ASCS offices.

NOTE.—Premiums and discounts are cumulative except only one grade discount shall be applied.

Effective date: August 24, 1976.

Signed at Washington, D.C., on August 17, 1976.

SEELEY G. LODWICK,
Acting Executive Vice President,
Commodity Credit Corporation.

Title 24—Housing and Urban Development

CHAPTER II—OFFICE OF ASSISTANT SECRETARY FOR HOUSING PRODUCTION AND MORTGAGE CREDIT—FEDERAL HOUSING COMMISSIONER (FEDERAL HOUSING ADMINISTRATION), DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R-76-411]

PART 260—INTEREST SUBSIDY GRANTS

Final Regulations for Section 802(c)(2) Program; Correction

On August 16, 1976, at 41 FR 34608, the Department published final regulations with respect to the Section 802 (c)(2) program. The effective date of the regulations was inadvertently set as September 15, 1976. It was and is the intent of this Office to make Part 260 effective upon publication in order that applications for the program may be accepted immediately.

Accordingly, the effective date of Part 260, Interest Subsidy Grants, is corrected to read August 16, 1976.

(Sec. 7(d), Department of HUD Act (42 U.S.C. 3535(d); § 802(c)(2), Housing and Community Development Act of 1974 (Pub. L. 93-383, 88 Stat. 633, (42 U.S.C. 1440(c)(2)).)

JAMES L. YOUNG,
Assistant Secretary for Housing.

[FR Doc.76-24722 Filed 8-23-76;8:45 am]

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI 2251]

PART 1914—AREAS ELIGIBLE FOR THE SALE OF INSURANCE

Suspension of Community Eligibility

● The purpose of this notice is to list communities wherein the sale of flood insurance as authorized under the National Flood Insurance Program (42 U.S.C. 4001-4128) will be suspended because of noncompliance with the program regulations (24 CFR Part 1909 et seq.) ●

The Flood Disaster Protection Act of 1973 requires the purchase of flood insurance as a condition of receiving any form of Federal or Federally related financial assistance for acquisition or construction purposes in a flood plain area having special hazards within any community identified by the Secretary of Housing and Urban Development.

The requirement applies to all identified special flood hazard areas within the United States, and no such financial assistance can legally be provided for acquisition or construction in these areas unless the community has entered the program and insurance is purchased. Accordingly, for communities listed under this Part such restriction exists as of the effective date of suspension because insurance, which is required, cannot be purchased.

Section 1315 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4022) prohibits flood insurance coverage unless an appropriate public body shall have adopted adequate flood plain management measures with effective enforcement measures. The communities suspended in this notice no longer meet that statutory requirement. Accordingly, the communities are suspended on the effective date in the list below:

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

Section 1914.4 of Part 1914 of Subchapter B of Chapter X of Title 24 of the Code of Federal Regulations is amended by adding in alphabetical sequence new entries to the table. In each entry, a complete chronology of effective dates appears for each listed community. The date that appears in the fourth column of the table is provided in order to designate the effective date of the authorization of the sale of flood insurance in the area under the emergency or the regular flood insurance program. The entry reads as follows:

§ 1914.4 List of Eligible Communities.

State	County	Location	Effective date of authorization of sale of flood insurance for area	Hazard area identified	Community No.
•	•	•	•	•	•
Oklahoma	Kingfisher	Kingfisher, city of	Dec. 23, 1971, emergency Sept. 30, 1976, regular Oct. 1, 1976, suspended	Apr. 12, 1974	400062
Texas	Galveston	Crystal Beach, town of	Oct. 8, 1971, emergency Sept. 30, 1976, regular Oct. 1, 1976, suspended	Sept. 30, 1976	480243

(National Flood Insurance Act of 1968 (title XIII of the Housing and Urban Development Act of 1968); effective Jan. 28, 1969 (33 F.R. 17804, Nov. 28, 1968), as amended, 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 F.R. 2680, Feb. 27, 1969) as amended 39 F.R. 2787, Jan. 24, 1974.

Issued: August 17, 1976.

RICHARD W. KRUMM,
Acting Federal Insurance Administrator.

[FR Doc.76-24530 Filed 8-23-76;8:45 am]

[Docket No. FI 2253]

PART 1914—AREAS ELIGIBLE FOR THE SALE OF INSURANCE

Status of Participating Communities

● The purpose of this notice is to list those communities wherein the sale of flood insurance is authorized under the National Flood Insurance Program (42 U.S.C. 4001-4128). ●

Insurance policies can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurers Association servicing company for the state (addresses are published at 40 F.R. 57210-212 and 41 F.R. 1062). A list of servicing companies is also available from the Federal Insurance Administration (FIA), HUD, 451 Seventh Street, SW., Washington, D.C. 20410.

The Flood Disaster Protection Act of 1973 requires the purchase of flood insurance as a condition of receiving any form of Federal or Federally related financial assistance for acquisition or construction purposes in a flood plain area having special hazards within any community identified by the Secretary of Housing and Urban Development.

The requirements applies to all identified special flood hazard areas within the United States, and no such financial assistance can legally be provided for acquisition or construction in these areas unless the community has entered the program. Accordingly, for communities listed under this Part no such restriction exists, although insurance, if required, must be purchased.

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

Section 1914.4 of Part 1914 of Subchapter B of Chapter X of Title 24 of the Code of Federal Regulations is amended by adding in alphabetical sequence new entries to the table. In each entry, a complete chronology of effective dates appears for each listed community. The date that appears in the fourth column of the table is provided in order to designate the effective date of the authorization of the sale of flood insurance in the area under the emergency or the regular flood insurance program. These dates serve notice only for the purposes of granting relief, and not for the application of sanctions, within the meaning of 5 U.S.C. § 551. The entry reads as follows:

§ 1914.4 List of Eligible Communities.

[Docket No. FI 2252]

PART 1915—IDENTIFICATION AND MAPPING OF SPECIAL HAZARD AREAS

List of Communities With Special Hazard Areas

• The purpose of this notice is the identification of communities with areas of special flood or mudslide or erosion hazards in accordance with Part 1915 of Title 24 of the Code of Federal Regulations as authorized by the National Flood Insurance Program (42 U.S.C. 4001–4128). The identification of such areas is to provide guidance so that communities may adopt appropriate flood plain management measures to minimize damage caused by flood losses and to guide future construction, where practicable, away from locations which are threatened by flood hazards. •

The Flood Disaster Protection Act of 1973 requires the purchase of flood insurance on and after March 2, 1974, as a condition of receiving any form of Federal or Federally related financial assistance for acquisition or construction purposes in an identified flood plain area having special flood hazards that is located within any community participating in the National Flood Insurance Program.

One year after the identification of the community as flood prone, the requirement applies to all identified special flood hazard areas within the United States, so that, after that date, no such financial assistance can legally be provided for acquisition and construction in these area unless the community has entered the program. The prohibition, however, does not apply to loans by Federally regulated, insured, supervised or approved lending institutions (1) to finance the acquisition of a residential dwelling occupied as a residence prior to March 1, 1976, or one year following identification of the area within which such dwelling is located as an area containing special flood hazards, whichever is later, or made to extend, renew, or increase the financing or refinancing in connection with such a dwelling, (2) to finance the acquisition of a building or structure completed and occupied by a small business concern, as defined by the Secretary, prior to January 1, 1976, (3) any loan or loans, which in the aggregate do not exceed $5,000, to finance improvements to or rehabilitation of a building or structure occupied as a residence prior to January 1, 1976, or (4) any loan or loans, which in the aggregate do not exceed an amount prescribed by the Secretary, to finance nonresidental additions or improvements to be used solely for agricultural purposes on a farm.

The effective date of identification shall be 30 days after the date of publication in the FEDERAL REGISTER. This 30 day period does not supersede the statutory requirement that a community, whether or not participating in the program, be given the opportunity for a period of six months to establish that it is not seriously flood prone or that such flood hazards as may have existed have been corrected by floodworks or other flood control methods. The six months period shall be considered to begin 30 days after the date of publication in the FEDERAL REGISTER or the effective date of the Flood Hazard Boundary Map, whichever is later. Similarly, the one year period a community has to enter the program under Section 201(d) of the Flood Disaster Protection Act of 1973 shall be considered to begin 30 days after publication in the FEDERAL REGISTER or the effective date of the Flood Hazard Boundary Map, whichever is later.

Accordingly, § 1915.3 is amended by adding in alphabetical sequence a new entry to the table, which entry reads as follows:

§ 1915.3 List of communities with special hazard areas (FHBMs in effect).

[Docket No. FI-996]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the Borough of Wormleysburg, Cumberland County, Pennsylvania

The Federal Insurance Administrator, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (§ 1917.10)), hereby gives notice of his final determinations of flood elevations for the Borough of Wormleysburg, Cumberland County, Pennsylvania under § 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the Borough must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to § 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with § 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the Bulletin Board, Municipal Building, 20 Market Street, Wormleysburg.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation, feet above mean sea level	Width in feet from bank of stream to 100-yr flood boundary facing downstream	
			Left	Right
Susquehanna River	Market Street Bridge	320		280
	Walnut Street Bridge	320		380
	Taylor Bridge	321		780
	Confluence with Conodoguinet Creek	321		1,000

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 F.R. 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 F.R. 2680, February 27, 1969, as amended by 39 F.R. 2787, January 24, 1974.)

Issued: August 10, 1976.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

[Docket No. FI-953]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the City of Norton, Virginia

The Federal Insurance Administrator, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (§ 1917.10)), hereby gives notice of his final determinations of flood elevations for the City of Norton, Virginia under § 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the City must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to § 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with § 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the Bulletin Board at City Hall, 618 Virginia Avenue, Norton.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width in feet from bank of stream to 100-yr flood boundary facing downstream	
			Left	Right
Guest River	Northern corporate limits	2,201	(1)	240
	N. & W. Railroad crossing at Lost Creek	2,087	180	185
	Kentucky Avenue	2,078	130	145
	Rose Avenue		180	75
	Chestnut Avenue (Esserville)	2,070	250	70
Clear Creek	Esserville, eastern corporate limits	2,106	120	120
	12th Street (Esserville)	2,083	140	125

[Docket No. FI-1,025]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the City of Richland Hills, Tarrant County, Texas

The Federal Insurance Administrator, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (§ 1917.10)), hereby gives notice of his final determinations of flood elevations for the City of Richlands Hills, Tarrant County, Texas under § 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the City must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to § 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with § 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the Bulletin Board at City Hall, 3200 Diana Drive, Richland Hills, Texas.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

V 41 165 AUG 24 76 UMI

Source of flooding	Location	Elevation, feet above mean sea level	Width in feet from bank of stream to 100-yr flood boundary facing downstream	
			Left	Right
Big Fossil Creek, tributary 3.	Dover Lane	563	20	125

[Docket No. FI-1,003]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the Township of Conyngham, Luzerne County, Pennsylvania

The Federal Insurance Administrator, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (§ 1917.10)), hereby gives notice of his final determinations of flood elevations for the Township of Conyngham, Luzerne County, Pennsylvania under § 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the Township must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to § 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with § 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the Bulletin Board at the Fire Hall, Main Street, Mocanaqua, Pennsylvania.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width in feet from bank of stream to 100-yr flood boundary facing downstream	
			Left	Right
North Branch Susquehanna River.	Northwest corporate limits	528	[2] 340	
	LR 40030 Bridge	522	[2] 220	
	T-436 (extended)	521	[2] 760

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF THE INTERIOR

Geological Survey

[30 CFR Part 211]

COAL MINING OPERATING REGULATIONS

Adoption of Requirements of Wyoming's Reclamation Laws and Requirements

On May 17, 1976, the Department of the Interior adopted new regulations to govern the management of federally owned coal resources. 41 F.R. 20252 (1976). Those regulations established a procedure under which the Secretary of the Interior may decide, through rulemaking, that the Department will approve mining plans in a particular state only if the mining plans would comply with the requirements of state reclamation laws which are as stringent as the reclamation requirements of 30 CFR Part 211. In an advance notice of proposed rulemaking, the Department explained what steps it would take to determine whether it would adopt the requirements of a state's reclamation law. 41 FR 27993 (1976).

The Department has now completed its review of the requirements of the reclamation laws of the State of Wyoming using the procedures explained in the advance notice of proposed rulemaking. The Department has begun, but has not finished reviewing the requirements of other states. This rulemaking proceeding proposes that the requirements of the State of Wyoming's reclamation laws be applied as a condition upon the approval of any proposed federal exploration or mining plan. The proposed rulemaking lists the provisions of Wyoming law which are laws relating to reclamation, and lists the federal regulations that are superseded by the Wyoming requirements.

Title 30 CFR 211.75(a) says:

Section 211.75. *Applicability of State law.* (a) On the effective date of this part, and from time to time thereafter, the Secretary shall direct a prompt review of State laws and regulations in effect, relating to reclamation of lands disturbed by surface mining of coal in each State in which Federal coal has been leased, permitted, or licensed. If, after such review, the Secretary determines that the requirements of the laws and regulations of any such State afford general protection of environmental quality and values at least as stringent as would occur under exclusive application of this part, he shall, by rulemarking, direct that the requirements of such State laws and regulations thereafter be applied as conditions upon the approval of any proposed exploration or mining plan, unless:

(1) The Secretary determines that such application of the requirements of such laws and regulations would unreasonably and substantially prevent the mining of Federal coal in such State, and

(2) The Secretary determines that it is in the overriding national interest that such coal be produced without such application of such requirements. In any such determination of overriding national interest, the Secretary will consult in advance of such determination with the Governor of the State involved.

* * * * *

Table I summarizes the comparison that was made. (The Analytical Criteria used in the Table are illustrative of the requirements of federal law; their use is not intended to change the effect of the regulations). Table II sets out, verbatim, the requirements of Wyoming's laws and regulations that will be adopted. The proposed § 211.76(b), and the column of Table I captioned "Federal Citation (30 CFR Part 211)", list those sections of 30 CFR Part 211 that the Department has concluded are regulations relating to the reclamation of lands disturbed by surface mining of coal. The list consists of 30 CFR 211.40 (a), minus the paragraphs of that section that are directed toward health and safety concerns or purely procedural requirements, rather than reclamation concerns. The omitted paragraphs are 30 CFR 211.40(a) (9), (10), (13)(iii), (14)(ii)(A), (15), (16), (17). The Department determined that the provisions of Part 211 not in § 211.40(a) were not regulations relating to the reclamation of lands disturbed by coal mining either because they (1) were purely procedural requirements; (2) were requirements unrelated to reclamation; or (3) were requirements already included in § 211.40. For example, § 211.10 prescribes what information must be submitted in a mining plan. This assists the Mining Supervisor in determining whether an operator would comply with the substantive reclamation requirements. The section adds no "on-the-ground" requirements, however, and it is primarily a procedural requirement. Similarly, § 211.41(c) *Permanent abandonment*, which states what steps must be taken to properly abandon a mining operation, and which requires backfilling, regrading and revegetating, merely repeats requirements that are also found in the performance standards in § 211.40(a). Omitting § 211.41(c), does not lessen the operator's reclamation duties. The Department has also decided that the procedures in 30 CFR 211.74, *Variances* are not regulations relating to reclamation of lands disturbed by surface mining of coal, and they will not be superseded by this rulemaking. Both Wyoming's rules and regulations and the Department's regulations have procedures that allow an operator to vary from a reclamation requirement if the variation is essential to achieve the desired post-mining use of the reclaimed lands. Wyoming treats this type of problem in the text of its reclamation requirements; the Department treats it in a separate section. If the Department adopts the reclamation requirements of Wyoming's laws and regulations, as proposed by this rulemaking, it will grant variances from the reclamation requirements only after consideration of the requirements of Wyoming law, but will use the procedures in 30 CFR 211.74 to process the request for a variance. The Department will consult with Wyoming in deciding whether to grant a variance.

The comparison in Table I shows that the requirements of Wyoming's laws and regulations are equal to or greater than those in 30 CFR Part 211 in every instance except one, the requirement for limiting access to protect the reclaimed land from grazing. This "deficiency" is minimized by other provisions which ensure that overall general environmental protection is at least as stringest as under Federal regulations. The requirements that were reviewed are substantive not procedural requirements. Those aspects of procedure which relate to the administration and enforcement of reclamation operations are not a part of this rulemaking, but may be covered as part of agreements made under 30 CFR 211.75 (b). The procedures that will be used in deciding whether to approve a mining plan are federal procedures.

After reviewing the comparison, the Task Force (1) made a preliminary recommendation that the requirements of Wyoming's reclamation laws provided general environmental protection at least as stringent as would occur under 30 CFR Part 211, and (2) determined that application of these laws and regulations as a condition to federal approval of mining and exploration plans would not unreasonably and substantially prevent the mining of federal coal in Wyoming.

The Secretary reviewed the Task Force's conclusions and directed that this notice of proposed rulemaking be published. The proposed rulemaking adds a new section, § 211.76 to 30 CFR Part 211. Paragraph (a) of the new section lists the requirements of Wyoming's reclamation laws and regulations that will be made a condition to federal approval of a mining or exploration plan under 30 CFR Part 211. Paragraph (b) lists the sections of Part 211 that are replaced by the requirements of Wyoming's laws and regulations. Paragraph (c) says that the Department may, through rulemaking, terminate the application of the requirements in § 211.76(a) if changes in

the requirements of either Federal or State law make that application inconsistent with 30 CFR 211.75(a). Before the regulations are finally adopted, the Department, and the State of Wyoming will have to execute a memorandum of understanding to cover how they will act on changes in Federal or State laws or regulations. This agreement will be published along with the final rulemaking.

This rulemaking also includes two proposed technical amendments to Part 211. The first technical amendment corrects a drafting error in § 211.40(a)(2). The last sentence of that section is a variance procedure, not a performance standard and it should have been included in § 211.74. The proposed amendment corrects this error. The second technical amendment separates the health and safety aspects of § 211.40(a)(14)(ii) from the reclamation aspects of that section. When the proposed rulemaking refers to either § 211.40(a)(2), or § 211.40(a)(14)(ii), or § 211.74, the reference is to those sections as amended by these technical amendments.

Although the proposed rulemaking does not attempt to amend 43 CFR Subpart 3041, the Department would like to clarify that the reclamation requirements of that section will be administered consistently with the changes made in Part 211 as the result of this rulemaking. If necessary, this will include making appropriate changes in the language of Subpart 3041.

The environmental impacts of this proposed action are discussed in the final Environmental Impact Statement, Surface Management of Coal Resources (43 CFR Part 3041) and Coal Mining Operating Regulations (30 CFR Part 211) (1976). NEPA does not require, and the Department will not prepare, a separate impact statement for this action.

The Department will conduct a public meeting on this proposed rulemaking during the week of September 20, 1976, in Cheyenne, Wyoming. The exact time and place of the hearing will be announced shortly. Any person who wishes to testify at the hearing should notify the Chief, Office of Public Affairs, Bureau of Land Management, Cheyenne, Wyoming 82001, (Tel. no. (307)–778–2220). The meetings will be open to the public. Depending upon the number of people desiring to be heard, the Chairperson may limit the amount of time available for each statement. Accordingly, those wishing to make an oral statement should plan to limit their remarks to 15 minutes. Additionally, such remarks should be reduced to writing and at least two copies filed with the Chairperson at the meetings. Individuals desiring to present extended remarks or written comments only for the record may do so at the meetings through the filing of at least two copies.

In addition, the Department will accept written comments on the proposed rulemaking until October 26, 1976. As the advance notice of proposed rulemaking stated, the comment period will not be extended. Please send your comments to Deputy Under Secretary Lyons, Chairman, Task Force on the Adoption of Requirements of State Reclamation Laws, Department of the Interior, Washington, D.C. 20240.

Dated: August 19, 1976.

JOHN KYL,
Acting Secretary,
U.S. Department of the Interior.

1. The Department of the Interior proposes to amend Title 30 CFR Part 211:

(a) By deleting the last sentence of 30 CFR 211.40(a)(2), and revising and renumbering 30 CFR 211.40(a)(14)(ii). As amended § 211.40 (a)(2) and (a)(14)(ii) reads as follows:

§ 211.40 Operating and reclamation standards.

(a) * * *

(2) The operator shall replace overburden and waste materials in the mined area by backfilling (compacting where necessary, to ensure stability or to prevent leaching of toxic materials), grading, or other means, so as to cover all acid-forming or other toxic materials, eliminate highwalls and spoil piles and restore the approximate original contour. Where the thickness of the coal deposits relative to the volume of overburden and other spoil and waste materials are either insufficient or more than sufficient to restore the approximate original contour, the operator shall, in order to provide adequate drainage, backfill, grade, and, where necessary compact using all available overburden or spoil material, to obtain the lowest practicable grade, which shall in any event be less than the angle of repose. Excess overburden or other spoil material shall be fully reclaimed in accordance with the requirements of this part;

* * * * *

(14) * * *

(ii) Provide warning signs, fencing, flagman, barricades and other safety and protective measures as may be necessary to regulate public access, vehicular traffic, and wildlife or livestock grazing in all areas of active operations, including lands undergoing reclamation:

(A) To protect the public, wildlife and livestock from hazards associated from such operations; and

(B) To protect revegetated areas from unplanned and uncontrolled grazing.

* * * * *

(b) By Amending 30 CFR 211.74(e) to read as follows:

§ 211.74 Variances.

* * * * *

(e) An operator may apply for a variance pursuant to the provisions of paragraph (a) of this section only by submitting a new or revised mining plan to the Mining Supervisor pursuant to the provisions of this Part. Variance from the requirements of subdivision (i) and (ii) of § 211.40(a)(2) may be allowed in an approved mining plan if the Director of the Geological Survey, with the concurrence of the Director of the Bureau of Land Management or the comparable appropriate authorized officer, determines that unusual physical conditions at the site, such as steeply dipping coal beds or multiple seam mining exists and such conditions make backfilling pursuant to such requirements impracticable as a result of the volume of material excavated or environmentally undesirable as a result of the duration of the operation. Minor changes of operations which do not involve violations of the performance standards set forth in this part, and the granting of a variance pursuant to this § 211.40(a)(2), will not be deemed to be subject to or require compliance with, the provisions of this section.

* * * * *

Adding a new § 211.76 to read as follows:

§ 211.76 Applicability of the requirements of Wyoming's Reclamation Laws and Regulations.

(a) Pursuant to § 211.75(a) the Secretary has determined that federal approval of a mining or exploration plan in Wyoming required by this Part 211 will be granted only if the plan would comply with the requirements of Wyoming's reclamation laws and regulations that are listed in subparagraphs (1)–(10) of this paragraph:

(1) Wyo. Stat. 35.502.3(e)(i);
(2) Wyo. Stat. 35.502.21(a)(i)–(vi);
(3) Wyo. Stat. 35.502.24:1;
(4) Wyo Stat. 35.502.32(b)(ii)–(ix);
(5) Wyo. Land Quality Reg. II–1b;
(6) Wyo. Land Quality Reg. II–2a(1), (2);
(7) Wyo. Land Quality Reg. II–3–5;
(8) Wyo. Land Quality Reg. III–1–4, 6–7;
(9) Wyo. Land Quality Reg. IV–1;
(10) Wyo. Land Quality Reg. VIII–1

(b) Paragraph (a) of this section supersedes the requirements of the following sections in this Part 211:

(1) 211.40(a)(1)–(8);
(2) 211.40(a)(11)–(13)(ii);
(3) 211.40(a)14(ii)(B)

(c) This section remains in effect until the Secretary determines, through rulemaking, and in accordance with a memorandum of understanding with the State of Wyoming that:

(1) The requirements of Wyoming's reclamation laws and regulations fail to provide general protection of environmental quality and values at least as stringent as would occur under the exclusive application of this Part; or

(2) The requirements of Wyoming reclamation laws and regulations unreasonably prevent the mining of federal coal and it is in the overriding national interest that the coal be produced without application of the requirements listed in paragraph (a) of this section.

WYOMING

TABLE 1.—*Comparison of requirements of Federal-State reclamation laws and regulations*

Analytical criteria	Federal citation (30 CFR pt. 211)	State citation (chapter/section)	Comments	Stringency of protection
A. Timing and objectives of reclamation:				
1. Contemporaneously as practicable with operations.	211.40(a)(1)	IV-1 II-1b 35-502.21(a) (i)-(iii)	Under State law reclamation must begin as soon as possible and continue concurrently.	Equal.
2. To a condition capable of supporting prior uses		35-502.32(b)(ix) II-4a(3)		
B. Restoration of approximate original contour	211.40(a)(2)	II-2a (1), (2) 35-502.21(a)(ii) 35-502.3(e)(i) II-3 35.502.32 (v), (vi)	Federal regulations require elimination of a highwall unless a variance is allowed. State regulations provide that a stabilized highwall may be left if a water impoundment is approved in the reclamation plan.	Equal.
1. Replace overburden in the mined area by backfilling, grading, or other means.				
2. Eliminate highwalls				
3. Eliminate spoil piles				
4. Restore the approximate original contour				
C. Stabilize and protect surface areas affected by coal mining and reclamation.	211.40(a)(3)	II-2a (1), (2) II-5c(2) 35-502.3(e)(i)	State regulations do not explicitly require operator to protect and stabilize all mined areas, but the requirement is implicit in other sections.	Equal.
1. Control slides, erosion, subsidence, and attendant air and water pollution.				
D. Topsoil handling, replacement	211.40(a)(4)	35-502.21(a)(v) II-4(a) (1), (2) II-4(b)1	No significant differences	Equal.
1. Remove topsoil separately				
2. Stockpile topsoil if not used immediately				
3. If topsoil is stockpiled for lengthy period, use vegetative cover to protect from wind and water erosion.				
4. If topsoil is poor in quantity or quality, use best suitable material available for revegetation.				
5. Replace topsoil on backfilled areas				
E. Revegetation	211.40(a)(13)	II-5 II-3(b)(3) 35-502.21(a)(iv) 35.502.32(vii)	State exempts land which did not contain vegetation prior to disturbance; State requires test plots for substitute species.	State.
1. Establish diverse vegetative cover, native to the area on regraded areas and all other affected lands which is capable of regeneration and plant succession.				
2. Establish vegetative cover at least equal in density and permanence to the native vegetation.				
3. Use of approved mixtures of introduced or native species where preferable.				
F. Hydrologic management of water impoundments, retention facilities, dams, and settling ponds.	211.40(a)(5)	II 2 III 6 35-502.24.1	Both State and Federal regulations have similar requirements for management of water impoundments. State regulations are silent on use of mine or process wastes in construction of water facilities, but require prior approval by the State engineering office.	Equal.
1. Assure the water facilities are adequate for intended purpose and that water quality and quantity is adequate.				
2. Assure that water facilities are designed according to sound engineering standards and practices.				
3. Assure that grading of water facilities provides adequate access for proposed water uses.				
4. Assure that mine and process wastes are not used in construction of water facilities.				
5. Minimize disturbances to prevailing quality, quantity, and flow of water in surface and ground systems.				
G. Minimize disturbances to prevailing quality, quantity, and flow of water in surface and ground systems at mine site and offsite by:	211.40(a)(7)	III 1-3	Federal Regulations require best practicable commercial technology to minimize, control, or prevent disturbances to ground and surface water systems. State regulations are more specific on standards for diversion ditches.	Equal.
1. Control acid or toxic drainage				
2. Minimize contributions of suspended solids to streamflow or runoff.				
3. Unless authorized do not deepen or enlarge stream channels.				
4. Remove or modify siltation structures after disturbed areas are revegetated and stabilized.				
5. Protect the quality, quantity, and flow of both upstream and downstream surface and ground water resources of valley floors with significant vegetation.				
H. Handling of toxic materials	211.40(a) (2), (5), (6), (8)	III 1-3 35-502.32(b), (iii), (iv)	State provides that auger holes may be plugged if they are a source of pollution.	Equal.
1. Cover or plug auger holes to minimize harmful drainage.				
2. Minimize air and water pollution by treating or disposing of rubbish and noxious substances.				
3. Cover acid-forming or toxic materials				
4. Control acid or toxic drainage to protect water quality.				
I. Roads, pipelines, powerlines, etc	211.40a (11), (12)	VIII 1	Provided for.	Equal.
1. Roads, etc. shall be designed to applicable standards.				
2. Roads, etc., shall be removed in an environmentally acceptable manner when no longer necessary.				
3. Roads shall not be surfaced with acid or toxic substances.				
4. Roads shall not be constructed in a stream nor shall a stream bed be used as a road.				
J. Limit access to protect reclaimed areas	211.40(a)14	II-5	State requires protection by fencing, or other techniques, for two years or until vegetation is capable of renewing itself.	Federal.
1. Protect revegetated areas from unplanned and uncontrolled grazing by providing fencing, barricades, and other protective measures.				

TABLE II—APPLICABLE PROVISIONS OF WYOMING'S LAWS AND REGULATIONS

WYOMING STATUTES

(1) § 35-502.3.

(e) Specific definitions for land quality:

(i) "Reclamation" means the process of reclaiming an area of land affected by mining to use for grazing, recreational, wildlife purposes, or any other purpose of equal or greater value. The process may require contouring, terracing, grading, resoiling, revegetation, compaction, and stabilization, settling ponds, water impoundments, diversion ditches, and other water treatment facilities in order to eliminate water diminution to the extent that existing water sources are adversely affected, pollution, soil and wind erosion, or flooding resulting from mining or any other activity to accomplish the reclamation of the land affected to a useful purpose;

(2) 35-502.21. *Establishment of standards.*

(a) The council shall, upon recommendation by the advisory board, establish rules and regulations pursuant to the following reclamation standards for the affected areas, including but not limited to:

(i) The highest previous use of the affected lands, the surrounding terrain and natural vegetation, surface and subsurface flowing or stationary water bodies, wildlife and aquatic habitat and resources, and acceptable uses after reclamation including the utility and capacity of the reclaimed lands to support such uses;

(ii) Backfilling, regarding or recontouring to assure the reclamation of the land to a use at least equal to its highest previous use;

(iii) A time schedule encouraging the earliest possible reclamation program consistent with the orderly and economic development of the mining property;

(iv) Revegetation of affected lands including species to be used, methods of planting and other details necessary to assure the development of a vegetative cover consistent with the surrounding terrain and the highest prior use standards set out in subparagraph (i) of this paragraph;

(v) Stockpiling, preservation and reuse of topsoil for revegetation, unless it can be demonstrated to the satisfaction of the administrator that other methods of reclamation or types of soil are superior;

(vi) Prevention of pollution of waters of the State from mining operations, substantial erosion, sedimentation, landslides, accumulation and discharge or acid water, and flooding, both during and after mining and reclamation;

(3) § 35-502.24:1. *Water impoundments.*

(a) In any plan for the creation of a permanent water impoundment the applicant must adequately demonstrate that:

(i) The size of the impoundment, contouring and revegetation, if any, are suitable for its intended purpose and use;

(ii) Final grading will provide adequate safety and access for proposed water users;

(iii) The impoundment dam construction will be so designed to insure permanent stability and to prevent safety hazards.

(4) § 35.502.32. *Duties of operator.*

(b) The operator, pursuant to an approved surface mining permit and reclamation plan, shall:

(i) • • •

(ii) Conduct all surface mining and reclamation activities within the permit area in conformity with his approved plan;

(iii) Protect the removed and segregated topsoil from wind and water erosion, and from acid or toxic materials, and preserve such in a usable condition for sustaining revegetation when restored in reclamation, or if topsoil is virtually non-existent or is not capable of sustaining vegetation, then subsoil, which is available and suitable, shall be removed, segregated, and preserved in a like manner as may be required in the approved reclamation plan;

(iv) Cover, bury, impound, contain or otherwise dispose of toxic acid-forming, or radioactive material or any material determined by the administrator to be hazardous to health and safety, or which constitutes a threat of pollution to surface or subsurface water as may be required in the approved reclamation plan;

(v) Conduct contouring operations to return the land to the use set out in the reclamation plan;

(vi) Backfill or grade, and replace topsoil, or approved subsoil, which has been segregated and preserved as may be required in the approved reclamation plan;

(vii) Replace, as nearly as possible, native or superior self regenerating revegetation on land affected, as may be required in the approved reclamation plan;

(viii) Prevent, throughout the mining and reclamation operation, and for a period of five years after the operation has been terminated, pollution of surface and subsurface waters on the land affected by the institution of plantings and revegetation, the construction of drainage systems and treatment facilities including settling ponds and the casing, sealing of boreholds, shafts, and wells so that no pollution is allowed to drain untreated into surface or subsurface water in accordance with state of federal water quality standards, whichever are higher, as may be required in the approved reclamation plan;

(ix) Reclaim the affected land as mining progresses in conformity with the approved reclamation plan.

WYOMING LAND QUALITY RULES AND REGULATIONS

(1) *Wyoming Land Quality Regulations.* II-1b.

b. Land uses—Previous uses of affected lands must be ranked on an individual basis according to the overall economic or social value of the land use to the community or area in which these lands are found.

(1) Reclamation shall restore the land to a condition equal to or greater than the "highest previous use." The land, after reclamation, must be suitable for the previous use which was of the greatest economic or social value to the community or area, or must have a use which is of more economic or social value than all of the other previous uses.

(2) The administrator of the Land Quality Division shall bear the responsibility of making a decision on the ranking of land uses in a particular area. This decision must be based on information concerning the economy of the area and the needs and desires of the people living thereon. The Land Quality Advisory Board may be consulted for suggestions or recommendations on the ranking of land uses in a given area.

(3) Operators are required to restore wildlife habitat, whenever possible, on affected land in a manner commensurate with or superior to habitat conditions which existed before the land became affected, unless the land is used for a recreational or agricultural purpose which precludes its use as "wildlife habitat."

(4) Water impoundments used for recreational purposes shall be constructed in accordance with the statutes and Chapter III, Section 6, of these regulations. Recreational lands, other than water impoundments, represent changes in the land which may or may not be suitable for wildlife habitat.

(2) *Wyoming Land Quality Regulation:* II-2a(1), (2).

SEC. 2. *Methods of mining—Reclamation required*—Surface reclamation of affected lands shall meet the following requirements for soft rock surface mining, hard rock surface mining and underground mining as described separately below:

a. Soft rock surface mining.

(1) If the reclamation plan does not provide for a water impoundment, the final pit area shall be backfilled, graded and contoured to the extent necessary to return the land to the use specified in the approved plan. In preparation of slope specifications in the plan, the operator shall consider an average of the measured slopes in the immediate area of the proposed mine site. The maximum inclination of slopes in the reclaimed area shall not be greater than the average inclination of the natural slopes in the immediate mine area. Slopes greater than the average natural slopes may be approved if the operator can demonstrate to the satisfaction of the administrator that returning the mined area to a slope equal to or less than the average natural slopes would create an unwarranted increase in the amount of affected lands. Individual slope measurements, locations of the measurements, and the average measurement shall be submitted with the reclamation plan. In determination of the average natural slope, the Land Quality Division may make an independent slope survey. All backfilling, grading, and contouring will be done in such a manner so as to preserve the original drainage or provide for approved adequate substitutes. No depressions to accumulate water will be permitted unless approved in the reclamation plan as being consistent with the proposed future use of the land.

Terraces or benches may be used only when it can be shown to the administrator's satisfaction that other methods of contouring will not provide the required result. If terracing is proposed, detailed plans indicating the dimensions and design of the terraces, check dams, any erosion prevention techniques, and slopes of the terraces and their intervals will be required.

(2) If the reclamation plan provides for a water impoundment and this use has been approved according to the requirements outlined in these regulations, the exposed pit areas must be sloped, graded, and contoured so as to blend with the topography of the surrounding terrain and provide for access and revegetation. Riprapping where necessary to prevent erosion will be required. Sloping requirements will be as described above. Under certain conditions wherein it can be demonstrated to the administrator's satisfaction that the pitwall can be stabilized by terracing or other techniques it may be permissible to leave not more than one half (½) of a proposed shoreline composed of the stabilized pitwall. The remaining portion of the shoreline must be graded and contoured so as to provide access and blend in with the topography of the surrounding terrain. In the event that a partial pitwall is proposed as final reclamation, the operator must submit a detailed explanation of the techniques to be used to establish the stability of the pitwalls in his reclamation plan. At the administrator's discretion, a study of the proposed pitwall stabilization techniques may be required from an independent engineering company for purposes

V 41 165 AUG 24 76 UMI

of verifying the effectiveness of the proposed stabilization techniques. The Land Quality Division will determine the acceptability of the proposed stabilization techniques based on this information and an on-site inspection.

(3) *Wyoming Land Quality Regulations.* II–3–5.

SEC. 3. *Surface preparation.* Backfilling, grading, and contouring of affected land shall be accomplished by one or more of the following as detailed in the approved reclamation plan:

a. Re-establishment of the contour of the land in a manner consistent with the proposed future use of the land.

b. Re-establishment of adequate through drainage if such a provision is necessary to prevent erosion, pollution or the accumulation of stagnant water.

c. Contouring of affected land to blend in with the topography of the surrounding terrain unless so doing would create an erosion problem or a hazard to man or beast.

d. Creation of water impoundments for a use certified in an approved plan in accordance with the statutes and Section 6, Chapter II, of these Regulations.

SEC. 4. *Topsoil, subsoil, overburden, and refuse.*

a. *Topsoil.* Topsoil, or an approved substitute, shall be evenly distributed on the surface of all lands affected during the course of the operation. Topsoil shall be so placed during the reclamation of all areas that are to be revegetated in accord with the approved reclamation plan.

(1) All topsoil or approved surface material shall be removed from all areas to be affected in the permit area prior to these areas being affected. The topsoil shall be segregated so as not to become mixed with subsoil and other overburden material, stockpiled in the most advantageous manner and saved for reclamation purposes.

(2) The topsoil or approved surface material shall be stockpiled in such a manner so as to minimize wind and water erosion. In order to accomplish this, the operator shall establish, through planting or other acceptable means, a quick growing cover of vegetation on the topsoil stockpiles. The topsoil shall also be protected from acid or toxic materials, and shall be preserved in a usable condition for sustaining vegetation when placed over affected land.

(3) Reclamation shall follow mining as soon as is feasible so as to minimize the amount of time topsoil must be stockpiled. If topsoil has been stored in a stockpile in excess of one year, the operator shall conduct soil analyses prior to use in order to determine its suitability for revegetation.

(4) Topsoil stockpiles shall be marked with a legible sign containing letters not less than six inches high on all approach roads to such stockpiles. Said signs shall contain the word "Topsoil" and shall be placed not more than 150 feet from any and all stockpiles of topsoil. Such signs must be in place at the time stockpiling is begun.

(5) The operator shall explain how the topsoil will be replaced on the affected land during reclamation, and shall indicate on his maps the location and sizes of all proposed topsoil stockpiles. This explanation shall include a description of the thickness of soil material to be placed over the affected land.

(6) If abundant topsoil is present, and it is not all needed to accomplish the reclamation required in the approved reclamation plan, the administrator may approve of use of this topsoil by this or another operator in another area for reclamation purposes.

(7) Trees, large rocks and other waste material which may hinder redistribution of topsoil shall be separated from the topsoil before stockpiling.

b. *Subsoil.* (1) If no topsoil is present in the permit area, or in the event that an operator must use subsoil for final cover, the operator shall obtain an adequate number of analyses of the subsoil to show pH, organic material content, available nitrogen, potassium, and phosphorus and such other elements and soil constituents as the administrator shall require, over the entire area of subsoil to be used, in order to determine suitability and fertilizer requirements. If the results of said analyses demonstrate to the satisfaction of the administrator that revegetation can be accomplished using such subsoil, the administrator may approve the use of such subsoil as an addition to or substitute for topsoil for reclamation purposes. The administrator shall require the operator to set up revegetation test plots using subsoil in order to determine the suitability of subsoil for revegetation purposes. Approval for the use of subsoil shall be obtained by the operator from the administrator prior to any mixing of topsoil and subsoil and prior to beginning any reclamation work. If the operator suspects that this procedure will be necessary prior to obtaining a permit he should describe the problem and his proposed procedure for eliminating this problem in his reclamation plan. If the problem is not discernible until after the permit is issued, an approved amendment to the reclamation plan will be required describing the operator's plans for accomplishing the above.

(2) Subsoil stockpiles shall be segregated from topsoil and overburden piles and shall be marked with a legible sign containing the word "Subsoil" in letters no less than six inches high on all approach roads to such stockpiles. Said sign or signs shall be placed not more than 150 feet from all stockpiles of subsoil. Such signs shall be placed at the time stockpiling is begun.

(3) The operator shall indicate on his maps the location of all subsoil piles.

(4) If subsoil is to be used in reclamation as a substitute for topsoil, all large rocks and other waste material which may hinder redistribution shall be separated before stockpiling.

(5) If all or some subsoil is not to be used in reclamation as a substitute for or additive to the topsoil, this unused subsoil must be regarded as all other overburden material and will be subject to the reclamation provisions described under the following section.

c. *Overburden, spoil and refuse.* (1) All overburden, spoil material and refuse shall be segregated from the topsoil and subsoil and stockpiled in such a manner to facilitate the earliest reclamation consistent with the approved reclamation plan.

(2) All overburden, spoil material, and refuse piles must be designed, graded, and contoured so as to blend in with the topography of the surrounding terrtain. (Slope requirements will depend on an everage of the slopes in the surrounding area as described in Chapter II, Section 2a. (1) and on the nature of the material.) After the grading and contouring of these stockpiles, topsoil, or approved subsoil must be distributed over them in preparation for the revegetation procedures. The slopes of all spoil areas must be designed so that they will be stabilized against wind and water erosion. This may include terracing, channeling around the toe of the spoil piles or other techniques. Terracing, if necessary, can be used to stabilize the slopes if it can be shown to the administrator's satisfaction that this technique of stabilization will produce the best results. If terracing is proposed, detailed plans indicating the dimensions and design of the terraces, check dams, erosion prevention techniques, slopes of the terraces, and terrace intervals will be required. The terrace design must be based on sloping requirements and the nature of the material involved.

(3) Piles of spoil material or other waste shall be marked with a legible sign containing the word "Spoil" or the words "Waste Material" in letters no less than six inches high on all approach roads to such spoil piles. Said sign or signs shall be placed not more than 150 feet from all stock piles. Such signs shall be in place at the time when piling of spoil or waste material is begun.

(4) All topsoil shall be removed from areas to be used for piling spoil material prior to the beginning of piling this material.

(5) The operator may be required to have analyses made of spoil material in order to determine if it will be a source of water pollution through reaction with leaching by surface water. If it is determined that this condition may exist, the operator shall describe proposed procedures for eliminating this condition.

(6) The operator must also indicate on his maps the location and size of all proposed spoil piles.

SEC. 5. *Revegetation.*

a. Revegetation of all affected lands shall be accomplished in a manner consistent with the approved reclamation plan and the proposed future use of the land.

b. Land which did not support vegetation prior to becoming affected land because of natural soil conditions need not be revegetated unless subsoil from such affected land will support vegetation. The operator shall demonstrate to the administrator's satisfaction that revegetation or reforestation is not possible if he seeks to proceed under the provisions of this Subsection.

c. After backfilling, grading, and contouring and the replacement of topsoil, and/or approved substitute, in such a manner so as to most efficiently accommodate the retention of moisture and control erosion on all affected lands to be revegetated, any fertilizer requirements as determined on the basis of previous analyses must be fulfilled. Seeding which is accomplished by mechanical drilling shall be on the contour unless specific situations dictate that other methods of seeding should be used.

d. The species of plants (grasses, legumes, forbs, shrubs, and trees seeding rates, seeding techniques, mulching requirements, and seeding times to be used in a given area for reclamation purposes shall be in accordance with rules, regulations, specifications and standards adopted by the State Conservation Commission and approved by the Land Quality Division. Whenever practicable, the Wyoming Game and Fish Department and the Wyoming Department of Agriculture may be consulted regarding revegetation procedures. The species of vegetation to be used in revegetation efforts shall be described in the reclamation plan indicating the composition of seed mixtures and the amount of seed to be distributed on the area on a per acre basis. Seed types will depend on the climatic and soil conditions prevailing in the permit area and the proposed use of the land after reclamation. Species to be planted as permanent cover shall be self-renewing. Seeding rates will depend on seed types, climatic and soil conditions and the techniques to be used in seeding.

e. More suitable species of vegetation may be substituted if revegetation test plot results show such species to be of superior value for reclamation purposes. Requests to substitute such species shall be made in writing to the administrator. The administrator shall inspect such test plots before approval or disapproval of the request.

f. The administrator shall not release the entire bond of any operator until such time as revegetation is complete, if revegetation is the method of reclamation as specified in the operator's approved reclamation plan. Revegetation shall be deemed to be complete when the vegetative cover of the affected land is shown to be capable of renewing itself under natural conditions prevailing at the site, and is at least of a density comparable to undisturbed areas in the immediate vicinity of the reclaimed land. Revegetation should be capable of withstanding grazing pressure at least comparable to that which the land could have sustained prior to mining, unless federal, state or local regulations prohibit grazing on such lands. If reforestation is the method of revegetation used, reforestation shall be deemed to be complete at such time as seventy-five (75%) of the seedings planted have shown themselves capable of continued growth over a period of five (5) years following planting. Quality and quantity of vegetative cover shall be determined in accordance with scientifically acceptable sampling procedures.

g. Any plans for irrigation must meet state laws for this use and be explained in the reclamation plan.

h. The operator must protect young vegetative growth from being destroyed by livestock by fencing or other approved techniques for a perfod of at least two (2) years, or until the vegetation is capable of renewing itself without supplemental irrigation or fertilization.

i. In those areas where there are no or very few noxious weeds prior to being affected by mining the operator must control and prevent the introduction of noxious weeds into the revegetated areas for a period of at least five (5) years after the initial seeding.

(4) *Wyoming Land Quality Regulation.* III–1–4, 6–7.

SECTION 1. *Temporary diversion of surface water.*

a. Surface water shall be diverted around the operation for the following purposes:

(1) To control water pollution.

(2) To control unnecessary erosion.

(3) To protect the on-going operation.

(4) To protect the water rights of downstream users.

b. Temporary diversion ditches shall be built to the following standards:

(1) In soils or other unconsolidated material, the sides of diversion ditches shall be no steeper than one and one-half to one (1½ : 1).

(2) In rock, the sides of diversion ditches shall not overhang.

(3) In soils or unconsolidated materials, the sides and in ditches carrying intermittent discharges, the bottom shall be seeded with approved grases so as to take advantage of the next growing season.

(4) Rock riprap, concrete, soil cement or other methods shall be used where necessary to prevent unnecessary erosion.

(5) Culverts or bridges shall be installed where necessary to allow access by the surface owner for fire control and other purposes.

c. In no case shall diversion ditches discharge upon topsoil storage areas, spoil or other unconsolidated material such as newly reclaimed areas.

d. A description of surface water diversion systems must be included in the mining plan and reclamation of these systems must be described in the reclamation plan.

SEC. 2. *Diversion of streams.*

a. In no case shall spoil, topsoil, or other unconsolidated material be pushed into, or placed below the flood level of a flowing or intermittent stream except during the approved construction of the diversion of said stream.

b. Diversion of a flowing stream classified as navigable shall first be approved by the Wyoming State Engineer.

c. The Wyoming Game and Fish Department shall be consulted prior to diversion or affecting more than 100 feet of bank or channel of a flowing stream.

d. The banks of a diverted flowing intermittent stream shall be protected by vegetation by planting approved species to take advantage of the next growing season.

e. The banks and channel of a diverted flowing or intermittent stream shall be protected where necessary by rock riprap or similar measures to minimize erosion and degradation of water quality.

f. Permanent diversion of a flowing stream must be fully described in the mining or reclamation plan.

g. Mining on the flood plain of a flowing or intermittent stream shall not be permitted if it would cause the uncontrolled diversion of the stream during periods of high water.

h. Waters flowing through or by the mining operation shall meet the standards set by the U.S. Environmental Protection Agency and the Wyoming Water Quality Division in regard to the effect of the operation upon such waters.

SEC. 3. *Surface waters.*

a. The operator shall list and describe the name, location, size, and approximate intermittent flow intervals for the present surface waters in and adjacent to the proposed permit area. The list shall include, but not be limited to, rivers, creeks, lakes, reservoirs, springs, and marshes.

b. Monitoring surface water conditions may be required during the course of the proposed operation based on the existing water conditions and the nature of the proposed operation.

SEC. 4. *Subsurface waters.*

a. The operator shall submit an estimate of the depth and quantity of any subsurface waters existing in the proposed permit area. The operator may be required to conduct test drilling and monitoring in order to determine the exact depth, quantity and quality of groundwater in geological formations affected by the mining operations. Such drilling will require permits from the State Engineer's Office.

SEC. 6. *Water impoundments.*

a. Water impoundments may be considered as final reclamation when it can be shown that their construction is an approved use of the land after reclamation and the proposed impoundments are part of the approved plan in accordance with the provisions of the statutes and these regulations.

b. In order for such impoundments to be considered for approval, the operator must submit the following in support of the proposal:

(1) Written consent from the surface landowner if different than the mineral owner.

(2) A description of the proposed use of the impoundment.

(3) A statement of the source, quality and quantity of water available for impoundment. It must be demonstrated that these characteristics will be consisted with the proposed use.

(4) A statement regarding the suitability for recreational, irrigation, livestock or wildlife watering. Such waters must be suitable for such use as determined by applicable State and Federal standards. The operator may be required to monitor surface and ground waters in order to determine that upon completion of the operation, the water quality and quantity will be consistent with the proposed use.

c. The operator must submit an alternative plan to be followed in the event monitoring indicates there is insufficient water of suitable quality to accomplish the proposed water impoundment plan.

d. All proposed water impoundments and dams to be constructed for reclamation purposed must be approved by the State Engineer's Office.

e. In addition to the above conditions, water impoundment construction will be subject to the following requirements:

(1) Dams must contain an overflow notch and spillway so as to prevent failure by overfilling and washing. Overflow notches and spillways must be riprapped with rock or concrete to prevent erosion.

(2) The slopes around all water impoundments must be gentle enough so as not to present a safety hazard to humans or livestock and so as to accommodate revegetation. Variations from this procedure may be approved by the administrator based on the conditions present at the individual locality.

(3) Mineral seams and other sources of possible water contamination within the impoundment area must be covered with overburden or stabilized in such a manner to prevent contamination of the impounded water.

(4) Bentonite or other mire producing material within the impoundment basin shall be removed or covered with materials which will prevent hazards to man or beast.

SEC. 7. *Tailings impoundments.*

a. Impoundments to contain mill tailings or slurry tailings shall be constructed in accordance with established engineering principles and shall be approved by the Wyoming State Engineer's Office. A copy of the State Engineer's approval shall be attached to the application.

b. Uranium mill tailings impoundments shall be subject to all applicable State and Federal requirements.

c. Reclamation of tailings impoundments shall be accomplished by removal and storage of all topsoil present within the tailings basin. After termination of operations, the topsoil shall be replaced and revegetated in accordance with these rules and regulations.

(1) If other methods of reclamation and stabilization against wind and water erosion are found to be necessary because of natural conditions, this must be stated and described subject to the administrators approval.

(5) *Wyoming Land Quality Regulation.* IV–1.

SEC. 1. *Time schedule.* The approved reclamation plan must be coordinated with the operator's mining plan in such a manner so as to facilitate reclamation at the earliest possible time consistent with the orderly development of the mining property.

a. Reclamation must begin as soon as possible after mining commences and must continue concurrently until such time that the mining operation is terminated and all of the affected land is reclaimed. If conditions are such that final reclamation procedures cannot begin until the mining operation is completed, this must be explained in the reclamation plan. Regardless of the type of operation, reclamation must begin within 180 days after termination of mineral production and must be completed within the time frame of the approved reclamation schedule. A detailed time schedule for the mining and reclamation progression must be included in the reclamation plan. This time schedule shall:

(1) Apply to reclamation of all lands to be affected in the permit area.

(2) Designate times for backfilling, grading, contouring, and reseeding.

(3) Be coordinated with a map indicating the areas of progressive mining and reclamation.

V 41 165 AUG 24 76 UMI

(4) Establish reclamation concurrently with mining operations, whenever possible.
(6) *Wyoming Land Quality Regulation.* VIII–1.

SECTION 1. *Roads and spur railroad lines.*

a. *Enclosure within permit area.* Access roads and railroad spurs shall be considered within the permit area and shall be covered by a reclamation bond. Spur lines shall be included within the permit area to the point where they join the main line or a spur serving another mine. Access and haul roads shall be included within the permit area. Roads maintained by the County, State or Federal Government need not be included in the permit area. Existing private roads must be included in the permit area if substantial upgrading is required.

b. *Upgrading.* Existing private roads need not be included within the permit area with the following exception(s).

(1) When the existing road requires extensive regrading and resurfacing in order to render the road usable.

(2) Upgrading of the road requires cuts, fills, and borrow areas.

c. *Legal ownership.* If the operator includes roads or spur lines within the permit area but does not possess the mineral rights or the right-to-mine, for these lands, the lands shall then be listed in the application as a separate Subsection in Appendix "C", the legal land description. The heading of the Subsection shall make it clear that the right-to-mine is not claimed on the described lands. Surface owners shall be listed for all lands crossed by spur lines and roads.

d. *Standards for roads.*

(1) Roads shall not be constructed up a stream channel or so close that the material shall spill into the channel.

(2) Streams shall be crossed at or near right angles unless contouring down to the stream bed will result in less potential stream bank erosion. Structure or ford entrances and exits must be constructed to prevent water from flowing down the roadway.

(3) A ditch must be provided on both sides of a through cut or a cutfill section, with ditch relief cross drains being spaced according to grade. Water must be intercepted before reaching a switchback or large fill area and diverted from the road. Water on a fill or switchback must be released below the fill or switchback, not over it. Waterbars shall be installed where needed.

(4) Culverts shall be installed at prominent drainageways, small creeks, and springs. Where necessary, culverts must be protected from erosion by adequae rock, concrete or riprap.

(5) Trees and vegetation may be cleared only for the essential width necessary to maintain slope stability and to serve traffic needs.

(6) Drainage facilities shall be installed as road construction progresses.

e. *Exemptions concerning roads.*

(1) If approval is obtained from the surface landowner to leave a road unreclaimed, an operator may request in writing to the Land Quality Division that a road be permitted to remain unreclaimed. The operator must furnish proof of the surface landowner's approval. Final decision of road reclamation will be made by the Land Quality Division Administrator.

(2) In the event that the surface landowner, a city or town, another agency of the State of Wyoming or an agency of the United States Government has approved the proposed access roads and has requested they not be reclaimed, no bond shall be required of the applicant for the reclamation of such roads and reclamation of such roads shall not be required; provided, however, that the administrator receives a copy of the written request from the surface landowner, city or town, or agency of the State or Federal Government, for retention of such roads.

OLIVES GROWN IN CALIFORNIA

Proposed Expenses and Rate of Assessment for 1976–77 Fiscal Year

This notice invites written comments relative to the proposed Olive Administrative Committee expenses of $876,000 and an assessment rate of $14 per ton of assessable olives to support committee activities during the 1976–77 fiscal year (September 1, 1976–August 31, 1977) under Marketing Order No. 932.

Consideration is being given to the following proposal submitted by the Olive Administrative Committee established under the marketing agreement, as amended, and Order No. 932, as amended (7 CFR Part 932), as the agency to administer the order. The agreement and order regulate the handling of olives grown in California, and are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

The proposal is as follows:

(a) That expenses which are reasonable and likely to be incurred by the Olive Administrative Committee during the period September 1, 1976, through August 31, 1977, will amount to $876,000.

(b) That the rate of assessment for that period, payable by each handler in accordance with § 932.39, be fixed at $14.00 per ton of olives.

(c) Terms used in the amended marketing agreement and order shall, when used herein, have the same meaning as given to the respective term in the amended marketing agreement and order.

All persons who desire to submit written data, views, or arguments in connection with this proposal should file them, in quadruplicate, with the Hearing Clerk, United States Department of Agriculture, Room 112–A, Washington, D.C. 20250, not later than September 10, 1976. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

Dated: August 19, 1976.

FLOYD F. HEDLUND,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

VOCATIONAL EDUCATION CURRICULUM

Additional Criteria

Pursuant to the authority contained in section 191 of Part I of the Vocational Education Act of 1963, as amended, 20 U.S.C. 1391, notice is hereby given that the Commissioner of Education, with the approval of the Secretary of Health, Education, and Welfare, proposes to amend Part 103 of Title 45 of the Code of Federal Regulations by revising Appendix C to read as set forth below. The proposed Appendix C would contain additional criteria for selection of applications under the program of support for Vocational Education Curriculum projects for fiscal year 1977.

(a) *Program purpose.* Section 191 of Part I of the Vocational Education Act of 1963, as amended, 20 U.S.C. 1391, provides for Federally-administered grants or contracts for programs and projects for the development of curriculums for new and changing occupations, and for coordination of improvements in, and dissemination of, existing curriculum materials. The purposes of these projects are to: (1) Promote the development and curriculum materials for use in teaching occupational fields, and including those in public service; (2) Develop standards for curriculum development in all occupational fields; (3) Coordinate efforts of the States in the preparation of curriculum materials and also in the preparation of current lists of curriculum materials available in all occupational fields; (4) Survey curriculum materials produced by other agencies of Government, including the Department of Defense; (5) Evaluate vocational-technical education curriculum materials and their uses; and (6) Train personnel in curriculum development.

(b) *Other program information.* The projects are conducted under grants or contracts awarded by the Commissioner of Education, in accordance with the provisions of Part I of the Act and with the applicable Federal regulations, 45 CFR Part 103. Eligible applicants include local educational agencies, State boards for vocational education, and public and private agencies, institutions or organizations. Under departmental policy profit making applicants are eligible only for a contract.

(c) *Regulations and criteria.* Regulations for vocational education discretionary programs were published in the FEDERAL REGISTER on August 15, 1974, 39 FR 29361. Regulations published in the FEDERAL REGISTER on November 6, 1973, 38 FR 30654, relate to general fiscal and administrative provisions for all Office of Education programs. These general regulations contain general criteria for the review of applications under Office of Education project type programs 45 CFR 100a.26 and are applicable to the programs under Part I of the Act.

In addition to the criteria for review of applications already published in the FEDERAL REGISTER, as described above, it is proposed that the additional criteria set forth in proposed Appendix C to the regulations in 45 CFR Part 103 will be applicable in connection with the review of applications for grants to be awarded in fiscal year 1977.

(d) *Written comments.* Interested persons are invited to submit written comments, suggestions, or objections regarding such proposed additional criteria to the Division of Research and Demonstration, U.S. Office of Education, 7th and D Streets, S.W., Room 5042, ROB No. 3, Washington, D.C. 20202, on or before September 23, 1976. Although it is now the practice for the Department to allow 45 days to provide an apportunity for interested persons to take part in the rulemaking process, this notice provides 30 days for the submission of written comments. In accordance with 5 U.S.C. 553(b)(3)(B), it would be impracticable and contrary to the public interest to extend the comment period beyond 30 days in view of the time constraints for completing the award-making process for FY 1977.

Comments received shall be available for public inspection at the above office, Monday through Friday between the hours of 8:30 a.m. and 4:00 p.m. All relevant materials received not later than September 23, 1976 will be considered.

(Catalog of Federal Domestic Assistance Program Number 13.496; Vocational Education—Curriculum)

Dated: August 13, 1976.

WILLIAM F. PIERCE,
Acting U.S. Commissioner of Education.

Approved: August 13, 1976.

MARJORIE LYNCH,
Acting Secretary of Health, Education and Welfare.

APPENDIX C

VOCATIONAL EDUCATION CURRICULUM

FISCAL YEAR 1977

The Office of Education contemplates supporting six project grants for six curriculum coordination centers in fiscal year 1977 program. Two of these awards will be open to competition. Four will be non-competing continuations of grants made in fiscal year 1976 to (1) the Illinois Office of Education; (2) the Oklahoma State Department of Vocational and Technical Education; (3) the Washington State Commission for Vocational Education and (4) the New Jersey Department of Education.

The two new awards will be funded with a three year multi-year approval on a non-competing annual basis, beginning January 1, 1977.

The applicants will submit their project goals and activities for the three-year multi-year period. Multi-year approval is intended to offer the project a reasonable degree of stability over time and to facilitate long range planning. Approval of a multi-year project shall not commit the Office of Education to provide financial assistance from appropriations not currently available; and second and third year funding is contingent on satisfactory performance.

(a) *Awarded applicants' obligation.* One of the three-year awards will provide leadership to curriculum coordination in the Southeast area including Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina and Tennessee. The other three-year award will provide leadership for the Western area including American Samoa, Arizona, California, Guam, Hawaii, Nevada and Trust Territory of Pacific Islands.

Each awardee will be the facilitator in enabling the States in their regional consortium:

(1) Improve their curriculum services and capabilities;

(2) Share information and plans regarding curriculum materials and needs in order to reduce duplication of efforts;

(3) Plan for cooperation in development, testing, evaluation, dissemination, reproduction and implementation of materials; and

(4) Develop and maintain intra-State liaison activities that will stimulate cooperative relationships at State and local levels.

In addition each awardee will become a member of the National Network Council for Curriculum Coordination in vocational and technical education; and as a member each awardee will:

(1) Conduct coordination, dissemination and diffusion activities in order to improve the acceptance of new curriculum products and to assess their impact;

(2) Establish and maintain a system for determining curriculum needs in vocational and technical education based on available manpower projections and the advancement of equity for girls and women in vocational education and for recommending priorities for State and national emphasis;

(3) Share information regarding materials and studies available and under development; and

(4) Provide curriculum services which will encourage the adaptation, demonstration and adoption of effective curricula and curriculum development practices in vocational and technical education in conjunction with business and labor.

The Office of Education will entertain requests for these grants to support:

(1) Communication and coordination activities with the States, the Network, and the U.S. Office of Education.

(2) Travel costs and per diem for the Center personnel to attend two meetings annually of the National Network Council for Curriculum Coordination. One of these meetings will be held in Washington, D.C.

(3) Travel costs and per diem, excluding honoraria, for State representatives to attend meetings sponsored by the center. Each of the six centers will hold a consortium meeting with their State representatives concurrently at a central U.S. location.

(b) Application review criteria. The criteria to be utilized in reviewing applications are listed below. These criteria are consistent with section 100a.26, Review of Applications, in the Office of Education's General Provisions for Programs, published in the FEDERAL REGISTER in 38 FR 30654 on November 6, 1973.

Segments or a segment of the application must address each criterion. Each criterion is weighted to show the maximum score that can be given to each specific criterion. Each criterion and the maximum points possible are as follows:

CRITERIA AND SCORE

(a) *Need and problems*—The application should clearly define the need for the project within the specified consortium of States and should indicate responsiveness to problems rather than symptoms. 15

(b) *Objectives*—The objectives should be clearly stated, supportive of defined needs, capable of being attained by the proposed procedures, and capable of being measured. 15

(c) *Plan*—The management plan should show functions to be performed and services to be provided; and the procedures for accomplishing each are delineated. The size and scope of the project is appropriate and is phased to the multi-year duration of the project. The proposed plan of operation should clearly describe (a) how the objectives will be undertaken and accomplished, (b) how and when personnel and resources will be utilized, (c) what, if any, in-service training connected with project services will be provided, (d) what feedback and evaluation procedures will be implemented and (e) how input from State vocational education administrators will be utilized. 20

(d) *Results*—The proposed outcomes should be identified and described in terms of (1) expected potential for their use for similar educational purposes and (2) anticipated impact at National, State and local levels, and (3) relationships to Federal/National curriculum program. Provisions should be made for disseminating the results of the project including techniques or other outputs to the consortium States and the National Network. 20

(e) *Institutional capability*—Application should clearly set forth current curriculum strengths and the capability of the applicant to immediately initiate and maintain liaison functions with consortium States. There should be evidence that adequate facilities and equipment will be provided and that participation of cooperating States has been authorized. Relationships with other dissemination, diffusion and facilitation systems, if any, should be described. 15

(f) *Personnel*—The qualifications and experience of key staff should be appropriate for the requirements of the project; specific responsibilities and time commitments should be identified for each of the key staff; and at least one key staff person should devote a minimum of 50 percent of their time to the total objectives of the project. 10

(g) *Budget*—The estimated cost should be reasonable in relation to anticipated results and the geographic area, scope, and duration of the project. Where possible anticipated costs by objectives are included. The application should also include a clear statement of cost-sharing which is substantiated by line items in the proposed budget. 5

DEPARTMENT OF LABOR

Employment and Training Administration

[29 CFR Part 97]

DEFERRED DESIGNATION OF POTENTIAL SPONSORS FOR FARMWORKER PROGRAMS

Notice of Proposed Rulemaking

The Secretary of Labor proposes to revise Title III, Section 303 regulations under the Comprehensive Employment and Training Act of 1973, as amended (hereinafter referred to as the Act), (Pub. L. 93–203, 87 Stat. 839 and Pub. L. 93–567, 88 Stat. 1845) by adding a new sentence to 29 CFR 97.215(b).

This proposed amendment is intended to clarify the Secretary's authority to defer designation of potential sponsors pending adequate time to review performance of applicants under their existing CETA section 303 grant, and, in addition, to permit applicants whose funding

V 41 165 AUG 24 76 UMI

requests have been rated as satisfactory by the Secretary to correct deficiencies in their current CETA Section 303 programs.

Comments on this proposed amendment will be received until September 8, 1976, after which the comments received will be evaluated, and if warranted, the proposal will be amended. Interested persons are invited to submit comments, data, or arguments to: Assistant Secretary for Employment and Training, U.S. Department of Labor, 601 D Street, NW, Washington, D.C. 20213, Attention: Pierce A. Quinlan, Administrator, Office of Comprehensive Employment Development.

It is proposed to amend 29 CFR 97 by amending § 97.215 as set forth below:

§ 97.215 Review of Funding Requests.

(a) • • •

(b) *Selection of potential grantees.* (1) As a result of the procedures set forth in paragraph (a) of this section, of consideration of the potential effectiveness and efficiency of the proposed programs, and of comments received pursuant to § 97.214(c), the Secretary shall designate potential grantees to receive a grant under section 303 for program operations in a designated target area. The consideration of the potential effectiveness and efficiency of the proposed programs includes but is not limited to the following: (i) cost effectiveness, and (ii) service delivery consideration.

(2) The Secretary may conditionally designate organizations as potential grantees pending resolution of their eligibility status, submission of additional documentation, or changes in the proposed program. The Secretary also reserves the right to defer designation of any organization which has submitted a Funding Request for a State or area or to invite the submission of new proposals. Such designations will be deferred pending (i) adequate time to consider performance of current CETA Section 303 applicants, or (ii) satisfactory correction of deficiencies by applicants in their current CETA Section 303 programs.

Signed this 12th day of August 1976, at Washington, D.C.

WILLIAM H. KOLBERG,
Assistant Secretary for Employment and Training.

[29 CFR Part 97]

USE OF FARMWORKER GRANT FUNDS TO JOIN ASSOCIATIONS

Notice of Proposed Rulemaking

The Secretary of Labor proposes to revise Title III, section 303 regulations under the Comprehensive Employment and Training Act of 1973, as amended (hereinafter referred to as the Act), (Pub. L. 93-203, 87 Stat. 839 and Pub. L. 93-567, 88 Stat. 1845) by adding a new paragraph, 29 CFR § 97.255(h).

This proposed amendment is intended to make clear that section 303 sponsors are permitted to use grant funds to join associations which serve the professional needs of section 303 program operators, and foster the exchange of technical employment and training information among such professionals; it is also intended to insure that Federal funds will not be used for lobbying or political purposes.

Comments on this proposed amendment will be received until September 23, 1976, after which the comments received will be evaluated, and if warranted, the proposal will be amended. Interested persons are invited to submit comments, data, or arguments to: Assistant Secretary for Employment and Traiming, U.S. Department of Labor, 601 D Street, NW, Washington, D.C. 20013, Attention: Pierce A. Quinlan, Administrator, Office of Comprehensive Employment Development.

It is proposed to amend 29 CFR 97 by amending § 97.255 as set forth below:

§ 97.255 Allowable Federal Costs.

* * * * *

(h) *Association Membership.* (1) CETA Section 303 sponsors are permitted to utilize grant funds to join those associations which provide bona fide, relevant technical and administrative services in support of Section 303 program efforts. The activities of such associations must be designed to contribute to the enhancement of professional and technical program knowledge.

(2) For membership dues or other membership-related costs to be allowable, the following conditions shall be observed: (i) The association's activities shall not violate the Anti-lobbying Act, 18 U.S.C. 1913, which prohibits organizations from using Federal funds "directly or indirectly to pay for any personal service, advertisement, telegram, telephone, letter, printed or written matter, or other device, intended or designed to influence in any manner a Member of Congress, to favor or oppose, by vote, or otherwise, any legislation or appropriation by Congress, whether before or after the introduction of any bill or resolution proposing such legislation or appropriation. * * *"

(ii) The association shall not violate the principles contained in the assurances set forth in the Section 303 sponsor grant package regarding restrictions against political activities for Federal grantees.

(iii) Those organizations substantially involved in lobbying are inappropriate selections for membership by CETA Section 303 sponsors. (See 41 CFR 1-15.711-19.) However, affiliated associations which are offshoots of such lobbying organizations, and whose only activity is to foster information exchanges and professional growth, may be appropriate selections for membership, if it can be demonstrated that their activities are separate from the parent association, and that the affiliate asociation does not contribute to the support of the parent organization.

(3) Sponsors wishing to utilize grant funds for membership in associations must obtain the prior approval of the Secretary before initiating membership procedures. Sponsors should submit documents which show that the association meets the conditions set forth in this paragraph 97.255(h), as well as budget information detailing the sponsor's proposed costs related to the proposed membership.

(4) Sponsors who seek to join an association shall submit (or cause the association to submit) to the Secretary a copy of the corporate charters, bylaws, constitution, or any other pertinent official document which explains the purpose of the association and demonstrates that the association will not be involved in activities which would violate the standards set forth in this paragraph 97.255(h). In the case of an association that is affiliated with an organization which conducts lobbying or political activities, the documentation must demonstrate that the activities of the association to be joined are separate from those of the affiliated organization.

(5) When the use of grant funds for membership in an association has been approved by the Secretary for one Section 303 sponsor, the Secretary will announce the approval and it will thereafter be unnecessary for any other 303 sponsor to submit the documentation required by paragraph (4) above. Each Section 303 sponsor must, however, receive written authorization from the Secretary before joining an approved association.

(6) Sponsor reviews will be conducted by the Secretary to determine that the purposes of such memberships are being carried out, and that program and operations are thereby enhanced.

(7) The cost shall be for Section 303 membership rather than an individual person's membership.

(8) The cost of the membership shall be reasonably related to the value of the services or benefits received. Sponsors are authorized to use up to one-tenth of one percent of their respective Section 303 allocations annually, with a maximum of $750.00 for association-related costs.

(9) Association-related costs shall be incorporated in the sponsor's Section 303 grant budget, charged to the administration category, and as such, shall be subject to the standard 20 percent overall grant administrative cost ceiling.

Signed this 12th day of August, 1976, at Washington, D.C.

WILLIAM H. KOLBERG,
Assistant Secretary for Employment and Training.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

[FRL 603-4]

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Revision to Oregon Implementation Plan

• The purpose of this notice is to announce receipt of proposed revisions to the Oregon State Implementation Plan and to invite public comment as to whether these revisions should be approved by the Administrator of EPA. •

On August 1, 1975, the State of Oregon Department of Environmental Quality (DEQ) submitted, for EPA's approval, revisions to the Oregon plan relating to open field burning. The revisions include the section of the Oregon Revised Statutes relating to field burning, ORS 468.450 through 468.485, passed by the regular session of the 1975 Oregon Legislative Assembly, and a revised regulation for agricultural burning, Oregon Administrative Rules (OAR), Chapter 340, 26-005 through 26-025. In addition, on February 1, 1976, the DEQ submitted further revisions to OAR 26-005 through 26-025 for EPA's approval. The revisions to the OAR, Chapter 340, 26-005 through 26-025 were made after proper notice was given and public hearings were held in accordance with 40 CFR 51.4.

The area most affected by field burning, the Eugene Air Quality Maintenance Area (AQMA), attained primary ambient air quality standards in 1975 at all monitoring stations except one. That station is felt to be unduly influenced by other nearby sources of particulate matter unrelated to field burning. The station will be subject to further evaluation before a final decision is made on the proposed revisions. On May 19, 1976, the Director of the DEQ submitted a request for the extension of the May 31, 1975 attainment date for meeting the national secondary ambient air quality standards for particulate matter in the Eugene AQMA to May 31, 1978. The request was made as a result of the action of the 1975 Oregon Legislature extending open field burning in the Willamette Valley.

The stautory provision relating to open burning which was approved as part of the Oregon plan in May 1972 banned open burning in the Willamette Valley of Oregon as of January 1, 1975. The revised statute, ORS 468.475, lifts the ban on open field burning and replaces it with a program to reduce the number of acres burned each year until 1978. In 1978, and each year thereafter, up to 50,000 acres may be burned annually, depending on several factors, including the availability of alternative methods of field sanitation. On June 28, 1976 a suit was filed in the Circuit Court of Marion County of the State of Oregon contending that the action by the 1975 Oregon Legislative Assembly to limit the number of acres to be burned is unconstitutional. (*Roy A. Bowers and Son, Inc., et.al.* v. *State of Oregon, Case No. 94173*).

In addition, the statute gives authority to the Oregon Environmental Quality Commission to: (1) Prohibit or limit, by rule, the amount of burning conducted; (2) adopt rules which will provide for a more rapid phase reduction in certain areas; (3) consult with other interested agencies before establishing any regulations; (4) establish emission standards for certified alternative methods to open field burning; and (5) establish the number of acres which can be burned each year.

Under the revised field burning program, each year applicants register the amount of acreage they wish to burn. The number of acres registered are totaled, after which the Environmental Quality Commission conducts hearings and determines the acreage allocation to be burned in that year. Permits to burn are issued by the Department which are not valid until a burning fee established by the legislature has been paid and a validation number has been assigned by the local fire district. The validation numbers are assigned only on days that meteorological conditions are satisfactory to burn a certain number of acres. The DEQ is responsible for enforcing the field burning rules adopted by the Commission and monitoring and preventing unlawful field burning.

The rules of the Department of Environmental Quality (OAR, Chapter 340, sections 26-005 through 26-025) as submitted on August 1, 1975 were revised to meet the requirements of ORS 468.450 through 486.485. The revisions submitted in February 1976 added a new section on certified alternatives to open field burning which includes emission standards for pilot field sanitizers approved by the Field Sanitation Committee and the Department of Environmental Quality.

The Administrator is required by Section 110 of the Clean Air Act to approve or disapprove any revision to an implementation plan submitted by a State. Public comment is invited on whether the revisions to Oregon's statutory authority and regulations for the control of open field burning and their request for extension of the attainment date for secondary particulate matter standards should be approved or disapproved as revisions to the State Implementation Plan. Copies of the proposed revisions are available for public inspection during normal business hours at these locations:

State of Oregon, Department of Environmental Quality, 1234 SW Morrison Street, Portland, Oregon 97205.
Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101.
Environmental Protection Agency, Public Information Reference Unit, Room 2922 (EPA Library), 401 M Street SW, Washington, D.C. 20460.

Interested persons may participate in this rulemaking by submitting written comments to the Regional Administrator, EPA, Region X, 1200 Sixth Avenue, Seattle, Washington 98101. Attention: K. Higley. Relevant comments postmarked on or before September 23, 1976, will be considered and will be available for public inspection at the above address.

(Sec. 110, Clean Air Act, as amended (42 U.S.C. 1857c-5))

Dated: August 9, 1976.

DONALD P. DUBOIS,
Regional Administrator.

FEDERAL TRADE COMMISSION

[16 CFR Part 437]

FOOD ADVERTISING

Change in Date for Prospective Witnesses at Washington, D.C. Hearing To Notify Commission of Their Expected Testimony

On May 25, 1976 the Presiding Officer published in the Federal Register (41 FR 21368) a Notice of Change of Dates for the Washington, D.C. Hearings on Proposed Trade Regulation Rule. In that Notice, the date for hearings in Washington, which had been set to commence on June 7, 1976, was changed to November 15, 1976 and the deadline for witnesses planning to testify at those hearings to notify the Commission representative of their intent was September 21, 1976.

That deadline has been extended to October 25, 1976. Therefore, persons desiring to orally present their views in Washington, D.C. should so inform the Commission representative listed below no later than October 25, 1976:

Ms. Lois Dimore [202-724-1489], Division of National Advertising, Bureau of Consumer Protection, Federal Trade Commission, Washington, D.C. 20580.

Prospective witnesses are reminded that when they intend to deliver statements not fully prepared and submitted in advance, they must file with the designated representative a detailed and comprehensive written outline or summary explaining the nature of their anticipated testimony, including, but not limited to, a statement of each fact, observation, opinion or conclusion which they expect to present. The Presiding Officer has the discretion to deny the right to present oral testimony to any person who fails to comply with this requirement.

Issued: August 19, 1976.

WILLIAM D. DIXON,
Presiding Officer.

POSTAL SERVICE

[39 CFR 775]

ENVIRONMENTAL STATEMENT PROCEDURES

Revision of Procedures

This document gives notice of a proposed complete revision of part 775 of title 39, Code of Federal Regulations, dealing with Environmental Statement Procedures. The primary purpose of the revision is to update and clarify the regulation. In addition, certain obsolete provisions have been deleted, such as the provisions dealing with the Corps of Engineers in present § 775.12 and .13.

V 41 165 AUG 24 76 UMI

Any persons interested in these revised procedures may participate in this proposed rulemaking by submitting written data, views, or arguments on the proposed revision to the Assistant Postmaster General, Real Estate and Building Department, U.S. Postal Service, 475 L'Enfant Plaza West, S.W., Washington, D.C. 20260, on or before September 27, 1976. Although exempt from the Administrative Procedure Act requirements, 5 U.S.C. 553(b), (c) regarding proposed rulemaking, 39 U.S.C. 410(a), the Postal Service proposes and invites public comment on the following amendment.

W. ALLEN SANDERS,
Assistant General Counsel.

In 39 C.F.R., Part 775 would be revised to read as follows:

PART 775—ENVIRONMENTAL STATEMENT PROCEDURES

Sec.
775.1 Purpose and policy.
775.2 Definitions.
775.3 Responsibilities.
775.4 Determining actions for which EIS must be prepared; actions to be assessed.
775.5 Preparation and use of environmental assessment; negative declaration.
775.6 Preparation and use of environmental impact statement.
775.7 Distribution and review of draft environmental impact statements.
775.8 Preparation and distribution of final environmental impact statements.
775.9 Public information.
775.10 Lists of environmental determinations.

Appendix I—Initial environmental assessment subject matter content.
Appendix II—Expanded environmental assessment outline.
Appendix III—Format of cover for environmental impact statements.
Appendix IV—Suggested outline for summary and conclusion to go at beginning of environmental impact statements.

775.1 Purpose and policy.

(a) These regulations prescribe the procedures to be followed in implementing the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4347), hereinafter referred to as NEPA; Executive Order 11514 of March 5, 1970, entitled "Protection and Enhancement of Environmental Quality" (35 FR 4247); and the Guidelines issued by the Council on Environmental Quality (CEQ) for preparing Environmental Impact Statements, hereinafter referred to as the CEQ Guidelines (40 CFR 1500). In addition, by directing the use of Environmental Impact Statement procedures in such manner as to help achieve the goals and objectives of the laws and directives listed below, these regulations serve to implement partially, the following laws and directives: section 106 of the National Historic Preservation Act of 1966 (16 U.S.C. 470f); Executive Order 11593 of May 13, 1971, entitled "Protection and Enhancement of the Cultural Environment" (36 FR 8921); the procedures of the Advisory Council on Historic Preservation for the protection of historic and cultural properties (36 CFR 800); Title IV of the Intergovernmental Cooperation Act of 1968 (42 U.S.C. 4231–4233); Office of Management and Budget Circular No. A–95 Revised, entitled "Evaluation, Review and Coordination of Federal and Federally Assisted Programs and Projects" (41 CFR 2052).

(b) Insofar as practicable and consistent with the public interest, fulfillment of the mission of the Postal Service and of economic and technical factors, Postal Service programs and actions shall be planned, initiated, and carried out in a manner to avoid adverse effects on the quality of the human environment. When this is not feasible, all reasonable measures shall be taken to mitigate any adverse environmental impact of the actions. This general policy will be implemented in accordance with the following:

(1) As early as practicable in the planning phase of every action to be assessed for environmental impact (see 775.4(a)-(3) below), the relevant A–95 Clearing houses, and through them, all affected State, areawide, and local agencies which are authorized to develop and enforce environmental standards, shall be informed with regard to plans for the proposed action and shall be afforded an adequate opportunity to review and comment on the proposed action. Any comments of such agencies will accompany the environmental assessment and, if any, the environmental impact statement, through the subsequent decision making processes.

(2) An environmental assessment shall be made as early as practicable in the project planning phase of every action to be assessed and shall be evaluated continually during development and after completion of the facility specification. This assesment will include an analysis of whether the proposed action will affect significantly the quality of the human environment and whether practical alternatives exist which might have less impact on the environment. The assessment, depending upon its results, will either support a negative declaration or require a detailed environmental impact statement. Such assessment, negative declarations, and environmental impact statements shall be prepared and processed pursuant to the guidance contained herein.

(3) The Postal Service will consider its proposed actions in relation to those of other agencies. If the Postal Service is the principally concerned, or "lead agency," and one or more other agencies have partial responsibility for the action, the other agencies shall be requested to furnish to the responsible Postal Service official such information as may be necessary to prepare a suitable and complete environmental impact statement. If another agency is the "lead agency," the full cooperation of the Postal Service shall be given to that agency.

(4) Appropriate alternatives to recommended courses of action shall be developed and described in any proposal which involves unresolved conflicts concerning alternatives uses of available sources.

(5) The Council on Environmental Quality shall be informed of proposed project environmental considerations as prescribed herein.

775.2 Definitions.

(a) "Environmental Assessment" is a documented evaluation process used to determine whether a proposed action is a major Federal action significantly affecting the quality of the human environment.

(b) "Negative Declaration" is a written description of a proposed action and its expected environmental impact, based on an environmental assessment, which contains a statement of the conclusion that the proposed action is not a major action significantly affecting the quality of the human environment. All bases for the conclusion shall be set out in the Declaration.

(c) "Environmental Impact Statement" (EIS) is a report which responds to the requirements of section 102(2)(C) of NEPA, and identifies and analyzes in detail the environmental effects of a proposed action and of alternatives to the proposed action. An EIS normally will be prepared and circulated in draft (DEIS) and final (FEIS) form.

(d) Relevant A–95 Clearinghouse(s) are the State and areawide Clearinghouses(s) listed in OMB Circular No. A–95 (revised) Clearinghouse Directory for the geographical area in which the Postal Service action is to take place. (OMB through its Circular No. A–95 (revised) established this system of Clearinghouses to facilitate intergovernmental cooperation.) The relevant Clearinghouses are to be informed of each reporting milestone throughout the impact review process.

(e) The "Responsible Official" who will supervise the preparation of Environmental Assessments and Environmental Impact Statements, and will sign Declarations of Negative Impact, shall be the Assistant Postmaster General, Real Estate and Buildings Department, with regard to Major Facilities and the Director of the Regional Real Estate and Buildings Department with regard to facilities delegated to that region. The Responsible Official may delegate these responsibilities to the extent that he deems advisable.

775.3 Responsibilities.

(a) The Responsible Official is required, in accordance with these regulations to perform the following:

(1) Prepare an initial environmental assessment of each proposed action to be assessed for environmental impact (see 775.4(a)(3) below), utilizing the format set out in Appendix I of these regulations.

(2) Give written notice to the relevant A–95 Clearinghouses furnishing location and scope of each project being assessed, and requesting comment. As each such project continues, he shall give written notice of the preparation of a negative declaration or of draft and final environmental impact statements, furnishing copies.

(3) Assemble all necessary environmental assessment information for each proposed action, evaluate the initial environmental assessment continually during the planning phase of a project, and prepare an expanded environmental assessment whenever the degree of complexity of the project requires it, following the outline set out in Appendix II of these regulations.

(4) Prepare either a negative declaration or the draft and final impact statements as required in accordance with the provisions of this document.

(5) Forward to the Assistant Postmaster General, Real Estate and Buildings Department, when made, each determination to make an environmental impact statement and each negative declaration. (See 775.10(c) below.)

(6) Maintain environmental files of Postal Service contemplated actions; include in these files all environmental assessments, and environmental impact statements.

(7) Distribute, and transmit to CEQ, copies of draft and final environmental impact statements in accordance with 775.7 and 775.8 below.

(8) Determine the necessity for, arrange for, and conduct public hearings following issuance of a DEIS on a proposed action.

(9) Prepare final environmental impact statements (FEIS) and evaluate each major action in the light of DEIS comments received from Federal, State and local entities, private organizations and individuals.

(10) Forward copies of FEIS to appropriate internal groups, agencies, or community organizations and/or individuals from whom comments were received.

(b) The Department of Communications and Public Affairs, subject to approval by the Responsible Official, will issue all press releases, and will coordinate on official answers to public inquiries of major interest or policy significance.

775.4 Determining actions for which an EIS must be prepared; actions to be assessed.

(a) Types of Actions Covered—

(1) Proposals for Legislation. An Environmental Impact Statement shall be included in every recommendation or favorable report on proposals initiated by the Postal Service for legislation that has environmental significance or may be environmentally controversial. It is determined in this regard that the Postal Service heretofore has not initiated proposals for types of repetitive legislation requiring environmental impact statements, and that the initiation of such proposals in the future is not foreseen. Where legislative scheduling with regard to a proposal that is environmentally significant or controversial does not permit compliance with the normal EIS procedures and waiting periods provided for herein, a draft environmental statement may be furnished to the Congress and made available to the public pending subsequent transmittal of comments, as received, and the text of a final statement when completed. Where additional recommendations, comments, or reports are submitted on a proposal concerning which an EIS already has been submitted, a new EIS is not required; if new environmental issues are raised, however, the existing EIS shall be supplemented.

(2) Regulations and Procedures. An Environmental Impact Statement shall be included in every promulgation of rules, regulations, procedures and instructions having significant environmental consequences.

(3) Projects and Program Activities. Environmental Impact Statements normally are not required for the principal types of projects and program activities undertaken by the Postal Service. An occasional individual postal facility project is environmentally controversial, however, and a small number of such projects have been determined to have environmental effects of sufficient significance to warrant the preparation of Environmental Impact Statements. Accordingly, a documented environmental assessment shall be made of each proposed project and program of a type listed below, and a determination shall be made as to whether each such proposed project or program is a major action significantly affecting the quality of the human environment:

(i) Acquisition of postal space, whether by direct construction or lease construction, or by purchase, lease, or condemnation of existing buildings or improvements.

(ii) Modernization, improvement, or alteration of existing facilities where the external configuration is changed substantially, or the postal mission is changed significantly.

(iii) Use of Postal Service property by others, through permit, lease, license, or other arrangement, resulting in a signification change in usage of the property.

(iv) Any proposed action which is, or is likely to be, environmentally controversial.

(b) Identifying Major Actions Significantly Affecting the Environment. The Responsible Official must exercise sound judgment based on a thorough assessment and an evaluation of all relevant factors including the following:

(1) Cumulative Impact. The overall, cumulative impact of the proposed action, actions of other Federal agencies planned or taking place in the area, further Postal Service actions contemplated or foreseeable, and other developments taking place in the area, must be considered. If it is reasonable to anticipate a cumulatively significant impact on the environment from Federal actions in the area, an EIS probably should be prepared.

(2) Controversy. If the environmental impact of a proposed major action is likely to be highly controversial, an EIS should be prepared.

(3) Adverse Significant Effects. Adverse significant effects include those that—

(i) substantially degrade the quality of the environment;

(ii) curtail the range of beneficial uses of the environment such as by making irreversible and irretrievable commitments of resources;

(iii) serve short-term, to the disadvantage of substantial long-term, environmental goals; and

(iv) may be localized in their effect, but nevertheless have a decidedly harmful environmental impact.

(4) Beneficial and Detrimental Effects. Significant effects can include those which result from actions having both beneficial and detrimental effects even if, on balance, it appears that the net effect will be beneficial.

(5) Environmental Setting. The significance of a proposed action may vary with its setting. An action that might have little impact in a large city may be significant in a small-town, rural, or suburban setting, and vice versa.

(6) Secondary Effects. Secondary, as well as primary, effects of a proposed action may be significant. Many major Federal actions stimulate or induce secondary effects in the form of new investments and changed patterns of land-use and social and economic activity. Such secondary effects, through their impacts on existing community facilities and activities, through inducing new facilities and activities, or through changes in natural conditions, may be more significant than the primary effects of the original proposed action.

(7) Environmental Subject Areas. The assessment of significance shall take into account both direct and indirect effects in the following (among others) environmental subject areas:

(i) Water, air and noise pollution, undesirable land use patterns, solid waste disposal, pesticide and herbicide use, transportation and handling of hazardous materials;

(ii) Changes in population distribution, and the effects of such changes on urban congestion (including vehicular traffic), water supply, sewage treatment facilities, other public services, and human health, safety, and welfare;

(iii) Ecological systems such as wildlife, fish, and other marine life; and

(iv) The effects of construction, alteration, demolition, and real property disposal on the preservation and enhancement of historic, cultural, aesthetically pleasing, and healthful surroundings.

775.5 Preparation and use of environmental assessment; negative declaration.

(a) The environmental assessment shall be evaluated as part of the decision making process. It is the basis for judgment by the "Responsible Official" as to whether or not a proposed action is a major Federal action significantly affecting the quality of the human environment. It is of utmost importance that the assessment be complete, giving the decision maker a clear picture of existing and projected environmental conditions relevant to the proposed action and an evaluation of possible and probable effects, primary and secondary, beneficial or adverse, of that action and

V 41 165
AUG 24 76
UMI

its practical alternatives. The environmental assessment is to be prepared by the responsible organization encompassing all phases of a proposed action and examining its effects on the environment.

(1) The environmental assessment will contain the information from the Postal Service's evaluation of available sites, an analysis of the consequences of the proposed action, alternatives to the proposed action, comments of any Federal agency which has jurisdiction by law or special expertise with respect to any environmental impact involved, written responses resulting from the A–95 Clearinghouse notification, and comments of local citizens and officials. Every attempt should be made to insure that appropriate contacts are made to obtain the most complete data base for determining the environmental effects of the proposed action.

(2) The environmental assessment is to be prepared as directed by the Responsible Official utilizing the format set out in Appendix I, and following the outline set out in Appendix II, of these regulations.

(b) Negative Declaration. If the environmental assessment indicates that a proposed action is not a major Federal action significantly affecting the quality of the human environment, the Responsible Official shall prepare and sign a negative declaration to that effect. The declaration must state that a review of all environmental factors has been completed and the determination, based on the assessment, has been made that the proposed action is not a major Federal action significantly affecting the quality of the human environment (including effects on historic properties and places). Copies of the environmental assessment and the negative declaration shall be placed in the project environmental file, available on request for public review.

775.6 Preparation and use of environmental impact statements.

Whenever it is determined, based on an environmental assessment, that a proposed action is a major Federal action significantly affecting the quality of the human environment, a detailed environmental impact statement shall be prepared at the earliest feasible point in the development of the proposal, and shall be included in every subsequent recommendation or report on the proposed action. Each such statement must reflect that the particular economic and technical costs and benefits of the proposed action have been assessed and weighed against the environmental costs and benefits. Environmental Impact Statements shall be prepared in final form (FEIS) based on a draft environmental impact statement (DEIS) and a responsive evaluation of comments on the DEIS received from Federal, State, and local governmental agencies and the public.

(a) Early Public Notice. As soon as practicable after a decision is made to prepare a DEIS, public notice shall be given, and comments invited, by publication in the FEDERAL REGISTER and a local newspaper and by posting a notice on the bulletin boards of all postal facilities located in and adjacent to the area of potential environmental impact.

(b) Environmental Impact Statements should contain:

(1) A description of the proposed action its purpose and setting, including information, summary technical data, and maps and diagrams where pertinent, adequate to permit an assessment of potential environmental impacts of the proposed action by commenting agencies and the public. Highly technical data and analyses should be confined to appendices. The amount of detail provided should be commensurate with the size and expected impact of the proposed action. Population and growth characteristics of the affected area shall be included. The sources of data used shall be included. The sources of data used shall be expressly noted.

(2) The probable impact of the proposed action on the environment. Both primary, or direct, and secondary, or indirect, impacts on the environment shall be included in the analysis. The probable effects of the proposed action and its alternatives on population distribution shall be included, and also an analysis of the effect of any anticipated change in population and employment patterns upon the resources of the area, including land use, water supply, public services, and traffic.

(3) A brief discussion summarizing in one place any probable adverse environmental effects that cannot be avoided should the proposal be implemented such as water or air pollution, undesirable land use patterns, damage to life systems, urban congestion, threats to health, or other consequences adverse to the environment. A statement should be included of how avoidable or mitigable adverse effects will be mitigated or avoided.

(4) An evaluation of the environmental impacts of alternatives to the proposed action. Section 102(2)(D) of NEPA requires the responsible agency to "study, develop, and describe appropriate alternatives to recommended courses of action in any proposal which involves unresolved conflicts concerning alternative uses of available resources." A rigorous explanation and objective evaluation shall be made of the environmental impacts of all reasonable alternative actions, particularly those that might avoid or mitigate some or all of the adverse environmental effects. An analysis of such alternatives and their environmental benefits, costs, and risks shall accompany the proposed action through the agency review process so as not to foreclose prematurely consideration of options which might have less detrimental effects. The analysis should be sufficiently detailed to present a comparative evaluation of the environmental benefits, costs, and risks of the proposed action and each reasonable alternative.

(5) A brief discussion of the relationship between local short-term uses of man's environment and the maintenance and enhancement of long-term productivity. This requires evaluation of the extent to which the proposed action involves trade-offs between short-term environmental gains and long-term losses, or vice versa, and it should contain a discussion of the extent to which the proposed action forecloses future options.

(6) A description of any irreversible or irretrievable commitment of resources which would be involved in the proposed action should it be implemented. This includes a statement of the extent to which the action irreversibly curtails the range of potential uses of the environment.

(7) An indication of economic, service, operational, working conditions, and other requirements and considerations of postal policy determined to offset or override any adverse environmental effects that have been identified. This discussion should also indicate the extent to which these countervailing benefits could or could not be realized by adopting identified alternatives to the proposed action that would avoid or mitigate some or all of the adverse environmental effects of the proposed action. If a cost-benefit analysis of the proposed action is prepared, it should be attached to the Statement and an indication should be given in the Statement of the extent to which environmental costs were considered in the cost-benefit analysis.

(8) A discussion of the relationship of the proposed action to the development plans and programs of the State, areawide, and local governments for the area in which the action is to take place. This should include a discussion of how the proposed action may conform to or conflict with Federal, State, areawide, and local land-use policies, plans, and controls and with current pollution limitations and compliance schedules duly adopted and approved pursuant to the Clean Air Act, the Federal Water Pollution Control Act, and the Noise Control Act of 1972, as the same may be amended from time to time. Where a conflict or inconsistency exists, a description should be included of the extent to which the proposed action has been reconciled or harmonized with the above plans, programs, policies, controls, limitations, and schedules, and the reasons should be given why the determination has been made to proceed notwithstanding the absence of full reconciliation.

(c) Prior to issuing either a draft or final EIS, the Responsible Official shall consult with and obtain the comments of any Federal agency which has jurisdiction by law or special expertise with respect to any environmental impact involved. This shall include the Environmental Protection Agency in every case. (See 775.7(b)(1), below, with respect to historic preservation requirements.)

(d) Environmental impact statements shall be prepared with a cover and a summary and conclusions section. (See Appendices III and IV.)

775.7 Distribution and review of draft environmental impact statements.

(a) Transmittal to Council on Environmental Quality. As soon as a DEIS is prepared, 10 copies shall be transmitted to the Council on Environmental Quality.

(b) Distribution. DEIS's shall be distributed to:

(1) Federal agencies previously consulted or having jurisdiction by law or special expertise with respect to any environmental impact involved, which shall include the Environmental Protection Agency in every case, and the Advisory Council on Historic Preservation whenever a property that is included in or eligible for inclusion in the National Register of Historic Places is located within the area of the proposed action's potential environmental impact (This requirement is in addition to, and not in substitution for, the requirements of section 106 of the National Historic Preservation Act of 1966 and the Procedures for the Protection of Historic and Cultural Properties adopted by the Advisory Council on Historic Preservation.);

(2) Appropriate State and local agencies which are authorized to develop and enforce environmental standards, and State and areawide clearinghouses established pursuant to OMB Circular No. A–95 for the purpose of facilitating cooperation between the Federal Government and State and local governments (This requirement is in addition to, and not in substitution for, the requirements of section 401 of the Intergovernmental Cooperation Act of 1968 and of OMB Circular A–95, Part II, providing for coordination of direct Federal development projects at the earliest practicable stage with State, areawide, and local development plans and programs.); and

(3) Private organizations and individuals that request an opportunity to comment. In order to facilitate comment by private organizations and individuals, the availability of draft environmental statements shall be announced by publication of a notice in a local newspaper and by posting on the bulletin boards of all postal facilities located in and adjacent to the area of potential environmental impact.

(c) Timing. It is important that the DEIS be prepared and circulated for comment as early as possible in the project planning and review process in order to permit Postal Service decision makers and outside reviewers to give meaningful consideration to the environmental effects involved. Postal Service officials should keep in mind that such statements are to serve as the means of assessing the environmental impact of proposed actions rather than as a justification for decisions already made. The preparation of reports through the final EIS, including required periods for review and comment must be completed before the project planning and design is finalized.

(d) Review periods.

(1) A minimum of 45 days shall be allowed for comment on a DEIS, after which it may be presumed that no person or agency has any comment to make, unless an agency or person requests an extension of time to reply. In determining whether to grant a requested extension of time, and for how long, responsible officials shall consider the magnitude and complexity of the statement and the extent of citizen interest in the proposed action, as well as the Postal Service's schedule requirements.

(2) To the maximum extent practiable, administrative action subject to EIS requirements is not to be taken sooner than 90 days after the DEIS has been circulated, furnished to the CEQ and (except where public disclosure will result in significantly increased costs of procurement) made available to the public, and is not to be taken sooner than 30 days after the FEIS (including comments thereon) has been made available to the Council, commenting agencies and the public. The foregoing periods of 90 and 30 days may, but normally should not, run concurrently. Subject to the possible need for recirculating the statement for the appropriate period in cases of significant substantive change, a DEIS or FEIS may be supplemented or amended at any time.

775.8 Preparation and distribution of final environmental impact statements.

(a) Preparation. All substantive comments received on a DEIS shall be attached to the FEIS, except that where comments are received from a large number of single individuals, syntheses of their comemnts together with the names of the individuals whose comments are so synthesized may be attached in lieu of attaching each individual comment. A meaningful reference shall be made in the FEIS to any responsible and cogent opposing view not adequately discussed in the DEIS, indicating the Postal Service's response to the issues raised.

(b) Transmittal to Council on Environmental Quality. As soon as an FEIS is prepared, 10 copies (together with the substance of all comments received) shall be transmitted to the Council on Environmental Quality.

(c) Distribution. A FEIS, with comments attached, shall be sent to the Environmental Protection Agency, to each Federal, State, and local agency and private organization that made substantive comments on the DEIS, and to each individual who requests a copy.

775.9 Public information.

(a) Public Hearings. The Responsible Official should arrange for a public hearing following distribution of a DEIS when he determines it appropriate in accordance with the criteria set out in subparagraph (b) below. In such event, the DEIS shall be made available to the public at least 15 days prior to the hearing date. A written notice of the time, date, and place of the hearing shall be sent to all appropriate Federal, State, and local Government entities (including State and Areawide Clearinghouses) and to all private organizations and individuals known to be interested. In addition, copies of the notice should be posted in appropriate public places including postal facilities in and adjacent to the area and at any known site or sites of a proposed construction project; copies of the notice should also be sent to the local newspaper. The DEIS may be used as an outline for the conduct of discussions. If, upon conclusion of the hearing, it appears that some elements of controversy remain unresolved, the submission of written comments should be solicited. Following the public hearing, a summary of the issues discussed, the major points raised by witnesses, and other significant aspects of the hearing shall be prepared. If the Responsible Official deems it appropriate, he may append this summary to the FEIS.

(b) In deciding whether to hold a public hearing the Responsible Official should consider the following factors.

(1) The magnitude of the proposed project in terms of cost, size, geographic area affected, traffic generation, and the like;

(2) The degree of known public interest in the proposed project and significance of requests for a hearing;

(3) The complexity of issues that attend the proposed project and the likelihood that information will be presented at the hearing that will be of assistance;

(4) The extent to which public involvement has already been achieved through other means, such as earlier public hearings, meetings with citizen representatives, and the submission of written comments during prepartion of the DEIS.

775.10 Lists of environmental determinations.

(a) There shall be maintained and kept current in the Real Estate Buildings Department in USPS Headquarters:

(1) a list of proposed projects for which Environmental Impact Statements are being prepared; and

(2) a list of proposed actions regarding which a determination has been made not to prepare an Environmental Impact Statement although—

(i) the action is similar to a significant number of Postal Service actions for which Statements have been prepared, or

(ii) it had been announced previously that a Statement would be prepared, or

(iii) the preparation of a Statement had been requested by the Council on Environmental Quality.

(b) Both of the above lists shall be updated and transmitted quarterly by the designated office to the Council on Environmental Quality and shall be made available for public inspection on request. With regard to any negative determination described in (a)(2) above, a publicly available record shall be maintained containing a brief statement of the reasons for the determination.

(c) So that the designated Headquarters office may perform its duties prescribed above in this 775.10, each Responsible Official shall furnish that office, on a current basis, the following:

(1) a brief description of each proposed project for which the preparation of an Environmental Impact Statement has been or is about to be commenced;

(2) notice of any abandonment or discontinuance of, or significant change in, any proposed project for which an EIS is, or was, being prepared;

(3) a copy of each DEIS and each FEIS; and

(4) a copy of each negative determination described in (a)(2) above, which shall contain or be accompanied by a statement of the reasons for the determination.

V 41 165 AUG 24 76 UMI

APPENDIX I.—*Initial environmental assessment subject matter content*

	Effect on environment			
	None	Moderate and/or temporarily detrimental	Permanently detrimental	Beneficial
I. Evaluation of effect upon location:				
A. Topography and geology:				
1. Relief and surface characteristic changes				
2. Presence of faults and/or joints				
3. Surface strata and underlying bedrock				
4. Subsurface mineral deposits				
B. Hydrology and water quality:				
1. Effect on local ground water and water table				
2. Drainage patterns of stor n drains and creeks				
C. Land and water resources:				
1. Effect on adjacent residential development				
2. Creation of limited use land area				
3. Effect on adjacent streams or lakes				
4. Effect on industrial potential				
5. E fect on land use patterns				
. Historical and archeological:				
1. Effect on archeological salvage				
2. Effect on historic places, sites or monuments				
(a) Review by State historic preservation officer				
E. Fish and wildlife:				
1. Alteration of wildlife habitat				
2. Effect on rare or endangered species				
3. Effect on fish and other water related biota				
F. Botanical:				
1. Removal of or damage to trees, shrubs and other vegetation.				
2. Effect on rare or endangered species				
3. Effect on adjacent vegetation				
G. Air quality and sound control:				
1. Air pollution and atmospheric discharges				
2. Created noise levels				
3. Noise abatement				
II. Evaluation of effect upon existing public service:				
A. Lock box service				
B. Finance service				
C. Delivery service				
D. Accessibility and parking				
III. Evaluation of effect upon employees:				
A. Transportation—availability of public transportation, travel times, and cost.				
B. Housing and essential community services				
C. Public food service, its availability and proximity				
D. Medical service—proximity of hospitals, physicians, ambulance service, public health service.				
E. Employee safety as it might be jeopardized by hazardous conditions at the points of ingress and egress from or to the site.				
F. Working conditions				
G. Operational productivity				
H. Relocation				
IV. Evaluation of effect on socioeconomic conditions:				
A. Relocation of residential dwellings				
B. Effect on local employment				
C. Effect on public health and well-being				
D. Relocation of public utilities				
E. Urban congestion				
F. Alternation of traffic patterns				
G. Effect on population trends				
V. Conclusion summary:				

Using items listed above as a table of contents, prepare a narrative explanation for each particular evaluation.

APPENDIX II

EXPANDED ENVIRONMENTAL ASSESSMENT OUTLINE

I. Summary
II. Environmental setting without action:
  1. Physical Environment (Geology)
  2. Biological Environment (Ecology)
  3. Cultural Environment (Demographic)
III. Proposed Action
  Description
  Environmental Effects
IV. Conclusions
  Focus on the significant impacts, the chosen alternative, its mitigating effects and the need for a negative declaration or an Environmental Impact Statement.

APPENDIX III—FORMAT OF COVER FOR ENVIRONMENTAL IMPACT STATEMENTS

DRAFT (FINAL) ENVIRONMENTAL IMPACT STATEMENT

Descriptive Title of Project

UNITED STATES POSTAL SERVICE REAL ESTATE AND BUILDINGS DEPARTMENT

APPENDIX IV—SUGGESTED OUTLINE FOR SUMMARY AND CONCLUSIONS SECTION TO GO AT BEGINNING OF ENVIRONMENTAL IMPACT STATEMENTS

PROJECT TITLE

SUMMARY AND CONCLUSIONS

Name, address, and telephone number of the individual at the Postal Service who can be contacted for additional information.

1. Brief description of action indicating project purpose, scope, and location.
2. Summary of environmental impact and adverse environmental effects.
3. Summary of alternatives considered.
4. a. (For draft statements) List all Federal, State, and local agencies from which comments have been requested.
  b. (For final statements) List all Federal, State, and local agencies and other sources from which written comments have been received.
5. Dates draft statement and final statement made available to the Council on Environmental Quality and the public.

INTERSTATE COMMERCE COMMISSION

[49 CFR Parte 1125]

[Ex Parte No. 293 (Sub-No. 2]

STANDARDS FOR DETERMINING RAIL SERVICE CONTINUATION SUBSIDIES

Supplemental Notice of Proposed Rulemaking and Order

Section 205(d)(6) of the Regional Rail Reorganization Act of 1973 (the RRR Act), 45 U.S.C. 715(d)(6), as amended by section 309 of the Rail Revitalization and Regulatory Reform Act of 1976 (the Rail Act), Pub. L. 94-210, directs the Rail Services Planning Office (the Office) of the Interstate Commerce Commission (the Commission) to:

> • • • determine and publish, and from time to time revise and reissue, standards for determining (A) the "revenue attributable to the rail properties", (B) the "avoidable costs of providing service", (C) a "reasonable return on the value", and (D) a "reasonable management fee", as those phrases are used in section 304 of this Act [as amended by Section 804 of the Rail Act], after a proceeding in accordance with the provisions of section 553 of title 5, United States Code.

The Office first issued standards on July 1, 1974 for computing subsidies for the continuation of rail freight service in the Northeast-Midwest Region (39 FR 2429). After field testing, revised standards were published January 8, 1975 (40 FR 1624). They have since been amended on March 28, 1975 (40 FR 14186); January 22, 1976 (41 FR 3402); and March 26, 1976 (41 FR 12836).

During recent months, the Office has received several requests to reopen this proceeding to consider amendments to the standards. The Office is apprising the public through this notice of those areas in which requests have been made for modification and of other areas where the Office itself believes there may be a need for modification. The public is encouraged to study the discussion and to submit statements containing views and arguments in support of, or in opposition to, the suggested changes.

DISCUSSION

Passenger train revenues and costs. The Office has issued regulations, effective August 3, 1976, for determining commuter rail service continuation subsidies and emergency operating payments in the Northeast-Midwest Region (41 FR 32545). Consequently, the Office proposes to amend the regional freight standards to make it clear that revenues, costs and return on the value of properties covered by the commuter standards will be excluded from the regional freight standards.

Revenues from bridge and overhead traffic. The Office proposes to revise the method of calculating revenues derived from traffic carried over a subsidized branch but not originating or terminating on the branch. Such traffic includes bridge traffic, which passes over the branch line as a route between two lines of the same carrier, and interchange traffic which is exchanged with another railroad at a point on the branch. With regard to bridge traffic, the Office wants to stress that the parties are not bound by the mileage apportionment in the standards but are free to negotiate a mutually acceptable useage charge. The Office proposes to handle interchange traffic as if it actually originated or terminated on the branch. The present standards assign interchange (overhead) revenues to the branch on the ratio of miles moved on the branch to miles moved on the system. The proposed standard would attribute interchange revenues directly to the branch.

Off-Branch Costs—Class II railroads. The annual report of Class II railroads (Form R-2) does not contain expensive categories and service units in sufficient detail to compute off-branch costs in the manner presently prescribed. Therefore, the Office proposes to amend the standards by adding a new procedure for calculating the off-branch cost of Class II railroads which operate branch lines under subsidy. The method which the Office is proposing uses revenue gross ton-miles as the basis of assigning off-branch costs. Under this method, the total operating expenses, rents and taxes, excluding federal income taxes of the carrier, would be multiplied by a 3 year composite variability factor for all Class I railroads, and this amount would be divided by the system total revenue gross ton-miles. This unit cost would be applied to the total revenue gross ton-miles accumulated by branch line traffic moving over other portions of the Class II carrier's system.

The initial composite variability factor, based on the years 1972-74, would be .78; this factor would be periodically updated to reflect current Class I data. (A variability factor based on Class II data would be preferable, but cannot be derived from existing data.) A draft regulation is annexed.

Revenues from shipments with transit privileges. The Office has been asked to clarify whether the revenue attributable to a branch line from transit shipments is meant to include the full revenue the carrier receives for the shipment or only the revenue from that portion of the movement between the on-branch originating or terminating point and the transit point. The Office believes that the full revenue from such shipments (including any transit charges collected) should be attributed to the branch line. The off-branch costs associated with the movement beyond the transit point would of course be charged against the branch. The Office proposes to amend the standards to clarify its position.

Income from property over which subsidized service is performed. The New Jersey Department of Transportation (NJDOT) has pointed out that the property over which a subsidized service is operated may be used simultaneously by others and the standards are silent concerning income accounts related to such rail properties. It requests that either the income be included in revenues attributable to the rail properties or the income, actual and prospective, be capitalized and deducted from the overall property value. The Office is interested in obtaining the views of other parties on this subject.

Superintendence costs. The present standards do not allow the operator to include costs incurred for the supervision of maintenance of way, maintenance of equipment, or transportation on the subsidized line. The Office believed that the amount of time that a superintendent would have to devote to a particular branch would be negligible and therefore, his salary should not be included as an avoidable cost of providing the subsidized service. However, a railroad operating several branch lines under subsidy may have to employ more supervisory personnel than it would in the absence of subsidized service. In such a case, some superintendence costs might be avoidable. The issue then is how to fairly assign the costs of such superintendence to individual branch lines. The Office has considered several alternatives, including the use of an apportionment formulae, and is of the opinion that, if such costs are to be allowed, they should be directly assigned, based on the number of hours which a superintendent actually devotes to the branch line. These costs would be subject to audit, just as are the hours of crew wages and other direct costs. The parties are encouraged to address the following questions: should superintendence costs be included in the standards, and, if so, what is the fairest way of assigning these costs to the individual branch line?

Engineering costs. In some instances subsidizers have requested that the operating railroad provide engineering assistance for rehabilitation of the branch line or for the construction of new facilities. The Consolidated Rail Corporation (ConRail) has requested that the cost of providing this engineering assistance be considered an avoidable cost of providing the subsidized service. The Office believes that the costs of such services should be negotiated separately from the operating agreement and should be included as part of the rehabilitation costs.

Maintenance of way equipment repair costs. ConRail has requested that two additional accounts be included in the standards: Account 269—Roadway Machines, which includes the cost of repairing roadway machines which are used for repairs of roadway and structures, and Account 271—Small Tools and Supplies, which includes the cost of obtaining and repairing roadway tools, the costs of supplies consumed in the operation of roadway machines, and the cost of supplies used by trackwalkers, track watchmen, and roadway and track repairmen. ConRail requests that these accounts be apportioned to the individual branch on a ratio of maintenance costs performed on the branch in the subsidy year to the total ConRail system maintenance costs in the subsidy year.

The Office believes such repair costs, if incurred solely as a result of work done on the branch, should be included as a direct cost, not as an apportioned cost. It recognizes though that the direct cost approach might tempt the operating railroad to use old or run-down equipment for maintenance of subsidized lines and as a result that the repair costs for equipment used on subsidized lines might be substantially higher than repair costs for equipment used elsewhere on the operating lines of the carrier. The parties are requested to state their views as to whether Accounts 269 and 271 should be included in the standards, and, if so, how these costs should be determined and how they can be included without cross-subsidizing the upkeep of the carrier's maintenance of way equipment.

Running overhead from yard to branch; deadheading; taxi, and hotel costs. These categories of costs, which are not presently covered by the standards, may be incurred in the provision of some subsidized service. These costs arise because of the location of, or the nature of the service required over, the subsidized line. For example, it may be necessary for an engine crew and locomotive to run overhead from a yard, performing no work along the way, to reach a subsidized branch line which is the only duty assignment of the crew outside the yard. The Office is hesitant to allow this cost because it may provide an incentive for inefficiency on the part of the operating railroad. However, the Office believes that deadheading costs or taxi or hotel costs for the crew which operates the subsidized service should be included in the standards, but the Office prefers an approach which will provide an incentive for more efficient operation rather than a standard which rewards inefficiency. The parties are encouraged to propose a standard which they believe will promote efficient operation.

Specialized equipment costs. The standards presently assign locomotive repair costs on a ratio of ton-miles served on a branch to ton-miles served on the

V 41 165 AUG 24 76 UMI

system. Similarly, other locomotive costs are assigned on a ratio of hours served on a branch to hours served on the system. This approach does not provide adequately for unique situations where a branch requires a special locomotive because of the physical characteristics of the branch. If a special locomotive is assigned to a subsidized branch and does not serve any other portion of the operating carrier's system, the actual repair and other costs of such a locomotive should be allowed. The same approach should apply to any other specialized equipment dedicated to service on a subsidized line.

Termination of service costs. Title V of the RRR Act provides protection for employees who lose their jobs or are relocated as a result of the consolidation of the region's bankrupt railroad systems into the ConRail system. Congress has authorized $250,000,000 to reimburse ConRail, USRA (where applicable) and acquiring railroads for amounts actually paid to protected employees pursuant to Title V. There is some uncertainty as to whether employees who are assigned by ConRail to work on branch lines operated under subsidy would be protected by the provisions of Title V should the subsidy not be renewed. The Office is seeking a ruling on this question from the Railroad Retirement Board.

The operating carrier may incur other termination costs, such as the cost of removing equipment, as a result of shutting down service on a line. The Office believes that such costs, to the extent that they can be shown to be validly incurred as a direct result of the termination of the subsidy, should be considered avoidable costs of providing service. The Office also believes that it would be appropriate to amend the standards to allow the parties to include in the operating agreement a mutually acceptable amount to cover the reasonable costs of termination.

Administrative fee. The standards presently provide that the operating carrier will receive an amount equal to 0.5 percent of revenues attributable to a subsidized branch as a fee for administering the subsidized service. ConRail has asserted that it will incur a serious deficit if the actual costs of administering the subsidized service which it operates are not treated as avoidable. The Office estimates that ConRail will receive an annual administrative fee of approximately $230,000.00 and has no information indicating that ConRail's actual costs will substantially exceed that amount. Consequently, the Office does not believe that there is a need to revise the administrative fee at this time. Furthermore, the fee established by the Office has several advantages: it is easily computed; it reduces the expense of record keeping; and it serves as an incentive to the operating carrier to hold the line on administrative costs. The Office would, of course, reconsider its position if operating experience should demonstrate that the actual cost of administering subsidized service substantially exceeds the fee as determined pursuant to the present standard.

Management fee. Under the standards, an amount equal to 4.5 percent of the total annual revenues attributable to the branch is to be paid to the operating carrier as a reasonable management fee. The parties may also negotiate an additional fee designed as an incentive to maximize revenues, minimize expenses, promote efficient service or otherwise achieve public interest objectives.

The Office wishes to stress that the 4.5 percent standard is not a ceiling; the parties are free to negotiate a higher percentage. The Office believes that a higher fee could serve as an incentive to section 304(d)(1)(C) designated operators to provide subsidized service. Also, limiting the management fee to 4 5 percent could produce an inequitable result where the subsidizer desired to have service provided by a short line carrier. Since the short line operator receives a much smaller share of the revenues from the traffic on the branch than would a carrier like ConRail it would be unfair if the fee were limited to 4.5 percent. The parties must be free to negotiate a management fee which they consider fair in such situations; however, if disputes arise the Office may have to issue specific guidelines for determining the management fee for short lines. The parties are encouraged to file suggestions for resolving this issue.

Traffic and general expenses. The present standards do not include any categories of traffic and general expenses, e.g., headquarters overhead and traffic solicitation expenses. The Office believes that, for the most part, a large, established carrier's expenses in these categories will not be affected materially by undertaking to continue service on branch lines. However, in some situations there may be a significant impact especially where a carrier was organized solely for the purpose of operating a subsidized line, a carrier's operations has been substantially increased by the addition of the subsidized service, or the single subsidized service is in itself a substantial railroad operation. In each of these situations considerable costs may be incurred which might have been avoided if the operating carrier had not undertaken to provide the subsidized service. In some cases, a carrier operating under section 304(d)(1)(c) of the RRR Act may have to cease subsidized service if the standards are not amended to include these items as avoidable costs of providing service. Therefore, the Office proposes to amend the standards to allow traffic and general expenses in certain cases. The Office proposes the following test to determine whether a railroad is eligible to include these expenses: either the railroad must have the size of its operation (measured in total mileage, gross revenues, gross ton-miles or car miles) increased by more than 25 percent as a result of taking on the subsidized service, or the service being operated under subsidy must in its own right qualify as a Class I railroad. The parties are requested to comment on this proposed approach and/or to provide suggested approaches of their own. The Office requests comments as to which traffic and general expenses an eligible carrier should be allowed to include. For example, if the executive officers of a railroad devote all their time to the operation of one or more subsidized lines, should the entire cost of their salaries be covered by subsidies? If they allot only part of their time to subsidized service, should the cost of their salaries be pro-rated accordingly? If so, should there be a cut-off point (e.g., if less than 10 percent of their time is devoted to subsidized service, should none of the cost of their salaries be eligible for inclusion)?

Determination of Revenues Attributable. In developing the regional standards, the Office reviewed several possible methods of defining "revenues attributable" and concluded that the only approach which would fairly represent the revenues a branch contributes to a carrier was to attribute all revenues received by the carrier from freight originating or terminating on the branch. For reasons stated in its prior rulemaking (39 FR at 24295), the Office also included off-branch costs calculated on a variable basis as "avoidable costs". Although this procedure has been judicially affirmed, *Commonwealth of Pennsylvania* v. *ICC; R. D. Timpany* v. *RSPO, ICC*, U.S.C.A., D.C., Nos. 75–1529; 75–1762, March 31, 1976, petition for certiorari pending, the Office, consistent with its duty to "revise and reissue" the standards from time to time, will consider suggestions from interested parties on alternative methods of defining "revenues attributable" which would permit elimination of off-branch costs.

Alternative compensation for use of property over which subsidized service is performed. Because of the inability of the parties to reach agreement with regard to valuation, other bases are being negotiated under which the trustees of the bankrupt railroads in the region are to be compensated for the use of their properties. The Office proposes to amend the standards to specifically provide for alternative compensation based on arm's-length negotiations.

Technical amendment. The reference in the last sentence of Section 1125.1(d) referring to "one of the first three quarterly Financial Status Reports required by Section 1125.9(f)" should be changed since it does not appear that the first three such reports will be issued within the time frame originally contemplated. The Office proposes to substitute the following language: "* * * based on the data contained in one of the Financial Status Reports issued during the first 10 months of the subsidy year as required by Section 1125.9 * * *."

Retroactivity. The Office requests comment on whether any of the proposed amendments discussed herein should be made effective retroactive to the date branch lines were first operated under the freight subsidy program.

FILING OF COMMENTS

After interested parties have filed their comments on the issues raised in this notice, the Office will allow further time for the participants to submit replies to the comments. To facilitate this process, the Office will reproduce all the comments received by the due date and provide them to all participants.

ORDER

In light of the foregoing considerations:

It is ordered, That the proceeding to formulate standards for determining rail freight service continuation subsidies in the Northeast-Midwest region, pursuant to Section 205(d)(6) of the Regional Rail Reorganization Act of 1973, as amended, is hereby reopened for the purpose of amending the standards.

And it is further ordered, That all interested persons are invited to participate in this proceeding by submitting written representations containing statements of facts or views. To be considered the original and 6 copies of each representation must be filed on or before September 24, 1976, with:

Rail Services Planning Office, Interstate Commerce Commission, Washington, D.C. 20036

Replies to the comments should be filed by October 15, 1976.

This is not a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969.

Issued August 19, 1976 by Alan M. Fitzwater, Director, Rail Services Planning Office.

ROBERT L. OSWALD,
Secretary.

CLASS II

OFF-BRANCH COSTS

Class II line-haul railroads shall calculate off-branch costs as follows:

(i) The estimated system variable expenses are calculated by multiplying the sum of the total operating expenses (Schedule 2002, L.54, col. (b)), net rents (Schedule 300, L.21, col. (b) and tax accruals less federal income taxes Schedule 350, L.18, col. (b) less L.13, col. (b)) in the carrier's latest Annual Report (Form R–2) by .78, the three year composite variability ratio for all Class I railroads.

(ii) The cost per revenue gross ton-mile is calculated by dividing the amount developed in step (i) by system total revenue gross ton-miles (Schedule 2601, L. 25, col. (d)) in the carrier's latest Annual Report (Form R–2).

(iii) The cost developed in step (ii) shall be applied to the total revenue ton-miles of traffic attributable to the branch which moves over other portions of the railroad's system.

DEPARTMENT OF THE TREASURY

Office of the Secretary

PRIVACY ACT OF 1974

Proposed Change to a System of Records

On December 2, 1975, in accordance with the requirements of the Privacy Act of 1974 at 5 U.S.C. 552a(e)(4), a system of records to be initiated approximately January 1977 by the Office of the Secretary called "Treasury Payroll/Personnel Information System (Treasury/OS 00.054)" was adopted by notice published in the FEDERAL REGISTER (40 FR 56017, 56029). The Office of the Secretary now proposes to amend this system of records.

A number of changes became necessary during final planning. The principal changes proposed are: Advancement of the starting date to September 26, 1976; addition of a facility at San Francisco, California; provision for the inclusion of other agencies in the system; addition of the data element called the Minority Group Designator (MGD); addition of routine use number five; revision of the description of the storage, retrieval, and access policies and practices consistently with the dual location of the system; and addition of a disposition provision. Stylistic and grammatical revisions were made throughout the notice, the text of which follows in full.

Notice of this proposal as required by subsection (o) of the Act, 5 U.S.C. 552a (o), was filed on June 24, 1976, with the Senate, the House of Representatives, the Office of Management and Budget, and the Privacy Protection Study Commission.

Any interested person may submit written data, views, objections, or arguments on this proposed amendment to the Acting Departmental Disclosure Officer, Office of Administrative Programs, United States Department of the Treasury, 1331 G Street NW, 3rd. floor, Washington, DC 20220, on or before September 23, 1976. All written comments received from the public by then will be considered by the Department before taking action on a final notice of adoption. Comments received will also be avialable for public inspection at the above address between the hours of 9:00 a.m. and 5:30 p.m., Mondays through Fridays, except public holidays. Further information is available by telephone at (202) 964-2792.

WARREN F. BRECHT,
Assistant Secretary (Administration).

Treasury/OS 00.054

System name: Treasury Payroll/Personnel Information System (To be implemented between 26 September 1976 and July 1978)—Treasury/OS.

System locations:
Internal Revenue Service Data Center, Box 1100, Detroit, Michigan 43232, and U.S. Old Mint Data Center Division, 88 5th Street, San Francisco, California 94103.

Categories of individuals covered by the system: All Treasury Department employees and employees of other agencies using the system.

Categories of records in the system: Personnel and payroll data on all Treasury Department employees and employees of other agencies using the system. Minority Group Designator (MGD) in compliance with Civil Service Commission Regulations.

Authority for maintenance of the system: The Civil Service Commission in the Federal Personnel Manual (Chapter 291), establishes control of the automated personnel information under the agency Director, Personnel. The Department of the Treasury, in the Fiscal Requirement Manual, establishes control of the automated payroll information under the agency Fiscal Assistant Secretary. 5 U.S.C. 301. The use of the social security account number is authorized by Executive Order 9397, November 22, 1943.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

1. To generate the necessary payroll information, deductions and allotments to pay employees biweekly.

2. To furnish the necessary information to concerned agencies and state and city taxing authorities required by law.

3. To provide input to management information systems, and related accounting and budget systems, from the basic payroll and personnel master file.

4. To provide the Civil Service Commission with data on pay, leave, benefits, retirement deductions, and other information necessary for the Commission to carry out its government-wide personnel management functions.

5. To supply information to other federal agencies, on properly authorized request, necessary for the fulfillment of programs authorized by statute or executive order.

For additional routine uses, see Appendix AA, 40 FEDERAL REGISTER 56419–56420, December 2, 1975.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records: Master file is kept on disc and magnetic tape. Information concerning the employee is retrieved through the use of the individual's name and/or Social Security Number. Information is reduced to hard copy in the form of reports and payroll information and documentation. The Director of the computer facility, where the system is located, is the designated Treasury official responsible for the onsite security of the data and the proper and timely processing of the system and to insure that data is maintained and handled in the computer facility in such a manner that will guard against the invasion of privacy of employees as set forth in all pertinent regulations. Disposition not yet authorized by the National Archives and Records Service. A formal request is in progress, proposing erasure in annual increments five years from the end of the calendar year in which the record was created. Should the disposition ultimately approved be materially different from the one outlined here, further notice will be made in this publication.

System manager and address: Chief, Treasury Employee Data and Payroll Division, Department of the Treasury, Washington, D.C. 20220.

Notification, access and contest procedure: By written request to the Bureau designee listed below. Requesters must state own name, social security account number, name of employing Bureau, and geographical location of facility or duty station to which assigned.

Bureau Designees:

Office of the Secretary. Director, Office of Management and Organization, Department of the Treasury, 15th and Pennsylvania Avenue NW, room 4406, Washington, D.C. 20220.

Bureau of Alcohol, Tobacco and Firearms. Assistant Director for Administration, Federal Building, room 4212, 1200 Pennsylvania Avenue, NW, Washington, D.C. 20226.

Comptroller of the Currency. Director, Finance and Administration, 490 L'Enfant Plaza East SW, Fifth Floor, Washington, D.C. 20219.

U.S. Customs Service. Assistant Commissioner for Administration, 1301 Constitution Avenue NW, room 3124, Washington, D.C. 20229.

Bureau of Engraving and Printing. Assistant Director for Administration, 14th & C Streets SW, room 113M, Washington, D.C. 20228.

Federal Law Enforcement Training Center. Assistant Director for Administration, Glynco Facility, Brunswick, Georgia 31520.

Bureau of Government Financial Operations. Assistant Commissioner for Administration, Annex 1, room 600-E, Washington, D.C. 20226.

Internal Revenue Service. Assistant Commissioner (Administration), 1111 Constitution Avenue NW, room 3308, Washington, D.C. 20224.

Bureau of the Mint. Assistant Director for Administration, Warner Building, room 942, 501 13th Street NW, Washington, D.C. 20220.

Bureau of the Public Debt. Assistant Commissioner, Engraving and Printing Annex, room 648, 14th & D Streets SW, Washington, D.C. 20226.

U.S. Savings Bonds Division. Director of Administration, 1111 20th Street NW., room 219, Washington, D.C. 20226.

U.S. Secret Service. Assistant Director (Administration), 1800 G Street NW., room 850, Washington, D.C. 20223.

Record source categories: The Processing Clerk enters each new employee's personnel and payroll information on a copy of the SF–50, SF–52, or other standard input documents and transmits it to the processing data center. Subsequent personnel or payroll data is forwarded in this manner also.

DEPARTMENT OF DEFENSE

Office of the Secretary

DOD ADVISORY GROUP ON ELECTRON DEVICES

Advisory Committee Meeting

Working Group A (Mainly Microwave Devices) of the DoD Advisory Group on Electron Devices (AGED) will meet in closed session at 201 Varick Street, New York, NY 10014 on September 21–22, 1976.

The purpose of the Advisory Group is to provide the Director of Defense Research and Engineering, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The Working Group A meeting will be limited to review of research and development programs which the Military Departments propose to initiate with industry, universities or in their laboratories. The microwave area includes programs on developments and research related to microwave tubes, solid state microwave, electronic warfare devices, millimeter wave devices, and passive devices. The review will include details of classified defense programs throughout.

In accordance with section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Advisory Group meeting concerns matters listed in section 552(b) of Title 5 of the United States Code, specifically subparagraph (1) thereof, and that accordingly, this meeting will be closed to the public.

MAURICE W. ROCHE,
Director, Correspondence and Directives OASD (Comptroller).

AUGUST 19, 1976.

DOD ADVISORY GROUP ON ELECTRON DEVICES

Advisory Committee Meeting

Working Group B (Mainly Low Power Devices) of the DoD Advisory Group on Electron Devices (AGED) will meet in closed session at 201 Varick Street, 9th Floor, New York, NY 10014, on September 16–17, 1976.

The purpose of the Advisory Group is to provide the Director of Defense Research and Engineering, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices:

The Working Group B meeting will be limited to review of research and development programs which the Military Departments propose to initiate with industry, universities or in their laboratories. The low power devices area includes such programs as integrated circuits, charge coupled devices and memories. The review will include details of classified defense programs throughout.

In accordance with section 10(d) of Appendix I, Title 5, United States code, it has been determined that this Advisory Group meeting concerns matters listed in section 552(b) of Title 5 of the United States Code, specifically subparagraph (1) thereof, and that accordingly, this meeting will be closed to the public.

MAURICE W. ROCHE,
Director, Correspondence and Directives OASD (Comptroller).

DEPARTMENT OF THE INTERIOR

COLORADO STATE MULTIPLE USE ADVISORY BOARD AND CRAIG, COLORADO DISTRICT ADVISORY BOARD

Bureau of Land Management Meeting

Notice is hereby given that the Colorado State Multiple Use Advisory Board and Craig, Colorado District Advisory Board will meet at the District Office in Craig, Colorado and at the Steamboat Village Inn, Steamboat Springs, Colorado, October 4, 5 and 6, 1976 from 8:30 a.m. to 5:00 p.m.

The District Board will meet October 4 at 8:30 a.m. at the Craig District Office and proceed on a field trip to view various resource programs in the general area of Douglas Mountain and Sand Wash, located northwest of Craig.

Both Boards will meet together Tuesday, October 5 at the Steamboat Village Inn to discuss on-going programs, as well as a briefing on the Energy Minerals Activity Recommendation System (EMARS).

The State Board will take a field trip on Wednesday, October 6 to view strip mining operations and rehabilitation work in the Craig area.

The meetings will be open to the public. Both District and State tours are open to the public. However, non-board members must provide their own transportation. Time will be made available from 1:00 p.m. to 2:00 p.m. October 5 for brief statements by members of the public. Such statements must not exceed ten minutes and limited in content to suggested topics and issues for consideration by the Board.

DALE R. ANDRUS,
State Director.

[FR Doc.76-24733 Filed 8-23-76;8:45 am]

UKIAH DISTRICT MULTIPLE-USE ADVISORY BOARD

Meeting

Notice is hereby given that the Ukiah District Multiple-Use Advisory Board to the Bureau of Land Management will meet in Garberville, California, October 7–8, 1976. Meeting times are 11:00 a.m. to 5:00 p.m. on Thursday and 8:00 a.m. to 3:00 p.m. on Friday.

A tour of the King Range National Conservation Area (NCA) located west of Garberville, will be conducted on the first day. All aspects of the NCA management plan, including general administration, forestry, mining, fisheries, and off-road vehicle use will be open for discussion during the tour. The tour, which will cover only the south end of the NCA, is open to the public; however, transportation must be provided by those wishing to attend. Off-road vehicles will not be required. Initial assembly point for the tour will be the Sherwood Forest Motel in Garberville. Scheduled departure time is 11:00 a.m.

The agenda for the formal meeting on Friday will include the following topics: King Range Management, Ukiah District Timber Management Program and Environmental Statement, and Ukiah District Geothermal Development.

The meeting will be held at the Garberville Justice Court, beginning at 8:00 a.m., and will be open to the public. Time will be made available at 8:30 a.m. and 11:30 a.m. on Friday for brief statements by members of the public. Such statements should be limited to matters set forth in the agenda. Those wishing to make an oral statement on an agenda topic should notify the Ukiah District Manager prior to the meeting days. Any interested person or organization may file a written statement with the Board for its consideration. Such statements may be submitted at the meeting or mailed to the Ukiah District Manager.

Dated: August 11, 1976.

MELVIN D. CLAUSEN,
District Manager.

NORTH ATLANTIC REGION ADVISORY COMMITTEE

Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act—Public Law 92-463, that a meeting of the North Atlantic Committee will be held at 2:00 p.m., EDT on September 20, 1976 through approximately 12:00 noon EDT on September 22, 1976 at Acadia National Park, Bar Harbor Motor Inn, Bar Harbor, Maine.

The purpose of the Committee is to provide for the free exchange of ideas between the National Park Service and the public, and to facilitate the solicitation of advice or other counsel from members of the public on problems and programs pertinent to the North Atlantic Region.

The members of the Committee are as follows:

Mr. John Cole, Brunswick, Maine.
Mrs. Antoinette Downing, Providence, Rhode Island.
Ms. Arthur Fenske, Green Village, New Jersey.
Dr. Charles H. W. Foster, Needham, Massachusetts.
Mr. George T. Hamilton, Dover, New Hampshire.
Mr. John Keith, Hartsdale, New York.
Mr. Frederick Micha, Ontario, New York.
Mr. William Niering, Gales Ferry, Connecticut.
Mr. William Pinney, Charlotte, Vermont.

Matters to be discussed at this meeting include:

1. Briefing on current activities in the North Atlantic Region
2. Fire Island National Seashore Master Plan
3. Gateway National Recreation Area Development Plan
4. National Park Service planning procedure and public participation policy
5. Transportation systems

The meeting will begin at approximately 2:00 p.m., September 20, 1976, at Bar Harbor Motor Inn, Bar Harbor, Maine. The meeting will be open to the public. Any member of the public may file with the Committee a written statement concerning the matters to be discussed.

The group will tour the Mt. Desert portion of Acadia National Park beginning at the Bar Harbor Motor Inn, Bar Harbor, Maine at 8:00 a.m. September 22, 1976 and returning to the motel at approximately 12:00 noon. There may be extra seats on the bus that will be available to the public on a first come basis, others are welcome to accompany the tour in their own transportation.

Persons wishing further information concerning this meeting, or who wish to submit written statements, may contact John C. Raftery, Assistant to the Regional Director, North Atlantic Regional Office at 617-223-2892. Minutes of the meeting will be available for public inspection approximately four weeks after the meeting at the office of the North Atlantic Region, 150 Causeway Street, Boston, Massachusetts, 02114.

Dated: August 11, 1976.

DENIS P. GALVIN,
Acting Regional Director.

COMMITTEE ON FUTURE ENERGY PROSPECTS; NATIONAL PETROLEUM COUNCIL

Meeting

Notice is hereby given for the following meeting:

The National Petroleum Council's Committee on Future Energy Prospects will meet on September 10, 1976, at 10:30 a.m., in the Arena Three Room of the Sheraton Inn, 3535 Quebec Street, Denver, Colorado.

The agenda includes the following items for review and discussion:

1. Progress of development of study topic papers.
2. Timetable for completion of study topic papers.
3. Any other matters pertinent to the overall assignment of the Committee on Future Energy Prospects.

The purpose of the National Petroleum Council is to provide to the Secretary of the Interior, upon request, advice, information, and recommendations upon any matter relating to petroleum or the petroleum industry.

The meeting will be open to the public to the extent that space and facilities permit. Any member of the public may file a written statement with the Council either before or after the meeting. Interested persons who wish to speak at the meeting must apply to the Council and obtain approval in accordance with its established procedures.

Further information about the meeting may be obtained from Ben Tafoya, Office of the Assistant Secretary-Energy and Minerals, Department of the Interior, Washington, D.C. (telephone: 343-6226).

Dated: August 19, 1976.

ROBERT L. PRESLEY,
Staff Assistant-Emergency Preparedness, Office of the Assistant Secretary-Energy and Minerals.

PACIFIC POWER AND LIGHT CO.

Availability of Draft Environmental Statement; Proposed 500 KV Powerline, Midpoint, Idaho-Medford, Oregon

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared an environmental statement for a proposed 500 KV powerline between Midpoint, Idaho, and Medford, Oregon, and invited your written comments within 45 days of this notice.

The proposal involves construction, operation, and maintenance of a 500 KV electric transmission line between the Midpoint, Idaho, substation and a new substation to be constructed northeast of Medford, Oregon.

Copies are available for inspection at the following locations:

Office of Information, Bureau of Land Management, Interior Building, 18th and C Streets N.W., Washington, D.C. 20240, Telephone: (202) 343-4151.

Idaho State Office, Bureau of Land Management, Room 398 Federal Building, 550 West Fort Street, Boise, Idaho 83724, Telephone: (208) 342-2711 Ext. 2291.

Oregon State Office, Bureau of Land Management, Room 100, 729 N.E. Oregon Street, Portland, Oregon 97208, Telephone: (503) 234-3361, Ext. 4024.

Boise District Office, Bureau of Land Management, 230 Collins Road, Boise, Idaho 83702, Telephone: (208) 342-2711 Ext. 2582.

Shoshone District Office, Bureau of Land Management, 400 West "F" Street, Shoshone, Idaho 83352, Telephone: (208) 886-2208.

Lakeview District Office, Bureau of Land Management, 357 North "L" Street, Lakeview, Oregon 97630, Telephone: (503) 947-2177.

Vale District Office, Bureau of Land Management, 365 "A" Street West, Vale, Oregon 97918, Telephone: (503) 473-3144.

Region VI Information Office, U.S.F.S., 319 S.W. Pine, Portland, Oregon 97208, Telephone: (503) 221-2877.

Burns District Office, Bureau of Land Management, 74 S. Alvord Street, Burns, Oregon 97720, Telephone: (503) 573-2071.

Medford District Office, Bureau of Land Management, 310 W. 6th Street, Medford, Oregon 97501, Telephone: (503) 799-2351.

Fremont National Forest, 34 "D" Street N., Lakeview, Oregon 97630, Telephone: (503) 947-2151.

A limited number of single copies may be obtained from the Idaho and Oregon State Directors, Bureau of Land Management, and the Office of Public Affairs, Bureau of Land Management, Washington, D.C. 20240.

Notice is also given that public hearings on the draft environmental statement will be held at the following locations:

Courtroom, Federal Building, 310 West 6th Street, Medford, Oregon, 9:00 a.m. on Sept. 27, 1976.

Mills Auditorium, E. Main and Orchard Avenue, Klamath Falls, Oregon, 9:30 a.m. on Sept. 30, 1976.

Citizens Center, 11 North G., Lakeview, Oregon, 9:00 a.m. on Sept. 29, 1976.

Rodeway Inn, 29th and Chinden, Boise, Idaho, 9:00 a.m. on Oct. 6, 1976.

Oral testimony of a 10-minute maximum duration will be accepted from each witness at the hearings in lieu of written comments or in addition to any written comments submitted by such witness. The 10-minute time limit will be strictly enforced. Complete text of prepared testimony may be filed with the presiding officer at the hearing whether or not the speaker has been able to finish with oral delivery in the allotted 10 minutes.

Written requests to testify orally should be filed as follows:

Medford Hearing—District Manager, Bureau of Land Management, at the above address prior to close of business of September 23, 1976.

Lakeview and Klamath Falls Hearings—District Manager, Bureau of Land Management, Lakeview, Oregon, at the above address prior to close of business of September 27, 1976.

Boise Hearing—Idaho State Director, Bureau of Land Management at the above address prior to close of business on October 4, 1976.

Requests to present testimony should be signed by the prospective witness and should state the approximate time preference for giving oral testimony. The cutoff dates are necessary so that a witness list can be made available on the day before the public hearings.

Speakers will be heard, if present, in their established order of precedence. After the last listed witness present has been heard, the presiding officer will consider the request of any other person present and wishing to testify. The presiding officer may continue the hearing into a subsequent session if necessary to hear all prospective witnesses. Only one witness will be allowed to represent the viewpoints of a single organization. However, any witness will be permitted to give germane testimony if offered as the views or opinion of a private citizen.

Dated: August 20, 1976.

STANLEY D. DOREMUS,
Deputy Assistant Secretary of the Interior.

GRAIN STANDARDS

Nebraska Grain Inspection Point

Statement of Considerations. The Hastings Grain Inspection, Inc., Hastings, Nebraska, is designated to operate as an official inspection agency in accordance with the provisions of section 7 (f) of the U.S. Grain Standards Act (7 U.S.C. 79(f)). The Hastings Grain Inspection, Inc., has been providing official inspection service for approximately 42 years at Hastings and Grand Island, Nebraska, as designated inspection points and for approximately 1 year at Kearney, Nebraska, as a designated inspection point. The Hastings Grain Inspection, Inc., has also been providing official sampling service for approximately 41 years at Kearney, Nebraska, and for approximately 20 years at Ogallala, Nebraska. A designated inspection point is defined as a city, town, or other location assigned under the regulations to an official inspection agency for the conduct of official inspections, and within which the official inspection agency, or one or more of its licensed inspectors is located (7 CFR 26.1(b)(13)).

The Hastings Grain Inspection, Inc., now plans to locate one or more of its licensed grain inspectors at Ogallala, Nebraska, and has requested that its assignment of inspection points be amended in accordance with section 26.99 (b) of the regulations (7 CFR 26.99(b)) to add Ogallala, Nebraska, as a designated inspection point.

Notice is hereby given that the Agricultural Marketing Service has under consideration the request from the Hastings Grain Inspection, Inc., to add Ogallala, Nebraska, as a designated inspection point under the U.S. Grain Standards Act.

Opportunity is hereby afforded all interested persons to submit written views and comments with respect to this matter to the Hearing Clerk, U.S. Department of Agriculture, Washington, D.C. 20250. All material submitted should be in duplicate and mailed to the Hearing Clerk not later than September 20, 1976. All materials submitted pursuant to this notice will be made available for public inspection at the Office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)). Consideration will be given to the views and comments so filed with the Hearing Clerk and to all other information available to the U.S. Department of Agriculture before final determination is made with respect to this matter.

Done in Washington, D.C., on August 19, 1976.

WILLIAM T. MANLEY,
Acting Administrator.

ADVISORY COMMITTEE ON GRAINS—WHEAT, FEED GRAINS AND SOYBEANS

Public Meeting

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the Advisory Committee on Grains—Wheat, Feed Grains and Soybeans. This meeting will be held on September 16-17, 1976, starting at 9 a.m., in Room 218-A of the Administration Building, U.S. Department of Agriculture. The Advisory Committee on Grains will meet jointly with the National Cotton Advisory Committee.

This meeting will be to discuss the current domestic and foreign supply-demand situation and the 1977 program outlook. The meeting will be open to the public. Any member of the public may file a written statement with the committee before or within one week following the meeting.

The names of the members of the committee, agenda, summary of the meeting and other information pertaining to the meeting may be obtained from Kenneth T. Benjamin, Director, Grains, Oilseeds and Cotton Division, ASCS, U.S. Department of Agriculture, Room 3741-S, Washington, D.C. 20250.

Signed at Washington, D.C. on August 18, 1976.

KENNETH BENJAMIN,
Executive Secretary, Advisory Committee on Grains—Wheat, Feed Grains & Soybeans.

KARTA UNIT MANAGEMENT PLAN

Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for Karta Unit Management Plan, USDA-FS-R-10-DES(Adm)76-05.

This envrionmental statement proposes six alternatives for the future management of Tongass National Forest land in the Karta-Big Salt area. Following review and comment on this statement, a management plan will be selected and stated in a Final Environmental Statement.

This draft environmental statement was transmitted to the CEQ on August 18, 1976.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service; South Agriculture Bldg., Room 3231, 12th Street & Independence Ave. S.W., Washington, D.C. 20250.
USDA, Forest Service, Alaska Region, Federal Office Building, Juneau, Alaska 99802..
Forest Supervisor, Chugach National Forest, 121 W. Firewood Lane, Suite 205, Anchorage, Alaska 99503.
Forest Supervisor, Chatham Area, Tongass National Forest, Federal Building, Sitka, Alaska 99835.
Forest Supervisor, Ketchikan Area, Tongass National Forest, Federal Building, Room 313, Ketchikan, Alaska 99901.
Forest Supervisor, Stikine Area, Tongass National Forest, Federal Building, Petersburg, Alaska 99833.

A limited number of single copies are available upon request to James S. Watson, Forest Supervisor, Box 2278, Ketchikan, AK 99901.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ guidelines.

Comments are invited from the public, and from state and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved for which comments have not been requested specifically.

Comments, concerning the proposed action and requests for additional information should be addressed to James S. Watson, Forest Supervisor, Box 2278, Ketchikan, AK 99901.

Comments must be received by October 17, 1976 in order to be considered in the preparation of the final environmental statement.

Dated: August 18, 1976.

CARL W. SWANSON,
Regional Environmental Coordinator, Alaska Region.

PROPOSED LAND USE PLAN, ELK RIVER PLANNING UNIT

Availability of Draft Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for the Proposed Land Use Plan for Elk River Planning Unit, Forest Service Report Number USDA-FS-R1(05)-DES-Adm 76-21.

The environmental statement concerns a proposed revision of the Multiple Use Plan for the Elk River Planning Unit, Palouse Ranger District, St. Joe National Forest.

This draft environmental statement was transmitted to CEQ on August 16, 1976.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Bldg., Room 3230, 12th St. & Independence Ave., S.W., Washington, DC 20250.
USDA, Forest Service, Northern Region, Federal Building, Missoula, MT 59801.
USDA, Forest Service, Clearwater National Forest, Rt. 4 Ahsahka Road, Orofino, ID 83544.
USDA, Forest Service, Palouse Ranger District, Rt. 2, Box 4, Potlatch, ID 83855.

A limited number of single copies are available upon request to Forest Supervisor Kenneth P. Norman, Clearwater National Forest, Rt. 4, Ahsahka Road, Orofino, Idaho 83544.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ guidelines.

Comments are invited from the public, and from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to Forest Supervisor Kenneth P. Norman, Clearwater National Forest, Rt. 4, Ahsahka Road, Orofino, Idaho 83544. Comments must be received by October 15, 1976, in order to be considered in the preparation of the final environmental statement.

Dated: August 16, 1976.

WARREN G. DAVIES,
Acting Regional Forester, Northern Region, Forest Service.

RANCHERIA MANAGEMENT UNIT—SIERRA NATIONAL FOREST; LAND USE PLAN

Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for the Land Use Plan, Rancheria Management Unit, Sierra National Forest, California, USDA-FS-R5-DES(Adm)-76-04.

The environmental statement concerns a proposed land use management plan for the 13,540 acres of National Forest lands known as the Rancheria Management Unit of the Sierra National Forest, in Fresno County, California. These lands contain no new wilderness study areas or inventoried roadless areas.

This draft environmental statement was transmitted to the Council on Environmental Quality (CEQ) on August 17, 1976.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Bldg., Room 3230, 12th St. & Independence Ave., SW., Washington, D.C. 20250.
Regional Forester, U.S. Forest Service, Room 529, 630 Sansome Street, San Francisco, California 94111.
Forest Supervisor's Office, Sierra National Forest, 1130 "O" Street, Fresno, California 93721.
Forest Service, District Ranger, Trimmer Route, Sanger, California 93657.

A limited number of single copies are available, upon request, from Forest Supervisor Sotero Muniz, Sierra National Forest, 1130 "O" Street, Fresno, California 93721.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ guidelines.

Comments are invited from the public, and from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental effect for which comments have not been specifically requested.

Comments concerning the proposed action, and requests for additional information should be addressed to Forest Supervisor Sotero Muniz, Sierra National Forest, 1130 "O" Street, Fresno, California 93721. Comments must be received within 60 days after transmittal to CEQ in order to be considered in the preparation of the final environmental statement.

T. W. KOSKELLA,
Deputy Regional Forester.

TENNESSEE TELEPHONE CO.

Proposed Loan Guarantee

Under the authority of Public Law 93-32 (87 Stat. 65) and in conformance with applicable agency policies and procedures as set forth in REA Bulletin 320-22, "Guarantee of Loans for Telephone Facilities," dated February 4, 1975, published in proposed form in the FEDERAL REGISTER, September 16, 1974 (Vol. 39 No. 180, pages 33228-33229) notice is hereby given that the Administrator of REA will consider providing a guarantee supported by the full faith and credit of the United States of America for a loan in the approximate amount of $12,258,000 to Tennessee Telephone Company, Mt. Juliet, Tennessee. The loan funds will be used to finance the construction of facilities to extend telephone service to new subscribers, and improve telephone service for existing subscribers.

Legally organized lending agencies capable of making, holding and servicing

V 41 165 AUG 24 76 UMI

the loan proposed to be guaranteed may obtain information and details of the proposed project from Mr. Eugene E. Morris, President, Tennessee Telephone Company, c/o 320 Cedar Bluff Road, Knoxville, Tennessee 37917.

To assure consideration, proposals must be submitted within 30 days of the date of this notice to Mr. Morris. The right is reserved to give such consideration and make such evaluation or other disposition of all proposals received, as the Tennessee Telephone Company and REA deem appropriate. Prospective lenders are advised that financing for this project is available from the Federal Financing Bank under a standing loan commitment agreement with the Rural Electrification Administration.

Copies of REA Bulletin 320-22 are available from the Director, Information Services Division, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250.

Dated at Washington, D.C., this 12th day of August, 1976.

DAVID H. ASKEGAARD,
Acting Administrator, Rural Electrification Administration.

DEPARTMENT OF COMMERCE

Domestic and International Business Administration

MATERIAL PREPARATION SUBCOMMITTEE OF THE SEMICONDUCTOR MANUFACTURING AND TEST EQUIPMENT TECHNICAL ADVISORY COMMITTEE

Partially Closed Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. IV, 1974), notice is hereby given that a meeting of the Material Preparation Subcommitee of the Semiconductor Manufacturing and Test Equipment Technical Advisory Committee will be held on Thursday, September 16, 1976 at 9:00 a.m. in Room 1851, Main Commerce Building, 14th and Constitution Avenue, N.W., Washington, D.C.

The Semiconductor Manufacturing and Test Equipment Technical Advisory Committee was initially established on January 3, 1973. On December 20, 1974, the Acting Assistant Secretary for Administration approved the recharter and extension of the Committee for two additional years, pursuant to Section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c)(1) and the Federal Advisory Committee Act. The Material Preparation Subcommittee of the Semiconductor Manufacturing and Test Equipment Technical Advisory Committee was established on March 3, 1976, by the Director, Office of Export Administration, pursuant to the charter of the Committee.

The Committee advises the Office of Export Administration, Bureau of East-West Trade, with respect to questions involving technical matters, world-wide availability and actual utilization of production and technology, and licensing procedures which may affect the level of export controls applicable to semiconductor manufacturing and test equipment, including technical data related thereto, and including those whose export is subject to multilateral (COCOM) controls. The Material Preparation Subcommittee was formed to provide advice to the Committee with respect to methods and equipment used for the preparation of semiconductor materials.

The Subcommittee meeting agenda has five parts:

GENERAL SESSION

(1) Opening remarks by the Subcommittee's Acting Chairman.

(2) Presentation of papers or comments by the public.

(3) Report on activities since the last Subcommittee Meeting—each member.

(4) Statement of future activities and schedule for actions.

EXECUTIVE SESSION

(5) Discussion of matters properly classified under Executive Order 11652, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The General Session of the meeting is open to the public, at which a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Subcommittee. Written statements may be submitted at any time before or after the meeting.

With respect to agenda item (5), the Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on November 25, 1975, pursuant to Section 10(d) of the Federal Advisory Committee Act that the matters to be discussed in the Executive Session should be exempt from the provisions of the Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552(b)(1), i.e., it is specifically required by Executive Order 11652 that they be kept confidential in the interest of the national security. All materials to be reviewed and discussed by the Committee during the Executive Session of the meeting have been properly classified under the Executive Order. All Committee members have appropriate security clearances.

Copies of the minutes of the open portion of the meeting will be available upon written request addressed to the Freedom of Information Officer, Room 3100, Domestic and International Business Administration, U.S. Department of Commerce, Washington, D.C. 20230.

For further information, contact Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Domestic and International Business Administration, Room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone: A/C 202-377-4196.

The complete Notice of Determination to close portions of the series of meetings of the Semiconductor Manufacturing Test Equipment Technical Advisory Committee and of any subcommittees thereof, was published in the FEDERAL REGISTER on January 30, 1976 (41 FR 4623).

Dated: August 19, 1976.

LAWRENCE J. BRADY,
Acting Director, Office of Export Administration, Bureau of East-West Trade, U.S. Department of Commerce.

[FR Doc.76-24773 Filed 8-23-76;8:45 am]

PATTERN GENERATION AND IMAGE TRANSFER AND INSPECTION SUBCOMMITTEE OF THE SEMICONDUCTOR MANUFACTURING AND TEST EQUIPMENT TECHNICAL ADVISORY COMMITTEE

Partially Closed Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. IV, 1974), notice is hereby given that a meeting of the Pattern Generation and Image Transfer and Inspection Subcommittee of the Semiconductor Manufacturing and Test Equipment Technical Advisory Committee will be held on Thursday, September 16, 1976, at 9:00 a.m. in Room 5230, Main Commerce Building, 14th and Constitution Avenue, NW., Washington, D.C.

The Semiconductor Manufacturing and Test Equipment Technical Advisory Committee was initially established on January 3, 1973. On December 20, 1974, the Acting Assistant Secretary for Administration approved the recharter and extension of the Committee for two additional years, pursuant to Section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c)(1) and the Federal Advisory Committee Act. The Pattern Generation and Image Transfer and Inspection Subcommittee of the Semiconductor Manufacturing and Test Equipment Technical Advisory Committee was established on March 3, 1976, by the Director, Office of Export Administration, pursuant to the charter of the Committee.

The Committee advises the Office of Export Administration, Bureau of East-West Trade, with respect to questions involving technical matters, world-wide availability and actual utilization of production and technology, and licensing procedures which may affect the level of export controls applicable to semiconductor manufacturing and test equipment, including technical data related thereto, and including those whose export is subject to multilateral (COCOM) controls. The Pattern Generation and Image Transfer and Inspection Subcommittee was formed to provide advice to the Committee with respect to equipment and techniques used in the formation of precision microelectronics artwork and masks.

The Subcommittee meeting agenda has four parts:

GENERAL SESSION

(1) Opening remarks by the Subcommittee Chairman.

(2) Presentation of papers or comments by the public.

(3) Discussion of the following categories of equipment in the context of the (a) technical criteria, and (b) matrix: Interactive computer graphics and pattern generator systems—Robert J. Maerz; Step-and-repeat cameras—R. A. Richardson; Mask replication—A Tobey; Electro-and-X-Ray lithography—Committee of the whole.

EXECUTIVE SESSION

(4) Discussion of matters properly classified under Executive Order 11652, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The General Session of the meeting is open to the public, at which a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Subcommittee. Written statements may be submitted at any time before or after the meeting.

With respect to agenda item (4), the Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on November 25, 1975, pursuant to Section 10(d) of the Federal Advisory Committee Act that the matters to be discussed in the Executive Session should be exempt from the provisions of the Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552(b)(1), i.e., it is specifically required by Executive Order 11652 that they be kept confidential in the interest of the national security. All materials to be reviewed and discussed by the Committee during the Executive Session of the meeting have been properly classified under the Executive Order. All Committee members have appropriate security clearances.

Copies of the minutes of the open portion of the meeting will be available upon written request addressed to the Freedom of Information Officer, Room 3100, Domestic and International Business Administration, U.S. Department of Commerce, Washington, D.C. 20230.

For further information, contact Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Domestic and International Business Administration, Room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone: A/C 202-377-4196.

The complete Notice of Determination to close portions of the series of meetings of the Semiconductor Manufacturing and Test Equipment Technical Advisory Committee and of any subcommittees thereof, was published in the Federal Register on January 30, 1976, (41 FR 4623).

Dated: August 19, 1976.

LAWRENCE J. BRADY,
Acting Director, Office of Export Administration, Bureau of East-West Trade, U.S. Department of Commerce.

Economic Development Administration

CHIPS 'N TWIGS, INC.

Petition for Determination of Eligibility

A petition by Chips 'N Twigs, Inc., 642 North Broad Street, Philadelphia, Pennsylvania 19130, and its affiliates, producers of apparel for men and boys, was accepted for filing on August 17, 1976, under section 251 of the Trade Act of 1974 (Pub. L. 93-618). Consequently, the United States Department of Commerce has initiated an investigation to determine whether increased imports into the United States of articles like or directly competitive with those produced by the firms contributed importantly to total or partial separation of the firms' workers, or threat thereof, and to a decrease in sales or production of the petitioning firms.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by the Chief, Trade Act Certification Division, Economic Development Administration, U.S. Department of Commerce, Washington, D.C. 20230, no later than the close of business of September 3, 1976.

CHARLES L. SMITH,
Acting Chief, Trade Act Certification Division, Office of Planning and Program Support.

[FR Doc.76-24755 Filed 8-23-76;8:45 am]

Patent and Trademark Office

INTERNATIONAL PROTECTION OF GOVERNMENT EMBLEMS AND SEALS

Change of Intent

The Patent and Trademark Office, Department of Commerce, intends to forward only the 50 State seals plus one departmental seal for each department listed in the publication "Seals and Other Devices in Use at the Government Printing Office" ("Seals") instead of the entire publication, as indicated on page 59366 of the FEDERAL REGISTER of December 23, 1975.

Since the publication had been printed in 1975, it was assumed that few deletions and additions would be necessary. However, the response to the above notice, along with some necessary deletions, resulted in a large number of seals in the publication requiring deletion. This rendered the publication unacceptable for submission to the World Intellectual Property Organization (WIPO).

Therefore, the Patent and Trademark Office now intends to forward only the 50 State seals along with the departmental seal denoted "No. 1" for each department listed in the "Seals" publication. If this is not the preferred departmental or State seal, the department or State involved is requested to notify the Patent and Trademark Office by September 21, 1976. This notification should either specify the number of the preferred seal, as it appears in the "Seals" publication, or provide a clear, black and white photograph, suitable for reproduction, of the preferred seal. The seal must be no larger than 1½ inches in diameter.

These seals will then be forwarded to WIPO for protection under Article 6*ter* of the Paris Convention for the Protection of Industrial Property.

Address all correspondence to: Commissioner of Patents and Trademarks, Washington, D.C. 20231.

Dated: August 18, 1976.

C. MARSHALL DANN,
Commissioner of Patents and Trademarks.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[Docket No. 76N-0239; DESI 5378]

CERTAIN COMBINATION ANORECTIC DRUGS: DEXAMYL SPANSULE CAPSULES, TABLETS, AND ELIXIR

Final Order on Objections and Request for Hearing on Refusal To Approve New Drug Applications

The Food and Drug Administration (FDA) denies hearing and refuses to approve the new drug applications for Dexamyl Elixir Spansule capsules and Tablets (NDA Nos. 17-074, 17-075, and 17-077; formerly docket No. FDC-D-582), effective September 3, 1976.

In the FEDERAL REGISTER of August 8, 1970 (35 FR 12652), FDA issued a statement of policy, under § 310.504 (21 CFR 310.504, formerly 21 CFR 130.46), regarding amphetamine-containing drugs, including dextroamphetamine. The statement noted that the National Academy of Sciences/National Research Council, Drug Efficacy Study Group (NAS/NRC) had found, inter alia, that this class of drugs had a generally short-term (a few weeks) anorectic effect, that there was no evidence that they altered the natural course of obesity, that they had a significant potential for abuse and that there were reservations about the adequacy of controls in some of the clinical studies. The Food and Drug Administration concurred with the NAS/NRC report, and in addition, noted that production data indicated that amphetamines were manufactured and used in quantities greatly in excess of demonstrated medical needs. Accordingly, the statement of policy required that such drugs be relabeled to deflect the present state of knowledge concerning amphetamines, their potential for misuse and abuse and their limited medical usefulness. The statement was made specifically applicable to combination drugs containing dextroamphetamine. Manufacturers of drugs not expressly covered by approved new drugs applications (NDA's) were permitted to continue marketing if they relabeled their products within 60 days and if they submitted a new drug application within 1 year.

V 41 165 AUG 24 76 UMI

Manufacturers were advised that the relabeled products—both single entity and combination—would be regarded as new drugs requiring new drug applications.

In a separate notice published in the FEDERAL REGISTER of August 8, 1970 (35 FR 12678), FDA announced its evaluation of 23 anorectic, i.e., appetite suppressant, drugs. The notice stated that FDA had considered the reports of the NAS/NRC, Drug Efficacy Study Group, together with other evidence, and concluded that there was a lack of substantial evidence for several claims but that the listed drugs were regarded as possibly effective for their claimed anorectic effects. Manufacturers were given 60 days to revise their labeling to delete those indications for which no substantial evidence had been found and 6 months to submit, in supplemental or original new drug applications, substantial evidence of effectiveness for the anorectic claims. Finally, the notice advised that at the end of the 6-month period, the data would be evaluated to determine whether or not substantial evidence had been demonstrated, and if it had not, procedures would be initiated to withdraw approval of the new drug applications pursuant to section 505(e)(2) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)).

In response to the August 8, 1970 statement of policy, Smith, Kline and French (SKF) submitted new drug applications for Dexamyl Spansules (NDA No. 17–075), Tablets (NDA No. 17–077) and Elixir (NDA No. 17–074) combination drugs containing dextroamphetamine sulfate and amobarbital in varying amounts; the elixir also contained alcohol. In a letter accompanying the submission SKF contended that Dexamyl products were not "new drugs" within the meaning of section 201(p) of the act (21 U.S.C. 321(p)) and that they were exempted from the requirements of the Drug Amendments of 1962 by the "grandfather clause" (section 107(c)(4) of Pub. L. 87–781 (21 U.S.C. 321 note)), and were therefore not subject to the August 8, 1970 statement of policy.

Subsequently, on January 15, 1973, the Acting Director of the Bureau of Drugs advised SKF that its applications were not approvable because (1) they failed to contain full reports of adequate tests by all methods reasonably applicable to show the safety and efficacy of the drugs for their labeled uses as required by section 505(b)(1) and (6) of the act, and (2) they failed to support the SKF claim that Dexamyl's sedative constituent, amobarbital, significantly decreased the adverse effects associated with the anorectic constituent, dextroamphetamine. Smith, Kline and French was further advised that it could contest the decision on the products and request a hearing by filing the applications over protest pursuant to § 314.110(d) (21 CFR 314.110(d)).

On February 12, 1973, SKF requested that its applications be filed over protest without prejudice to its position that the products were not "new drugs." On the same day, the statement of policy regarding amphetamines for human use under § 310.504 was revised and published in the FEDERAL REGISTER (38 FR 4249), to reflect that while sufficient data had been submitted, in response to the previous statement of policy, to generally support the anorectic efficacy of single entity, oral-dosage anorectic drugs, the degree of extra weight loss was small (a few tenths of a pound a week in many cases), variations were great, and the rate of weight loss decreased after the first weeks of therapy. Accordingly, the Commissioner of Food and Drugs concluded that single entity oral dosage forms were effective in the management of exogenous obesity as a short-term (a few weeks) adjunct in a regimen of weight reduction based on caloric restriction for patients in whom obesity is not alleviated by other measures. The statement reiterated that anorectic combinations containing sedatives or tranquilizers were regarded as new drugs requiring approved new drug applications and that the data in such applications must meet the requirements of § 300.50 *Fixed combination prescription drugs for humans* (21 CFR 300.50, formerly 21 CFR 3.86).

In a notice of opportunity for hearing covering 13 anorectic combinations, published in the same issue of the FEDERAL REGISTER (February 12, 1973 (38 FR 4279), Docket No. FDC–D–582), the Commissioner stated that the data submitted in response to the August 8, 1970 DESI notice had been reviewed and found not to provide substantial evidence that the drugs were effective as fixed combinations for their claimed uses because the submitted data did not support the contention that the combination products decrease the incidence or severity of side effects or lessen the abuse potential associated with the single anorectic ingredient. Accordingly, he proposed to withdraw approval of the named new drug applications and invited holder(s) of new drug applications and other interested persons, including manufacturers and distributors of identical, related, or similar products, to submit, on or before March 14, 1973, a written request for hearing. The request for hearing was to state why approval of the new drug application should not be withdrawn and to provide a well-organized and full factual analysis of the clinical and other investigational data in support of the requested hearing.

On March 14, 1973, SKF responded by letter and contended that the notice of opportunity for hearing should be withdrawn insofar as it applied to Dexamyl products because (1) Dexamyl products were not identical, similar or related to the 13 combinations named in the notice, (2) Dexamyl products have never been the subject of an approved NDA and therefore were not "new drugs" within the meaning of the act, and (3) the Commissioner lacked authority to determine whether a drug was a "new drug" within the meaning of the act. Alternatively, SKF argued that the data in its applications, and Dexamyl's 22-year history of safe and effective use raised issues of fact sufficient to justify a hearing and therefore that it was entitled to a detailed statement of reasons for the Commissioner's conclusion that its studies failed to provide substantial evidence of effectiveness.

In the FEDERAL REGISTER of March 30, 1973 (38 FR 8290), the Commissioner advised SKF and other manufacturers who had requested hearings that they could continue marketing their products pending a ruling on the hearing requests.

On July 11, 1973, SKF filed a supplemental hearing request reasserting its previous legal arguments and providing additional clinical studies.

The Commissioner has considered all of the material submitted by SKF and has concluded that there is no genuine issue of material fact requiring a hearing and that the legal objections offered are insubstantial. A full discussion follows:

I. THE DRUGS

A. *Elixir.* Each 5 milliliter (one teaspoonful) contains 5 milligrams dextroamphetamine, 32 milligrams amobarbital and 25 percent alcohol.

B. *Spansule capsules.* Each Spansule capsule No. 2 contains 15 milligrams dextroamphetamine and 97 milligrams amobarbital. Each Spansule capsule No. 1 contains 10 milligrams dextroamphetamine and 65 milligrams amobarbital.

C. *Tablets.* Each tablet contains 5 milligrams dextroamphetamine and 32 milligrams amobarbital.

II. RECOMMENDED USES AND DOSAGE: RATIONALE FOR THE COMBINATION

The labeling for Dexamyl products incorporates the changes required by § 310.504 and recommends Dexamyl solely for exogenous obesity as a short-term (a few weeks) adjunct in a regimen of weight reduction based on caloric restriction. Smith, Kline and French's rationale for including amobarbital is that it reduces the possibility of the wakefulness and excitation that may occur in some patients on dextroamphetamine alone.

The labeling generally provides that Dexamyl should be administered at the lowest effective, individually adjusted dosage. The specific recommended dosages are as follows: Elixir, 1 teaspoonful 2 or 3 times daily 30 to 60 minutes before meals; Spansule capsules, 1 in the morning; Tablets, 1 tablet 2 or 3 times daily, 30 to 60 minutes before meals.

III. DATA SUBMITTED TO SUPPORT CLAIMS OF EFFECTIVENESS

If SKF is to have its three NDA's for Dexamyl approved, it must first establish, by adequate and well-controlled clinical investigations conducted pursuant to 21 U.S.C. 355(d) and 21 CFR 314.111(a)(5), that these products are effective anorectic agents. A well-controlled study is one, using subjects substantially identical in all respects except for the drug received, that permits comparison of test-drug treatment results

with the results of no treatment or some other effective treatment. Properly conducted, such a study permits conclusions to be drawn regarding the effect of a single, well-defined variable: the presence or absence of the test drug. To the extent that other variables, such as observer bias or differences between the patient-groups, are introduced into the study, the ability to reach a conclusion about the test drug is confounded. The principles set forth in § 314.111(a)(5) are intended to eliminate such confounding factors while assuring that the study generates unbiased documented quantitative information that permits FDA to evaluate the study results independently.

Additionally, because the various formulations of Dexamyl contain fixed combinations of dextroamphetamine and amobarbital (the Elixir also contains alcohol), SKF must show, by adequate and well-controlled clinical investigations conducted in accordance with the statute and regulations, that the drugs meet the requirements of the policy for fixed-combination prescription drugs for humans under § 300.50. This policy requires that each component of a product contribute to the effects claimed in its labeling and that the dosage of each component (amount, frequency and duration of administration) be such that the combination is safe and effective for a significant patient population requiring the concurrent therapy defined in the labeling. The regulation specifically cites as appropriate combinations those in which one component of a combination drug enhances the safety or effectiveness of the principal active component or minimizes the abuse potential of the active component.

Smith, Kline and French does not claim that amobarbital directly enhances or potentiates the effectiveness of dextroamphetamine. Nor does SKF claim that amobarbital reduces the abuse potential of dextroamphetamine. Rather, SKF claims that Dexamyl satisfies the combination policy because amobarbital significantly reduces the number of side effects attributable to dextroamphetamine. To substantiate its claim, SKF must compare the incidence and severity of side effects of Dexamyl and dextroamphetamine in two substantially identical groups of subjects who have the precise condition for which Dexamyl is recommended by its labeling. Both groups must receive the drugs under the conditions of use set forth in the labeling.

However, a demonstrated reduction in certain side effects would not satisfy all the requirements of the combination policy. If, for example, amobarbital reduced the incidence of insomnia, there would still be no logical reason to administer the barbiturate throughout the day. In that event, the "amount, frequency, and duration" of each component would not be such that the combination was safe and effective because clearly unnecessary drug administration would result from use of the fixed combination.

A. CONTRIBUTION OF AMOBARBITAL

1. *Elixir.* No data were submitted by SKF to support the contribution of amobarbital in this dosage form.

2. *Spansule capsules.* Regarding the claim that amobarbital reduces the possibility of excitation and wakefulness caused by dextroamphetamine, SKF identified five studies, only one of which utilized the Spansule dosage form. It is evaluated as follows:

"Anorexia and Central Nervous System Stimulation," T. M. Feinblatt and E. A. Ferguson, "Psychosomatics," Vol. II, No. 1, January-February, 1961. This study was described as a double-blind, 4-way cross-over study in which 91 subjects were divided into 4 groups and given placebo, phenmetrazine, dextroamphetamine, and combined dextroamphetamine-amobarbital for a period of 1 week until all patients received each regimen. To rule out order of administration as a confounding variable, each treatment was administered first, second, third, and fourth approximately the same number of times. Patients were told to take one dose a day and to restrict their diet to 1,200 calories per day.

The authors reported that Dexamyl-treated patients had significantly lower side effects than did patients treated with dextroamphetamine. The study, as reported, however, patently fails to meet the criteria for a well-controlled clinical investigation because it does not explain methods of observation and recording of results, including variables measured, quantitation or assessment of the subjects' response, and steps taken to minimize bias on the part of the data analyst, as required by 314.111(a)(5)(ii)(*a*) (*3*) and (*4*). Although the study was supposed to compare the incidence of stimulatory side effects, the only detail offered on the collection of data is that patients were asked a uniform series of questions. No information is provided about the nature or form of questions asked, and consequently their appropriateness for ascertaining the incidence of stimulatory side effects cannot be determined.

An important reason for knowing the questions used is that, as the authors recognize, soliciting information with specific questions gives an unusually high incidence of adverse effects compared to recording spontaneous comments. Accordingly, it is questionable whether these solicited responses may properly be considered drug-related adverse effects or whether they are more properly attributable to investigators' questions.

The investigators present their results in a summary data table with general categories such as "felt better," "insomnia," and "nervousness." They do not explain how data were placed into these categories, i.e., whether these descriptions summarize specific answers to specific questions or represent the overall conclusion of the investigator based on patient responses and/or his personal observations. Nor does the report state whether patients were given an opportunity to characterize the severity of their reactions. Without more information on how adverse reaction data were elicited and analyzed, assessment of results is impossible. There is also no way to tell if the questions were designed only to elicit dextroamphetamine-like adverse reactions or whether they were also directed at detecting amobarbital-type side effects. Obviously, it makes no sense to claim that the side effects of dextroamphetamine are reduced if the other component, amobarbital, is responsible for equally serious side effects of its own. Details on how adverse reactions were elicited are required to tell if the investigators took such a possibility into account.

In addition, the study did not provide the summary of methods of analysis and evaluation of data required by §314.111(a)(5)(ii)(*a*)(5). Without such a summary, it is impossible (even if methods of collecting data had been explained) to assess the authors conclusion that Dexamyl patients had fewer side effects than dextroamphetamine patients.

Clearly, this study is not a well-controlled clinical investigation. Even if it were well-controlled, it could not, by itself, constitute substantial evidence within the meaning of section 505(d) of the act, since that section requires at least two such studies. Furthermore, the 1¼ page paper is completely lacking in details that permit scientific evaluation (§ 314.111(a)(5)(ii)(*c*)).

3. *Dexamyl tablets.* The other four studies submitted by SKF all related to the tablet dosage form. These are evaluated as follows:

(a) "Effects of Placebo, Dexamyl, and Lucofen on Moods, Emotions, and Motivations," J. S. Cameron, P. G. Specht, and G. R. Wendt, "Journal of Psychology," Vol. 66, pp. 199–209, 1967. Smith, Kline and French provided a supplemental statistical analysis in which 78 volunteer students (39 men and 39 women) were observed after single-dose treatment with a variety of different drugs, each administered 2 or more days apart. The treatment drugs included Lucofen (chlorphentermine HCl), dextroamphetamine (men received 8 milligrams, women received 5 milligrams), a combination similar to Dexamyl tablets (5 milligrams dextroamphetamine and 30 milligrams amobarbital), dimenhydrinate, a variety of weak analgesics, and three placebo treatments. The treatments were given in different sequences to offset any effect related to the order of administration. On each treatment day the subject was evaluated twice, once before taking medication in the late morning and again 2 hours after medication. In the morning, before taking medication, each patient filled out a 133-item free-choice Adjective Check List designed to describe how he felt when filling it out, e.g., warmhearted, or friendly. In the afternoon, after taking medication, the free-choice check list was redone and, in addition, each patient completed a 32-item forced-choice Adjective Check List. The forced-choice check list consisted primarily of 32 pairs of self-descriptive adjectives, e.g., jittery-nerv-

V 41 165 AUG 24 76 UMI

ous, or easygoing-relaxed. For each paired description the subject was asked to indicate whether he felt more that way before taking the drug or after the drug took effect.

As reported by SKF, the forced-choice Adjective Check List showed significant advantages for Dexamyl over dextroamphetamine in two relevant categories in males "easygoing-relaxed" (more on Dexamyl) and "jittery-nervous" (fewer on Dexamyl). No significant differences were seen in females.

This study is not an adequate and well-controlled clinical investigation within the meaning of § 314.111(a)(5) for a number of reasons.

The most critical defect in the study is the use in males of a larger dose of dextroamphetamine in the dextroamphetamine-only group (8 milligrams) than in the combination drug group (5 milligrams). Because of this, the male test and control groups were not comparable with respect to the most pertinent variable, namely, the amount of dextroamphetamine taken (§ 314.111(a)(5)(ii)(*a*)(2)(*iii*)). It is senseless to attempt to demonstrate that amobarbital reduces the side effects of a given amount of dextroamphetamine unless the same amount of dextroamphetamine is used in both halves of the comparison. The addition of the amobarbital accompanied by a reduction in the dose of dextroamphetamine (which itself would be expected to reduce side effects) makes it impossible to determine whether the smaller number of side effects was attributable to the addition of amobarbital or the decrease in dextroamphetamine, or both.

The study is not well-controlled in several other respects. The patients were not selected so as to assure their suitability for the purposes of the study as required by § 314.111(a)(5)(ii)(*a*)(2)(*i*). Although Dexamyl is recommended as an adjunct for the treatment of exogenous obesity in a regimen of weight reduction based on caloric restriction, it does not appear that patients in this study were either obese or on a calorie-restricted diet. Thus, the study is invalidated because there is no evidence suggesting that the subjects in the study will react to dextroamphetamine or amobarbital the same as obese patients on a calorie-restricted diet.

Equally important, although Dexamyl's labeling recommends use over a period of a few weeks, Dexamyl was administered only once, on a single day, in this study. Clearly therefore, the study can provide no evidence that the drug will have the effect it is represented to have under the conditions of use recommended in the labeling (§§ 300.50(a) and 314.111(a)(5)(i)).

Finally, the investigators did not use the same formulation of Dexamyl as the one for which approval is sought. The combination in the study consisted of 5 milligrams dextroamphetamine and 30 milligrams of amobarbital, yet none of the combinations covered by the subject NDA's contain this precise formulation (§ 314.111(b)).

The analysis of the results was also deficient (§ 314.111(a)(5)(ii)(*a*)(*5*)). No statistical analysis of the free-choice Adjective Check List was reported. Although the authors grouped adjectives into clusters (e.g., friendly, good-natured, trustful and warmhearted were combined), they do not explain how the adjectives and the clusters relate to adverse drug effects due to dextroamphetamine. Finally, in analyzing the free-choice Adjective Check List, results for males and females were combined and analyzed; no separate data for females were provided. Because the males received different dosages of dextroamphetamine, their data bias the results and render the combined analysis uninterpretable. Therefore, the results of the free-choice Adjective Check List cannot be used to support a claim that amobarbital reduces the incidence of dextroamphetamine side effects.

Nor do the results of the forced-choice Adjective Check List demonstrate a contribution of amobarbital. For this check list, male and female data were reported separately. There were no significant differences between women given 5 milligrams of dextroamphetamine and women given 5 milligrams of dextroamphetamine plus 30 milligrams of amobarbital. Although, as noted, the forced-choice Adjective Check List showed significant advantages for Dexamyl over dextroamphetamine in two relevant categories in males—"easygoing-relaxed" (more on Dexamyl) and "jittery-nervous" (fewer on Dexamyl)—this is meaningless because the Dexamyl males received less amphetamine than the dextroamphetamine males. Moreover, the same check list also showed that more males became "jittery-nervous" on placebo than on dextroamphetamine. This indicates a clear "no-test" situation and calls into question the validity and usefulness of the forced-choice Adjective Check List as a measurement of dextroamphetamine side effects.

(b) "Dexamyl Tablets (5 milligrams dextroamphetamine and 32 milligrams amobarbital) and Dextroamphetamine (5 milligrams dextroamphetamine) Mood Study in Thirty-Seven Overweight Women," J. C. Respess, unpublished study, 1973. This was a double-blind crossover study designed to test whether or not a psychological mood study could show differences between Dexamyl and dextroamphetamine; 39 female volunteers, all of whom were 20 percent or more overweight according to Metropolitan Life Insurance standards, participated in the study on 2 weekends. On the first Friday, the subjects were advised of the study procedure and completed a 50-item Adjective Check List. On Saturday morning, the subjects completed two additional Adjective Check Lists and filled out a 65-item Profile of Mood Status. After completing the second Adjective Check List, half of the subjects were given Dexamyl, and half dextroamphetamine; the two medications were identical in appearance. In the afternoon, subjects completed two Adjective Check Lists, received a second dosage of the respective medications, filled out two additional Adjective Check Lists and two additional mood status profiles. The routine was repeated on Sunday. Two weekends later the procedure was duplicated but the groups were crossed over to the other medication.

This study does not constitute substantial evidence of effectiveness within the meaning of § 314.111(a)(5)(i) because Dexamyl was not administered under the conditions of use recommended in its labeling and because, in any case, the results do not show that amobarbital reduces the side effects of dextroamphetamine.

Although Dexamyl was offered for daily use over a period of several weeks, the subjects received Dexamyl for only 2 days. Thus, there is no way to assess the effect of amobarbital when administered for the length of time suggested in Dexamyl's labeling (§§ 300.50(a) and 314.111(a)(5)(i)).

Similarly, there is no indication in the protocol or accompanying biostatistical analysis that the subjects were on a weight-reducing regimen. Since decreased food intake is the primary condition of use of Dexamyl, the drug must be studied in subjects who are on a calorie-restricted diet (§§ 300.50(a) and 314.111(a)(5)(*a*)(2)(*i*)).

The setting of this study was markedly different from that in which the medication would normally be taken (§§ 300.50(a) and 314.111(a)(5)(i)). In this regard, the author acknowledges that the results were influenced by the milieu of the sessions (companionship of others with similar weight problems, sharing motel rooms and meals and anticipation of being accepted in another upcoming weight-loss program), a milieu which he characterized as a "rather unusual socializing situation.

To summarize, it is meaningless to try to assess the contribution of amobarbital under conditions departing so radically from those recommended in the labeling.

Finally, the results do not provide any evidence that amobarbital reduces the the side effects of dextroa...phetamine. The items on the Adjective Check List were categorized into groups called "active factor" and "drowsy factor." No significant differences between the medications were found in the "drowsy factor." Although significant differences were found by the author and SKF for the "active factor," neither the author nor SKF has shown how this finding supports the claims made by Dexamyl's labeling. Thus, as defined by the author, the "active factor" consisted of the following adjectives: active, alert, alive, attentive, careful, cheerful, clear-thinking, confident, energetic, friendly, good-natured and sociable. Smith, Kline and French characterized the "active factor" as a mood of "better feeling of well-being and a more business like attitude" and, alternatively, a "like work and like people" attitude. No information is provided on how these adjectives support the claim that amobarbital decreases excitation and wakefulness attributable to dextroamphetamine. In

fact, the author noted that no difference was evident between Dexamyl and dextroamphetamine with respect to a third factor, "stimulation," a factor which would appear more directly relevant to the excitation that may be caused by dextroamphetamine.

(c) "Double-Blind Multiple Investigator Clinical Study Comparing Dexamyl Tablets (5 milligrams dextroamphetamine and 32 milligrams amobarbital) to Dextroamphetamine (5 milligrams dextroamphetamine)," A. A. Conte, R. E. Noble, M. M. Perloff, J. C. Respess, and J. Schneyer, unpublished, 1973. In this series of investigations, 5 doctors following the same protocol each selected 30 anxious subjects who were at least 20 percent overweight according to Metropolitan Life Insurance tables. Anxiety was measured with the aid of an Anxiety Manifestation Index scale that listed five signs and symptoms of anxiety: agitation, anxiety, hyperactivity, motor disturbance, and tension. Patients who had no manifestation of a particular sign or symptom were rated zero; patients with very mild, mild, and moderate manifestation of a sign or symptom were rated one, two, and three respectively. Only patients who had a total score of four or more were admitted to the study. Once admitted, the subject's height, weight, body frame, age, sex, pulse and blood pressure were recorded. Thereafter, patients in each study were randomly divided into two groups and given an 8-week supply of either Dexedrine (5 milligrams dextroamphetamine) or Dexamyl (5 milligrams dextroamphetamine and 32 milligrams amobarbital). Neither the investigator nor the subject knew which medication was being taken. The subjects were told to follow a 1,200-calorie daily diet, to take three tablets each day and to return every 2 weeks, at which time adverse reactions, weight, blood pressure and pulse were recorded.

The purpose of these investigations was to ascertain by two criteria whether amobarbital contributed to the claimed effect by determining (1) whether fewer Dexamyl patients dropped out of the study than dextroamphetamine-treated patients, and (2) whether patients on Dexamyl experienced fewer adverse effects than those on dextroamphetamine.

These studies are not well-controlled within the meaning of § 314.111(a)(5) for a number of reasons. First, it should be recognized that the subjects selected were not appropriate for the purposes of the study in light of Dexamyl's labeling (§§ 300.50(a) and 314.111(a)(5)(ii)(*a*)(2)(*i*)). Dexamyl's labeling does not in any way indicate that the drug is recommended for anxious patients, yet only patients with anxiety were entered in the study. Results in this population cannot be used to demonstrate the effectiveness of Dexamyl in the population described in Dexamyl's labeling. The rationale for the combination of drugs in Dexamyl is that the amobarbital component will reduce side effects due to the dextroamphetamine component. Such side effects presumably occur in both anxious and nonanxious persons and selection of an arbitrarily chosen subpopulation must be explained. The choice of subjects has not been explained nor has SKF provided any evidence that results in the test population could be generalized to the population described in Dexamyl's labeling.

Even assuming that anxious patients were appropriate subjects for study, the multi-clinic study is not well-controlled. It fails to demonstrate that the subjects in test and control groups were comparable with respect to the incidence and degree of anxiety (§ 314.111(a)(5)(ii)(*a*)(2)(*iii*)). Although randomization would in many instances assure such comparability, a check on the results of randomization is necessary for obviously pertinent variables: This is clear from § 314.111(a)(5)(ii)(*a*)(2)(*iii*), which requires that both the protocol for a study and the report of the study assure comparability of pertinent variables. The study is clearly deficient in that no such analysis was carried out. Moreover, this defect cannot be remedied by further analyses because the device used to measure anxiety, the Anxiety Manifestation Index, has not been validated and thus the study fails to explain the methods of observation and recording of results, including the variables measured, quantitation, and assessment of subjects' response (§ 314.111(a)(5)(ii)(*a*)(3)). (Validation refers to the demonstrated ability of a particular index to detect the condition sought to be determined, in this case, anxiety.) Because the Anxiety Manifestation Index is not a recognized measure of anxiety and because SKF has not provided any evidence to support its validity, there can be no assurance that the test and control groups were comparable with respect to either the incidence or severity of anxiety (§ 314.111(a)(5)(ii)(*a*)(2)(*iii*)).

Assurance of test and control group comparability is further precluded by the absence of evidence that each investigator had experience or training in applying psychological measuring scales. Without this information there is no assurance, even if the Anxiety Manifestation Index scale had been validated, that it was properly used by any of the investigators.

The absence of evidence of validation and proper utilization of the Anxiety Manifestation Index precludes a demonstration of group comparability and renders these studies, on their face, less than well-controlled (§ 314.111(a)(5)(ii)(*a*)(2)(*iii*)).

Methods of observation and recording of subjects' response are not explained (§ 314.111(a)(5)(ii)(*a*)(3)). No explanation is provided as to whether the investigators evaluated subjects solely on the basis of their own observations, or on the basis of questions asked the subjects, or both. This is particularly critical since SKF's own investigators (Feinblatt & Ferguson, supra) have acknowledged that soliciting adverse reaction information, instead of recording spontaneous comments, yields an unusually high incidence of side effects. As stated previously, this raises a question whether reported adverse effects were attributable to the drug or to subject susceptibility to physician suggestion. Furthermore, if evaluations were based on specific questions, it is not explained whether subjects were asked if they were experiencing specific adverse reactions (e.g., Did you experience insomnia on the medication?) or whether only general questions were asked (e.g., Did you experience anything unusual on the medication?). Where adverse reaction data are susceptible to physician suggestion, such information is essential in evaluating the results. The absence of specific information regarding the precise questions asked is also critical because we are not told whether, and if so what, attempts were made to detect adverse reactions possibly caused by amobarbital. As shown above, it is quite misleading to claim that dextroamphatamine's side effects are reduced if, as indicated in Dexamyl's labeling, the second compo-nnt, amobarbital, is responsible for side effects of its own.

The necessity for more information about the methods of observation and recording of subjects' response is increased by use of the Anxiety Manifestation Index because the "adverse reactions" recorded by the investigators are in some cases the very signs and symptoms that constituted the basis for entering these patients into the study. Accordingly, there is no way to be sure, in the absence of a detailed explanation of methods of recording results, that a particular response is a true adverse reaction or mere persistence of a preexisting condition. In the Schneyer study, for example, the 11 "adverse reactions" on dextroamphetamine consisted (apart from 1 instance of diarrhea, 2 instances of insomnia—as noted earlier, insomnia does not require day-long use of a sedative—and 1 instance of tachycardia) of 6 instances of agitation and 1 of tension. "Agitation" and "tension" are two of the five anxiety parameters that make up the Anxiety Manifestation Index, which records that all of the people involved had some degree of agitation and tension prior to entering the study. It is not clear how Schneyer decided that agitation and tension were adverse reactions when the subjects had these conditions before taking any drug. It is possible he recorded as an adverse reaction every instance in which an element of the Anxiety Manifestation Index worsened compared to the pretreatment evaluation. Even this is not stated explicitly, however, and the scale may not have been used at all after initial selection of patients. In any case, it is not clear that an instance of one element worsening is a true adverse reaction. To consider such findings we must have some information regarding the spontaneous fluctuations of the elements of the Anxiety Manifestation Index over the 8-week period of the study. They almost certainly wax and wane spontaneously, so that it is not at all obvious, for

V 41 165 AUG 24 76 UMI

example, that a finding of "mild" tension or agitation at a particular follow-up visit in a patient who was rated as having a "very mild" tension or agitation prior to treatment should be considered a drug-related "adverse reaction." It may well have been a spontaneous fluctuation of the particular manifestation. A similar question is raised by recorded incidents of insomnia, a manifestation not listed on the Anxiety Manifestation Index. The invesigators should have stated, but did not, whether patients were asked if they had trouble sleeping prior to entering the study. If they were and the answer was "Yes," the insomnia could well have been another instance of a persisting, preexisting complaint.

In short, without a more detailed explanation of the method of eliciting and recording adverse reaction data and without documented information regarding the range of each patient's spontaneous fluctuations of the various symptoms, it is impossible to assess the validity or even interpret the results of this series of studies (§ 314.111(a)(5)(ii)(*a*)(3) and (*c*)).

These studies failed to assure comparability of test and control groups in another, highly pertinent variable: previous history of dextroamphetamine use (§ 314.111(a)(5)(ii)(*a*)(2)(*iii*)). It is generally recognized that amphetamines as a class can produce both tolerance and dependence, as the labeling for Dexamyl acknowledges:

> Amphetamines have a significant potential for abuse. Tolerance and extreme psychological dependence have occurred. There are reports of patients who have increased dosage to many times that recommended. For these reasons, care should be used in the selection of candidates for 'Dexamyl' therapy * * *.

It is thus apparent that a subject's prior history of amphetamine use may affect not only the incidence of various side effects, but also the subject's perception of these side effects as adverse reactions. For example, a patient who finds the stimulatory effects of such drugs pleasurable, or at least not unpleasant, might report such effects differently from a patient who found them distressing, or might not report them at all. Although such patients are not per se unsuitable for study, it is obviously vital that test and control groups be comparable with respect to this variable. The exclusion by SFK of patients who had used drugs within 2 weeks of the studies' initiation does not provide such comparability but merely assures that there is no persisting drug effect in the persons studied.

In several respects, SKF failed to demonstrate that the data from the five investigators could be combined for statistical analysis because it was not shown that each block of patients, in any single study or in all five studies, was similar with respect to either the presence or the degree of anxiety (§ 314.111(a)(5)(ii)(*a*)(2)(*iii*)). Because each investigator may have used widely varying criteria to measure anxiety, and because the effect of different degrees of anxiety on side effects is unknown, it is impermissible to pool the results of these investigators. A further obstacle to pooling is the investigators' failure to show that each block of subjects was comparable with respect to (1) prior history of amphetamine use, (2) the manner in which each investigator elicited adverse reaction data and/or (3) the method used to record adverse reactions.

In assessing the results of the multiple-investigator study, SKF concluded that "the data do not support the hypothesis that anticipated a lower dropout rate in favor of Dexamyl—approximately the same number of patients discontinued each medication before the end of the recommended 8-week study interval."

In support of the second hypothesis (that Dexamyl patients would experience fewer adverse reactions than dextroamphetamine patients), SKF claims that, for the combined analysis, only 19 percent (14 of 74) of the patients who used Dexamyl experienced adverse reactions while 34 percent (25 of 73) of the dextroamphetamine patients had adverse reactions. Smith, Kline and French claimed that this result is statistically significant, and also argued that the results of each individual study, separately examined, favored Dexamyl.

The Commissioner has already described many clear deficiencies in the individual studies making up the multi-investigator study. Because the combined analysis is the sum of these inadequately controlled studies, it can no more constitute an adequate and well-controlled study than they can, even if pooling of data had been justified by SKF. In addition, a multi-clinic study is still only a single study and, even if adequate and well-controlled, could not, standing alone, constitute substantial evidence of effectiveness within the meaning of section 505(b) of the act, which requires at least two such investigations. Moreover, the advantage of Dexamyl over dextroamphetamine in the combined analysis arises almost entirely from the Schneyer and Perloff studies, which are the two most seriously flawed studies in the series.

Smith, Kline and French argued that the results of each individual study, separately examined, favored Dexamyl. However, only in the Schneyer study (11 adverse reactions for dextroamphetamine patients and 5 for Dexamyl patients) did SKF argue that the results were statistically significant.

The Schneyer study has been discussed briefly above. Of the 11 dextroamphetamine adverse reactions, only 4 may have represented new symptoms in the patients involved: 2 instances of insomnia, 1 of tachycardia, and 1 of diarrhea. There is little reason to suppose, nor is it claimed by SKF, that amobarbital would prevent diarrhea, and this reaction is thus not relevant to Dexamyl. Also, as noted earlier, the presence of insomnia prior to the study cannot be determined and, in any case, insomnia is not an adverse effect that would justify all-day sedation; nocturnal sedation would be the appropriate treatment. The remaining seven "adverse effects" consist of agitation (six instances) and tension (one instance). The terms "agitation" and "tension" also happen to be two of the five parameters used to measure the patients' initial anxiety level and virtually all of the patients in the study had some degree of agitation and anxiety when they entered the study. Agitation and tension are thus not new findings in these patients. As noted above, it is unclear when or why Schneyer called agitation or anxiety (present in patients before any drug was given) an adverse reaction, but it is possible he did so when they appeared to become more severe during the course of the study. This is uncertain, however, and there is no evidence that a complete new Anxiety Manifestation Index was performed at each visit. Without such data, it is impossible to tell what the spontaneous fluctuation of the various parameters was and a minor change in a parameter, e.g., from "very mild" to "mild," is of uncertain significance; it certainly is not necessarily an adverse reaction and may represent mere spontaneous fluctuation. It is thus clear that the description of methods of observation in the Schneyer study is entirely insufficient to permit evaluation of the results of the study (§ 314.111(a)(5)(ii)(*a*)(3)). The Dexamyl group's five reported adverse effects included one diarrhea and one insomnia, as well as three worsenings of an element of the Anxiety Manifestation Index. When these variations of the rating scale elements are discounted, the adverse effects are few and obviously not significantly different for the two groups.

It is noteworthy that four other studies supposedly conducted using a protocol identical to Schneyer's gave results in no way resembling the Schneyer study. In any event, no single study can of itself constitute substantial evidence of effectiveness within the meaning of section 505(b) of the act, which requires at least two such investigations.

The Perloff study was, after Schneyer, the study that most favored Dexamyl, although not to a statistically significant degree (three adverse effects for dextroamphetamine and none for Dexamyl). The reported adverse effects were, in every case, "CNS stimulation," a term of uncertain meaning or significance, particularly in patients who were characterized, before receiving any medication, as agitated, anxious, and tense, i.e., who already showed "CNS stimulation." This constitutes an obvious failure to explain the "assessment of any subject's response" in § 314.111(a)(5)(ii)(*a*)(3). Moreover, the Perloff study is flawed by an extremely high (nearly 80 percent) dropout rate. Only two Dexamyl and three dextroamphetamine patients completed the entire 8-week study. Seven Dexamyl patients and three dextroamphetamine patients remained in the study for 2 weeks or less. Overall, the study appeared to favor dextroamphetamine in that patients on that drug stayed on therapy for a longer time.

The effects of this severe dropout rate (e.g., maintenance of comparability of pertinent variables (§ 314.111(a)(5)(ii)(*a*)(2)(*iii*)) were not analyzed, nor were the reasons for dropping out ascertained in most cases. The study is virtually uninterpretable and it cannot be considered remotely and adequate and well-controlled, either standing alone or as part of the pooled results.

The Respess and Noble studies each reported the same number of adverse effects for the Dexamyl and dextroamphetamine groups and thus do not suggest any benefit from amobarbital. Conte reported two adverse effects for the dextroamphetamine group, none for the Dexamyl group, but this was not a statistically significant difference.

Smith, Kline and French's attempt to interpret the Conte and Perloff studies more favorably for Dexamyl by counting the number of patients who had their doses reduced is meaningless. If doses were reduced because of an adverse reaction then the reaction should have been recorded; a dose reduction not accompanied by a recorded adverse reaction demonstrates the need for more detailed information regarding the method for identifying and recording this type of data.

Analysis of the individual studies thus reveals that each is fatally flawed in a number of ways and, in any case, that only one is even claimed to show a statistically significant advantage for Dexamyl. These flawed studies cannot be combined to produce a study that is any better than its inadequate parts. The multiclinic study is thus, whether analyzed as pooled data or an individual studies, not adequate or well-controlled, and cannot constitute or contribute to substantial evidence for the effectiveness of Dexamyl.

(d) "Double-Blind Comparison of Dexamyl Tablets (5 milligrams dextroamphetamine and 32 milligrams amobarbital) and Dextroamphetamine (5 milligrams dextroamphetamine) in Twenty Overweight 'Non-Anxious' Subjects," J. C. Respess, unpublished, 1973. With one exception, the author used the same protocol followed in the multiple investigator study in paragraph (c) above. The previous study admitted only those patients who had a score of four or more on the Anxiety Manifestation Index; only subjects who had a score of three or less, i.e., "Nonanxious" patients, were supposed to be admitted to this study.

Examination of patient report forms shows that the investigator failed to follow his own protocol. Of the 20 patients, 8 (40 percent) had anxiety scores exceeding 3 and thus, according to the author's own criteria, were not "nonanxious." Of course, as before, without a validated scale and without evidence that this investigator is trained and experienced in using such scales, there can be no assurance that the test and control groups were comparable with respect to either the incidence or degree of anxiety (§ 314.111(a)(5)(ii)(*a*)(2)(*iii*)).

Most important, the results of this study do not support the SKF claim because the author reported that of the 10 patients given dextroamphetamine only 1 experienced an adverse reaction whereas 2 of the 10 Dexamyl patients had adverse reactions.

It is noteworthy that this is a fifth study with substantially the same design as Schneyer's that fails to duplicate his results.

B. ANORECTIC EFFECT—CLINICAL INVESTIGATIONS.

Many of these studies were reviewed above in section III.A., "Contribution of Amobarbital." The methodologies of these studies will be repeated here only insofar as they pertain to the anorectic claims.

1. *Elixir.* No data were submitted by SKF in support of the claimed anorectic effectiveness for this dosage form.

2. *Spansule capsules.* Four articles were identified by SKF to support the claimed anorectic effect of the Spansule capsules. These are evaluated below.

(a) "Anorexia and Central Nervous System Stimulation," T. M. Feinblatt and E. A. Ferguson, reviewed in section III.A.2. of this notice. This study was conducted to discover whether "dampening" the stimulatory effects of dextroamphetamine interfered with its anorectic effect.

The study is not, however, adequate and well-controlled because it does not permit quantitative comparison of the results of drug treatment with an appropriate control (§ 314.111(a)(5)(ii)(*a*)(4)) and because the study is grossly lacking in details necessary for scientific evaluation (§ 314.111(a)(5)(ii)(*c*)). The study design itself is faulty because failure to provide a washout period between drug treatments makes it impossible to determine whether any weight loss observed was due to Dexamyl or to the cumulative effects of the other active treatments, and comparison between treatments is impossible. It should be noted that SKF recognized the need for such a washout period in its analysis of the Bargmeyer and Bauer study (see paragraph (b) of this section below). In addition, the data are analyzed in such a way that weight loss on Dexamyl is never quantitatively compared to weight loss on placebo or any other drug. The authors' conclusion that "on the average, patients on active drug lost about a pound a week; some lost more, some less" does not refer specifically to the anorectic effectiveness of Dexamyl and does not permit any conclusions to be drawn as to whether Dexamyl patients lost more weight than placebo patients or for that matter, lost any weight at all. This casual means of presenting data is plainly inadequate to permit scientific evaluation (§ 314.111(a)(5)(ii)(*c*)).

Accordingly, the authors' conclusion that amobarbital does not compromise the appetite suppressant effects of dextroamphetamine is not, and cannot be, supported by this study.

The study is less than well-controlled for other reasons. The authors did not characterize the subjects under study with respect to the degree or etiology of obesity (§ 314.111(a)(5)(ii)(*a*)(2)(*i*)). Without these data there is no way to assure that subjects were suitable for the study. They also did not explain such fundamental methods of observation and recording of results as steps taken to minimize bias on the part of the analysts of the data, whether care was taken to weigh subjects at the same time of day, whether the same scales were used at each weighing, whether the same individual conducted each weighing in and/or whether menstrual cycles of females were considered (§ 314.111(a)(5)(ii)(*a*)(3) and (4)). These details cannot be overlooked in a study designed to measure weight loss.

(b) "An Anorectic-Tranquilizer Combination in the Treatment of Overweight," Captain E. Bargmeyer and Captain C. R. Bauer, unpublished study, 1964. A separate statistical critique was submitted by SKF for this study. This was a two-phase, double-blind study designed to test whether active medications were more effective than placebo. In the first phase (4 weeks in length), 163 of 234 overweight patients were randomly assigned to 2 weeks' treatment with either Dexamyl Spansule capsules (15 milligrams dextroamphetamine and 97 milligrams amobarbital) or Eskatrol Spansule capsules (15 milligrams dextroamphetamine and 7.5 milligrams prochlorperazine) and then switched to the other medication for the remaining 2 weeks. At the end of this 4-week period, each subject was asked for a drug preference (first or second drug) and was continued on the preferred drug for the second 8-week phase. As a control, 71 subjects were divided into 2 groups and treated with a placebo that matched Dexamyl or a placebo that matched Eskatrol, and then switched to the other placebo for 2 weeks. At the end of 4 weeks, these subjects were also asked for preference (which placebo) and instructed to continue it for the second 8-week phase. All subjects were instructed to take one capsule a day and to avoid high calorie foods.

(i) *Phase I.* The first phase of the study is not well-controlled because the study report does not include a method of assigning patients to treatment and control groups in a way that minimizes bias (§ 314.111(a)(5)(ii)(*a*)(2)(*ii*)). Usually this is accomplished by assigning patients to treatment and control groups in a random fashion, e.g., using a table of random numbers. Although the report indicates that patients receiving active treatment were assigned randomly to either Dexamyl or Eskatrol, there is no such assurance that the assignment was random between active drug and placebo groups. Although the details of how patients were assigned to active drug and control groups are not provided (itself a critical defect which renders the study clearly inadequate, (§ 314.111(a)(5)(ii)(*a*)(2)(*ii*)), the language of the report suggests that 168 patients were chosen and given the 2 active drugs in a crossover design and that a wholly separate group of 71 patients was selected and given placebos, also in a crossover design. This technique does not constitute any attempt to minimize bias, as is necessary

V 41165 AUG 24 76 UMI

to preclude the possibility that an investigator might, consciously or unconsciously, assign individuals to the test drug group (Dexamyl) who, for one reason or another, would prejudice the results in favor of the test drug, e.g., assigning individuals to the Dexamyl group who show evidence of greater determination or who have had past success in weight loss programs.

The method of patient assignment fails to help assure that test and control groups were initially comparable with respect to pertinent variables, such as age, sex, degree of obesity, prior history of weight loss and history of amphetamine use (§ 314.111(a)(5)(ii)(*a*)(2)(*iii*)). Moreover, no analysis was provided comparing distribution of such variables in the two groups, as is clearly required by regulation, which states that both the protocol for the study and the report of the study must assure comparability of pertinent variables (§ 314.111(a)(5)(ii)(*a*)(2)(*iii*)). Accordingly, there can be no assurance that observed effects were attributable to the test drug rather than to one or more of the variables that may have been unevenly distributed between the groups.

The authors also failed to conduct a second followup analysis to show that test and control groups were still comparable at the conclusion of the first phase (§ 314.111(a)(5)(ii)(*a*)(2)(*iii*)). This is necessary to ensure that the high dropout rate during this phase (31 of 71 placebo patients and 48 of 163 patients on active medications) did not alter the composition of the test and control groups with respect to pertinent variables.

The authors did not explain the methods of observation and recording of results within the meaning of, and as required by, § 314.111(a)(5)(ii)(*a*)(3). For example, no explanation is provided as to whether or not care was taken to weigh patients at the same time of day, whether subjects were consistently weighed with or without clothes, whether the same individuals conducted each weighing, and/or whether menstrual cycles of females were taken into account. Without this information, it is difficult to assess the accuracy and/or reliability of the data. Nor should these details be omitted in a study designed to measure weight loss.

The authors claim that first phase average weekly weight loss with active drugs was approximately three times that of placebo, but no actual numbers are provided and neither SKF nor the authors have provided a statistical analysis to determine whether these findings are statistically significant (§ 314.111(a)(5)(ii)(*a*)(5)). In any event, SKF appears to doubt that the results of the first phase can be used to support the claimed anorectic effectiveness of Dexamyl because the firm states in its report that "four weeks is not long enough to conduct a weight regimen program."[2]

(ii) *Phase II.* The second 8-week phase of the study is also not well-controlled because, like the first phase, it failed to assign patients to test groups in a way that minimizes bias and assures comparability of treatment and control groups with respect to pertinent variables (§ 314.111(a)(5)(ii)(*a*)(2)(*ii*) and (*iii*)). It has already been pointed out that patients do not appear to have been assigned randomly to the active drug and placebo groups in Phase I, nor was the comparability of the groups with respect to pertinent variables assessed. The second phase used the patients who had completed the first phase (almost one-third of the Phase I patients had dropped out of the first phase) and then reassigned them, but, again, not in random fashion. In fact, SKF stated in its analysis of the second phase, "patients were not randomly assigned to the drugs." Patients were allowed to select their treatment on the basis of personal preference. During the second phase, an additional 60 patients, nearly 40 percent of those who started the phase, dropped out before the study was completed. Such dropouts could easily upset whatever group comparability existed at the start of this phase. Despite this, comparability of the two groups was not analyzed.

The second phase of the study, like the first, did not explain methods of observing and recording results (§ 314.111(a)(5)(ii)(*a*)(3)), the statistical methods used (§ 314.111(a)(5)(ii)(*a*)(5)), or measures taken to minimize bias on the part of the analysts of the data (§ 314.111(a)(5)(ii)(*a*)(4)).

The authors report that during the 8-week period of the second phase, Dexamyl patients lost an average of 1.29 pounds per week, while placebo patients lost an average of 0.88 pound per week. For the entire 12-week study both the authors and SKF claimed that average weight loss with the two combinations was almost equal and that the difference between weight loss with drugs and weight loss with placebo was statistically significant. However, since the study was not well-controlled for the reasons detailed above, neither the study nor SKF's supplemental critique provides substantial evidence to support the claim that Dexamyl is an effective anorectic.

The separate statistical critique submitted by SKF raises more questions than it answers when it states "the authors' [sic] chose to omit some of the data," and when it states there were some "minor disagreements in numbers because all the little decisions that are needed to summarize clinical data were not recorded." Moreover, the SKF critique provides different numbers (than the authors) for patients entered into the study (168 on active drug rather than 163), for the number of dropouts at the end of 4 weeks (53 rather than 48), and for the number of patients who generated final results (157 active drug patients rather than 115, and 65 placebo patients rather than 40). These differences are not explained. In view of these representations by SKF, in view of the different figures presented by the two reports, and in view of the total absence of raw data, neither the study nor SKF's statistical analysis is acceptable even as corroborative support for a well-controlled study (§ 314.111(a)(5)(ii)(*c*)).

(c) "A Comparison of Prolonged-Release Amphetamine-Barbiturate Combinations in the Short-term Management of Obesity," F. P. Roland, "Clinical Medicine," pp. 805–809, May 1965. In this crossover study designed to compare 2 amphetamine-sedative combinations, 100 obese subjects were divided into 2 equal groups and assigned either Dexamyl (10 milligrams dextroamphetamine and 65 milligrams amobarbital) or another combination (10 milligrams methamphetamine HCl and 60 milligrams pentobarbital sodium) for a period of 2 weeks. At the end of 2 weeks, the subjects were crossed over to the other medication. Subjects selected their own diets and were told to take one capsule daily.

This study is clearly deficient in that it does not provide a comparison of the results of treatment with an appropriate control (§ 314.111(a)(5)(ii)(*a*)(*4*)). The regulations provide for several kinds of control including an "active treatment control," i.e., an "effective regimen of therapy." The comparison treatment in this study, however, is not such an effective regimen. Although the Commissioner has recognized that methamphetamine and dextroamphetamine, when used as single entities, are effective anorectic agents (as set forth in the revision of § 310.504 published in the FEDERAL REGISTER of February 12, 1973 (38 FR 4248)), he has made no such finding for anorectic combinations generally or for the specific methamphetamine-pentobarbital combination used in this study. It is thus of no use whatsoever to compare Dexamyl to this combination drug whose anorectic effectiveness has not been established.

The author failed to state what steps, if any, were taken to minimize bias on the part of the subjects, observers, or analysts of the data (§ 314.111(a)(5)(ii)(*a*)(*4*)). For example, there is no indication whether this study was conducted under double-blind or single-blind conditions, or whether, as SKF states in its summary, nonblind conditions prevailed, i.e., both patients and investigators knew which medication was being given. To rule out the possibility of introducing physician encouragement and/or subject expectations as causes of weight loss, it is desirable that anorectic trials be double-blind.

Finally, SKF admits that this study is not a well-controlled clinical investigation.

(d) "The Use of a Sustained-Release d-Amphetamine-Amobarbital Preparation in the Treatment of Obesity," R. P. Shapiro and K. I. Michaile, "International Record of Medicine and General Practice Clinics," pp. 638–641, October 1956. In this double-blind, crossover study, 39 obese patients were placed on a low calorie diet (1,000 to 1,400 calories) for periods ranging from 2 to 18 weeks (average, 8 weeks) depending upon how well they accepted and responded to the

restricted diet. At the end of the dieting period, patients were divided into two groups and given either Dexamyl Spansule capsules or an identical looking placebo for 8 weeks and then switched to the other treatment for 8 weeks.

This study is not well-controlled because the authors have failed to assure that test and control groups were comparable with respect to such pertinent variables as age, sex, duration or degree of obesity, concurrent use of other drugs and, most important here, the length of time that a patient was in the diet-alone phase of the study (§ 314.111(a)(5)(ii)(*a*)(2)(*iii*)). Although group comparability is often not a serious problem in a crossover study, as any differences between groups are cancelled out by the crossover, this is not the case when there is an effect of sequence of drug administration on results. In an anorectic study as long as 16 weeks, it is well known, and the authors themselves recognize, that weight loss becomes more difficult to achieve as therapy is prolonged. Thus, as the greatest weight reductions are anticipated in the first phase when patients are more enthusiastic and determined, the weight losses achieved in the second phase will necessarily comprise less of the total weight losses, i.e., the combined weight losses for each group will be "weighted" more heavily by results from the first phase. It is thus critical that the patient groups entering the first phase be comparable, or alternatively, that the study be analyzed to show that there is no effect of sequence. For example, if patients who received Dexamyl first averaged only 6 weeks on diet alone (before taking Dexamyl) while the patients receiving placebo first averaged 10 weeks on diet alone (before taking placebo), a finding of greater weight loss for Dexamyl in the first phase of the study may not be due to Dexamyl's superiority. It might be due to the fact that the enthusiasm for dieting of the patients on diet had been sapped by their more prolonged attempts at weight loss. This would not be "cancelled out" by the second 8-week treatment period because by then the weight loss for all groups would be expected to diminish.

The authors did not explain what steps, if any, were taken to minimize bias on the part of analysts of the data (§ 314.111(a)(5)(ii)(*a*)(*4*)). For a study to be well-controlled, bias must be precluded at each stage. It is of little use to "blind" patients and observers of data if the analysts are allowed (consciously or unconsciously) to introduce bias in their presentation of the data. Analyst bias may easily be avoided by withholding the identity of the treatment (e.g., drug "A" and drug "B") until all subjective decisions have been made. The authors also did not provide any explanation of their methods of statistical analysis (§ 314.111(a)(5)(ii)(*a*)(5)). For example, they stated that patients on Dexamyl lost an average of 0.499 pound per week, and patients on placebo lost an average of 0.333 pound per week, a difference claimed to be statistically significant though "not very great"; but they did not bother to state the level of probability for statistical significance. Omission of this detail is incomprehensible and the term "statistically significant" is meaningless without reference to a probability level.

Similarly, in spite of the fact that order of drug administration was recognized as probably influencing the results, the authors have not presented any statistical analysis showing how the results were affected by this factor or showing that they were not affected (§ 314.111(a)(5)(ii)(*a*)(*5*)). The bare conclusion, unsupported by raw data or any details, that "active medication was more effective than the placebo in 21 of the 39 patients and its superiority was evident whether it was given before or after placebo therapy" is grossly inadequate. How many of the 21 patients for whom Dexamyl was more effective received it first? Obviously, if the majority received Dexamyl first, then as shown above, the result may well have been attributable to when the patient received the drug rather than the drug itself.

Finally, the study is lacking in the details which permit scientific evaluation (§ 314.111(a)(5)(*ii*)(*c*)). As noted above, rudimentary details of results and analysis are not provided, nor are the characteristics of the patients described. For example, the actual interim and final weights for individuals and even groups are omitted; only the average weekly weight loss is given. Details relating to methods of observation and recording of results, including whether care was taken to weigh subjects at the same time of day, whether the same scales were used, whether menstrual cycles of females were considered, or whether care was taken to consistently weigh subjects with or without clothes were also omitted (§ 314.111(a)(5)(ii)(*a*)(3)). This information should not be overlooked in any study designed to measure weight loss. Its absence becomes more important for evaluation of this study where the difference in weight loss was 0.166 pound.

3. *Tablets.* In support of the claimed anorectic effect of this dosage form, SKF identified three articles and two clinical studies. The articles are reviewed in full while the clinical studies, already reviewed above, will only be discussed insofar as they pertain to the anorectic claims.

(a) "A Study of the Effectiveness of Certain Anorexigenic Agents," J. F. Fazekas, W. Ehrmentraut and J. Kleh, "American Journal of Medical Science," pp. 692, 699, December, 1958. The relevant portion of this investigation was a double-blind study in which 43 mentally deficient, obese subjects were divided into 3 approximately equal groups according to sex, intelligence quotient, height and initial weight. The first group received phenmetrazine (25 milligrams), the second received Dexamyl tablets, and the third received placebo. All medications were given twice a day for the first 12 weeks; thereafter, for the next 16 weeks, dosage was doubled for patients who showed little or no weight loss. All patients were placed on a diet of approximately 2,700 calories per day. Weights were recorded at 4-week intervals.

Even if Dexamyl had been found effective in this study, the results cannot be considered adequate for approval of a new drug application because the drug was not studied under the conditions of use recommended in Dexamyl's labeling (§§ 300.50(a) and 314.111(a)(5)(i)). For example, patients who had their dosages doubled were receiving four tablets a day although Dexamyl's labeling recommends two or three tablets a day. Similarly, although the labeling for Dexamyl recommends use "as a short term (a few weeks) adjunct in a regimen of weight reduction," these patients were kept on treatments for approximately 7 months. Because the authors did not provide data on interim weight losses it is impossible to determine what anorectic effect, if any, the drug would have when used in accordance with the directions on the label.

In any event, despite the higher dose of medication and prolonged duration of therapy, the study failed to show a statistically significant difference between Dexamyl and placebo although it did show that phenmetrazine was effective compared to placebo.

There is no analysis of whether Dexamyl and phenmetrazine were different to a statistically significant degree, but from the data provided it appears they were not. Thus we have three findings: (1) Dexamyl was not better than placebo to a statistically significant degree, (2) Dexamyl was not different from phenmetrazine to a statistically significant degree, and (3) phenmetrazine was better than placebo to a statistically significant degree.

Although the study is not useful in demonstrating the effectiveness of Dexamyl, it illustrates the pitfalls of the positive control study. Had no placebo group been included, the conclusion might have been reached that the study showed Dexamyl to be an effective anorectic, a conclusion clearly not warranted by the study results. As will be discussed below, use of a potitive control to reach a conclusion that two drugs are not different requires an analysis of the power, i.e., sensitivity, of the statistical test used.

(b) "The Treatment of Obesity with an Anorexigenic Drug," E. Roberts, "Annals of Internal Medicine," Vol. 34, No. 6, pp. 1324–1330, June 1951. Dexamyl was given for 3 months to 64 patients (4 men and 60 women) who had failed to lose weight while under supervision at various clinics and private practice for 6 months. Each patient was instructed to follow the same diet recommended previously, which ranged from 1,000 to 1,800 calories per day. Patients were examined biweekly for the first month, and then at 1-month intervals.

This study is not well-controlled because the results of therapy with the test drug were not compared to the results in a control group (§ 314.111(a)(5)(ii)(*a*)(*4*)). Accordingly, it is impossible to determine whether weight loss was related to Dexamyl, to the overall program of diet, to physician contact and encour-

V 41 165
AUG 24 76
UMI

agement, or to the placebo effect of pill-taking. The patients' varied experience at clinics and in private practice during the preceding 6 months cannot be considered an adequate control because many conditions (such as the degree and nature of physician contact and encouragement) in addition to medication, were necessarily changed during the study.

Moreover, since there was no control group, the physician was aware of the patients' medication, i.e., the study was "unblinded," and she may well have transmitted her favorable expectations to patients or introduced bias into the study in other ways. For example, the author, without any explanation, excluded from her calculations five patients who failed to show a satisfactory weight loss, thereby biasing the results in favor of Dexamyl. Obviously, an accurate picture of drug efficacy requires inclusion of treatment failures as well as successes. The regulations clearly require that some measures, preferably "blinding," be taken to minimize bias on the part of the observer and analyst of the data (§ 314.111 (a) (5) (ii) (*a*) (*3*) and (*4*)).

The absence of a placebo control group renders the study clearly incapable of demonstrating whether weight loss was related to Dexamyl or to the placebo effect associated with any pill-taking (§ 314.111(a) (5) (ii) (*a*) (*4*)). Thus the finding that 59 of the 64 subjects lost an average of 19 to 26 pounds at the end of 3 months, a "satisfactory" weight loss, does not constitute evidence of Dexamyl's effectiveness.

In any event, SKF does not claim the study is well-controlled.

(c) "The Use of Mood Ameliorating Agents in the Treatment of Psychogenic Obesity," P. Rosenberg, "American Practitioner and Digest of Treatment," Vol. 4, No. 12, pp. 818–820, December 1953. This investigator selected 94 obese, depressed, nervous patients and treated them with varying dosages of Dexamyl for periods ranging from 3 to 14 weeks. Patients were examined at weekly intervals and instructed to continue their recommended diet.

This study is clearly deficient because it lacks any comparison of the results of treatment with a control (§ 314.111(a) (5) (ii) (*a*) (*4*)). In the absence of such a control group it is impossible to distinguish drug effect from the placebo effect of pill-taking and/or from the effect of the overall program.

The investigator failed to use the drug in a manner prescribed by Dexamyl's labeling: 36 patients received twice the recommended maximum dosage and 16 other patients received undefined extra dosages (§§ 300.50(a) and 314.111(a) (5) (i)). Because the author failed to provide individual dosage or weight loss data, there is no way to identify and separate the double dosage patients.

Although the investigator stated that "other therapy was given when indicated," he failed to identify either the type of therapy given or the patients who received such therapy. Accordingly, there can be no assurance that the results were not attributable to modalities other than Dexamyl (§ 314.111(a) (5) (ii) (*a*) (*2*) (*iii*)).

The findings were so lacking in detail that scientific evaluation is impossible (§ 314.111(a) (5) (ii) (*c*)). For example, although the investigator concluded that "satisfactory weight loss was observed in all but one patient," he failed to define the criteria for "satisfactory." The investigator's attempt to relate weight loss to the claimed effect of Dexamyl on mood was equally meaningless (e.g., "markedly beneficial" patients lost an average of 3.0 pounds per week, "perceptibly improved" patients lost 2.5 pounds per week and "non-beneficial and adverse" patients lost 1.5 pounds per week) since he failed to define the criteria for the moods, failed to state how the moods were ascertained, failed to state how many patients comprised each group, and failed to offer any interim or final raw weight loss data.

In any event, SKF does not claim the study is a well-controlled clinical investigation.

(d) "Double-Blind Multiple Investigator Clinical Study Comparing Dexamyl Tablets to Dextroamphetamine," A. A. Conte, R. E. Noble, M. M. Perloff, J. C. Respess and J. Schneyer, reviewed above in section III.A.3.(c) of this notice. In this series of five studies SKF attempted to prove that Dexamyl is an effective anorectic agent by showing its equivalence to dextroamphetamine, an "active" control drug. Each investigator selected 30 obese, anxious patients, and randomly assigned them to 2 groups, dextroamphetamine or Dexamyl. Patients were weighed every 2 weeks for a period of 8 weeks and told to follow a 1,200-calorie daily diet.

This series is inherently incapable of establishing the anorectic effectiveness of Dexamyl since the active control used, dextroamphetamine, does not permit a quantitative evaluation of the effects of Dexamyl (§ 314.111(a) (5) (ii) (*a*) (*4*)). Because the anorectic effect of dextroampetamine is only marginal to begin with, (i.e., its advantage over placebo is small), and because its anorectic effect is highly variable, its effectiveness is not demonstrable in every study (see the FEDERAL REGISTER of February 12, 1973 (38 FR 4249). Therefore, before a finding of anorectic equivalence of dextroamphetamine and Dexyamyl in a particular study can be considered as evidence of the effectiveness of Dexamyl, it must be demonstrated that dextroamphetamine was in fact effective under the precise conditions of the study, e.g., by including a placebo control in the study. This series failed to include a placebo control or otherwise show that dextroamphetamine was in fact effective under those circumstances. Accordingly, a finding of "no difference" between Dexamyl and dextroamphetamine in a particular study can mean either that both were effective or that neither was effective in that study.

Moreover, even if it were contended that dextroamphetamine was a meaningful active control (i.e., that it was actually effective in these studies), the failure of SKF to include an appropriate statistical analysis, namely an analysis of the power of the statistical tests used, renders scientific evaluation impossible (§ 314.111(a) (5) (ii) (*a*) (*5*)).

The necessity for such a statistical test arises out of the fundamental difference between a study that attempts to show that a drug is better than a placebo control and one that attempts to show that a drug is as good as an active or positive control.

In a placebo-controlled study the relevant questions are: Did the drug-treated group respond differently from the placebo group, and, if so, was the difference statistically significant? A significant difference is usually defined, by convention, as less than 1 chance in 20 ($p \leq 0.05$) that the observed difference was due to chance alone. In a study that uses an active control the relevant questions are: Did the test group respond as well as the active group and, if so, was the study sufficiently sensitive to detect a difference between the two drugs if one existed? This second question is not addressed by SKF.

Because there are many elements in an active-control study that may prevent detection of a difference that really exists (e.g., too few subjects in the sample, insensitive measuring devices, large patient-to-patient variation in treatment response), a finding of drug equivalence may indicate only that the study was not sufficiently sensitive to detect a difference between the drugs.

The probability of detecting a difference between test and control drugs when they differ by some specified amount is called the "power" of a statistical test and is a critical part of the analysis of positive control studies. To illustrate with an example: If a study had only a 50 percent change (power= 0.5) of detecting a 50 percent difference between two drugs, a failure to find a statistically significant difference between treatments would mean little.

In view of the small size of the sample per study (30 patients), the known high variability of patient-to-patient response to anorectic drugs and the very modest weight loss achieved (about 1 pound per week on the average), all of which would render it difficult for the studies to show a difference between Dexamyl and dextroamphetamine, the failure of SKF to conduct a power of the test analysis further precludes scientific evaluation of this study.

In addition, the authors failed to assure comparability between test and control groups with respect to each subject's prior history of amphetamine use (§ 314.111(a) (5) (ii) (*a*) (*2*) (*iii*)). Inasmuch as Dexamyl's labeling recognizes that anorectic tolerance may develop with continued use of the drug, this failure, by itself, renders the studies not well-controlled. In the absence of a demonstration that test and control groups

in each study were comparable with respect to this variable, a showing of equivalent weight loss for the Dexamyl group in a study may reflect either effectiveness of Dexamyl or the fact that the dextroamphetamine group had acquired an anorectic tolerance for amphetamine drugs and no longer responded to them.

The authors and SKF also failed to state what steps, if any, were taken to minimize bias on the part of the analysts of the data (§ 314.111(a) (5) (ii) (*a*) (*4*)). Steps must be taken to preclude the possibility of analyst bias (either conscious or unconscious), since it may cause them to make subjective decisions that vitally affect the results of the study, e.g., whether or not to include all patients in the analysis or only those who completed the entire 8 weeks.

Finally, the authors did not explain the methods of observation and recording of results (§ 314.111(a) (5) (ii) (*a*) (*3*)). For example, they do not state whether care was taken to weigh patients at the same time of day, whether subjects were consistently weighed with their clothes on or off, whether the same individual conducted each weighing in each investigation, whether all investigations followed the same procedures, and whether the menstrual cycles of women were taken into account. This last factor is important because fluid retention often accounts for large fluctuations in weight and because 110 of the 120 subjects in this series were females.

Smith, Kline and French presented its conclusions in two ways. The first was the investigator's global effectiveness ratings ("excellent," "good," "fair," and "poor") which in turn were based upon a comparison of the patient's actual weight loss against the patient's expectations of how much weight he or she wanted to lose. Smith, Kline and French concluded that Dexamyl and dextroamphetamine were equivalent when measured in this manner. However, because the expectations were entirely subjective and because there was no showing that the two groups in each study and for all studies were initially comparable in their expectations, it is impossible to draw any meaningful scientific conclusions by this analysis (§ 314.111(a) (5) (ii) (*a*) (*2*) (*iii*)).

In a second, less subjective approach, SKF compared prestudy body weights with body weights at each 2-week interval and with final weights at the end of 8 weeks. This analysis was carried out for four of the five studies individually and then combined. Dr. Perloff's data were not included because patient followups were inadequate.

Analysis of the individual studies showed that in two studies (Noble and Repress), dextroamphetamine patients lost more weight than Dexamyl patients; in two other studies (Conte and Schneyer), Dexamyl patients lost more. In the combined analysis, after 4 weeks, dextroamphetamine patients lost significantly more weight than Dexamyl patients and this difference was statistically significant. After 8 weeks dextroamphetamine patients lost slightly more weight than Dexamyl patients.

Neither the individual nor the pooled results can demonstrate that Dexamyl is an effective anorectic agent, or even that it is equivalent to dextroamphetamine, because of the critical deficiencies described above which render the study inadequately controlled: failure to show that dextroamphetamine was in fact effective in this series, failure to analyze the power of the statistical tests used, failure to assure group comparability, failure to set forth steps taken to minimize analyst bias, and failure to explain the methods of observation and recording of results. The results of the pooled analysis are unacceptable for the additional reason that SKF did not demonstrate that the data from the four studies could be combined for statistical evaluation (§ 314.111(a) (5) (ii) (*a*) (*2*) (*iii*)).

Although the Commissioner does not in any way base his summary rejection of this study on his interpretation of the results obtained in the multi-investigation study, he believes that, even if the studies were well-controlled, the results are at best inconclusive. For example, the fact that there was a statistically significant difference in weight loss favoring dextroamphetamine at the end of 4 weeks may well indicate that Dexamyl is in fact less effective than dextroamphetamine when used as directed in its labeling, i.e., "as a short-term (a few weeks) adjunct" in a weight reduction program.

(e) "Double-Blind Comparison of Dexamyl Tablets (5 milligrams dextroamphetamine and 32 milligrams amobarbital) and Dextroamphetamine (5 milligrams dextroamphetamine) in Twenty Overweight 'Non-Anxious' Subjects," J. C. Respess, reviewed above in section III.A.3.(d) of this notice. This study followed the same protocol as the just-received multiple investigator study except that subjects were supposed to have an anxiety score of three or less (the multiple investigator study used only subjects with a score of four or more).

This study is not a well-controlled clinical investigation for reasons identical to those cited in the review of the multiple-investigator study. Most important is the absence of a placebo control which prevents a determination that either dextroamphetamine or Dexamyl was effective under the conditions of this study and at the same time precludes a quantitative comparison of the results of Dexamyl treatment with an appropriate control (§ 314.111(a) (5) (ii) (*a*) (*4*)).

IV. SUMMARY

A. *Elixir.* Smith, Kline, and French submitted no data to support the claimed anoretic effectiveness or the claimed decrease in excitation and wakefulness for this dosage form. It is obvious, therefore, that there is a genuine and substantial issue of fact and that the Commissioner must refuse to approve the NDA for this product.

B. *Spansule capsules.* Smith, Kline and French submitted only one study using this dosage form (Feinblatt & Ferguson, in section III.A.2. and B.2. of this notice) to support the claim that amobarbital reduces the side effects caused by dextroamphetamine. As shown above, the study did not explain the manner in which data was collected and assessed (§ 314.111(a) (5) (ii) (*a*) (*3*)), the steps taken to minimize bias on the part of the analyst of the data (§ 314.111(a) (5) (ii) (*a*) (*4*)), or the methods of data analysis (§ 314.111 (a) (5) (ii) (*a*) (*5*)). In short, it lacks the details necessary for scientific evaluation (§ 314.111(a) (5) (ii) (*c*)). Of course, even if the study were well-controlled, one study cannot constitute substantial evidence (section 505(b) of the act).

Four studies were identified by SKF to support the claimed anorectic effectiveness for the Spansule capsule dosage form. None of these meet the criteria for well-controlled clinical investigations.

The Feinblatt study, in addition to providing few of the details needed for scientific evaluation (§ 314.111(a) (5) (ii) (*c*)), failed to provide a drug-free period between treatment periods, making it impossible to differentiate the anorectic effect of the various drugs used from those of Dexamyl (§ 314.111(a) (5) (ii) (*a*) (*2*) (*iii*)). More important, the authors' evaluation of data lumped results for all "active" drugs together, so that Dexamyl was never specifically compared to any control (§ 314.111(a) (5) (ii) (*a*) (*4*)).

The Bargmeyer study (see section III.B.2.(b) of this notice) also did not provide a drug-free period between treatments. Most important, the investigators did not assign patients to treatment and control groups in a manner that would minimize bias (e.g., randomly) nor in a manner that assured comparability with respect to pertinent variables (§ 314.111 (a) (5) (ii) (*a*) (*2*) (*ii*) and (*iii*)). They also failed to explain the methods of observing and recording data (§ 314.111(a) (5) (ii) (*a*) (*3*)).

The Roland study (see section III.B.2.(c) of this notice) compared Dexamyl to another amphetamine-sedative combination, but not to placebo. Since neither combination is known to be an effective anorectic, this study does not permit a meaningful quantitative comparison of results and plainly cannot demonstrate effectiveness for either drug (§ 314.111 (a) (5) (ii) (*a*) (*4*) (*iii*)).

The Shapiro study (see section III.B.2.(d) of this notice) failed to assure test and control group comparability with respect to a variable (duration of therapy prior to receipt of drug) which, by the authors' own admission, was highly pertinent (§ 314.111(a) (5) (ii) (*a*) (*2*) (*iii*)). The authors did not describe the methods of analysis used or the level of probability at which statistical significance was found (§ 314.111(a) (5) (ii) (*a*) (*5*)), nor did they explain methods of observing and recording data essential in evaluating an anorectic trial (§ 314.111(a) (5) (ii) (*a*) (*3*)).

If SKF is to be granted a hearing for this dosage form, it must show that a genuine and substantial issue of fact exists as to both the anorectic claim and

V 41 165 AUG 24 76 UMI

the claim that amobarbital reduces wakefulness and excitation attributable to dextroamphetamine. Since SKF has failed to submit any adequate and well-controlled clinical investigations to support either claim, it is clear that it is not entitled to a hearing regarding the Spansule capsule dosage form. Indeed, since only one study was offered to support the claimed contribution of amobarbital, it is unnecessary to examine the other data.

C. *Tablets.* Smith, Kline and French identified four studies to support its claim that amobarbital, in this dosage form, reduces the excitation and wakefulness caused by dextroamphetamine.

The Cameron study (see section III.A.3.(a) of this notice) was obviously incapable of showing that amorbarbital reduces adverse reactions caused by the principal active component, dextroamphetamine, because test and control groups were not comparable with respect to the amount of dextraomphetamine (§ 314.111(a)(5)(ii)(*a*)(*4*)). Furthermore, Dexamyl was administered only once to each patient (as opposed to two or three times a day as the labeling suggests) and none of the patients were either obese or on a calorie-restricted diet. Accordingly, no conclusions can be reached concerning the effects of Dexamyl when used as labeled (§ 314.111(a)(5)(i)).

The Respess (mood) study (see section III.A.3.(b) of this notice) did not test the drug under the conditions recommended in its labeling since patients received medication for only 2 days as opposed to a period of several weeks (§§ 300.50(a) and 314.111(a)(5)); did not assure that patients were suitable for the study since it does not appear that they were obese (§ 314.111(a)(5)(ii)(*a*)(2)(*b*)); and did not consider the adverse effects mentioned in Dexamyl's labeling but instead focused on mood changes that were of unestablished relationship to adverse effects.

The other Respess study (nonanxious) (see section III.A.3.(d) of this notice) reported fewer side effects for dextroamphetamine patients than for Dexamyl patients.

The multiple investigator series (see section III.A.3.(c) of this notice) failed to assure that patients were appropriate for the study since only anxious patients were tested whereas Dexamyl's labeling makes no claim to treat such a population (§ 314.111(a)(5)(ii)(*a*)(2)(*f*)). And, even assuming the propriety of the population, the study did not and cannot demonstrate test and control group comparability with respect to either the incidence or degree of anxiety, or prior history of amphetamine use (§ 314.111(a)(5)(ii)(*a*)(2)(*iii*)). The investigators did not explain the manner in which adverse effect data were elicited from the subjects (§ 314.111(a)(5)(ii)(*a*)(3)). For example, they did not explain whether patients were asked specific questions and, if so, the nature of the questions, whether the physicians recorded their personal observation of patient behavior or instead, the patients' self-evaluation, as gleaned from their spontaneous comments. In one study the "adverse reactions" reported appear to be the same manifestations of anxiety that were present even before the study began. The authors also failed to explain whether attempts were made to detect adverse reactions caused by amobarbital or how, if at all, they distinguished between true adverse reactions and spontaneous fluctuations of anxiety symptoms listed in the Anxiety Manifestation Index used to select patients at the beginning of the study. Without this information it is impossible to evaluate the findings of a study designed to determine the incidence and severity of adverse reactions (§ 314.111(a)(5)(ii)(*c*)).

In any event, even if the series were well-controlled, the results cannot provide substantial evidence to support the SKF claim that amobarbital significantly reduces wakefulness and excitation caused by dextroamphetamine since only one investigator, Schneyer, reported a significant reduction in side effects. A single study cannot be considered substantial evidence of effectiveness since section 505(b) of the act requires more than one such study. The same holds true if SKF elects to combine the data; it still represents a single study.

SKF submitted five studies to support the claimed anorectic effectiveness of Dexamyl tablets.

The Fazekas study (see section III.B.3.(a) of this notice), the only study using a placebo as well as a positive control, concluded that Dexamyl was no better than placebo.

The Roberts study (see section III.B.3.(b) of this notice) did not include a control group so there is no way to quantitatively compare the results of Dexamyl with results in a control (§ 314.111(a)(5)(ii)(*a*)(*4*)). Smith, Kline and French does not claim the study is a well-controlled clinical investigation.

The Rosenberg study (see section III.B.3.(c) of this notice) also failed to include a control group of any kind (§ 314.111(a)(5)(ii)(*a*)(*4*)). The investigator also did not test the drug under the conditions of use recommended in Dexamyl's labeling (§§ 300.50(a) and 314.111(a)(5)(i)). Smith, Kline and French does not claim the study is a well-controlled clinical investigation.

The multiple investigator study did not use an appropriate control (§ 314.111(a)(5)(ii)(*a*)(*4*)). Use of dextroamphetamine as an active treatment control, without a placebo control as well, is unacceptable because there was no showing that it was in fact effective under the precise conditions of these studies. Dextroamphetamine, while effective, is not demonstrably effective in every study. Accordingly, the conclusion that Dexamyl and dextroamphetamine were equivalent could mean either that both were effective or that neither was effective. Even if it had been shown that dextroamphetamine was effective in these studies, SKF failed to conduct the kind of statistical analysis essential to a meaningful evaluation of a study with an active control (§ 314.111(a)(5)(ii)(*a*)(*4*)). The study also failed to assure comparability between test and control groups with respect to previous history of amphetamine use (§ 314.111(a)(5)(ii)(*a*)(2)(*iii*)), did not set forth what steps, if any, were taken to minimize bias on the part of analysts of the data (§ 314.111(a)(5)(ii)(*a*)(*4*)), and did not explain relevant methods of observing and recording data (§ 314.111(a)(5)(ii)(*a*)(3)).

The Respess (nonanxious) study, which essentially followed the same protocol as the multiple investigator studies, is not well-controlled for the same reasons. Additionally, SKF did not draw any conclusions or offer any statistical analysis to evaluate the data generated by the study (§ 314.111(a)(5)(ii)(*a*)(5)).

If SKF is to be granted a hearing for the tablet dosage form, it must demonstrate the existence of a genuine and substantial issue of fact regarding both the anorectic claim and the claim that amobarbital significantly reduces side effects caused by dextroamphetamine. Inasmuch as SKF has failed to identify substantial evidence for either of these claims, no genuine and substantial issue of fact exists and the Commissioner must refuse to grant a hearing on his decision to refuse approval of this new drug application.

V. Legal Arguments

In its March 14, 1973 request for a hearing, SKF presented an array of legal defenses. They are discussed as follows:

Smith, Kline and French contends that its Dexamyl products are not identical, similar or related to the drugs named in the February 12, 1973 DESI notice and, therefore, any action taken with respect to those products does not affect Dexamyl. This argument is based on the observation that the combinations named in that notice which contained dextroamphetamine do not contain amobarbital, and the one combination that contained amobarbital does not contain dextroamphetamine. Although this may establish that Dexamyl is not identical to the drugs named in the February 12, 1973 notice, it in no way establishes that SKF's products are not similar or related to the named combinations. To the contrary, the regulations under 310.6(b) (21 CFR 310.6(b)) specifically provide that a drug is identical, similar or related to another drug if it is "related in chemical structure." Smith, Kline and French admits that dextroamphetamine is related chemically to phenmetrazine and amphetamine, two anorectic agents named in the notice.

In addition, the same regulation further provides that a drug is identical, similar or related to another drug if it is related in "known pharmacological properties." It is undisputed that the principal component of Dexamyl, dextroamphetamine, is a sympathomimetic drug; it is also undisputed that Dexamyl is promoted as an anorectic. Therefore, it is clear that Dexamyl is identical, similar and/or related to the sympathomimetic anorectic drugs named in the February 12, 1973 notice and covered

by it. Finally, § 310.6(b) specifically provides that "[a] combination drug product containing an identical, related, or similar drug is also subject to the conclusions contained in the notice." Since nearly all of the drugs named in the notice contain dextroamphetamine, (e.g., Appetrol (NDA No. 12–127), containing dextroamphetamine and meprobamate; Biphetamine-T (NDA No. 11–538), containing dextroamphetamine, di-amphetamine and methaqualone; and Dexerpine tablets (NDA No. 10–207), containing dextroamphetamine and reserpine alkaloid), and since one of the named drugs contains amobarbital (Delfeta-sed Stedytabs (NDA 12–415) containing, inter alia, methamphetamine HCl and amobarbital), Dexamyl is clearly subject to the notice.

The rationale for the generic approach to regulating drugs is stated succinctly in the regulations at § 310.6(a), "It is not feasible for the Food and Drug Administration to list all products which are covered by an NDA and thus subject to each notice." For the same reason the generic regulation has been specifically sanctioned by the courts. "USV Pharmaceutical Corp. v. Weinberger," 412 U.S. 655 (1973); "North American Pharmacal, Inc. v. Department of Health, Education, and Welfare," 491 F.2d 546 (8th Cir. 1973).

Smith, Kline and French also argues that Dexamyl products are exempted from the drug efficacy requirements of the Drug Amendments of 1962 by the "grandfather clause" (section 107(c)(4) of Pub. L. 87–781) because the products are not new drugs and because they have never been the subject of an approved NDA. For a number of reasons this argument is also without merit.

The Federal Food, Drug, and Cosmetic Act, enacted in 1938, provided for a system of premarketing clearance and subsequent supervision of all "new drugs" (section 505). A "new drug" was defined by the 1938 act under section 201(p) (21 U.S.C. 321(p)) as a drug not generally recognized by qualified experts as safe for its intended use. In the Drug Amendments of 1962, Congress broadened the protection afforded by the 1938 act by adding a requirement that drugs be proven effective, as well as safe, for their intended uses. However, the 1962 amendments also contained a "grandfather clause," section 107(c)(4), that exempted certain drugs from the newly imposed effectiveness requirements. Under this section a drug was exempted if on October 9, 1962, it was (1) commercially used or sold in the United States, (2) was not a "new drug" as defined in the 1938 act, i.e., was generally recognized as safe, and (3) "was not covered by an effective application" filed under section 505 of the 1938 act.

Since Dexamyl products were first marketed in 1950, it is clear they were commercially used and sold on October 9, 1962, within the meaning of the first condition of the exemption.

However, the products do not meet either of the remaining two criteria. Dexamyl products were obviously new drugs subject to regulation when first marketed in 1950. Smith, Kline and French has pointed to no definitive point in time when Dexamyl products ceased being new drugs, nor has it provided any cogent reason why they should have been considered old drugs as of October 9, 1962. Obviously, neither SKF's self-serving refusal to file an NDA for Dexamyl from 1950 to October 9, 1962, nor administrative oversight on the part of FDA to so require, can be used to establish the safety of Dexamyl. Under these circumstances, the Commissioner concludes that Dexamyl products were new drugs on October 9, 1962 whose effectiveness must be proved by substantial evidence.

It has already been shown that Dexamyl was "covered" by effective new drug applications on October 9, 1962. Therefore, SKF also fails to meet the third criterion for grandfather status.

There is an additional reason why Dexamyl products are not exempt from the 1962 amendments. A drug qualifies for exemption under section 107(c)(4), inter alia, "when [it is] intended solely for use under conditions prescribed, recommended, or suggested in labeling * * * on [October 9, 1962]". It is axiomatic that unless a drug's labeling has the identical conditions of use that it had on October 9, 1962, it cannot qualify for the grandfather exemption. "United States v. Tyler Pharmacal Distributors, Inc.," 408 F. 2d 95 (7th Cir. 1969); "United States v. Allan Drug Corp.," 357 F. 2d 713 (10th Cir. 1966), cert. denied, 385 U.S. 899; "United States v. 1,048,000 Capsules * * * Afrodex," 347 F. Supp. 768, 770 (S.D. Tex. 1972), aff'd 494 F. 2d 1158 (5th Cir. 1974); "Merritt v. Folsom," 165 F. Supp. 418, 421 (D.D.C. 1958). See also § 310.3(h) (21 CFR 310.3(h)). As shown below, Dexamyl's conditions of use have changed drastically since October 9, 1962.

On October 9, 1962, Dexamyl was unreservedly recommended by its labeling, inter alia, for "overweight control of appetite." Today, Dexamyl is recommended by its labeling for exogenous obesity, "as a short-term (a few weeks) adjunct in a regimen of weight reduction based on caloric restriction." The changes concerning the conditions of use are significant and self-evident. Dexamyl is now offered only for short-term use not to exceed a few weeks; the earlier 1962 labeling contained no such restriction on the duration of administration.

On October 9, 1962, SKF's labeling recommended Dexamyl for "relief of symptoms of mental and emotional stress frequently associated with lowered caloric intake"; the present labeling states that the combination reduces wakefulness and excitation attributable to dextroamphetamine. The two indications constitute wholly different conditions of use.

There are other changes. The present labeling greatly expands the 1962 list of contraindications, precautions and warnings. Contraindications added since 1962 include hyperthyroidism, agitated states, porphyria, patients with a history of drug abuse, and use with monamine oxidase inhibitors. Post-1962 precautions include advising cautious use in conjunction with alcohol and in patients taking guanethidine, or who have decreased liver function or diabetes mellitus. Post-1962 labeling contains elaborate warnings concerning tolerance to the anorectic effect of Dexamyl, masking of fatigue, potential for drug abuse, usage in pregnancy and by children under 12 years of age. None of these restrictions were present in the pre-1962 labeling.

It is clear that Dexamyl is not recommended for use under the same conditions as on October 9, 1962. Accordingly, even assuming, arguendo, that Dexamyl products were not "new drugs" on October 9, 1962, and even further assuming that they were not "covered" by existing approved NDA's on that date, the labeling changes, by themselves, render these products ineligible for exemption under section 107(c)(4).

It is of course well settled that the party seeking the protection of an exemption has the burden of showing he comes within its terms; it is equally well settled that exemptions are to be construed strictly against the party invoking their shelter. "United States v. Allan Drug" Corp., supra. Viewing the above facts against these legal principles, it is clear that SKF's claim for grandfather status must be rejected.

Smith, Kline and French next contends that FDA is without authority to determine the "new drug" status of Dexamyl and that, in any event, withdrawal of the NDA's named in the February 12, 1973 DESI notice would not ipso facto cause the Dexamyl products (which were not in the notice) to become unapproved new drugs. These contentions are also without merit because the Supreme Court has squarely held that the Commissioner does have the authority, subject to judicial review, to determine the "new drug" status of individual drugs or classes of drugs and that withdrawal or refusal to approve one NDA covers all identical, similar or related drugs. "Weinberger v. Hynson, Westcott & Dunning, 412 U.S. 609 (1973); "Weinberger v. Bentex Pharmaceutical, Inc.," 412 U.S. 640 (1973); "National Ethical Pharm. Ass'n. v. Weinberger," 365 F. Supp. 735 (D. S.C. 1973), aff'd 503 F. 2d 1051 (4th Cir. 1974). "North American Pharmacal, Inc. v. Department of Health, Education and Welfare," supra.

Smith, Kline and French contends that the Commissioner has not stated any reasons or facts to support his conclusion. This notice supplies the necessary reasons and facts. The summary procedure employed here has been explicitly approved by the Supreme Court in "Hynson, Westcott, & Dunning," supra, and by numerous other courts as well. See "Cooper Laboratories, Inc. v. Commissioner, Federal Food and Drug Administration" 501 F. 2d 772 (D.C. Cir. 1973); "Upjohn Co. v. Finch," 422 F. 2d 944 (6 Cir. 1970); "Pfizer, Inc. v. Richardson," 434 F. 2d 536 (2d Cir. 1970); "American Cyanamid Co. v. Richardson,

V 41 165 AUG 24 76 UMI

456 F. 2d 509 (1st Cir. 1971). In Hynson, the Court stated [at p. 622]:

> The drug manufacturers have full and precise notice of the evidence they must present to sustain their NDA's, and under these circumstances we find FDA hearing regulations unexceptionable on any statutory or constitutional ground.

The Court undoubtedly approved of this procedure because manufacturers have both actual and constructive notice of the regulations and because they "express well-established principles of scientific investigation." Hynson, supra, at pp. 618–619. Here, SKF was given actual notice in the February 12, 1973 FEDERAL REGISTER notices (38 FR 4279 and 38 FR 4249) that evidence for the effectiveness of Dexamyl would have to meet the standards set forth in regulations promulgated in the FEDERAL REGISTER of May 8, 1970 (35 FR 7251). In view of these facts and in view of the failure of SKF's submission to comply with long-recognized scientific principles embodied in the regulations, additional notice is unwarranted.

Smith, Kline and French also contends that because FDA has expressed the opinion that all amphetamine combinations are ineffective and because this opinion may be based on studies submitted by other drug manufacturers, SKF should be permitted to review the other studies. For the same reason, SKF argues that an evidentiary hearing is necessary to assure a decision based on the evidence of record. Since the Commissioner's decision to refuse approval of the Dexamyl NDA's is based only on SKF's submissions reviewed in this order and upon well established principles of pharmacology and drug testing, SKF's apprehensions are unjustified and its requests are denied.

Finally, SKF contends that the data which it submitted together with the history of "safe and effective use of Dexamyl products over a period of 22 years" demonstrate its effectiveness. It is well settled that the commercial success and widespread acceptance of a product, standing alone, cannot meet the standards of substantial evidence. "Hynson, Westcott & Dunning v. Weinberger," supra; "Upjohn Co. v. Finch," 422 F. 2d 944, 954 supra, "Pharmaceutical Manufacturers Ass'n. v. Richardson," 318 F. Supp. 301, 310 (D. Del. 1970). As the Court stated in Hynson, supra [at p. 619]:

> The [Congressional] hearings underlying the 1962 Act show a marked concern that impressions or beliefs of physicians no matter how fervently believed, are treacherous.

FINDINGS

On the basis of the foregoing review of SKF's evidence and legal arguments, the Commissioner finds that (1) there is a lack of substantial evidence that Dexamyl products have the effects they are represented to have under the conditions of use recommended, suggested or prescribed in their labeling and (2) there is a lack of substantial evidence that each component of the combination products contributes to the total effects claimed.

Smith, Kline and French has failed to offer any data or legal reason to demonstrate the existence of a genuine and substantial issue of fact requiring a hearing.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 505(d)), 52 Stat. 1052 as amended (21 U.S.C. 355(d)) and under the authority delegated to the Commissioner (21 CFR 5.1) (recodification published in the FEDERAL REGISTER of June 5, 1976 (41 FR 24262)), approval of new drug applications (NDA No. 17–074, 17–075 and 17–077 for Dexamyl Elixir, Tablets and Spansule capsules) and all amendments and supplements thereto, is refused. This order shall be effective on September 3, 1976.

(Sec. 505(d)), 52 Stat. 1052 as amended (21 U.S.C. 355(d).)

Dated: August 17, 1976.

SHERWIN GARDNER,
Acting Commissioner of Food and Drugs.

NATIONAL ADVISORY COUNCIL ON INDIAN EDUCATION

Public Availability of Reports of Closed Meeting Activities of Advisory Committees

Pursuant to the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. 1 (Supp. II 1972) and OMB Circular A–63 of March 27, 1974, those advisory committees of the Department of Health, Education and Welfare which held closed or partially closed meetings in 1975 have prepared a report on the activities of these meetings. Copies of the report have been filed and are available for public inspection at the following locations:

Library of Congress, Exchange and Gift Division, Federal Advisory Committee Desk, Washington, D.C. 20540.
National Advisory Council on Indian Education, Room 326—Pennsylvania Bldg., 425 13th Street, NW., Washington, D.C.
Committee Management Staff, U.S. Office of Education, Room 4156, FOB 6, 400 Maryland Avenue, S.W., Washington, D.C. 20202.

The name of the subject committee is listed below:

National Advisory Council on Indian Education.

LINCOLN C. WHITE,
Executive Director, National Advisory Council on Indian Education.

NATIONAL ADVISORY COUNCIL ON INDIAN EDUCATION

Meeting

Notice is hereby given, pursuant to section 10(a) (2) of the Federal Advisory Committee Act (Pub. L. 92–463, 5 U.S.C. Appendix 1), that the next meeting of the Executive Committee of the National Advisory Council on Indian Education will be held September 10–11, 1976, at the Sheraton Denver Hotel, 3535 Quebec Street, Denver, Colorado 80207.

The National Advisory Council on Indian Education is established under section 442 of the Indian Education Act, Title IV of Pub. L. 92–318, (20 U.S.C. 1221g). The Council, among other things, is directed to:

(1) Advise the Commissioner of Education with respect to the administration (including the development of regulations and of administrative practices and policies) of any program in which Indian children or adults participate from which they can benefit, including sections 241aa to 241ff and 887c of this title and with respect to adequate funding thereof;

(2) Review applications for assistance under sections 241aa to 241ff, 887c, and 1211a of this title, and make recommendations to the Commissioner with respect to their approval;

(3) Evaluate programs and projects carried out under any program of the Department of Health, Education, and Welfare in which Indian children or adults can participate or from which they can benefit, and disseminate the results of such evaluations;

(4) Provide technical assistance to local educational agencies and to Indian educational agencies, institutions, and organizations to assist them in improving the education of Indian children;

(5) Assist the Commissioner in developing criteria and regulations for the administration and evaluation of grants made under section 303(b) of the Act of September 30, 1950, (Pub. L. 874, Eighty-first Congress); and

(6) To submit to the Congress not later than March 31 of each year a report on its activities, which shall include any recommendations it may deem necessary for the improvement of Federal education programs in which Indian children and adults participate, or from which they can benefit, which report shall include statement of the National Council's recommendations to the Commissioner with respect to the funding of any such programs.

The meeting on September 10–11, 1976, will be open to the public beginning at 9:00 a.m. and ending at 5:00 p.m. each day. This meeting will be held at the Sheraton Denver Hotel.

The proposed agenda includes:

(1) Develop FY '77 NACIE Budget
(2) Discuss Agenda items for September 17–19, 1976, Full Council Meeting
(3) Regular Committee Business

The September 10, 1976 meeting will be closed to the public from 3:00 p.m. to 5:00 p.m. for reviewing applications for the position of Deputy Commissioner for the Office of Indian Education that must be held in confidence, under the authority of section 10(d) of the Federal Advisory Committee Act (Pub. L. 92–463) and under the exemptions contained in the Freedom of Information Act, Section 552(b) (4 and (6) of Title 5 U.S.C. (Pub. L. 90–23), 45 CFR 5.71(a) and § 5.71(c).

Records shall be kept of all Council proceedings and shall be available for public inspection at the Office of the National Advisory Council on Indian Education located at 425 13th Street, NW., Room 326, Washington, D.C. 20004.

Signed at Washington, D.C., on August 11, 1976.

LINCOLN C. WHITE,
Executive Director, National Advisory Council on Indian Education.

National Institute of Education

NATIONAL COUNCIL ON EDUCATIONAL RESEARCH

Special Meeting

Notice is hereby given that a special meeting of the National Council on Educational Research will be held on August 30, 1976, at the National Institute of Education, 1200—19th Street, N.W., Washington, D.C., in Room 823. Because this meeting will consist solely of a discussion of Fiscal Year 1978 budget matters which have not yet been approved by the President or released to the public, it has been determined that this meeting must be closed. This is in accordance with the Council's policy to close meetings only under the most extraordinary circumstances and consistent with the provisions of the Federal Advisory Committee Act.

Because of the urgency and timing of the mid-September budget submission, it is essential that this meeting take place on the above-scheduled date even though it creates an exception to the requirement for timely notification of meetings.

The National Council on Educational Research is established under Section 405(b) of the General Education Provisions Act (20 U.S.C. 1221e(b)). Its statutory duties include:

(a) Establishing general policies for, and reviewing the conduct of the Institute;

(b) Advising the Assistant Secretary for Education and the Director of the Institute on development of programs to be carried out by the Institute;

(c) Recommending to the Assistant Secretary and the Director ways to strengthen educational research, to improve the collection and dissemination of research findings, and to insure the implementation of educational renewal and reform based upon the findings of educational research.

Dated: August 19, 1976.

VERA BROWN,
Executive Assistant to the Director, National Institute of Education.

Office of the Assistant Secretary for Health

HEALTH INSURANCE BENEFITS ADVISORY COUNCIL

Meeting

Notice is hereby given, pursuant to Pub. L. 92–463, that the Health Insurance Benefits Advisory Council (HIBAC), established pursuant to section 1867 of the Social Security Act, as amended, which advises the Secretary of Health, Education, and Welfare on Medicare and Medicaid matters will meet on Thursday, September 16 at 9:00 a.m. and Friday, September 17, 1976 at 9:00 a.m. in Room 5051 of the Department of Health, Education, and Welfare's North Building, Third and C Streets, SW., Washington, D.C. Principal consideration and discussion will include general policy issues and options regarding cost-containment and program reform. These meetings are open for public observation.

Further information on the Council may be obtained by contacting Ronald M. Klar, M.D., M.P.H., Executive Secretary, Health Insurance Benefits Advisory Council, Room 17A–31, 5600 Fishers Lane, Rockville, Maryland 20852, telephone (301) 443–3274 or 443–4728.

Dated: August 13, 1976.

RONALD M. KLAR,
Executive Secretary, Health Insurance Benefits Advisory Council.

Office of the Assistant Secretary for Health

NATIONAL PROFESSIONAL STANDARDS REVIEW COUNCIL

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Council meeting:

Name: National Professional Standards Review Council.

Date and Time: September 13, 1976 (10:00 a.m. to 5:00 p.m.) September 14, 1976 (9:00 a.m. to 1:00 p.m.).

Place: Auditorium (first floor), DHEW North Building, 330 Independence Avenue, S.W., Washington, D.C.

Purpose of Meeting: The Council was established to advise the Secretary of Health, Education, and Welfare on the administration of Professional Standards Review (Title XI, Part B, Social Security Act). Professional Standards Review is the procedure to assure that the services for which payment may be made under the Social Security Act are medically necessary and conform to appropriate professional standards for the provision of quality health care. The Council's agenda will include discussion of a variety of issues relevant to the implementation of the PSRO program.

Meeting of the Council is open to the public. Public attendance is limited to space available.

Any member of the public may file a written statement with the Council before, during, or after the meeting. To the extent that time permits, the Council Chairman may allow public presentation of oral statements at the meeting.

All communications regarding this Council should be addressed to William D. Coughlan, Staff Director, National Professional Standards Review Council, Office of Quality Standards, Room 16A–09, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20852.

Dated: August 16, 1976.

WILLIAM B. MUNIER,
Executive Secretary, National Professional Standards Review Council.

Social Security Administration

WESTERN SAMOA

Finding Regarding Foreign Social Insurance or Pension System

Section 202(t)(1) of the Social Security Act (42 U.S.C. 402(t)(1)) prohibits payment of monthly benefits to aliens, subject to the exceptions described in sections 202(t)(2) through 202(t)(5) of the Social Security Act (42 U.S.C. 402(t)(2) through 402(t)(5)), for any month after they have been outside the United States for 6 consecutive calendar months.

Section 202(t)(2) of the Social Security Act (42 U.S.C. 402(t)(2)) provides that section 202(t)(1) shall not apply to any individual who is a citizen of a foreign country which the Secretary of Health, Education, and Welfare finds has in effect a social insurance or pension system which is of general application in such country and under which (A) periodic benefits, or the actuarial equivalent thereof are paid on account of old age, retirement, or death, and (B) individuals who are citizens of the United States but not citizens of such foreign country and who qualify for such benefits are permitted to receive such benefits or the actuarial equivalent thereof while outside such foreign country without regard to the duration of the absence.

Pursuant to authority duly vested in the Commissioner of Social Security by the Secretary of Health, Education, and Welfare, and redelegated to him, the Director of the Bureau of Retirement and Survivors Insurance has approved a finding that Western Samoa, beginning August 13, 1972, has a social insurance system of general application which pays periodic benefits on account of old age, retirement, or death, and under which citizens of the United States, not citizens of Western Samoa, who leave Western Samoa, are permitted to receive such benefits or their actuarial equivalent at the full rate without qualification or restriction while outside that country.

Accordingly, it is hereby determined and found that Western Samoa has in effect, beginning August 13, 1972, a social insurance system which meets the requirements of Section 202(t)(2) of the Social Security Act (42 U.S.C. 402(t)(2)).

Dated: AUGUST 18, 1976.

PASQUALE F. CALIGIURI,
Director, Bureau of Retirement and Survivors Insurance.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

INTERSTATE FUNDING STUDY

Request for Comments

Pursuant to section 150(a) of the Federal-Aid Highway Act of 1976 (Pub. L. 94–280) the Federal Highway Administration, in conjunction with the Office of the Secretary of Transportation, is preparing a report to Congress on the financing of the completion of the Interstate Highway System. Section 150(a) specifically requests that the report "identify and analyze optional financing methods including State bonding authority under which the Secretary contracts to reimburse the States for up to 90 per centum of the principal and interest on such bonds." Present law does not allow Federal participation in interest payments on such bonds. The report is to be submitted to Congress by February 5, 1977.

To assure that all concerned parties have an opportunity to express their views, the Federal Highway Administration is soliciting comments on the subject of this study. Although any area of the subject may be commented upon, the Federal Highway Administration would be most interested in views concerning the feasibility of the States to issue bonds to accelerate construction of all or portions of the Interstate Highway System, and the potential economic, employment, construction industry, and other impacts of an accelerated Interstate System construction program.

Interested persons or organizations should submit their comments, in writing, to the Federal Highway Administration, Office of Program and Policy Planning, HPP–30, Washington, D.C. 20590, no later than September 20, 1976.

Issued on: August 18, 1976.

NORBERT T. TIEMANN,
Federal Highway Administrator.

[FR Doc.76–24727 Filed 8–23–76;8:45 am]

CIVIL AERONAUTICS BOARD

[Order 76–8–95; Docket No. 28744; Agreement CAB 25762]

CONTINENTAL AIR LINES, INC. AND RIO AIRWAYS, INC.

Order on Reconsideration

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 17th day of August, 1976.

By order 76–5–120, May 25, 1976, the Board set for hearing the application of Continental Air Lines, Inc. (Continental) to suspend its service over the Midland/Odessa-Tulsa portion of segment 3, Route 29, for a five-year period, and to approve Continental's agreement with Rio Airways, Inc. (Rio) for the replacement of its suspended service.[1] The Board's order states that the issues in the proceeding shall include: (1) whether Continental's authority to serve the Midland/Odessa-Tulsa portion of segment 3 should be suspended or deleted, and, if so, what conditions should be attached to any suspension found to be required; and (2) whether the Continental/Rio Replacement Agreement should be approved, and, if so, what conditions should be attached to the approval.

The Midland/Odessa parties filed a timely petition for reconsideration of the Board's order urging that the Board redefine the issues to include alternatives to suspension/replacement and to clarify the order.

It requests that the expanded issues include (1) whether the public interest requires the removal or modification of conditions (5) and (6) of Continental's certificate,[2] and (2) whether the public interest requires certification of an additional carrier to serve the Midland/Odessa-Tulsa portion of segment 3. Further, it requests that the Board make clear that there is no issue in this proceeding of suspending Continental's service without replacement by a more responsive and efficient service, and that the issue of suspension of Continental on the Midland/Odessa-Tulsa segment of Route 29 includes the more limited issue of simply authorizing the carrier to overfly Wichita Falls and/or Lawton/Fort Sill.

The petition is opposed by Continental to the extent that it would transform the proceeding into a Midland/Odessa-Oklahoma route proceeding. Continental does not oppose expansion of the issues to include the removal of restrictions from its certificate authority affecting its ability to serve segment 3, but it stresses the point that such measures alone are not adequate to solve its service problems on this segment, which are allegedly caused in large part by the ready access of the potential flow traffic to faster, convenient connecting service over the Dallas/Fort Worth gateway. Continental vigorously opposes the consideration in this proceeding of applications from other certificated carriers for Midland/Odessa-Oklahoma authority, which it asserts would completely change the proceeding from one for suspension/replacement to a full-blown new route proceeding, and would doom all prospects for continuing service to all points on segment 3. Neither Continental nor Rio would be interested in investing their resources in providing service to the remainder of the segment if stripped of the opportunity for providing replacement service in the Lubbock/Midland/Odessa-Oklahoma markets.

The Bureau states it would join in the request for inclusion of the issue of deleting restrictions from Continental's authority, but only if the inclusion of the issue is not opposed by Continental. The Bureau would, in the event such restriction removal is placed in issue, open the proceeding to consider new route applications from other certificated carriers; however, the Bureau does not justify or even explain its position on this point. Further, the Bureau opposes Midland/Odessa's suggestion that the Board make clear that this proceeding will not enable Continental to suspend service without providing replacement service. It contends that the Board has retained and should retain the freedom to attach any conditions to its final order as the public interest may dictate. The Bureau does not oppose clarification of the suspension issue as including permission to overfly Wichita Falls and Lawton/Fort Sill.[3]

Midland/Odessa's petition to expand the issues will be denied. Putting in issue the deletion of Continental's conditions (5) and (6) would completely transform the proceeding into a major competitive route case in which the issues of new turnaround authority in the Chicago-Kansas City and Kansas City-Tulsa markets would completely overshadow the issues of service in the segment 3 markets which are the intended subject of this proceeding. As Continenal points out, it would also be necessary to put in issue its condition (8)(a), thereby raising similar extraneous issues of new single-plane authority in numerous Chicago-Texas/Oklahoma markets; and the carrier further suggests putting new Kansas City-Oklahoma City nonstop authority in issue. No showing whatever has been made to justify so vast an expansion of the proceeding; indeed, Continental has been at pains to depreciate the suggestion that deletion of these certificate restrictions could be expected to result in a significantly increased flow of Chicago and Kansas City traffic over segment 3, and our own analysis indicates little support for segment 3 operations could be expected to result, in view of the multistop nature of any Chicago/Kansas City-Midland/Odessa service Continental might be able to mount and the superior frequency, speed, and convenience of existing connecting service via Dallas/Fort Worth.[4]

By the same token, although a lesser expansion of the issues to include a limited modification rather than outright deletion of Continental's conditions (5), (6), and (8)(a) might not require opening up the proceeding to competing applications, the foregoing analysis indicates too little likelihood of any useful result, in terms of materially strengthening Continental's ability to serve segment 3, to justify the complication and material delay of the proceeding which even such a limited consideration of Continental's certificate restrictions would entail. Moreover, we detect no interest by Continental in such a limited consideration of its restrictions.

Although consideration of substitute certificated service over the Midland/Odessa-Tulsa portion of segment 3 would not necessarily transform or greatly expand the scope of the proceeding, our analysis indicates very little likelihood that any certificated carrier would hope to operate such service on an economically sound basis, in view of the small traffic flows involved and the availability of relatively ample and convenient connecting service. The certificated carriers who might be expected to be interested in providing such substitute service are apparently in agreement, since none of them have in fact filed applications. In view of the absence of any such applications, Midland/Odessa's petition to expand the issues in this respect is essentially moot, and will accordingly be denied.

Midland/Odessa also requests clarification that there is no issue in this case of suspending Continental without replacement service. In the interest of providing the Board with maximum decisional flexibility we will not adopt Midland/Odessa's suggested clarification. Under the issues as framed by Order 76–5–120, the suspension of Continental's authority without a replacement service is one of a variety of alternative courses of action the Board could adopt.

Midland/Odessa's requested clarification that the suspension issue as stated in Order 76–5–120 includes the issue of authority to suspend and overfly certain low-traffic-generating points on segment 3 has merit and will be granted.[5] In addition, Continental has indicated in its latest pleading that it desires to retain unsuspended its authority (presently unused) to operate over segment 3 between Tulsa-Oklahoma City and Aubuquerque/El Paso—a desire inconsistent with its original application to suspend service over segment 3, and at least technically inconsistent with the way the issues in the proceeding were framed in Order 76–5–120. In view of this clarification of the applicant's intentions, it is appropriate to reframe the principal issue as being the suspension or deletion of Continental's authority to serve any or all of the present intermediate points in segment 3.[6]

Accordingly, it is ordered that:

1. Ordering paragraph 2(a) of Order 76–5–120 is hereby amended to read:

(a) Do the public convenience and necessity require that the authority of Continental Air Lines, Inc., to serve any or all of the intermediate points presently named on segment 3 of its certificate for Route 29 be suspended or deleted? If so, what terms, conditions, and limitations, if any, should be attached to any suspension or deletion found to be required?

2. Except to the extent granted herein, the petition for reconsideration filed by the Midland/Odessa parties be and it hereby is denied; and

3. The motions of Continental Air Lines and American Airlines for leave to file otherwise unauthorized documents be and they hereby are granted.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board:

PHYLLIS T. KAYLOR,
Secretary.

CIVIL SERVICE COMMISSION

PRIVACY ACT OF 1974

Notice of Proposed System of Records

In accordance with 5 U.S.C. 552a(e)(4) and (11), Section 3 of the Privacy Act of 1974 (Public Law 93–579), notice is hereby given that the Commission proposes to establish a new system of records subject to the provisions of the Privacy Act. The following system of records, the CSC Managerial Potential Rating System (CSC–9), is a new system of records for which no public notice consistent with the provisions of 5 U.S.C. 552a(e)(4) has been previously published in the FEDERAL REGISTER.

Pursuant to 5 U.S.C. 552a(o) and guidelines for implementing the Privacy Act established by the Office of Management and Budget in OMB Circular A–108, on June 9, 1976, the Commission transmitted to the Congress, the Privacy Protection Study Commission, and the Office of Management and Budget the required "Report on New Systems" for the CSC Managerial Potential Rating System.

Any interested persons may submit written comments on this notice to the Director, Personnel and Labor Relations Division, Bureau of Management Services, U.S. Civil Service Commission, 1900 E Street, N.W., Washington, D.C., by September 23, 1976.

All written comments received from the public through that date will be considered by the Commission before adoption of final notice. The comments received will be available for public inspection at the above address between the hours of 9 a.m. and 4 p.m., Monday through Friday (except holidays) until September 23, 1976.

Effective date: This notice shall be effective September 24, 1976.

CSC–9

System name. CSC Managerial Potential Rating System–CSC.

System location. Bureau of Management Services, U.S. Civil Service Commission, 1900 E Street, N.W., Washington, D.C. 20415.

Categories of individuals covered by the system. Individuals who are employed or who were employed on or after the date of implementation of the system by the U.S. Civil Service Commission in permanent positions classified in pay grades GS–13, GS–14, and GS–15, and their supervisors.

Categories of records in the system. These records contain the following types of information about the covered individuals:

a. Demographic data—date of birth, sex, educational level, year of degree, academic discipline, service computation date, handicap code, and minority group designator.

b. Position data—organization, occupation, grade level, number of employees supervised, identification of supervisors.

c. Rating data—ratings of managerial potential obtained from the employee and his supervisors, and date of rating.

Authority for maintenance of the system. Sections 3341, 3361, 4118, and 4503 of Title 5, U.S.C.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses. These records are used to:

---

[1] Agreement CAB 25762.

[2] Condition (5) in substance requires that all Kansas City-Tulsa flights serve Albuquerque or El Paso. Condition (6) requires that all Chicago-Kansas City flights serve Los Angeles or a point west thereof. As Continental points out, consideration of condition (6) would be futile unless condition (8)(a) were also put in issue; the latter precludes Chicago-Kansas City flights from serving points south of Kansas City which are not on segment 6 (as none of the Texas/Oklahoma points here at issue are). Continental had previously asserted that these conditions make it difficult to flow Chicago and Kansas City traffic over segment 3 in order to support Tulsa/Oklahoma City-Lubbock/Midland/Odessa service.

[3] Continental filed a motion for leave to file an otherwise unauthorized document, which motion will be granted, and a reply to the Bureau's answer, in which it supports inclusion of the issue of deleting its conditions (5) and (6), provided condition (8)(a) is also put in issue, and suggests a still further expansion of the case to include the possibility of extending segment 3 to Kansas City, thereby putting in issue new Kansas City-Oklahoma City nonstop authority. If deletion of its conditions (5), (6), and (8)(a) is put in issue, Continental states it will not oppose consideration of competing applications to serve the Tulsa-Midland/Odessa portion of segment 3.

American Airlines subsequently filed a motion for leave to file an otherwise unauthorized document, which motion will also be granted, and an answer opposing the expansion of the issues proposed by the Midland/Odessa parties as amplified by Continental in its answer to the Midland/Odessa petition and further amplified in its reply to the Bureau's answer.

[4] In Order 76–6–84, in denying a separate petition by the Midland/Odessa parties for an investigation of service between Midland/Odessa and points in the East, the Board determined *inter alia* that the historic traffic in the Midland/Odessa-Chicago market (4,640 O&D passengers in 1974, or fewer than 7 passengers per day in each direction) does not warrant an investigation of the need for first single-plane service in that market, particularly since infrequent multistop service could be expected to attract only a portion of the available traffic in the face of one-stop connecting service over Dallas/Fort Worth. That conclusion is obviously relevant here.

[5] It must be pointed out, however, that any right to overfly a suspended point would not abrogate specific conditions otherwise contained in Continental's certificate. See, for example, Application of Hughes Airwest, Order 74–9–7, September 4, 1974, note 14.

[6] Continental holds authority over other segments in the Tulsa-Oklahoma City, Lubbock-Albuquerque, Lubbock-Midland/Odessa, and Midland/Odessa/El Paso markets which will not be affected by any suspension or deletion of intermediate points on segment 3 which may be ordered in this proceeding. See footnotes 1 and 12 of Order 76–5–120.

V41I165 AUG 24 76 UMI

a. Serve as a basis for employee counseling by supervisors on career development.

b. Rank the managerial potential of covered employees as one of the elements used for agency management decisions regarding career development, awards, and promotions to managerial positions.

c. Demographic data will be used to produce statistical summaries to help assure that ratings are based solely on individual performance. The summaries will indicate trends that will be helpful in assessing compliance with equal employment opportunity and in assessing the relationship of managerial potential rating to such factors as educational level, recency of education academic discipline, and years of Federal service.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system. See Storage, Retrievability, Safeguards, Access, Retention and Disposal below.

Storage.—The records are maintained on magnetic tape, punched cards, lists, and forms.

Retrievability.—Records are indexed by a combination of name, employee identification number, grade, occupation, and organization.

Safeguards.—Records are stored in lockable metal file cabinets or in secured rooms with access limited to those whose official duties require access.

Retention and Disposal.—Automated records are retained for five to ten years. Manual input is retained for three years.

System manager and address. Director, Personnel and Labor Relations Division, Bureau of Management Services, U.S. Civil Service Commission, 1900 E Street, N.W., Washington, D.C. 20415.

Notification procedure. Inquiries, including name, CSC employee identification number, and date of rating, should be addressed to the system manager named above.

Record access procedures. Current or former employees who wish to gain access to their records should direct such a request in writing, including their name, CSC employee identification number, and date of rating, to the system manager named above.

Contesting record procedures. Same as Record Access Procedures, above.

Record source categories. Information in this system of records comes from the individual to whom it applies, and/or the individual's supervisors, except position and demographic information provided by agency officials.

UNITED STATES CIVIL SERVICE COMMISSION
[SEAL] JAMES C. SPRY,
Executive Assistant to the Commissioners.

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

GLOBAL ENVIRONMENTAL EFFECTS OF CARBON DIOXIDE

Establishment of Study Group

Pursuant to the Federal Advisory Committee Act (P.L. 92-463), I hereby certify that the establishment of a Study Group on Global Environmental Effects of Carbon Dioxide as hereinafter identified is in the public interest in connection with the performance of duties imposed upon the Energy Research and Development Administration by the Energy Reorganization Act of 1974 and other applicable law. This determination follows consultation with the Office of Management and Budget (OMB), pursuant to Section 9(a)(2) of the Federal Advisory Committee Act and OMB Circular No. A-63 (Revised).

1. *Name of Advisory Committee.* Study Group on Global Environmental Effects of Carbon Dioxide.

2. *Purpose.* To give guidance to ERDA in the development of its role in environmental research dealing with the global effects of increasing levels of carbon dioxide produced by fossil fuel combustion and related matters. The Group's guidance will be based on a thorough review of ongoing and planned national and international research activities in this area. Due recognition will also be given to recommendations put forward by the various scientific deliberative bodies. A preliminary guidance document is to be submitted to the Assistant Administrator for Environment and Safety by December 31, 1976. A more detailed report is to be submitted by April 30, 1977. This report may be updated subsequently by amendments if deemed necessary in the view of the Group or the Assistant Administrator for Environment and Safety. The Group will also review and comment upon the research program developed as a result of its guidance until the Group's date of termination.

3. *Effective date, establishment, and duration.* The Study Group is established effective on September 8, 1976 and after filing of the charter with the standing committees of Congress having legislative jurisdiction over the Energy Research and Development Administration. The Study Group's termination date shall be December 31, 1978.

4. *Membership.* The membership of the Study Group on Global Environmental Effects of Carbon Dioxide shall be fairly balanced in terms of the points of view represented and the Group's function. Membership will include representatives from the fields of the ecological sciences, meterorology, oceanography, and engineering. Individuals with strong scientific backgrounds and high level scientific administration experience will be included. Other qualified and experienced individuals who can contribute to the activities of the Group will also be included. There will be no discrimination on the basis of race, color, creed, national origin, religion, or sex.

5. *Study Group on Global Environmental Effects of Carbon Dioxide Operation.* The Study Group will operate in accordance with provisions of the Federal Advisory Committee Act (P.L. 92-463), ERDA policy and procedures, OMB Circular No. A-63 (Revised), and other directives and instructions issued in implementation of the Act. The Study Group will be provided with the necessary support to accomplish its purpose.

Effective date: August 24, 1976.

ROBERT C. SEAMANS, JR.,
Administrator.

ENVIRONMENTAL PROTECTION AGENCY

[PF44; FRL 604-5]

BASF WLANDOTTE CORP. AND THOMPSON-HAYWARD CHEMICAL CO.

Filing of Pesticide Petitions

Pursuant to the provisions of section 408(d)(1) of the Federal Food, Drug, and Cosmetic Act, the Environmental Protection Agency gives notice that the following petitions have been submitted to the Agency for consideration.

PP 6F1828. BASF Wyandotte Corp., Agricultural Chemicals Dept., 100 Cherry Hill Rd., Parsippany NJ 07054. Proposes that 40 CFR 180.355 be amended by the establishment of tolerances for combined residues of the herbicide bentazon (3-isopropyl-1H-2,1,3-benzothiadiazin-4(3H)-one-2,2-dioxide) and its 6- and 8-hydroxy metabolites in or on the raw agricultural commodities peanuts (nutmeats after the removal of hulls) at 0.05 part per million (ppm), peanut hay at 3 ppm, peanut hulls at 0.3 ppm, corn grain and fresh corn (including sweet corn, kernels plus cob with husk removed) at 0.05 ppm, corn forage and fodder at 3 ppm, rice at 0.05 ppm, rice straw at 3 ppm, the hay of seed and pod vegetables (except soybeans) at 3 ppm, and soybean hay at 0.3 ppm. Proposed analytical method for determining residues is a gas chromatographic procedure using a flame photometric detector in the sulfur specific mode (394 mm). PM25 (202/755-7012)

PP 6F1832. Thompson-Hayward Chemical Co., PO Box 2383 Kansas City KS 66110. Proposes that 40 CFR 180 be amended by the establishment of a tolerance for residues of the insecticide N-[[(4-chlorophenyl)amino]carbonyl]-2,6-difiorobenzamide in or on the raw agricultural commodity soybeans at 0.05 ppm. Proposed analytical method for determining residues is a high-pressure liquid chromatographic procedure using UV spectrometry. PM17 (202/426-9425)

Interested persons are invited to submit written comments on any petitions referred to in this notice to the Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, Room 401, East Tower, 401 M St. SW, Washington DC 20460. Three copies of the comments should be submitted to facilitate the work of the Agency and of others interested in inspecting them. Inquiries concerning specific petitions referred to in this notice may be directed to the designated Product Manager (PM), Registration Division (WH-567), Office of Pesticide Programs, at the above address, or by telephone at the numbers cited. Written comments should bear a notation indicating the number of the petition to which the comments pertain. Comments may be made at any time while a petition is pending before the Agency. All written comments filed pursuant to this notice will be available for public inspection in the office of the Federal Register Section 8:30 a.m. to 4:00 p.m. Monday through Friday.

Dated: August 16, 1976.

JOHN B. RITCH, JR.,
Director, Registration Division.

[FR Doc.76-24707 Filed 8-23-76;8:45 am]

[FRL 603-6; OPP—50243]

DOW CHEMICAL CO. ET AL.

Issuance of Experimental Use Permits

Pursuant to section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), experimental use permits have been issued to the following applicants. Such permits are in accordance with, and subject to, the provisions of 40 CFR Part 172; Part 172 was published in the FEDERAL REGISTER on April 30, 1975 (40 FR 18780), and defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 464-EUP-47. Dow Chemical Company, Midland, Michigan 48640. This experimental use permit allows the use of $2,417 pounds of the microbiocide bromine chloride in effluent for evaluation of disinfection in sewage disposal plants to control bacteria and viruses and in water used in "once through" industrial water cooler systems to evaluate control of growth of algae, bacteria, and fungi. A total of 3,203,500 gallons of water are involved; the program is authorized only in the States of Maryland and Hawaii. The experimental use permit is effective from July 9, 1976, to July 9, 1977.

No. 201-EUP-50. Shell Chemical Company, Washington, DC 20460. This experimental use permit allows the use of 9,600 pounds of the insecticide (a synthetic pyrethroid) cyano (3-phenoxyphenyl) methyl-4-chloro-α-(1-methylethyl) benzene-acetate on cotton to evaluate control of the Pink Bollworm, the Cottonleaf Perforator, the Tobacco Budworm and the Cotton Bollworm and to evaluate reduction of the Bollweevil. A total of 5,000 acres is involved; the program is authorized only in the States of Alabama, Arizona, Arkansas, California, Florida, Georgia, Louisiana, Mississippi, Missouri, New Mexico, North Carolina, Oklahoma, South Carolina, Tennessee, and Texas. The experimental use permit is effective from July 9, 1976, to July 9, 1977. A temporary tolerance for residues of the active ingredient in or on cottonseed has been established.

No. 239-EUP-74. Chevron Chemical Company, Richmond, California 94804. This experimental use permit allows the use of the remaining supply of 354.75 pounds of the insecticide acephate authorized in a previous experimental use permit; the insecticide will be used on almonds to evaluate control of the Naval Orangeworm. A total of 50 acres is involved; the program is authorized only in the State of California. The experimental use permit is effective from July 10, 1976, to July 31, 1977. A temporary tolerance for residues of the active ingredient in or on almonds has been established.

Interested parties wishing to review the experimental use permits are referred to Room E-315, Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M St., S.W., Washington, D.C. 20460. It is suggested that such interested persons call 202/755-4851 before visiting the EPA Headquarters Office, so that the appropriate permits may be made conveniently available for review purposes. These files will be available for inspection from 8:30 a.m. to 4:00 p.m. Monday through Friday.

Dated: August 16, 1976.

JOHN B. RITCH, JR.,
Director, Registration Division.

[FR Doc.76-24710 Filed 8-23-76;8:45 am]

[FRL 604-6; OPP-50242]

MOBIL CHEMICAL CO. ET AL.

Issuance of Experimental Use Permits

Pursuant to section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), experimental use permits have been issued to the following applicants. Such permits are in accordance with, and subject to, the provisions of 40 CFR Part 172; Part 172 was published in the FEDERAL REGISTER on April 30, 1975 (40 FR 18780), and defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 2224-EUP-16. Mobil Chemical Company, Richmond, Virginia 23261. This experimental use permit allows the use of 152 pounds of the insecticide 1-ethoxy-4-(1-[4-(1,1-dimethylethyl)phenyl]-2-nitrobutyl)-benzene on apples, pears, peaches, soybeans, cabbage, broccoli, brussels sprouts, cauliflowers, collards, Irish potatoes, and tomatoes to evaluate control of a variety of insects. A total of 160.5 acres is involved; the program is authorized only in the States of Alabama, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, New Hampshire, New Jersey, New York, North Dakota, Ohio, Oregon, Pennsylvania, South Carolina, Texas, Virginia, Washington, Wisconsin, and Wyoming. The experimental use permit is effective from May 12, 1976, to May 12, 1977. Any crops treated under this permit will be destroyed or used for research purposes only.

No. 100-EUP-44. Ciba-Geigy Corporation, Greensboro, North Carolina 27409. This experimental use permit allows the use of 866 pounds of a herbicide which is a mixture of 2-chloro-*N*-(2-ethyl-6-methylphenyl)-*N*-(2-methoxy-1-methylethyl) acetamide and procyazine on corn to evaluate control of annual grasses and broadleaf weeds. A total of 577 acres is involved; the program is authorized only in the States of Colorado, Connecticut, Delaware, Illinois, Indiana, Iowa, Kansas, Kentucky, Maine, Maryland, Michigan, Massachusetts, Minnesota, Missouri, Montana, Nebraska, New Hampshire, New Jersey, New York, North Dakota, Ohio, Pennsylvania, Rhode Island, South Dakota, Vermont, Virginia, West Virginia, and Wisconsin. The experimental use permit is effective from July 9, 1976, to April 30, 1977. A temporary tolerance for residues of the active ingredient in or on corn has been established.

No. 1016-EUP-35. Union Carbide Corporation, Washington DC 20006. This experimental use permit allows the use of 880 pounds of an insecticide which is a mixture of carbaryl and petroleum oils on corn to evaluate control of the Southwestern Corn Borer. A total of 140 acres is involved; the program is authorized only in the State of Texas. The experimental use permit is effective from July 9, 1976, to July 9, 1977. A permanent tolerance for residues of the active ingredient in or on corn has been established (40 CFR 180.169).

Interested parties wishing to review the experimental use permits are referred to Rm. E-315, Registration Division (WH-567), Office of Pesticide Programs, Environmental Protection Agency 401 M St. SW., Washington, D.C. 20406. It is suggested that such interested persons call 202/755-4851 before visiting the EPA Headquarters Office, so that the appropriate permits may be made conveniently available for review purposes. These files will be available for inspection from 8:30 a.m. to 4 p.m. Monday through Friday.

Dated: August 16, 1976.

JOHN B. RITCH, JR.,
Director, Registration Division.

[FRL 603-7; OPP-50244]

SHELL CHEMICAL CO. AND CIBA

Issuance of Experimental Use Permits

Pursuant to section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), experimental use permits have been issued to the following applicants. Such permits are in accordance with, and subject to, the provisions of 40 CFR Part 172; Part 172 was published in the FEDERAL REGISTER on April 30, 1975 (40 FR 18780), and defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 201-EUP-54. Shell Chemical Company, Washington, D.C. 20036. This experimental use permit allows the use of 0.002 pounds of an insecticide which is a mixture of 2H-1,3-thiazine, tetrahydro-2-(nitromethylene) and (Z)-9-tricosene indoors and outdoors in kitchens, dining rooms, bedrooms, patios, porches, kennels, barns, garbage areas, etc., to evaluate control of flies and mosquitoes. A total of 250 units will be used, 1 unit per home, in four States; the program is authorized only in the States of Florida, Georgia, Texas, and California, with approximately 60 units being used in each State. The ex-

V 41 165 AUG 24 76 UM

perimental use permit is effective from July 12, 1976, to July 12, 1977.

No. 201–EUP–55. Shell Chemical Company, Washington, D.C. 20036. This experimental use permit allows the use of 0.002 pounds of the insecticide 2H–1, 3-thiazine, tetrahydro-2-(nitromethylene) indoors and outdoors in kitchens, dining rooms, living rooms, bedrooms, patios, porches, kennels, barns, garbage areas, etc. to evaluate control of flies and mosquitoes. A total of 250 units will be used, 1 unit per home, in four States, the program is authorized only in the States of Florida, Georgia, Texas, and California, with approximately 60 units being used in each State. The experimental use permit is effective from July 12, 1976, to July 12, 1977.

No. 100–EUP–46. Ciba-Geigy Corporation, Greensboro, North Carolina 27409. This experimental use permit allows the use of 320 pounds of the pre-emergent herbicide atrazine on wheat to evaluate control of cheatgrass, kochid, mustard, pigweed, Russian thistle, wild lettuce, wild sunflower, and volunteer wheat during the fallow period of a wheat-fallow-wheat rotation. A total of 850 acres is involved. The program is authorized in the States of North Dakota and Montana; the States of South Dakota, Iowa, and Minnesota are authorized for shipping purposes only. The experimental use permit is effective from July 12, 1976, to July 12, 1977. A permanent tolerance for residues of the active ingredient in or on wheat has been established (40 CFR 180.220).

No. 100–EUP–47. Ciba-Geigy Corporation, Greensboro, North Carolina 27409. This experimental use permit allows the use of 320 pounds of the pre-emergent herbicide atrazine on wheat to evaluate control of cheatgrass, kochid, mustard, pigweed, Russian thistle, wild lettuce, wild sunflower, and volunteer wheat during the fallow period of a wheat-fallow-wheat rotation. A total of 850 acres is involved. The program is authorized in the States of North Dakota and Montana; the States of South Dakota, Iowa, and Minnesota are authorized for shipping purposes only. The experimental use permit is effective from July 12, 1976, to July 12, 1977. A permanent tolerance for residues of the active ingredient in or on wheat has been established (40 CFR 180.220). This permit and the one above will use the same active ingredient, but different formulations.

Interested parties wishing to review the experimental use permits are referred to Room E–315, Registration Division (WH–567), Office of Pesticide Programs, EPA, 401 M St., SW., Washington, D.C. 20460. It is suggested that such interested persons call 202/755–4851 before visiting the EPA Headquarters Office, so that the appropriate permits may be made conveniently available for review purposes. These files will be available for inspection from 8:30 a.m. to 4:00 p.m. Monday through Friday.

U.S. DEPARTMENT OF AGRICULTURE

Issuance of Experimental Use Permits

Pursuant to section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), experimental use permits have been issued to the following applicants. Such permits are in accordance with, and subject to, the provisions of 40 CFR Part 172; Part 172 was published in the FEDERAL REGISTER on April 30, 1975 (40 FR 18780), and defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 27586–EUP–6. U.S. Department of Agriculture, Bozeman, Montana 59715. This experimental use permit allows the use of 2.5 tons formulated product of the microbial insecticide *Nosema locustae* (spores) on rangeland grass and hay to evaluate control of the Mormon cricket. The experimental use permit is effective from May 19, 1976, to May 19, 1977.

No. 27586–EUP–7. U.S. Department of Agriculture, Bozeman, Montana 59715. This experimental use permit allows the use of 2.5 tons formulated product of the microbial insecticide *Nosema locustae* (spores) on rangeland grass and hay to evaluate control of the Mormon cricket. A total of 3,250 acres is involved for both of these permits; the programs are authorized only in the States of Colorado and Utah. This experimental use permit is also effective from May 19, 1976, to May 19, 1977. The permits will use the same active ingredient, but different formulations.

Interested parties wishing to review the experimental use permits are referred to Room E–315, Registration Division (WH–567), Office of Pesticide Programs, EPA, 401 M St., SW, Washington, D.C. 20460. RECEIPT OF APPLICATION FOR PESTICIDE REGISTRATION

Data To Be Considered in Support of Applications

On November 19, 1973, the Environmental Protection Agency (EPA) published in the FEDERAL REGISTER (39 FR 31862) its interim policy with respect to the administration of section 3(c)(1)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended ("Interim Policy Statement"). On January 22, 1976, EPA published in the FEDERAL REGISTER a document entitled "Registration of a Pesticide Product—Consideration of Data by the Administrator in Support of an Application" (41 FR 3339). This document described the changes in the Agency's procedures for implementing section 3(c)(1)(D) of FIFRA, as set out in the Interim Policy Statement, which were effectuated by the enactment of the recent amendments to FIFRA on November 28, 1975 [Pub. L. 94–140], and the new regulations governing the registration and re-registration of pesticides which became effective on August 4, 1975 (40 CFR Part 162).

Pursuant to the procedures set forth in these FEDERAL REGISTER documents, EPA hereby gives notice of the applications for pesticide registration listed below. In some cases these applications have recently been received; in other cases, applications have been amended by the submission of additional supporting data, the election of a new method of support, or the submission of new "offer to pay" statements.

In the case of all applications, the labeling furnished by the applicant for the product will be available for inspection at the Environmental Protection Agency, Room 209, East Tower, 401 M Street, SW., Washington DC 20460. In the case of applications subject to the new section 3 regulations, and applications not subject to the new section 3 regulations which utilize either the 2(a) or 2(b) method of support specified in the Interim Policy Statement, all data citations submitted or referenced by the applicant in support of the application will be made available for inspection at the above address. This information (proposed labeling and, where applicable, data citations) will also be supplied by mail, upon request. However, such a request should be made only when circumstances make it inconvenient for the inspection to be made at the Agency offices.

Any person who (a) is or has been an applicant, (b) believes that data he developed and submitted to EPA on or after January 1, 1970, is being used to support an application described in this notice, (c) desires to assert a claim under section 3(c)(1)(D) for such use of his data, and (d) wishes to preserve his right to have the Administrator determine the amount of reasonable compensation to which he is entitled for such use of the data or the status of such data under Section 10 must notify the Administrator and the applicant named in the notice in the FEDERAL REGISTER of his claim by certified mail. Notification to the Administrator should be addressed to the Product Control Branch, Registration Division (WH–567), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW, Washington DC 20460. Every such claimant must include, at a minimum, the information listed in the Interim Policy Statement of November 19, 1973.

Specific questions concerning applications made to the Agency should be addressed to the designated Product Manager (PM), Registration Division (WH–567), Office of Pesticide Programs, at the above address, or by telephone as follows:

PM 11, 12, and 13—202/755–9315; PM 21 and 22—202/426–2454; PM 24—202/755–2196; PM 31—202/426–2635; PM 33—202/755–9041; PM 15, 16, and 17—202/426–9425; PM 23—202/755–1397; PM 25—202/755–7012; PM 32—202/426–9486; and PM 34—202/426–9490.

The Interim Policy Statement requires that claims for compensation be filed on or before October 26, 1976. With the exception of 2(c) applications not subject to the new section 3 regulations, and for which a sixty-day hold period for claims is provided, EPA will not delay any registration pending the assertion of claims for compensation or the determination of reasonable compensation. Inquiries and assertions that data relied upon are subject to protection under section 10 FIFRA, as amended, should be made on or before September 23, 1976.

Dated: August 16, 1976.

JOHN B. RITCH, Jr.,
Director, Registration Division.

APPLICATIONS RECEIVED (OPP—33000/449)

EPA Reg. No. 3125–102. Chemagro Agricultural Div., Mobay Chemical Corp., PO Box 4913, Kansas City MO 64120. GUTHION 2L EMULSIFIABLE INSECTICIDE. Active Ingredients: O,O-Dimethyl S-[4-oxo-1,2,3-benzotriazin-3(4*H*)-yl)methyl] phosphorodithioate 22.2%. Method of Support: Application proceeds under 2(a) of interim policy. PM12

EPA Reg. No. 3125–123. Chemagro Agricultural Div. GUTHION 8S. Active Ingredients: O,O-Dimethyl S-[(4-oxo-1,2,3-benzotriazin-3(4*H*)-yl)methyl] phosphorodithioate 22%. Method of Support: Application proceeds under 2(a) of interim policy. PM12

EPA Reg. No. 3125–193. Chemagro Agricultural Div. GUTHION 50% WETTABLE POWDER. Active Ingredients: O-O-Dimethyl S-[(4-oxo-1,2,3-benzotriazin-3(4*H*)-yl] phosphorodithioate 50%. Method of Support: Application proceeds under 2(a) of interim policy. PM12

EPA Reg. No. 3125–25. Chemagro Agricultural Div. GUTHION 25% WETTABLE POWDER CROP INSECTICIDE. Active Ingredients: O,O-Dimethyl S-[4-oxo-1,2,3-benzotriazin-3(4*H*)-yl)methyl] phosphorodithioate 25%. Method of Support: Application proceeds under 2(a) of interim policy. PM12

EPA Reg. No. 352–372. E. I. du Pont de Nemours & Co., Inc., Biochemicals Dept., 6054 Dupont Bldg., Wilmington DE 19898. VYDATE L OXAMYL INSECTICIDE/NEMATICIDE FOR USE ON NON-BEARING APPLE TREES Active Ingredients: Methyl N',N'-dimethyl-N-[(methylcarbamoyl)oxy]-1-thiooxamimidate 24%. Method of Support: Application proceeds under 2(a) of interim policy. Republished: Added use. PM12

EPA Reg. No. 352–370. E. I. du Pont de Nemours & Co., Inc. LANNATE L METHOMYL INSECTICIDE. Active Ingredients: Methomyl S-methyl N-[(methylcarbamoyl)oxy]-1-thiooxamimidate 20%. Method of Support: Application proceeds under 2(a) of interim policy. Republished: Added use. PM12

EPA Reg. No. 352–370. E. I. du Pont de Nemours & Co., Inc. LANNATE L METHOMYL INSECTICIDE FOR USE ON GREEN PEAS. Active Ingredients: Methomyl S-methyl N-[(methylcarbamoyl)oxy]thioacetimidate 24%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Added uses. PM12

EPA Reg. No. 352–354. E. I. du Pont de Nemours & Co., Inc. BENLATE BENOMYL FUNGICIDE. Active Ingredients: Benomyl (Methyl-1- (Butylcarbomoyl)-2-Benzimidazole-Carbamate) 50%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Added uses. PM22

EPA Reg. No. 352–354. E. I. du Pont de Nemours & Co., Inc. BENLATE BENOMYL FUNGICIDE. Active Ingredients: Benomyl (Methyl-1 (Butylcarbomoyl)-2-Benzimidazole-Carbamate) 50%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Added uses. PM22

EPA Reg. No. 352–342. E. I. du Pont de Nemours & Co., Inc. LANNATE METHOMYL INSECTICIDE FOR USE ON GREEN PEAS. Active Ingredients: Methomyl S-methyl N-[(methylcarbamoyl)oxy] thioacetimidate 90%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Added use. PM12

EPA Reg. No. 912–37. Farmers Union Central Exchange, Inc., PO Box G, St. Paul MN 55165. GREEN HOUSE DACTHAL G–2.5 GRANULES FOR LAWNS, ORNAMENTAL TURF, STRAWBERRY PLANTINGS, FLOWER & VEGETABLE GARDENS. Active Ingredients: Dimethyl ester of tetrachloroterephthalic acid 2.5%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA File Symbol 1457–AR. Fine Organics, Inc., A Subsidiary of Hexcel Corp., 205 Main St., Lodi NJ 07644. MYTAB. Active Ingredients: Tetradecyl trimethyl ammonium bromide 100%. Method of Support: Application proceeds under 2(c) of interim policy. PM31

EPA Reg. No. 279–2961. FMC Corp., Agricultural Chemical Div., 100 Niagara St., Middleport NY 14105. FERBAM 5 SULFUR 90 DUST FUNGICIDE. Active Ingredients: Ferbam 5.00%; Sulfur 90.00%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM21

EPA Reg. No. 2393–306. Hopkins Agricultural Chemical Co., Box 584, Madison WI 53701. 2,4–D AMINE WEEDKILLER. Active Ingredients: Dimethylamine Salt of 2,4-Dichlorophenoxyacetic Acid 49.4%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA File Symbol 2393–GGA. Hopkins Agricultural Chemical Co. 2,4-D AMINE WEED KILLER. Active Ingredients: Dimethylamine Salt of 2,4-Dichlorophenoxyacetic Acid 49.4%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 407–338. Imperial, Inc., PO Box 423, W. 6th & Grassy, Shenandoah IA 51601. GARDEN WEED PREVENTER WETTABLE POWDER CONTAINS DACTHAL. Active Ingredients: Dimethyl ester of tetrachloroterephthalic acid 75%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 407–284. Imperial, Inc. PRE-EMERGENCE HERBICIDE (2.5% DACTHAL GRANULES). Active Ingredients: Dimethyl ester of tetrachloroterephthalic acid 2.5%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 2342–770. Kerr-McGee Chemical Corp., Kerr-McGee Bldg., Oklahoma City OK 73102. FASCO METHOMYL-DUST-2 INSECTICIDE. Active Ingredients: Methomyl (S-methyl-N-[(methylcarbamoyl)oxy]-thioacetimidate) 2%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM12

EPA Reg. No. 1202–97. Puregro Co., 1052 W. 6th St., Los Angeles CA 90017. GAVAMINE D–40 WEED KILLER. Active Ingredients: Dimethylamine Salt of 2,4-Dichlorophenoxyacetic Acid 49.5%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 2126–53. Science Products Co., Inc., 5801 N. Tripp Ave., Chicago IL 60646. 50% METHOXYCHLOR WETTABLE POWDER. Active Ingredients: Methoxychlor, technical 50.0%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM13

APPLICATIONS RECEIVED (OPP–33000/450)

EPA Reg. No. 264–189. Amchem Products, Inc., Brookside Ave., Ambler PA 19002. SUPER D WEEDONE LAWN WEED CONTROL. Active Ingredients: Diethanol amine salt of 2,4-dichlorophenoxyacetic acid 20.3%; Diethanol amine salt of dicamba 1.9%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 4–210. Bonide Chemical Co., Inc., 2 Wurz Ave., Yorkville NY 13495. LAWN WEED KILLER (DUST). Active Ingredients: Triethanalamine Salt of 2,4-Dichlorophenoxyacetic Acid 8.35%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 4–114. Bonide Chemical Co., Inc. WEED & FEED. Active Ingredients: Triethanolamine salt of 2,4-Dichlorophenoxyacetic acid 1.6%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

RECEIPT OF APPLICATION FOR PESTICIDE REGISTRATION

Data To Be Considered in Support of Applications

On November 19, 1973, the Environmental Protection Agency (EPA) published in the FEDERAL REGISTER (39 FR 31862) its interim policy with respect to the administration of section 3(c) (1) (D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended ("Interim Policy Statement"). On January 22, 1976, EPA published in the FEDERAL REGISTER a document entitled "Registration of a Pesticide Product—Consideration of Data by the Administrator in Support of an Application" (41 FR 3339). This document described the changes in the Agency's procedures for implementing section 3(c)(1)(D) of FIFRA, as set out in the Interim Policy Statement, which were effectuated by the enactment of the recent amendments to FIFRA on November 28, 1975 (Pub. L. 94–140), and the new regulations governing the registration and re-registration of pesticides which became effective on August 4, 1975 (40 CFR Part 162).

Pursuant to the procedures set forth in these FEDERAL REGISTER documents, EPA hereby gives notice of the applications for pesticide registration listed below. In some cases these applications have recently been received; in other cases, applications have been amended by the submission of additional supporting data, the election of a new method of support, or the submission of new "offer to pay" statements.

In the case of all applications, the labeling furnished by the applicant for the product will be available for inspection at the Environmental Protection Agency, Room 209, East Tower, 401 M Street, S.W., Washington DC 20460. In the case of applications subject to the new Section 3 regulations, and applications not subject to the new Section 3 regulations which utilize either the 2(a) or 2(b) method of support specified in the Interim Policy Statement, all data citations submitted or referenced by the applicant in support of the application will be made available for inspection at the above address. This information (proposed labeling and, where applicable, data citations) will also be supplied by mail, upon request. However, such a request should be made only when circumstances make it inconvenient for the inspection to be made at the Agency offices.

Any person who (a) is or has been an applicant, (b) believes that data he developed and submitted to EPA on or after January 1, 1970, is being used to support an application described in this notice, (c) desires to assert a claim under section 3(c) (1) (D) for such use of his data, and (d) wishes to preserve his right to have the Administrator determine the amount of reasonable compensation to which he is entitled for such use of the data or the status of such data under section 10 must notify the Administrator and the applicant named in the notice in the FEDERAL REGISTER of his claim by certified mail. Notification to the Administrator should be addressed to the Product Control Branch, Registration Division (WH–567), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington DC 20460. Every such claimant must include, at a minimum, the information listed in the Interim Policy Statement of November 19, 1973.

Specific questions concerning applications made to the Agency should be addressed to the designated Product Manager (PM), Registration Division (WH–567), Office of Pesticide Programs, at the above address, or by telephone as follows:

PM 11, 12, and 13—202/755–2315; PM 21 and 22—202/426–2454; PM 24—202/755–2196; PM 31—202/426–2635; PM 33—202/755–9041; PM 15, 16, and 17—202/426–9425; PM 23—202/755–1397; PM 25—202/755–7012; PM 32—202/426–9486; and PM 34—202/426–9490.

The Interim Policy Statement requires that claims for compensation be filed on or before October 26, 1976. With the exception of 2(c) applications not subject to the new section 3 regulations, and for which a sixty-day hold period for claims is provided, EPA will not delay any registration pending the assertion of claims for compensation or the determination of reasonable compensation. Inquiries and assertions that data relied upon are subject to protection under section 10 of FIFRA, as amended, should be made on or before September 23, 1976.

Dated: August 16, 1976.

JOHN B. RITCH, JR.,
Director, Registration Division.

APPLICATIONS RECEIVED (OPP–33000/451)

EPA Reg. No. 2749–247. Aceto Chemical Co., Inc., Agricultural Chemicals Div., 126–02 Northern Blvd., Flushing NY 11368. BARBAN EC POST-EMERGENCE WILD OAT HERBICIDE. Active Ingredients: Barban (4-Chloro-2-Butyryl-M-Chloro - Carbanilate) 11.8%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM25

EPA File Symbol 33955–LUR. Acme Div., PBI-Gordon Corp., 300 South 3rd Street, Kansas City KS 66118. ACME DURSBAN GRANULAR INSECTICIDE. Active Ingredients: Chlorpyrifos (0,0-diethyl 0-(3,5,6-trichloro-2-pyridyl) phosphorothioate) 0.5%. Method of Support: Application proceeds under 2(b) of interim policy. PM12

EPA File Symbol 3051–72. AGCO Agricultural Products Co., Box 698, Mesquite NM. AGCO METHOMYL 2 INSECTICIDE DUST. Active Ingredients: S-methyl - N-[(methylcarbamoyl) oxy] thioacetimidate 2.00%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM12

EPA Reg. No. 3442–624. USS Agri-Chemicals, P.O. Box 1685, Atlanta GA 30301. USS VERTAGARD MCPP-2,4-D (AMINE SALT) BROADLEAF WEED KILLER. Active Ingredients: Diethanolamine salt of 2-(2-Methyl-4-chlorophenoxy) propionic acid 31.00%; Diethanolamine salt of 2,4-Dichlorophenoxyacetic acid 15.35%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 6308–77. The Ansul Co., P.O. Drawer 1165, Weslaco TX 78596. ANSAR 529 H.C. HERBICIDE WESTERN FORMULATION. Active Ingredients: Monosodium Acid Methanearsonate 47.65%. Method of Support: Application proceeds under 2(b) of interim policy. PM23

EPA Reg. No. 6308–60. The Ansul Co. ANSAR 170 H.C. HERBICIDE HIGH CONCENTRATE. Active Ingredients: Monosodium Acid Methanearsonate 58.39%. Method of Support: Application proceeds under 2(b) of interim policy. PM23

EPA Reg. No. 6308–29. The Ansul Co. ANSAR 529 H.C. HERBICIDE HIGH CONCENTRATE. Active Ingredients: Monosodium Acid Methanearsonate 47.74%. Method of Support: Application proceeds under 2(b) of interim policy. PM23

EPA Reg. No. 6308–20. The Ansul Co. PHYTAR 560 HERBICIDE. Active Ingredients: Sodium Cacodylate 22.73%; Dimethylarsininc Acid (Cacodylic Acid) 3.88%. Method of Support: Application proceeds under 2(b) of interim policy. Amendment: Added uses. PM23

EPA Reg. No. 10088–16. Athea Labs, Inc., 4180 N. First St., Milwaukee WI 53212. Active Ingredients: Dimethylamine Salt of 2,4-Dichlorophenoxyacetic Acid 24.5%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 5887–55. Black Leaf Products Co., 667 North State St., Elgin, IL 60120. Active Ingredients: Dimethylamine Salts of 2,4-Dichlorophenoxyacetic Acid 0.65%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 33313–3. Blakely-Wellgro, Inc., P.O. Box 26, Wellington CO 80549. TURF TONIC WEED AND FEED. Active Ingredients: Dimethylamine salts of 2,4-Dichlorophenoxyacetic Acid .67%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 5011–60. Carmel Chemical Corp., Box 406, Westfield IN 46074. FORMULA GH–18. Active Ingredients: Naled-1,2-Dibromo-2,2 dichloroethyl dimethyl phosphate 10%; Aromatic petroleum distillate 45%; Petroleum distillate 45%. Method of Support: Application proceeds under 2(b) of interim policy. PM16

EPA File Symbol 34895–G. Central Solvents & Chemicals Co., 2465 South 1100 West, Wood Cross UT 84087. Active Ingredients: Pine Oil 99.4%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Revised offer to pay statement submitted. PM32

EPA File Symbol 3125–148. Chemagro Agricultural Div., Mobay Chemical Corp., Box 4913, Kansas City MO 64120. Active Ingredients: fenthion 0,0-Dimethyl 0-(3-methyl-4-(methylthio) phenyl] phosphorothioate 93%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Method of Support changed from 2(a) to 2(b). PM15

EPA File Symbol 3125–277. Chemagro Agr. Div. SENCOR 50% WETTABLE POWDER HERBICIDE. Active Ingredients: 4-Amino-6-(1,1-dimethylethyl) -3-(methylthio) -1,2,4-triazin-5(4*H*) -one 50%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Revised Offer to Pay statement submitted. PM25

EPA Reg. No. 5569–70. Coastal Chemical Corp., PO Box 856, Greenville NC 27834. 2% METHOMYL INSECTICIDE DUST. Active Ingredients: Methomyl (S-methyl-N-[(methylcarbamoyl) oxy] thioacetimidate 2%. Method of Support: Application proceeds under 2(c) of interim policy. Republished: Revised offer to pay statement submitted. PM12

EPA Reg. No. 4715–304. Colorado International Corp., P.O. Box 7257, Denver CO 80207. BEST 4 SERVICE BRAND SURE DANDELION AND WEED KILLER. Active Ingredients: Dimethylamine Salt of 2,4-Dichlorophenoxyacetic Acid 24.0%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

V 41 165 AUG 24 76 UMI

EPA File Symbol 4643–EO. Dearborn Chemical Div., Chemed Corp., Lake Zurich IL 60047. DEARCIDE 716 OXIDIZING MICROBIOCIDE. Active Ingredients: Trichloro-S-Triazinetrione 25.00%; Potassium Peroxymonosulfate 22.90%; Potassium Bisulfate 9.35%. Method of Support: Application proceeds under 2(c) of interim policy. Republished: Revised offer to pay statement submitted. PM24

EPA Reg. No. 3772–28. Earl May Seed & Nursery Co., North Elm Street, Shenandoah IA 51630. EARL MAY GARDEN WEED PREVENTER. Active Ingredients: Dimethyl ester of tetrachloroterephthalic acid 2.5%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA File Symbol 3770–GEN. Economy Products Co., Inc., Box 427, Shenandoah IA 51601. GARDEN VEGETABLE AND FLORAL DUST. Active Ingredients: Malathion (o,o-dimethyl dithiophosphate of diethyl mercaptosuccinate) 5.00%; Methoxychlor, technical 5.00%; Captan: (N-(trichloromethyl) thio) -4-cyclohexene-1,2-dicarboximide) 5.00%. Method of Support: Application proceeds under 2(c) of interim policy. Republished: Revised offer to pay statement submitted. PM13

EPA Reg. No. 4816–428. FMC Corp., A.C.D., Industrial Sales Dept., 100 Niagara St., Middleport NY 14105. PYRENONE SPACE SPRAY. Active Ingredients: Pyrethrins 0.3% Piperonyl Butoxide; Technical 2.4%; Petroleum Distillate 97.3%. Method of Support: Application proceeds under 2(a) of interim policy. PM17

EPA File Symbol 36867–R. Henley and Co., Inc., 750 Third Ave., New York NY 10022. TRI-N-BUTYLTINOXIDE. Active Ingredients: Bis (Tri-n-Butyltin) Oxide 95%. Method of Support: Application proceeds under 2(b) of interim policy. PM24

EPA Reg. No. 4704–2. J. C. Ehrlich Chemical Co., Inc., 800 Hiesters Lane, Reading PA 19605. MAGIC CIRCLE RABBIT REPELLENT. Active Ingredients: Thiram (Tetramethylthiuram disulfide) 20%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM11

EPA File Symbol 32196–R. Kare Kemical, 148 Eagle Plaza, Opa Locka FL 33054. CONCENTRATED ALGICIDE. Active Ingredients: Alkyl Dimethyl Benzyl Ammonium Chloride (C14, 60%; C12, 25%; C16, 15%) 10%. Method of Support: Application proceeds under 2(b) of interim policy. PM24

EPA Reg. No. 8940–5. Lite Weight Products, Inc., 707 Funston Rd., Kansas City KS 66115. SUP–RO 5 WEED AND FEED. Active Ingredients: Dimethylamine 2,4-Dichlorophenoxyacetate 1.50%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM23

EPA Reg. No. 5204–16. M&T Chemicals Inc., Subsidiary of American Can Co., P.O. Box 1104, Rahway NJ 07065. BIOMET BLUE ANTIFOULING PAINT NO. 12122. Active Ingredients: Tributyltin fluoride 7.5%. RECEIPT OF APPLICATION FOR PESTICIDE REGISTRATION

Data To Be Considered in Support of Applications

On November 19, 1973, the Environmental Protection Agency (EPA) published in the FEDERAL REGISTER (39 FR 31862) its interim policy with respect to the administration of section 3(c)(1)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended ("Interim Policy Statement"). On January 22, 1976, EPA published in the FEDERAL REGISTER a document entitled "Registration of a Pesticide Product—Consideration of Data by the Administrator in Support of an Application" (41 FR 3339). This document described the changes in the Agency's procedures for implementing section 3(c)(1)(D) of FIFRA, as set out in the Interim Policy Statement, which were effectuated by the enactment of the recent amendments to FIFRA on November 28, 1975 [Pub. L. 94–140], and the new regulations governing the registration and re-registration of pesticides which became effective on August 4, 1975 (40 CFR Part 162).

Pursuant to the procedures set forth in these FEDERAL REGISTER documents, EPA hereby gives notice of the applications for pesticides registration listed below. In some cases these applications have recently been received; in other cases, applications have been amended by the submission of additional supporting data, the election of a new method of support, or the submission of new "offer to pay" statements.

In the case of all applications, the labeling furnished by the applicant for the product will be available for inspection at the Environmental Protection Agency, Room 209, East Tower, 401 M Street, S.W., Washington, D.C. 20460. In the case of applications subject to the new section 3 regulations, and applications not subject to the new section 3 regulations which utilize either the 2(a) or 2(b) method of support specified in the Interim Policy Statement, all data citations submitted or referenced by the applicant in support of the application will be made available for inspection at the above address. This information (proposed labeling and, where applicable, data citations) will also be supplied by mail, upon request. However, such a request should be made only when circumstances make it inconvenient for the inspection to be made at the Agency offices.

Any person who (a) is or has been an applicant, (b) believes that data he developed and submitted to EPA on or after January 1, 1970, is being used to support an application described in this notice, (c) desires to assert a claim under section 3(c)(1)(D) for such use of his data, and (d) wishes to preserve his right to have the Administrator determine the amount of reasonable compensation to which he is entitled for such use of the data or the status of such data under Section 10 must notify the Administrator and the applicant named in the notice in the FEDERAL REGISTER of his claim by certified mail. Notification to the Administrator should be addressed to the Product Control Branch, Registration Division (WH–567), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. S.W., Washington, D.C. 20460. Every such claimant must include, at a minimum, the information listed in the Interim Policy Statement of November 19, 1973.

Specific questions concerning applications made to the Agency should be addressed to the designated Product Manager (PM), Registration Division (WH–567), Office of Pesticide Programs, at the above address, or by telephone as follows:

PM 11, 12, and 13—202/755–9315; PM 21 and 22—202/426–2454; PM 24—202/755–2196; PM 31—202/426–2635; PM 33—202/755–9041; PM 15, 16 and 17—202/426–9425; PM 23—202/755–1397; PM 25—202/755–7012; PM 32—202/426–9486; and PM 34—202/426–9490.

The Interim Policy Statement requires that claims for compensation be filed on or before October 26, 1976. With the exception of 2(c) applications not subject to the new section 3 regulations, and for which a sixty-day hold period for claims is provided, EPA will not delay any registration pending the assertion of claims for compensation or the determination of reasonable compensation. Inquiries and assertions that data relied upon are subject to protection under section 10 of FIFRA, as amended, should be made on or before September 23, 1976.

Dated: August 16, 1976.

JOHN B. RITCH, JR.,
Director, Registration Division.

APPLICATIONS RECEIVED (OPP–33000/453)

EPA File Symbol 35988–R. Aerosol West, PO Box 5103, Ventura CA 93003. INSECTICIDE, AEROSOL RESMETHRIN—2%. Active Ingredients: (5-Benzyl-3-furyl) methyl 2,2-dimethyl- 3 -(2 - methylpropenyl) cyclopropanecarboxylate 2.00%. Method of Support: Application proceeds under 2(b) of interim policy. PM12

EPA File Symbol 39259–A. The Aluvis Co., 23996 Clawiter St., Hayward CA 94545. RAT–X ALL WEATHER RAT BAIT READY TO USE BLOCKS. Active Ingredients: Diphacinone (2-diphenylacetyl-1,3-indandione) 0.005%. Method of Support: Application proceeds under 2(b) of interim policy. PM11

EPA File Symbol 39259–L. The Aluvis Co. RAT–XW ALL WEATHER RAT BAIT READY TO USE BLOCKS. Active Ingredients: Warfarin [3-(a-acetonylbenzyl)-4-hydroxycoumarin] 0.025%. Method of Support: Application proceeds under 2(b) of interim policy. PM11

EPA File Symbol 39259–U. The Aluvis Co. RAT–XW FENCE BLOCK ALL WEATHER ROOF RAT BAIT READY TO USE BLOCKS. Active Ingredients: Warfarin [3-(a-acetonlbenzyl) -4-hydroxycoumarin] 0.025%. Method of Support: Application proceeds under 2(b) of interim policy. PM11

EPA File Symbol 39259–G. The Aluvis Co. RAT–XP ALL WEATHER RAT BAIT READY TO USE BLOCKS (SEWERS). Active Ingredients: Pival [2-Pivalyl-1,3-Inandione] 0.025%. Method of Support: Application proceeds under 2(b) of interim policy. PM11

EPA File Symbol 39259–R. The Aluvis Co. RAT–X FENCE BLOCK ALL WEATHER ROOF RAT BAIT READY TO USE BLOCKS. Active Ingredients: Diphacinone [2-diphenylacetyl-1,3-indandione] 0.005%. Method of Support: Application proceeds under 2(b) of interim policy. PM11

EPA Reg. No. 35378–6. Aqua Process Chemicals, PO Box 20155, Houston TX 77025. S–75 MICROBIOCIDE. Active Ingredients: 2-(Thiocyanomathylthio)-benzothiazole 8.-0%; 2-Hydroxypropylmethane-thiosulfonate 7.0% Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM33

EPA File Symbol 5734–T. Avril, Inc., 601 N. Third St., Reading PA 19601. AVRIL SWIMMING POOL ALGAECIDE. Active Ingredients: n-Alkyl (60% C14, 30% C16, 5% C12, 5% C18) dimethyl benzyl ammonium chlorides 5%; n-Alkyl (68% C12, 32% C14) dimethyl ethylbenzyl ammonium chlorides 5%. Method of Support: Application proceeds under 2(b) of interim policy. PM24

EPA Reg. No. 5887–97. Black Leaf Products Co., 667 N. State St., Elgin IL 60120. BLACK LEAF WEED PREVENTER. Active Ingredients: Dimethyl ester of tetrachloroterephthalic acid 5.0%. Method of Support: Application proceeds under 2(b) of interim policy. Application for reregistration. PM26

FEDERAL MARITIME COMMISSION

[FMC-142(a); (Rev. 3/74)]

MED-GULF CONFERENCE

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, within 20 days after publication of this notice in the FEDERAL REGISTER. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

MED-GULF CONFERENCE

Notice of Agreement Filed by:

Stanley O. Sher, Esquire, Billig, Sher & Jones, P.C., Suite 300, 2033 K Street, NW., Washington, D.C. 20006

Agreement No. 9522-27, among the members of the above-named conference, modifies the basic agreement by establishing a separate section for Puerto Rican tariff with exclusive jurisdiction over the tariff rules and regulations apropos to that section.

By Order of the Federal Maritime Commission.

Dated: August 19, 1976.

FRANCIS C. HURNEY,
Secretary.

FEDERAL POWER COMMISSION

[Docket No. RP68-16]

CITIES SERVICE GAS CO.

Filing of Releases

AUGUST 11, 1976.

Take notice that on June 28, 1976, Cities Service Gas Company (Cities) filed, pursuant to Paragraph (E) of the Commission's order issued on January 30, 1969, in this docket, copies of 22 releases received by Cities from its customers. In filing its refund report on November 8, 1975, in this docket, Cities noted that releases had not been received from 23 jurisdictional customers at the time of the report but that such releases would be filed with the Commission upon receipt.

Cities states that with the exception of the Town of Gate, Oklahoma (Gate), Cities has now supplied to the Commission copies of the releases from all customers which were mailed refunds on October 11, 1973. Gate, according to Cities, failed to negotiate two separate refund sheets mailed to it by Cities; Cities reduced Gate's May, 1976 bill by the amount of the refund in order to fulfill its refund obligation.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 27, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-24744 Filed 8-23-76;8:45 am]

FEDERAL RESERVE SYSTEM

CITIZENS NATIONAL CORP.

Formation of Bank Holding Company

Citizens National Corporation, Wisner, Nebraska, has applied for the Board's approval under 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 80 per cent (or more) of the voting shares of Citizens National Bank of Wisner, Wisner, Nebraska. The factors that are considered in acting on the application are set forth in 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received no later than September 17, 1976.

Board of Governors of the Federal Reserve System, August 18, 1976.

GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

GENERAL SERVICES ADMINISTRATION

PRIVACY ACT OF 1974

Corrections to Automated Data and Telecommunications Service (ADTS) Systems of Records

On August 27 and October 7, 1975, there were published in the FEDERAL REGISTER (40 FR 39185 and 46421) notices of systems of records pursuant to the provisions of the Privacy Act of 1974, Pub. L. 93-579, 5 U.S.C. 552a. Notice is hereby given that the General Services Administration proposes to revise and correct these systems of records to clarify the contents of the systems and their routine uses and to correct minor inaccuracies. The systems of records identified as GSA/ADTS 1, Classified Control Files; GSA/ADTS 3, Discretionary Supervisor Files; GSA/ADTS 5, Financial Management Files; and GSA/ADTS 6, Personnel Administrative Files, are revised to correct minor inaccuracies. GSA/ADTS 4, Emergency Notification Files, is revised to clarify the routine uses and correct minor inaccuracies; and GSA/ADTS 8. Key Personnel and Essential Residence Telephone Directory, is revised to change the system's name and to clarify the telephone listings contained in the system and the system's routine uses. None of the changes requires a new system report.

Any person interested in commenting on the additional routine uses contained in this notice may do so by submitting comments in writing to General Services Administration (BR), Washington, DC 20405. Comments must be submitted on or before September 23, 1976.

GSA/ADTS 1

System name: Classified Control Files, GSA/ADTS.

System location: Office of Telecommunications, Central Office and regional offices of ADTS at the addresses listed in the appendix following the GSA/ADTS notices.

Categories of individuals covered by the system: Employees of GSA, other Government agencies, and commercial corporations.

Categories of records in the system: Records are mantained in this nonautomated system for the purpose of ensuring control over access to classified information and facilities. Contains records such as: Security clearance levels, identificaiton credentials, registers, access authorizations, official courier/messenger designations, security officer appointments, files custodian lists, security briefings, and acknowledgments.

Authority for maintenance of the system: Executive Order 10450, April 27, 1953.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Maintaining and exchanging current information regarding authority of personnel to gain access to classified material or facilities. Documenting responsibilities of designated personnel to administer the overall security program. Used to verify clearance for access to classified material or facilities; to allow performance of maintenance and repair of classified communications equipment; and to verify authority to release, transport, and receive classified material, both inter and intra agency. Other routine uses are contained in the appendix following the GSA notices.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper files kept in safes or storage cabinets.

Retrievability: Filed alphabetically at each location by name of individual.

Safeguards: Buildings employ security guards. Storage containers are either locked or located in a limited access area.

Retention and disposal: Disposition of records shall be in accordance with the HB, GSA Records Maintenance and Disposition System (OAD P 1820.2).

Systems manager(s) and address: Chief, Secure and Emergency Commu-

V 41 165 AUG 24 76 UM

nications Branch, Office of Telecommunications, GS Building, 18th & F Streets, NW., Washington, DC; mailing address: General Service Administration (CTOS), Washington, DC 20405.

Notification procedure: Inquiries should be directed to the Chief, Secure and Emergency Communications Branch, at the above address or to the Director, Telecommunications Division, of the appropriate regional office at the address listed in the appendix following GSA/ADTS notices.

Record access procedures: Same individuals as above.

Contesting record procedures: GSA rules for access to records and for contesting the contents and appealing initial determinations are promulgated in 41 CFR Part 105–64, published in the FEDERAL REGISTER.

Record source categories: The individuals themselves, requests for clearance and/or access, and other security forms.

GSA/ADTS 3

System name: Discretionary Supervisor Files, GSA/ADTS

System location: Normal place of business of supervisor in either the GSA/ADTS Office or regional locations. The addresses are listed in the appendix following the GSA/ADTS notices.

Categories of individuals covered by the system: ADTS employees including those in intern, youth employment, and temporary status.

Categories of records in the system: Records are maintained in this nonautomated system at the complete discretion of the ADTS supervisor. Contains records such as personnel actions, training requests, performance appraisals, letters of commendation, citations, awards, job descriptions, accident reports, supervisor's assessment, career counseling, leave record, copies of warnings, grievances, reprimands, attendance, annotated organizational charts, selection brief, outside employment, and labor relations.

Authority for maintenance of the system: Title 5 U.S.C. Section 301.

Routine uses of records maintained in the system, including categories of users and the purpose of such uses: The routine uses of these records, as defined in 5 U.S.C. 552a(a)(7) and provided for in 5 U.S.C. 552a(b)(3), are described in the appendix following the GSA notices.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper files stored in metal lockable filing cabinets and metal lockable desk drawers.

Retrievability: Filed alphabetically at each location by name of individual.

Safeguards: Buildings employ security guards. Records are maintained in metal lockable filing cabinets or metal lockable desk drawers, with limited access.

Retention and disposal: Disposition of records shall be in accordance with the HB, GSA Records Maintenance and Disposition System (OAD P 1820.2).

Systems manager(s) and address: Executive Director, ADTS, GS Building, 18th & F Streets, NW., Washington, DC; mailing address: General Services Administration (CX), Washington, DC 20405.

Notification procedure: Inquiries should be directed to the individual's immediate supervisor. Any required additional assistance can be obtained from the system manager identified above, or the Regional Commissioner of the appropriate regional office at the address listed in the appendix following the GSA/ADTS notices.

Record access procedures: Same individuals as above.

Contesting record procedures: GSA rules for access to records and for contesting the contents and appealing initial determinations are promulgated in 41 CFR Part 105–64, published in the FEDERAL REGISTER.

Record source categories: The individuals themselves, personal observations of the supervisor, conversations, copies of documents prepared by the supervisor, and other employees.

GSA/ADTS 4

System name: Emergency Notification Files, GSA/ADTS.

System location: Central and Regional Offices of ADTS at the addresses listed in the appendix following the GSA/ADTS notices.

Categories of individuals covered by the system: GSA/ADTS Central Office and regional employees.

Categories of records in the system: Records are maintained in this nonautomated system for the purpose of notifying and identifying employees or their designees under emergency conditions. Contains records such as: employees name, address, position title, office phone number, and home phone number.

Authority for maintenance of the system: Title 5 U.S.C. Section 301.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Maintaining a current listing of Federal officials to be contacted during national disasters, contingency and emergency situations; and providing this information, as necessary, in disasters or public or personal emergencies, to concerned agencies, telephone companies, telecommunications common carriers, civil defense, and other activities and individuals involved in the emergency or relief effort. Contacting officials in support of Federal Emergency Plan D and NCS Plan for Communications Support in major disasters and emergencies. Other routine uses are contained in the appendix following the GSA Notices.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper files kept in safes or storage cabinets.

Retrievability: Filed alphabetically at each location by name of individual.

Safeguards: Buildings employ security guards. Storage containers are either locked or located in a limited access area. Information is released only to authorized officials.

Retention and disposal: Disposition of records shall be in accordance with the HB, GSA Records Maintenance and Disposition System (OAD P 1820.2).

System manager(s) and address: Chief, Secure and Emergency Communications Branch, Office of Telecommunications, GS Building, 18th & F Streets, NW., Washington, DC; mailing address: General Services Administration (CTOS), Washington, DC 20405.

Notification procedure: Inquiries should be directed to the system manager identified above or to the Director, Telecommunications Division, at the regional office at the address listed in the appendix following the GSA/ADTS notices.

Record access procedures: Same individuals as above.

Contesting record procedures: GSA rules for access to records and for contesting the contents and appealing initial determinations are promulgated in 41 CFR Part 105–64, published in the FEDERAL REGISTER.

Record source categories: The individuals themselves, their supervisors, emergency listings, disaster plans, and personnel files.

GSA/ADTS 5

System name: Financial Management Files, GSA/ADTS.

System location: Financial Management Division, ADTS, at the Central Office and in the offices of the ADTS Commissioners and Telecommunications Division Directors in the regional offices at the address listed in the appendix following the GSA/ADTS notices.

Categories of individuals covered by the system: GSA/ADTS Central Office and regional employees.

Categories of records in the system: Records are maintained in both paper and automated form for the purpose of financial management. Contains information on financial projections for short and long range planning, preparation of annual financial plans, monthly and quarterly analysis of operation funds, and verifying accounting reports. Contains records such as: Travel logs, transportation requests, claims, vouchers, within grade notices, pay changes, operator cost data, credit cards, requisitions, overtime requests, operating plans, time and attendance files, payroll, commercial call certifications, employment staffing, retirement eligibility, and manpower and payroll statistics.

Authority for maintenance of the system: Title 31 U.S.C. Sections 66a and 66b.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: The routine uses of the records, as defined in 5 U.S.C. 552(a)(7) and provided for in 5 U.S.C. 552(b)(3), are described in the appendix following the GSA notices.

Polices and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper files are kept in storage containers. Magnetic tapes are filed in a tape library.

Retrievability: Filed alphabetically at each location by name of individual.

Safeguards: Buildings employ security guards. Records containing personal information are maintained in metal lockable filing cabinets or metal lockable desk drawers, with limited access. Tapes and other records are located in a limited access area.

Retention and disposal: Disposition of records shall be in accordance with the HB, GSA Records Maintenance and Disposition System (OAD P 1820.2).

System manager(s) and address: Executive Director, ADTS, GS Building, 18th & F Streets, NW., Washington, DC; mailing address: General Service Administration (CX), Washington, DC 20405.

Notification procedure: Inquiries should be addressed to the system manager identified above or to the Regional Commissioner of the appropriate regional office at the address listed in the appendix following the GSA/ADTS notices.

Record access procedures: Same individual as above.

Contesting record procedures: GSA rules for access to records and for contesting the contents and appealing initial determinations are promulgated in 41 CFR Part 105–64, published in the FEDERAL REGISTER.

Record source categories: Telephone Inventory Accounting System and individuals submitting the various types of claims, vouchers, and requests.

GSA/ADTS 6

System name: Personnel Administrative Files, GSA/ADTS.

System location: Central Office and regional offices of ADTS at the addresses listed in the appendix following GSA/ADTS notices.

Categories of individuals covered by the system: GSA, ADTS, Central Office and regional employees.

Categories of records in the system: Records are maintained in this nonautomated system for the purpose of administering personnel matters in the ADTS Central Office and regions. Contains annotated organizational charts, training, duty and leave schedules, travel requests, authorizations, reprimands, warnings, vouchers, appraisals, position descriptions, biographic and career information, suggestions, details, personnel actions, grievance and appeal files, EEO files, personnel ceiling control, licenses, awards, essential residence telephone service listing, skill directory, trainee and intern files, property receipts, rosters, locators, job applications, and surveys.

Authority for maintenance of the system: Title 5 U.S.C. Section 301.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Action taken with Civil Service Commission or pending on grievances, reprimands, warnings, suggestions, etc. Other routine uses are described in the appendix following the GSA notices.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper files kept in metal lockable filing cabinets or metal lockable desk drawers.

Retrievability: Filed alphabetically at each location by name of individual.

Safeguards: Buildings employ security guards. Records maintained in metal lockable filing cabinets or metal lockable desk drawers, with limited access.

Retention and disposal: Disposition of records shall be in accordance with the HB, GSA Records Maintenance and Disposition System (OAD P 1820.2).

System manager(s) and address: Executive Director, ADTS, GS Building, 18th & F Streets, NW., Washington, DC; mailing address: General Service Administration (CX), Washington, DC 20405.

Notification procedure: Inquiries should be directed to the employee's immediate supervisor. Any additional assistance can be obtained from the system manager identified above, or the Regional Commissioner of the appropriate regional office at the address listed in the appendix following the GSA/ADTS notices.

Record access procedures: Same individuals as above.

Contesting record procedures: GSA rules for access to records and for contesting the contents and appealing initial determinations are promulgated in 41 CFR Part 105–64, published in the FEDERAL REGISTER.

Record source categories: The individuals themselves, their supervisors, and from other ADTS employees.

GSA/ADTS 8

System name: Special Purpose Telephone Contact Listings, GSA/ADTS.

System location: GSA/ADTS Regional Telecommunications Offices and GSA operated switchboards within the ten GSA regions and the FTS Central Information Service and Emergency Poison Control listings at GSA, ADTS Region 3. See Appendix GSA/ADTS Address of Locations following the GSA/ADTS notices.

Categories of individuals covered by the system: Federal agency personnel as designated by the Federal agencies.

Categories of records in the system: Includes listings such as Key Personnel and Essential Residence Telephone Listing for the purpose of identifying essential residential telephone service to designated key officials in time of emergency; FTS Central Information Service for the purpose of contacting key officials for necessary day-to-day operations and in emergency situations; Emergency Poison Control Listings for the purpose of providing emergency medical assistance; and other listings of key officials for the purpose of day-to-day operations and emergencies. These listings may include name, position, title, office address, office telephone number, home address, and/or home telephone number.

Authority for maintenance of the system: The Federal Property and Administrative Services Act of 1949, 63 Stat. 377, as amended.

Routine uses of records maintained in the system, including categories of users and the purpose of such uses: The routine uses of these records, as defined in 5 U.S.C. 552a(a)(7) and provided for in 5 U.S.C. 552a(b)(3), shall include: (1) The transfer to GSA of the above described information from the Federal agency responsible for collecting the information for inclusion in the GSA-maintained nationwide central information service and in regional listings of Federal personnel designated as key personnel or points of contact; (Personal information; i.e., home address or telephone number, will not be disclosed to a caller. The GSA switchboard operator will either "patch" the call through to the subject, or will notify the subject that a call has been made to him for callback purposes.) (2) the transfer of designated essential residence information (and deletions from such list) in the regions to the appropriate telephone companies to provide emergency line load control pursuant to 41 CFR 101–35.6; and (3) those routine uses described in the appendix following the GSA notices.

Policies and practices for storing, retrieving, processing, retaining, and disposing of records in the system:

Storage: Paper, tapes, and/or cards.

Retrievability: Indexed by name and/or agency.

Safeguards: Limited access areas and records are accessible only to authorized personnel of GSA.

Retention and disposal: Maintained until rescinded by authorized agency.

System manager(s) and address: The officials responsible for the telephone contact listings are: (1) Central Information Service and Emergency Poison Control: Regional Director, Telecommunications Division, Region 3; (2) Regional listings: Regional Director, Telecommunications Division, in the appropriate region. The addresses of the responsible officials are listed in the appendix following the GSA/ADTS notices.

Notification procedures: Information may be obtained from the officials listed above.

Record access procedures: Same individuals as above.

Contesting record procedures: GSA rules for access to systems of records, contesting the contents of a system of records, and appealing initial determinations are promulgated in 41 CFR Part 105–64, published in the FEDERAL REGISTER.

Record source categories: Information provided by Federal agencies and subject individuals.

Dated at Washington, D.C., on August 13, 1976.

G. C. GARDNER,
Director of Administration.

PUBLIC PROGRAMS PANEL ADVISORY COMMITTEE

Meeting

AUGUST 6, 1976.

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463) notice is hereby given that a meeting of the Public Programs Panel will meet at Washington, D.C. on September 20 and 21, 1976, commencing at 9:30 a.m., in Room 1130 at 806 15th Street, N.W.

The purpose of the meeting is to review Humanities Media Grant proposals that have been submitted to the Endowment for possible grant funding.

Because the proposed meeting will consider financial information and personnel and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Chairman's Declaration of Authority to Close Advisory Committee Meetings, dated August 13, 1973, I have determined that the meeting would fall within exemptions (4) and (6) of 5 U.S.C. 552(b) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with operation of the Committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Mr. John W. Jordan, 806 15th Street, N.W., Washington, D.C. 20506, or call Area Code 202-382-2031.

JOHN W. JORDAN,
Advisory Committee Management Officer.
